Super Loud Rock Music

Is A Health Hazard

CALIFORNIA, Pa. (AP) - Super-loud rock music is a health hazard and may be illegal under certain conditions, according to safety consultant Randall Davidson, who heads a private firm here called the International Safety Institute. He says he has measured the sound levels at hundreds of nightclubs and discotheques across the country, where he says bands often play at a decibel level between the rumble of a subway train and the roar of a jet plane at takeoff. In numbers, that comes out above the allowable limit of 115 decibels for 15 minutes specified under the federal Occupational Safety and Health Standards Act of 1970, he says.

Nudists 'Accept' Youngster

NEW RIVER, Ariz. (AP) - Nine-year-old Terry Bruhn, suffering pain and disfigurement from leukemia, has found acceptance among other residents of a nudist colony here. "Nude people accept you for what you are," said Terry's mother, Mrs. Dallas Bruhn, 32. "Like when Terry's hair, came out-they couldn't care less about Terry's hair. But when you go out on the outside, people just stare." Terry, thin but alert, is losing her hearing and eyesight. She knows she is dying from acute myeloblastic leukemia. "I won't be here for my birthday (June 1) because I am going to die," she said.

Murphy Backer Convicted

SAN DIEGO (AP) - C. Arnholt Smith, once a powerful banker and backer of Republican causes, has been convicted of two counts of instigating illegal campaign contributions to former California Republican Sen. George Murphy. The offenses are misdemeanors. He could be fined \$5,000 on each. The six-man, six-woman jury which convicted Smith Thursday failed to reach a verdict on two other counts involving alleged corporate contributions to former President Richard M. Nixon's

Tax Cut Passage Imminent

WASHINGTON (AP) - The Senate is on the verge of passing a \$30-billion tax cut bill designed to stimulate the economy while providing some immediate and long-term tax relief to most American families. After removing parliamentary roadblocks and voting higher taxes on major oil companies, the Senate aimed to pass the bill today. That would allow a Senate-House conference to work out final details of the bill and have it sent to President Ford for his signature by Wednesday.

Dairy Prices To Increase

WASHINGTON (AP) - Acting with unusual haste, the Senate Agriculture Committee is expected to approve with few changes a House-passed farm bill that could raise the prices of dairy products by \$495 million within a year. The Senate panel is expected to consider the measure today, less than 24 hours after it won approval in the House. A committee spokesman, however, said the full Senate was unlikely to take up the measure until after

Machine To Catch Smugglers

WASHINGTON (AP) - The government is developing a new electronic device for U.S. Border Patrol agents to detect persons being smuggled into the country inside cars or trucks. The machine operates on the same principle used to monitor earthquakes. It is activated by air wave vibrations created by slight muscular movements. including heart beats and the involuntary muscular action of the digestive tract.

Lon Nol May Step Down

WASHINGTON (AP) - Diplomatic reports are cir-culating persistently that Cambodian President Lon Nol will step down within the next two weeks and board an aircraft for an unspecified destination abroad. According to diplomatic sources here, leaders of the insurgent Khmer Rouge would be invited to enter Phnom Penh and form a new government after Lon Nol left the country.

PSC Okays Fuel Adjustment

For Three Power Firms

TALLAHASSEE, Fla. (AP) - The Public Service Commission has approved higher fuel adjustment charges for three of the four major electric utilities in Florida Two of the requests were trimmed.

Florida Power Corp. of St. Petersburg, which has the highest fuel-adjustment charge among the big four, was the only exception to the higher rates granted Thursday. The April charge a Florida Power customer who used 1,000 kilowatt hours a month was set at \$14.25, compared

with \$14.44 in March. For Florida Power & Light Co. of Miami, the charge will increase to \$5.75 from \$5.33 in March.

The increase for Tampa Electric Co. will be to \$5.61 from \$5.15. The charge for customers of Gulf Power Co. in Pensacola goes from \$6.04 to \$7.00.

