Four Wise Men Give Good Advice On How To Live

Dr. Butler Says You Can Do 12 Months Work in 10, Not 12

Do you want to live to be useful and effective, after 80?

Then consider these tips from four wise old men:

Dr. Nicholas Murray Butler, President of Columbia University, credits his effectiveness at 80 to a program he follows faithfully. It was given him by a physician after hard work left the educator in his early thirties.

J.B.R.'S INITIALS on the napkin of this breakfast tray readily tell for whom the breakfast is intended, but take a look in the right-hand corner of the tray and you'll see a disc bearing F.A., the President's initials.

Insect and Disease Control for the Victory Garden

By JACK C. RUSSELL

Many of the Spring vegetable crops in this part of the state require continuous close observation and an occasional insecticide application for protection against the ravages of the ever increasing insect pests. The importance of close daily observation to detect insect infestations cannot be over emphasized.

PINNING THE SILVER STAR on Chaslon Leon R. Corlaine, of New Boston, Tex., is Lieut. Gen. George B. Patton, Jr., U.S. commander of armored force units in Tunisia. The chapter was decorated for gallantry in the field while under the command of Patton.

James A. Edison Is Promoted To Lieutenant Jg

Chief Aviation Pilot Has Had Many Unique Experiences

James A. (Eddie) Edison, stationed at the Sanford Naval Air Station, until recently a Chief Aviation Pilot, has been commissioned lieutenant jg.

Edison has had extensive experience in flying, including a flight from Bermuda to Glasgow, flying a Consolidated P.B.Y. biplane. He has covered only half of the 4,400 miles that he had to make the rest of the journey with only the engine to keep the plane level. His fastest time on this run was 22 hours and 10 minutes.

How Many Kinds Of Insurance? One and no more, your insurance should be nearly as broad and recognized as you. Are you getting the best? Don't be sure to talk to us about completely protecting your property, your person.

CHILD BUD WORMS

There are several species of caterpillars that feed in buds of growing corn before hatching.

CONTROL

If only an occasional plant is infested they may be controlled by pulling the suspicious plants, or by pulling and collecting by hand.

CUTWORMS

This insect is again mentioned because they sometimes consume large areas of leaf surface on many vegetable plants, especially after the plant has made considerable growth.

TOMATO HORN WORM

When mature this caterpillar is about three inches long, bright green in color and has a red horn on the posterior extremity.

CONTROL

There are several species of caterpillars that attack turnips, mustard, leafy greens, etc. during the Spring and summer months.

CONTROL
