If you're building or buying a new house, the wisest move you can make is into a Walf-Wise home. It's constructed with a combination of energy-saving features that meet FPLs standards, so you can save on the cost of electricity every month, every year lust how much you save will depend on your lifestyle and conservation efforts.

Among the many cost-saving options of a Watt-Wise home are: extra ceiling and wall insulation, solar or heat-recovery units for

water heating, and a high-efficiency air conditioner or heat pump Other easily included power savers are fluorescent lighting, a microwave oven, and thermally efficient windows and doors to minimize heat build-up.
Your new Watt-Wise home will not only help you hold down

the cost of electricity, but it will help reduce FPL's dependence on costby oil, which will benefit everyone. Below is a list of builders who can tell you more comforting facts about Watt-Wise homes.

Supervisor Says Accident Could Happen Again

High Court Backs Union Leaders

A burning cigarette left in an overstuffed chair is believed to be the cause of a fire that guided the home of Ernest and Josie Mooney on Creek Road near Sanford Tuesday morning. The intense heat from the burning chair melted a carburetor on a kerosene heater, Ignilling the kerosene and feeding the life, according to a spokesman for the Seminole County fire department. Firetighters were called to the scane at 3:29 a.m. and hadd the

Auto Inspections Coming Back?

Most other banks in town think you don't need them on the weekend. But at Barnett we know your busy work schedule often does not permit much spare time. You might need to make a deposit or cash a check, and Saturday is the only day you have time to stop at the bank. So, our drive-in windows are open on Saturdays...just in case you need us. That's just one more way we deliver when We Promise Performance.

A Crystal Ball For The Coming TV Season By Kenneth R. Clark nows with a "Ninja" theme, which is sort of as

UPITV Reporter
NEW YORK (UPI) - Video addicts scarcely have had time to digest the current television season. the networks already are working on next fall's menu and Phil Burrell says it will have something to tempt just about every palate. There is no clear-cut trend - no overriding and," he said, "We have a couple of those vehicles, we have a couple of computer vehicles inspired by the video game craze ... and of course cornedies are Burrell is vice president of TV programming for Dancer Fitzgerald Sample, which, as one of the nation's largest advertising agencies, last year parchased nearly \$300 million in television time for its clients. He is in a position to see what the networks will be using in their quest for Nicisen ratings, almost before network executives In Dancer Fitzgerald's annual prime time survey, he said 76 new pilots, plus 14 new series already given limited try-out runs in March or slated for them in April, are under consideration for the 1983-84 schedule - If the Screen Actors Guild doesn't extonle the industry with a strike on July 1. The survey shows video games turning into series with "Automan" and "Herndon and Me" at ABC and "Whiz Kids" at CBS, "Whiz Kids" and Herndon" involve computer-genlus kids while Automan" is a video game hero who actually es to life to battle crime. Burrell said the new season will be offered a whole ion on family life - "the happily married unhappily married, just divorced, just widowed and ving together. No less than five of these protagonists will be widowers trying to cope with kids, and two series — "Together Again" at CBS and "Jennifer Stept Here"

C - will complicate the issue with ghosts.

Sawyer says his biggest customers for these are

urists at art shows and the better flea markets.
The main appeal of his photos, he says, is

Oriental mix of the occult and martial arts, are under consideration at ABC and NBC, and all three networks will overflow with private eyes ranging from the super macho to the super klutzy NBC is even looking at one called "Mantmal," which is all about a professor who solves crimes by turning himself into various beasts Notable ancestors may be celebrated with "Zoero and Son" at CBS and "The Rousters," starring Weatt Earp III, at NBC, Media shows may range Wyatt Earp III. at NIX. Media shows may range from the already premiered "Goodnight Beamtown" to "The National Snoop" — an NBC "Laff-in" style paredy of scandal-mongering tabloids. Barrell said the networks will woo viewers next season with a clutch of stars from the big screen. including Bette Davis, Madeline Kahn, Ann Jilitan, Cybill Shepherd, Buddy Hackett, George Hami

and Dennis Weaver.

nostalgia.