Election Date Set

TALLAHASSEE, Fla. (AP) - All municipal and nonpartisan elections, including the election of judges, should be held at the same time in odd-numbered years, says an election-reform group appointed by Secretary of State Bruce Smathers. The proposal would mean holding all city elections on

the same day. They are now scattered through the late winter and spring. It also would mean that judicial elections would be

moved from primary day in even-numbered years when top state officials and legislators are nominated. Committee members said at their meeting Thursday that the change should increase interest in the city elections and reduce the size of the ballot in even-year elections.

Farm Prices Supports Poor

Just as a drop in the cost of farm products begins to reduce the wholesale price index, the House Agriculture Committee approves an emergency increase in farm price supports. Correct us if we're wrong but this seems to us

to be inflationary. How can we ever whip inflation if the Congress steps in whenever prices start going down and starts propping them back up again?

It is estimated that proposals to increase farm price supports could cost taxpayers about \$1 billion in the coming year. That is just the direct cost to the government. The indirect cost to consumers could be much more because they would be denied the savings they otherwise would enjoy by virtue of lower prices in the marketplace.

Most (over \$700 million) of the direct cost increase would come from guaranteeing cotton growers a return well over the expected market price. The law of supply and demand has hit cotton prices because people around the world are economizing on purchases of clothing. If nothing is done, many cotton planters may turn to other crops, such as grain. Grain prices could fall. That might make cattle feeding profitable again, even with lower meat prices.

But no, Congress won't let the free market have its way. Instead the props will be quickly moved into place under cotton prices and the government will guarantee that cotton farmers will make a profit on their new plantings.

Farm price supports may have served a purpose during the great depression of the 1930s. That depression started on our farms in the 1920s. But times change.

There no longer is any real danger of overproduction of food and fiber on American farms only a danger of distorting the free market so that producers and consumers are deprived of the economic benefits of our great agricultural productivity.

The self-reliant American farmer will be better off in the long run if he gets out of the Socialistic soup line right now. And the American consumer will be better cff too.

Filibuster Is Fair

The Senate of the United States of America has been called the world's greatest deliberative body, and with good cause. It has a great tradition for long thorough debate over matters of substantial significance to the nation and the world. It is a tradition which should be preserved.

Senators are mistaken if they vote to make it easier for the Senate to invoke "cloture"-a limitation on debate-believing that they are ending obstruction. Actually, they are encouraging a type of tyranny of the majority to which U. S. Ambassador John Scali objected so vigorously recentlyinthe United Nations. They are casting aside one more protection against

steamrolling of our Constitutional process. The filibuster of itself, is not an unfair weapon used to obstruct progress. It is a parliamentary tool designed to en-courage adequate consideration of significant changes in the laws of the United States. The longest filibuster speech in Senate history was made by a conservative, Strom Thurmond of South Carolina. The second largest was made by a liberal, Wayne Morse of Oregon.

Recently, Senate liberals used the filibuster to defeat a strong antibusing bill while conservatives used it to stop a Consumer Protection Agency bill. Thus, it is used by all segments of the political spectrum and assures the minority is heard - and that is what the republican form of government is

WASEINGTON - (NEA) - The United States does have some gut issues in Vietnam. The offshore waters reportedly have major reserves of oil. The South, at peace, has food to spare for export. Both are crucial in the free world. The South Vietnamese are an intelligent, hardworking people capable of making important contributions, especially with the educational resources this country has pumped into that small land.

But Vietnam is important to the United States for a far different reason. We have, consistently, whether in Europe, the Middle East or Asia, attempted to insure that no country take over another by force. We fought to prevent Hitler's invasion of China and Indochina. We blocked Britain, France and Israel when they united to nvade Egypt during the Suez Canal crisis.

For that same principle, many Americans want to make certain Israel does not go under or that it permanently retain parts of Egypt, Syria and Jordan. It is not that this tiny country is of strategic importance to the United States. Our economic interests obviously are much more closely tied with Arab lands, where we also have historical ties. But for reasons outlined above, it is in our interest to work for the military security of both Israel and the Arab nations, even those we regard as unfriendly. Otherwise we live in a jungle

> DON OAKLEY Responsibility And Crime **Big Issue**

john spolski

The schools, the communications media and the business community should be forced to share legal responsibility for the antisocial and criminal behavior of youth, says a critic. According to John Lyon, writing in U.S.

