## FIRST APPEARANCE OF SANFORD HIGH ELEVEN AT LOCAL PARK WILL BE AGAINST NEW SMYRNA

Two Teams Will Clash New Smyrna on Saturday prepared At Atlantic Field conder; n the local eleven await the Saturday After- result of this game before indulging in any more knocking.

## Team Looks Better hold down the signal position. He has gained more confidence in his For Coming Fracas new position and has perfected several new plays which are ex-

Teams Will Present termining

Sanford High, after two over-belming defeats, meets New

myrna Saturday, Philosophers, scientists and even pessimists agree that the worm will, when sufficiently pushed, turn suimists agree that the worm and although the worm is generally considered a rather spincless creature of the the earth, it sometimes turns hard enough to upset things, including football dope.

We are not likening the fighting Sanford gridders to worms of the earth by any means, but we are attributing to them that most admirable quality possessed by some favored worms; the ability. the courage and the determination to turn and tear things up.

Alibis have no place in sporting circles, and it is not our intention to deal with them. We prefer to cave an untouched supply of them for the New Smyrna aggregation, for we believe that they, and not will need them on Saturday after the referee's final whistle ends a game that will, in our opinon, mark the turning of the my thical worm.

What we are dealing in is cold, hard indubitable facts, and in reviewing Sanford's recent defents those who are unpatriotic enough to indulge in adverse criticians of the guittiest little team that ever trotted out upon a gridion should, in all fairness, recall the initial game of the season, when Sanford downed Palatka in a pouring rain. Sanford was outweighed appre

ciably and in many other ways bandicapped yet the locals outfought and outplayed their opponents in every quarter.

The following Saturday Sanford went up against Bartow, undoubt edly one of the two strongest High coached by Hoyt Carlton, one of the finest conches in the south.

Plying experienced apponents almost twice their size, is it any wonder that a small, light team lacking in practically everything that is essential to victory except fight and the determination to win. should go down in defeat

And this game had a most important bearing on last Friday's defeat at Plant City for during the Bartow mix-up many of San ford's best men, including Captain Peck, were injured and prevented from playing against the Planter-Following a week of successful workouts and strennous skull practice, Sanford goes to battle with Innergonal and an annual and bank of the san and an annual an annual and an annual an an

noon at 3 O'Clock Byrd, the stocky little quarter who showed up so well against the Planters last Friday, will again pected to play a large part in determining the result of Saturday's

Strong Line - Ups; Melsch, the hard driving, elusive runner, will again be at the full-Locals Have Edge back position, and with Thompson or Christenberry at right half and Barber at left, Sanford will go into the fray with a strong offensive

> With Greer and Wallace at the tackle positions, and Russell and Kennedy as guards, Sanford's line is expected to offer a stonewall opposition to the plunging New Smyrna backs, and Coaches Huit and Welcher believe that it will have no great difficulty in opening up holes in the visitors' line.

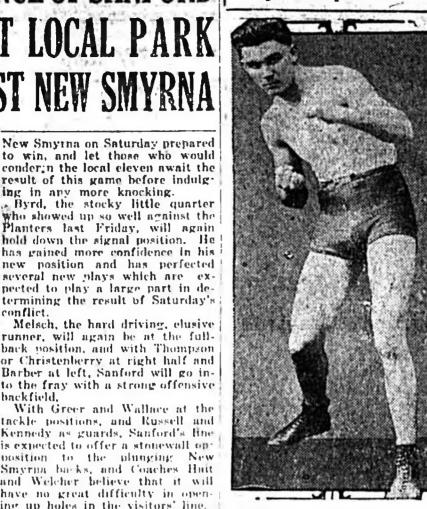

Whitfield and Wilson will hold down the wing positions, and it is hoped that these two players will show a much better brand of footin last Friday's conflict, when they repeatedly allowed the Plant City backs to skirt their ends for considerable gains.

Time after time they were sucked in on trick plays, and the local mentors have labored all week in an attempt to improve their style

Spurred on by the hope and confidence of their classmates and the lack of faith on the part of many of Sanford's citizens who should be supporting them, the Sanford players will trot upon the field Saturday inbued with a spirit that will make their defeat all but impossible, and the Sanford High students are already planning a program for the celebration of the

# New Type of Car Still Automobile World

It is an open car one moment and 30 seconds later same car is entirely enclosed. Studebaker Duplex ends need of hunting for side curtains in the dark and storm

A new type of car has stirred the automobile world sides and back; hardwood front. Steel, U-shapel as has nothing since the abandonment of the "brewy". style of body building.

It is the Studebaker Duplex, so called to indicate that it is an open car one moment, and 30 seconds later it is an enclosed car.

Like all great advances in the industrial arts, it is "so simple in operation, it is a wonder it wasn't thought of before" ---

Particularly since its need has been growing, year by year, ever since automobiles were made.

Many people all of the time, and most people part of the time, want an open car-to bring to their riding the fresh crispness of the country air, and a free and untrammeled association with the great outdoors.

Yet for these same people, the snug comfort of the closed car, shutting out the storm and the wind and the cold, has been at times a necessity.

### Two cars in one

The Studebaker Duplex is Joth cars in one. Just pull down the roller enclosures concealed in the roof of the car. In 30 seconds the open car has been made an enclosed car.

No hurried efforts to put up curtains; no hunting for the right one while the storm beats in; no mixing them up in the da. c; no exposure through holes torn in them while trying to obtain, for the emergency, the protection given by a closed car - - -

Just pull down the roller enclosures giving instant enclosed car effect.

The body is built substantially - sides, corners and roof frame are of steel. The roof has curved steel

cross beams, six of them, support the waterproofs duplex fabric top and its linings. Here is permanent beauty, no sagging tops. But Studebaker, on which the whole vehicle-using

world has come to depend for reliability, would not rest on only one real contribution to the value given the public.

It must give all that engineering ability could devise.

## Striking new features

So there are offered three distinct models of cars, to meet each of the three fields of demand-the Standard Six, with 113-inch wheelbase and 50 horsepower motor; the Special Six, with 120-inch wheelbase and 65 horsepower motor; the Big Six, most magnificent and luxurious of its products with 127-inch wheelbase and 75 horsepower motor.

Duplex bodies are available on each line. In addition, closed models have workmanship and materials and beauty of line so far above the price class of the car, they must be seen to be appreciated.

Of scarcely less importance than the Duplex feeture are other improvements such as, automatic ignition system, lighting control on the steering wheel, new location of emergency brake, improved one-piece windshield and many others.

The body lines, steering mechanism, and even the fenders of the new Studebaker were designed cape cially for genuine balloon tires. Thus the body lines harmonize with grace and beauty hitherto unattained, even by Studebaker.

Come in and see these new cars.

## At Exactly Open Car Cost

Seminole Hudson-Essex Co.

You pay exactly open ear cost for the all-year comforts of the Coach. Hudson alone can build it. As the largest builder of 6-cylinder closed cars in the world, Hudson exclusively holds the advantages to produce this car and this price.

It creates the one important buying issue today. For no one who knows closed car comforts will be saxisfied with an open car, with one-season utility, and diminishing resale value.

Thot is why the Coach outsells all rivals. Its leadership is not even challenged.

Everyone knows it provides highest closed car value. Hudson invented the Coach and its development and experience make its value exclusive. And even more important in your permanent enjoyment of the Coach, is the

famous Super-Six chassis with performance distinction and long lasting reliability not excelled by any car regardless of cost.