"Twe had people walk up and asy, "That looks just like so and so. I've got to have that ptcture!" Or. "We had one of those!" meaning some particular item in the photograph.
"Several pictures of small children will remind them of pictures their grandparents had. Women expectally will warm up to such photos. There's just something about it." Sawyer is personally fond of photographs of old automobiles, and he finds that when he prints them for his sales displays, "right away this will grab the eye of the man, of the husband. He'd like that picture hanging near his guns, or in his den next to the deer head or wherever." Most of the pictures that sell, Sawyer says, are from the period 1875 to 1905, "That's when I fee the best pictures were taken. You had the start of the automobile era, the buses, the trolley cars." A good antique photograph, according to Sawyer, is one that tells you something about the era in which it was taken. For example, the serious expressions often seen on the faces of the adults in

"One thing about the photographs back then as opposed to those of today was that they tell you a little more, sometimes. Because when they took a picture back then it was quite a thing "The photographer is coming. We've got to get ready, even if it takes all day, or the night before!" "Today you take the camera out of the drawer, take the picture, put the camera back in the drawer, have the film developed, etc., etc. But then it was like Sunday dinner. And not everybody had a camera in those days. You had to hire a photographer. Everybody didn't have an in Sawyer recalls one old photograph in particular that he came across that portrayed "a grandfather in this large wooden chair, and all around him are these generations of his children. He looked like the Godfather with his pinstriped suit and his bow tie celluloid collar, cane in his hand." To Sawyer, the picture stands out becau nveys "a sense of power, of closeness of family. "It's just amazing. It's fascinating to see, thre a photograph, how people lived. I could lay out 100 pictures, shut the door and take a slight walk in my

he says. And that's not counting a set-up for water, and little things like a quality magnifying glass, an eithing knife, charcoal or *2 penells, and copy film for reproduction, as well as doubleweight matter paper for prints. All these items are available in any well-stocked hoto store and art supply shop. Sawyer recoups the expenses of his hobby by saking it a business as well as a pasitime. Besides the fees he charges for restoring other people's antique photos, he makes his hobby a lucrative one by selling reproductions of his own antique prints.

Colleges Resorting To Creative Financing For Cash-Short Students

By Stanley W. Darden

United Press International
Colleges and universities cerose the United States, p
including some in the Southeast, are finding they must
devise more fiexable tutton payment plans for their
students in three hard economic times.
One of the most trangitative plans in the nation has e
come out of St. Olaf College in Northield, Minn., a
liberal arts institution with a well-respected must p

program.

St. Olaf estimates that a student who enrolls this year and stays through graduation four years later can expect to pay \$55,000 in tuition.

The celloge has instituted what it calls "a charitable irminider unitinist" to help the parents of students defeat the roat of their during.

The article, writes by shifting a family's assets to the college — whose generates a sax deductions for charitable contributions — then having the college establish a Coyear trust that yields income to the family. If a family has or can borrow \$50,000 in assets, they could care nought to send two or even three more children through college for the same amount that they would spend to deducate one child.

The family would donate \$10,000 to the college, getting in return a charitable deduction worth \$8,000, assuming the family is in the 50 percent tax bracket. The remaining \$40,000 worth of assets goes to the college for the creation of a 20-year trust, with all the college for the creation of a 20-year trust, with all the college for the creation of a 20-year trust, with all the college, the form of the college for the creation of a 20-year trust, with all the college, and the college for the creation of the college for t

The college invests the money in high-quality discounsed corporate bonds, yielding 12 percent a year. That alone is not enough to pay the \$8,000-\$10,000 yearly college costs. But combined with the income tax asvings the parents have realized from their charitable contrabilities. It will cover almost two years of costs. The rest corners from a less in the actioned from \$1.014.

At the end of the fourth year, the student will owe the codinge #12.068 — which will be paid off from the proceeds of the trust over the next three years. By the end of the seventh year, the student's costs will sill be proceed to the process of the process of the control of the control of the process of the proter of the process of the process of the proter of the process of the process of the proserved of the process of the process of the proposition of the process of the process of the proposition of the process of the process of the program of the process of the process of the program of the process of the process of the proposition of the process of the process of the proposition of the process of the proter of the process of the process of the proter of the process of the process of the proter of the process of the process of the proter of the process of the process of the proter of the process of the process of the process of the proter of the process of the process of the process of the proter of the process of the process of the process of the proter of the process of the process of the process of the proter of the process of the process of the process of the proter of the process of the process of the process of the proter of the process of the proter of the process of

other achools are studying it."
Most state supported universities have tuitien low
enough so they don't have to draw up deferred payment

plans.
At the University of North Carolina at Chapel Hill where is obtate tuition is about 8000 per semester, then are no deferred payment plans, according to financial districtor Elenaro Morris.
"We're blessed with low tuition rates for Nortl Carolina readerint," said Mrs. Morris. "That takes some

Carolina readents." said Mrs. Morris. "That takes some of the pressure off our bookkeeping as well as our students' pocketbooks." Out-of-state students pay significantly more than in-staters at UNC. But there has been no need to develop deferred payment plans for them, said Mrs. Morris. A spokesman for Emory University in Atlanta said

INVITATION TO BID

"Together — with Freedom's new banking power — we'll serve you even better!"