Catholic magazine, society unfairly forces families to bear the legal burden of responsibility for adolescent behavior "when agencies outside the home have had a decisive role in shaping the character and behavior patterns of

While acknowledging that the chief responsibility is with parents, it is hard to imagine, he says, that "drug use, shoplifting, larceny and felonious behavior would be taught - or learned - in most homes.

From another quarter, two researchers charge that sociologists are suffering from a "person - blame" bias - the tendency to hold individuals, rather than the system, responsible for the individual's problems.

"If we view delinquents as persons who follow extralegal paths to socially valued goals when the conventionally approved paths are barred to them, we would advocate system - change remedies," say Nathan Caplan and Stephen D. Complaints against department stores were up Nelson of the University of Michigan.

There is, of course, a lot of truth in these arguments. Every parent is aware of how much more powerful the influence of outside factors, especially peer-group pressures, is on their children than values taught in the home - if values are taught in the home. And young people who run afoul of the law have in all too many Not even the complaints, however, give an cases known nothing but blame and failure in accurate picture of the bunkum consumers must their lives.

> But the trouble with this kind of reasoning is hat if the individual is not, at some point, to be held responsible for his bad behavior, if it is always society's fault, the "system's" fault, then neither is the individual to be praised for his good behavior.

If those who "follow extralegal paths million vehicles were recalled between 1967 and socially valued goals" are to be held blameless because the legal paths are barred to them, then those who do follow the legal paths can take no credit for their achievements.

In other words, if it is the "system's" failure in the one case, then logically it should be called the 'system's" success in the other.

A not-so-funny thing has been happening on the way to a more perfect society. We hear everything about individual rights, but nothing about individual responsibilities. Yet crime, delinquence and antisocial behavior grow steadily more prevalent.

In our emphasis on what society owes to inportant national interest in Vietnam, Cambodia, says the 3.3 average for this nation is only a third snapping clerks, cranky telephone operators, dividuals owe society, we actually depreciate the bullying cops. (Eph.

Not everyone who says he loves Christ loves the church. Many have made the statement, "The church doesn't smatter; one's relationship to Christ is all that counts." In this age of anti-institutionalism, such a statement may seem elementary.

However if the Bible is to be believed, the church does 5:25). If He thought the church 4:20). It might be added that he a worth dying for, how dare we who does not love the local

Some may say, "I'm a member of the church universal but not of a specific local congregation." This also is impossible. Our only approach to the church universal through the local congregation. If we are unwilling to claim our brethren in specific local situations, there is no way we can be identified with the brethren in general. The Bible says that "he who

'Thanks A Lot' Is Not Enough

By ABIGAIL VAN BUREN DEAR ABBY: I can sympathize with anyone who is taken advantage of by people who don't drive and are always looking for rides. (I call them 'schnorrers.")

Abby, I make sure my tank is not in need of filling when I have company with me because I don't want them to think that if I pull into a filling station it is a hint for them to buy some gas. Wouldn't you think that after years of chauffeuring people around one would give me a small gift, or buy me a lunch? Never! And I never see any of

SPORTS **IN BRIEF Clemson Coach Calls It Quits**

CLEMSON, S.C. (AP) - Amid a flurry of rumors regarding a National Collegiate Athletic Association investigation into the Clemson recruiting program, Tates Locke has resigned as head basketball coach of the South Carolina school, effective immediately, Locke, contacted at home in Easley, S.C., told The Associated Press his resignation was the result of pressure which built up during the entire basketball

season "There were a lot of personal rumors, accusations and allegations that were very difficult to live with," he said.

NFL Battle Lines Drawn

HONOLULU (AP) - National Footbail League owners and their players ready their lines for battle again with neither side knowing what the other really wants, but neither wanting another costly strike. The principal fighting front will be the Rozelle Rule, compensating a club which has lost a player to another

outfit in the league. At their annual meeting at Waikiki Beach, the owners reaffirmed their belief that there must be compensation or the richer teams will get richer at the expense of the others.

Wepner 10-1 Underdog?

