There is plenty of soap in Mianni, and probably almost everywhere alse in the country. One store advertises "1,470 Cases of Soap Just Heceived"; another. OPA price ceilings held the price of soap down, but there were no ceilings on the ingredients. So soap yirtually disappeared from the markets. Now you can get it, but as is always the case sooner or later, you have to pay for L.

The Picket Line

As this new economic era unfolds, it seems to run! largely to picket liffes. Here is something rather new to our own country and the world in general. It may be important enough to qualify as a new era in civilization. The nature of the era and its possible effect on the world are worth considering by anybody seriously interested in the future of his children and grandchildren.

In previous eras, the main purpose of mankind has been to make a living, get ahead and accumulate enough skill and property to make himself and his family confortable. Latterly this has been easier than in any former generation, because of the great development of labor-, saving machinery and the more rapid means of production All oblivery notices, cards of and distribution of goods and services.