Two leading financial institutions are joining together — ComBank and Freedom Savings. And frankly, you're going to see some changes. Excifing changes that will broaden the scope of services available and meet more of your banking requirements.

With our combined capabilities, we'll be able to introchor some innovative new servoss. Lending limits wil be raised. More funds will be available for commercial loans and business francing. You'll enjoy the convenience of increased 24-hour feller service. And well continue to respond to the special needs of the business community with our commercial services. Our frust Department will still be available to provide both corporate and personal financial planning. Together, we'll have the financial strength of more than \$1.7 billion in combined assets. Our banking facilities will expand to more than 46 offices in 15 counties throughout central, southwestern and northern Florida

BUT SOME THINGS WILL NEVER CHANGE. The same congerial staff you're accustomed to will continue to great you. The experienced personnal you've relied on for financial counseling will be here to offer their assistance. Our tradition of personal service is guaranteed.

And just as importantly, our commitment to the community, its growth and development will persist in a stronger, more vital fashion than ever before.

TALLAHASSEE (UPI) - The House has approved a bill that would give back to creditors a controversal weapon for collecting debts from

"desidents."
The measure (IIII 472), passed 89-84 and sent to the Sentet, would allow credition to freeze the assets of a borsower use has a bank account, even before a language approved.

The Flerick Supreme Court struck down as unconstitutional a statute allowing such prevaigneed with open personal proposed and a statute allowing such prevaigneed wins of persistence but proposed sand the new legislation answers the court's objections. Under the bill, a creditor, before freezing any assets, would have to convince a judge both that he is likely to win a judgment and that there is a likelihood that the debtor's assets will disappear if they are not frozen.

In addition, he agreed to a last-minute amend ment that would require the court to notify a debter in writing of the garnishment action and advise him of his right to have an immediate hearing.

one way or another You've been looking at new cars, and perhaps you've found the perfect one for you and your family. Now you just have to decide where and how to finance the purchase, and here is where you may encounter some confusion Because, unfortunately for you, there are some very important catches to the 11.9% or even lower rates offered by the automotive

manufacturers In most cases, to get their lowest advertised rates, you must pay top dollar for your new car. If you try to bargain on the sales price, those low rates may suddenly disappear. You may find that you have to make a very large down payment, as much as 1/3 or more—a far greater amount than you had planned. Chances are you'll have to give up any price rebates you'd counted on, and the term of the loan may be very short-in some cases only 18 or 24 months—resulting in high monthly payments, in spite of a low interest rate.

All things considered, what seemed at first to be an attractive finance package can turn into a complicated, expensive proposition.

Or borrow from Southeast Bank and save-in more ways than one. First, you'll still benefit from our very competitive 11.9% rate. But you'll have some real advantages as well. Most importantly, as a cash customer, you'll be in a much stronger position to bargain. This alone could save hundreds

of dollars. You can select terms up to a full 48 months, enabling you to tailor

your monthly payments to suit your budget. And your down payment may be smaller than that required by other financing plans. Credit where credit is due, from Southeast Bank and select new

car dealers. Southeast new car loans are avail-

able at any Southeast Banking Center and through select dealers throughout Florida who have made special arrangements to offer their customers the convenience and savings of Southeast Bank nancing.

We have financing available for almost any purpose, from a new car to a new home, and it just makes more sense to finance you major purchases with us. Whatever your requirements may be see your Southeast banker You'll get competitive rates, terms to suit your needs, and the confi-dence of dealing with the leader in Florida banking.

11.9% new car loan rate is subject to change without notice; there is an initial service fee of only 2% of the loan, but never more than \$50, regardless of the loan amount.

Not every aerobatic pilot is willing to try formation work because of the added demands of concentration, rather special people, a team of distinct individualism who become welded together in a single purpose during a performance. Each member of the team with just service. So this is not just any airchitecture of the contract of the

"Mostly mutual respect for each other's ability,"
says Charlie Hillard, team leader and at 41 years of
age, the senior member in both years and flying
experience. "This team is made up of three strong
personalities; each is very much his own person.

What makes it work so well is that there is this mutual feeling that you're flying with the two finest aerobatic pilots in the world."

gerouser pioes in the word.