A great hitter in his heyday with the boisterous "Gashouse Gang" St. Louis Cardinals in the 1930s, Medwick held a unique distinction at the time of his death. He was the last National Leaguer to win the triple crown of batting, runs-batted-in and

home runs in one season. He accomplished the feat in 1937 and it stood the test of time for 38 years. That year Medwick had a batting average of .374, drove in 154 runs and hit 31 home runs. Actually it was 32 home runs, but one was washed out. In addition, he led the league in run scoring with 111, in hits with 237 and in doubles with 56. It was a spectacular season that brought him the honor of being named the NL's Most Valuable Player for 1937.

Ducky, so-called because he walked like a duck, was born Joseph Michael Medwick Nov. 4, 1911 at Carteret, N.J. He played the out field, threw and batted right. handed. He stood 5-feet-10 inches and in his playing prime weighed 178 pounds.

Altogether he played 17 years in the majors, including service with the Brooklyn Dodgers, New York Giants, Boston Braves, and New York Yankees after he was traded by the Cardinals to Brooklyn in 1940.

County Action To Come Tuesday

By BILL BELLEVILLE Herald Staff Writer

Faced with the loss of Law Enforcement Assistance Act (LEAA) money for the \$750,000 operation of the Sanford Crime Lab, local officials say their only alternative is to ask the state to take over the lab "lock, stock, and barrel."

"LEAA has gotten out of funding crime labs," County Commission Chairman Sid Vihlen, Jr. said. "And we expected the state to support the lab with state funds after they passed a crime lab bill, but no monies were forthcoming." Vihlen said that Seminole County Sheriff John Polk, Orange

County Sheriff Mel Colman and Crime Lab head Pete Ragsdale last week came up with the idea to seek a state takeover. "Under Chapter 74-362 Florida Statue, the Florida Department of Criminal Law Enforcement has the authority to take

control" of a crime lab, Vihlen said,

"Except for \$50,000 of budgeted money, we will be out of funds by the end of June," Vihlen said. "As one commissioner. I see a state-takeover as the only way to keep it going." -The Beard will be asked to pass a resolution Tucud declaring the lab "a necessary function" and requesting a state take over "lock, stock and barrel," Vihlen said, The criminology lab serves the need for law enforcem agencies from 30 counties in this area.

But, in order to not alter the current operation of the lab, four conditions will be asked in the takeover, Vihlen said: -That the state continue the location in Seminole County at the

Sanford Airport. -That the state maintain the same or better level of service for all 30 counties.

LONGWOOD-J.R. Grant, at 60, has begun a new career-in politics. After less than three months on the job as a city councilman and council chairman he has already left

his mark on the community. There is no mold that quite fits this silver-haired gentleman and though in elective office, he considers the description "politician" both degrading and insulting.

"No, I am not a politician," he says. "A politician is a person who straddles the fence placing one foot firmly on each side while he has his hand in the axpayers' pocket."

Grant, "tired of seeing the town embarrassed by not being able to pay its bills, tired of hearing people from outside laughing at the city" decided he personally had to do something about it. He tossed him name into the political arena as a candidate for council last October and was surprised when no one stepped forward to oppose his candidacy. Despite

Vihlen said that he, Ragsdale, Polk and Colman will travel to Tallahassee late next week to further discuss the proposition with state officials.

Sheriff Polk had been diligently pursuing the state take-over since last week when he first became aware of the impending oss of funds, Vihlen declared.

Also, at Tuesday's Board meeting Commissioners will hear a proposal from Phoebe Carpenter of the 4-C-organization. Mrs. Carpenter will ask the Board to endorse a newly passed state statute establishing minimum standards for privately owned and operated child care centers.

The optional state law provides for county endorsemen before it is effective on a local level. Mrs. Carpenter will also discuss a federally subsidized child

care program for Seminole County.Under the program, the federal government makes matching funds available to child care centers and provides for the upgrading of employe training levels in the centers Another part of the plan involves federal subsidies to centers

who have needy families involved in their program. During their night session of Public Hearings beginning at 7 p.m. Tuesday, commissioners will hear:

-A continued rezoning request from Dr. Russell Hickman asking that a tract of land on U. S. 17-92 be rezoned from agriculture to very light industrial (M-1A).

-An application for a dredge and fill permit in an unnamed canal in Mobile Manor at Lake Shore Drive.