[Hillard is not alone in that estimation. At the last two world aerobatic championships, world competitors were still talking about the 1972 U.S. team at the world competition in France. The three Eagles Team members composed the winning U.S. Team, one of the strongest ever fielded, and Hillard took the world individual championship.]

Hillard is often identified with a speciacular maneuver he introduced known as he "longue roll." his specialty, its which he holds the atripane in a vertical either through zero atraped, minitatining a continual rolling maneuver all the way to the top of the vertical line and back down, so that the atripane seems to hang on its propeller white rolling in a lot more to Charlie Hillard than one special as lot more to Charlie Hillard than one special

Flying right wing is Polerezny, who brings 12 years of flying experience into the cockpit when he fires up. As an executive with the Experimental Aircraft Association, Polerezny devotes as much of his energy and articulate intelligence to promoting aviation for EAA members as he does to his participation on the Eagles Team.

Poberczny brings a particularly intense competitive spirit to everything he does — that means "competitive" in the positive sense. It's a spirit that lends him a fleree concentration and produces maximum effort during every performance, allowing him to fly as perfectly as his considerable abilities permit.

"There's no fuse shout it." says Gene Soury, in his typical laconic ensurer. "Tom just does it." In fact, Pubercary "does it" so well that he took the U.S. national unlimited championality in 1973 as well as recent credit for directing the flying sequences in the new motion picture, "Cloud Dancer," already an acknowledged classic even before its release for the accuracy of its depiction of competition aerobatic

Soury has been described as the quiet man who lits his airplane do his talking. and it's just there. He's one of those people who doesn't have to fly the lowest to be the most exciting."

"How do you describe his kind of talent?" wunders Hillard. "He's just better, period. He's so precise and consistent. Some pilots will fly a maneuver that's technically akay, but Gene will fly it over and over for you, with the radiuses tight and exactly the same.

Soucy was born into aerobatics - his purents flew - and he's presently a co-pilot on a DC-9 for a regional strine. Hillard and Poberezny have dedicated part of their lives to aerobatics, but each has other important interests. Soucy gives the impression that flying is all of it, and he never seems to tice of the chance to fly another hour, a new airplane, a povel maneuver. The Eagles' left wing pilot also brings top-rank awards with him to the team, with his winning of the U.S. National unlimited championship for three years running, from 1970 through 1972. (Only recently, after a long layoff from competition, Soury took the phototype Eagle 1 to the national championship competition, and with only six days to practice in an all-new airplane, he finished an incredible third overall.)

This Eagles Team is spectacular without being All three of them talk in terms of "margins" and "consistency." The point has never been to take the greatest risks, but to fiv so precisely and smoothly - in a word, so professionally - that even unschooled audiences can sense the difference in the quality of the aerobatics they're watching. This is a very unusual group of men, a combination of talents and personalities that blend together with unique success. In fact, we may never see its like

The initial flight took place in July, 1968 and the first C5 entered service with the Air Force in 1970. A total of 81 aircraft were 'produced, with the last unit delivered in 1973. Physically the C5 is 247.8 feet long and has a wing span of 222.8 feet. It is powered by four TF-39 turbofan

engines rated at 38,000 pounds of thrust each. The maximum total takeoff weight is 712,500 pounds with takent weapon is a maximum payload of more than 165,000 pounds. Its eargo hold is 19 feet wide, 13.5 feet high and 144.6 fret long for exceptionally big volumes Loading and unloading is outck and

So when Sturgill comes to Seminole County, it's usually a good bet that Dave will take out his instruments and pick with some of his frends. He was in town recently, stopping for a visit with Mary Ann and Tom Masters who live on 3rd Street in Chuluota en route from their North Carolina digs to a sen's home in Vero Beach. Their visit was cause for celebration. A group of friends stopped by for a jam session that lasted into the early morning hours as Sturgil entertained with songs, stories and his knowledge of music history.

sengs, stores and his knowledge or music history.

One of the greatest Joys of Sturgill's life is attending bluegrass feativals, which are quite numerous in the hills of Virginia. Tennessee and North Carolina near the family home. "Not the bluegrass that all the college kids used to go too, but the real thing."

He said the "real" bluegrass has almost died because of a change in the instrumentation. There's also an effort to make it innore popular by adding other types of music to the traditional bluegrass sound of a guitar fiddle, banjo and mandolin. Sturgill is a historian. He knows the origins of

Dave Sturgill, who earns his living making musical instruments, plays a pretty mean fiddle. Sturgill has been making instruments professionally for 13 years and playing them

who wrote or performed them.

He also knows his own family's history, having written a geneaology book about the family's migration to America. An engineer with the Bell Telephone Co. In Washington D.C. for more than 25 years, Sturgill dropped out auddenly to take over an alting Nashville musical instrument firm. The company didn't do well but the experience gave him the impetus to start his own company. Skyland, in

"I'd been making musical instruments since I was 11 years old so it wasn't exactly something new," he says. But dissatisfaction with his job made Sturgill turn his hobby into a full-time job. turn its noopy note a full-time job.

Today, he's glad he made the change and feels as
if he's contributing to preserving a musical heritage.

Not too many years ago there were several big
musical houses that mass-produced instruments,
he says. "Now, they're all gone. The Japanese have
run them out of business." for a lot lorger. Sturgill may be a craftsman by trade but he's an entertainer at heart and he has a vast repertoire of Appalachian songs that he'll play at a drop of a hat.

But there remains a market for the more expensive hand-crafted instruments that Sturgill and his sons Jan and John, who joined the firm in 1973, produce.

He's always on the lookout for old cherry, maple, apple or other wood that can be formed into a unique musical instrument. The wood he uses is at cast 25 yearsold, much of it considerably older, and

least 25 yearsold, much of it considerately older, and Sturgill says has a lifetime supply on has can The handful of instruments Sayland produces each year are expensive. Unitars are proted from \$500, violins begin at \$600. But Sturgill says they appreciate in rabue if properly cared for. As a crafteman, Sturgill's pride above through when he refer to his instruments as the best currently being made in America.

But as a performer, be's more humble. "A great
guitar maker once said that those who can, play,

Kathryn says. "Bing's idea of punishing our children (Harry. Nathan and Mary) was to chase them around the house with a rolled newspaper shouting. "This has got to stop." He never struck any of us in his life."

Gave said. "Dod bad a strong will. He stopped

amoking cold. He admitted he made some mistakes raising us. Maybe he did change his ways of disciplining his second family.

"I know I was shocked the first time I saw Harry and Nathan arguing with Dad at their house in Hillsborough. I couldn't believe It. If my brothers or had talked back to him — POW!"

Kathryn and Gary, both approaching 50, share an awe of the dominating force in their life. Crosby's superstar status perfoundly affected their lives.

Blug's first wife, Dixle Lee (Gary's mother), died in 1952. It was an unhappy marriage, He married Kathryn. 29 years his junior, in 1957. By all accounts it was nappy unions.

"Together — with Freedom's new banking power — we'll serve you even better!"

Two leading financial intitutions are joining together — ComBank and Freidom Savings. And frankly, you're going to see'some changes. Exciting changes that will broaten the scope of services available and meel more of your banking requirements.

With our combined cap bilities, we li be able to introduce some innovative few services. Lending limits will be avaised. More furtly will be available for commercial loans and business financing. You'll enjoy the convenience of increased 24-hour leller service. And we'll continue to repond to the special needs

And we'll continue to repond to the special needs of the business community with our commercial services. Cur Trust Department will still be available to provide both corporate and personal financial planning.

Together, we'll have the financial strength of more than \$1.7 billion in combined assets. Our banking facilities will expand to more than 46 offices in 15 counties throughout central, southwestern and northern Florida.

BUT SOME THINGS WILL NEVER CHANGE. The same congenial staff you're accustomed to will own intuine to great you. The experienced personnel you've relied on for financial counseling will be here to offer their assistance. Our tradition of personal service is guaranteed.

And just as importantly, our commitment to the community, its growth and development will persist in a stronger, more vital fashion than ever before.

Ballet Guild To Dance Into Your Heart

Season's Premiere Set This Weekend

By Doris Dietrich PEOPLE Editor All elements of a superbly staged extravings

ombine for a well-deserved celebration when Hallet Guild of Sanford-Seminole presents its 15th anniversary performance this Saturday and Sunday at Lake Mary High School And you're cordially invited to the gala. "Sensational Invitational," best described as an invigorat-

ing innovative spring dance party.

Not had for a fledgling dance company that was nearly swept off its pink-satined toes by a few. septies 15 years ago when the non-profit group was But the handful of enthusiastic believers grew to a

congregate of faithful supporters who heartily endorse the thriving dance company as Sanford and Seminole County's contribution to the cultural enrichment of the community.

Dedicated to Florida's First Lady Adele Oraham, a

stanch supporter of the arts, the performance is under the direction of the founders of BGS, Valerie Weld and Miriam Wright, who have devotedly given of their time and talents to the artistic endeavor since its inception in 1968.

The anniversary performance will feature 17 Ballet Gulld company dancers, ages 11 to 19, and three guest dancers, Charmley Mann, Holley Kurimal Ricker and Mirtam Wright. The Ballet Guild of Jacksonville will also appear as guest dancers in three numbers. "Pas de Quatre," "Shenandash" and "Brandenburg."

The curtain will rise on a rousing patriotic ballet.

"Hats Off," saluting men and women in service. The high-stepoing BGS dancers present a review of the American scene and end the dazzling dance to the American scene and end the dazzing dance in the music of "Stars and Stripes Forever." "Hats Off" soothingly moves into a graceful classical ballet."Blue Danube, "set to the immortal clusical ballet. "Blue Darube," set to the immortal wallz of composer Johann Strauss. DEAR DECK: I am tracing genealogy on the Gunter family. When "Winds of War" aired, I briefly saw the listing of players. I thought I saw that the man who played Hiller was samed Gunter. Can you tell me about him? Mr. Amarilla.

Texas DEAR DICK: I notice that a Pierce Brossman plays Rem-ington Sierle. Schwijfer Brossman and I are compiling all this information we can about the Brossman/Brossman traillier and have it back to the 1600s in Germany. Can you find not it that in the action read same and anything about blaz? MBS. C.G., Parker, Ohia. C.B., Picker, Okta.

You are both barking up the wrong family tree. The actor who played Hitler was Genter Meisner. Gunter or Gusther to a popular first name in Germany. As for the actor who plays Remington Steele, his name is Bronan, not Bronaman, and he is at rishman. Som. here and descended.

DEAR DICK: We have a local girl in Hellywood named Faye Grant. She played Rhonds, in "The Greatest American Here." Then she was in a movie called "Scalor Frip." I have also seen her in other filting. All of so here would like to keep sp with what the is doing. Where is she now and what is she doing! MRS. J.B., St. Claff. Shores, Mich.

She is working, as mach as it is possible to work in Holly-wood today, what with the rough competition for parts. You will next see her on NBCs. "V" a two-parter to air or Sunday, May I and and Monday, May 2.

CBS Admits Clumsiness During Preparation Of Vietnam Show

NEW YORK (UPD - CBS has admitted a m of clumsiness in preparation of the Vietnam against which Gen. Westmoreland has filed a multi-million-dollar libel suit, but does clumsiness constitute malice?

Malice is what the general must prove if he is to collect damages against the network for its claim that he falsified enemy troop strength numbers during his stewardship of that unpopular war. Under law, mere incommetence does not enunt

The controversial "Benjamin Report," which CBS strove in vain to keep confidential, has detailed admissions made in brief on July 15, 1962, in connection with a documentary titled "The Un-counted Enemy: A Victorian Deception," which was aired Jan. 23, 1982, with Mike Wallace anchoring CBS News president Van Gordon Sauter ordered executive senior producer Burton Benjamin to make the investigation after TV Guide blasted his network for contending that Westmoreland engineered a for contending that westmoreland engineered a "conspiracy" to faisify enemy troop strength numbers so that President Johnson and the American public would think the war was being

Benjamin, in an exemplary job of investigati reporting of his own organization, concluded that the documentary violated 10 specific network news standards and CBS made the entire report public after the court ordered that it be turned over to stmoreland's attorneys In complying. Sauter defended the documentary noting that TV Guide did not "address the accuracy or substance of the broadcast, only the manner of its

"Any flaws in the preparation did not undermine the editorial integrity of the broadcast," he said in a statement. "It is an accurate and important account of the distortion of enemy strength estimates by the military in Vietnam. Then and now, CBS News stands by the documentary and its value to those seeking a broader understanding of the Victnam

Benjamin's report was critical of producer George Crile's handling of Sam Adams, the former CfA analyst who initially brought the charges to CfBS, and of George Allen, who had served as his immediate susperior in Vietnam. Both supported the documentary's premise, but Benjamin faulted Crile's failure to identify Adams as a paid consultant and for interviewing an initially reluctant Allen a second time after failing in the

In an original transcript of the second interview. released in the report, Crile told Allen, "We're going to keep at this until we get it right," and Allen subsequently told Crile, "I'm sorry, George, I don't know what you want me to say. I don't know what sweeter expecting me to say. Bentamin also said Crile violated guidelines by screening interviews with other witnesses for Allen in a bid to get him to talk Benjamin dealt with the TV Guide charges, line by

and one of the most serious accused the producers of deliberately excluding Walt W. Rostow. who served as special assistant to Johnson from 1966 until 1969, after interviewing him for three fours.

After querying Crile on the point, Benjamin quotes him as saying he "agonized" over the matter, but decided to exclude the Rostow footage because he was "contradictory and in some places unresponsive Crile was backed by Wallace who said, "Rosto and LBJ were not our story. Our story was that 'the

books were cooked Benjamin also faulted Crile for failure to interview several other witnesses who might have supported Westmoreland. He pegged the ratio of interviews supporting the documentary's premise vs. those denying it at 9 to 2, which he called "an imbalance in presenting the two sides of the issue." Benjamin concluded the word "consulracy" never should have been used since there was no evidence

Other criticisms involved two montions that were made to appear as one: a "journalistic oversight" that permitted Westmoreland to discuss one meciing which then was cut into a sequence about another: lack of enterprise in ignoring a key pro-Westmoreland witness after being told he was too fil to be interviewed; imprecision in the handling of correspondence, and "the coddling of sympathet It took 15 months to complete the controversial

documentary and by Benjamin's own admission, narts of it fell by the wayside - but by error in uman judgement rather than out of a desire to "get" Westmoreland. "get" Westmoreland.

The court ultimately will decide the issue, but while the "Benjamin Report" may bring a moment of joy to Westmoreland, it is not likely to make him rich.

Anyone Can Run For President

Kid Talk With Sen. Kennedy

Here it comes again...another shoplifting pitch. We know you've heard it before, but read on. Shoplifting is stealing. It is punishable by law and it labels you a criminal. It can wipe out your hopes for the future. It gets you a court record that can't be erased. Say goodby to college plans or landing a job. Employers will think twice before they hire a thief. Is that wallet, necklace or lipstick you pocket worth the price you must

SERVING SEMINOLE COUNTY

HOW TO ERASE A GOOD PART OF YOUR FUTURE.

Here it comes again ... another shoplifting pitch. We know you've heard it before, but read on. Shoplifting is stealing. It is punishable by law and it labels you a criminal. It can wipe out your hopes for the future. It gets you a court record that can't be erased. Say goodby to college plans or landing a job. Employers will think twice before they hire a thief. Is that wallet, neckloce or lipstick you pocket worth the price you must pay in the end?

Mother's Day

A Labor Of Love For Kids Who Make Gifts For Mom

By Diane Petryk Herald Staff Writer

There's nothing quite as industrious as a kindergutener when it comes to creating something sprelid to give mem on Mother's Day. At Sabal Point Elementary School, students were busy this week preparing some ingenious giffs, from

corsages to terrariums.

But Matthew Kiefer, 6, is giving his mom a dream kitchen.

Well, almost.

weis, amous.

The dream kitchen comes in the form of a drawing
Matthew made to serve as the cover of a very special
cookbook. The picture depicts Matthew's ideal—a
kitchen filled with chocolate cake and brownies and
equipped with three ovens (probably for baking
chocolate cake and brownies) and a mierowave. But

equipped with three ovens (probably for baking chocolate cake and brownies) and a microwave. But there's salid, loo, in the picture and a modern decor of Matthew's invention.

This artistic achelvement will be laminated, says Matthew's teacher. Mary Hart, and will become the rover of a cookbook constaining the favorts receives

of students' mothers.

There will be 22 recipes in the book-an outstanding Mother's Day gift.

Other pupils told the story of their cookbook

Severs:
Seven Tadd, 69s, said his cover shows his mem going to answer the phone while cooking. There's soup on the stove, but the real items of interest are the cherries. Lots and lots of cherries and his mem is about to put them in the fee cream she's going to

make.

Evan Shafran, 5, said his cover shows his mom
with a big sharp knife. Jimmy Waters, 6, drew his
mother making a cake. Mom standing by the stove
is 6-year-old Kamif Bownian's picture.

Katy Zara, 6, gave her cookbook a catchy title:
"Mom's Cookbook".

When a Coulomb to give the clouds a study starting with a cover, For Starty Welner, 6, it was cuptakes and her picture shows her mem fresting them with popcorn and his picture shows below the helps his mom out in popcorn popping duties at the Pacelli household.

Jim Kuliano, S. dewa a lag refrigerator and his more parking funch. Barble Stakes, 6. also pat a refrigerator, rice becad and her more in the picture. And Billy Chattao, 60%, put his artistic talents to the task of depicting the day his more "lisped over the broccol." But probably the most imagnative colobook cover any mother will get from the project of his. Iter's kinder parent cases will be the one of his later's kinder parent cases will be the one Kindama's drawing depicts he and his morn in the kitchen, but there's more. The busding Dr. Sessue.

scribes it this way:

nescribes it mis suay. "Mom is making food and there I am with a sandwish on my head I put on a fake mustache and there are cookies and cakes and that's my dog and that's Mickey Mouse. The substitution of the moment of the mom

Jeff Dunn, 7, isn't a flashy kind of guy. Nothing fancy for mom on Mother's Day. No furs. jeweiry, or dinner al a fancy restaurant. Jeff is more subtle and direct. A bunch of flowers, a

plantic soda pop bottles into terrariums by taking the opaque bottlems off the bottles, putting in the plants and turning the bottle, with its neck cut off, over the plants so form a cover. While Miss Beth Harris' kindergarter misde hug and a kiss is all if takes to say, 'I love you, mom.' It's a message that comes in loud and clear to his mother. Pam Dunn of Palm Terrace Street in Sanford.

Luce helped her pupils make allouette profiles of themselves to take home to mom. Seven-year-old delf Dunn of Sanford will give his mom some flowers accompanied by a big hug and a

Let Blair Agency Solve **Auto Insurance Needs**

Are tree? Perhaps, while uninsured, you've had an accident or been given a ticket for driving under the influence and you need to have automobile or truck insurance quickly.

The place to go is the Bair Agency, 2510-A Oak Ave., at the corner of Park Avenue in Sanford. There are three experienced underwriters and Mrs. Genie Blair, founder of the agency, there to help you solve your problem.

The Blair Agency is one of the few insurance agencies in the area empowered to fill out an SR 22 form confirming that a client has purchased liability insurance.

A client can purchase his insurance in the morning from Blair, have the SR 22 form filled out immediately thereafter and hand carry the form to the state Drivers' License office where it can be forwarded to the state. This will stop a driver's license from being auspeader.

The forms affirm that a driver is fin

With 27 years in the insurance industry, Mrs. Blair founded her own agency 12 years ago. The Blair Agency has been at the same location for the past seven years.

se it. This is in keeping with the agency's p a compete service to its circuits.

One of the first things the Blair Agency sees as a secessity for people buying insurance is that they receive complete information about the various yets of insurance available. With this knowledge, then so and decide what is best for them.

The three professional underwriters at Biair a liling to talk with you on the telephone to be fre your insurance problems.

Basketball Wins Hearts Of TV Sports Fans

By Kenneth R. Clark UPI Telvision Reporter NEW YORK (UPI) - Sports fans, of necessity, an

the most schizophrenic of television audiences. No matter what they're watching, something equally sweaty is bound to be taking place on another It's an exercise in agony, but according to the latest survey by the Merit Report, most of them will ont for a National Baskethall Association Champion ship game when push comes to shove on the dial Such information may fall under the category of vidro trivia for many in the prime time crowd, but it is anything but trivial to advertisers who pay most than the average working stiffs annual salary for a few minutes of commercial time between plays. goals, rounds and other same divisions

Advertisers like to know where their mone Advertisers like to know where their money breeds the most money and they are willing to pay even more money to such public opinion mavens as the Merit Report in order to find out In the latest survey, 1,201 randomly selected adults were asked which of five different sporting

events they would watch on television if all five wen on the air simultaneously. Events in question were the Kentucky Derby, the Indianapolis 500, a world heavyweight championship fight, and championship games of the Stanley Cup and the National thall Association NBA basketball got an overall nod of 24 percent

May 18

but when responses were split along the lines of age, gender and address, a different picture emerged.

Men, it turned out, will go for a world heavyweight boxing championship fight over NBA buskethall by 27 percent to 24 nervest.

Women on the other hand are not at all food of fisticulfs. Only 11 per cent of those surveyed said they would watch a heavyweight mauling, with nearly half — 48 percent — preferring either the Kentucky Derby (25 percent) or the NIA championship game (23 percent)

People in the 18-34 age bracket opted for boxing by 25 percent over the NBA game at 23 percent and the Berby at 15 percent. The over-50 cr

other hand, preferred the Derby by 27 percent, giving the NBA game 24 percent. There were regional differences, too, with 26 ercent of Northeasterners preferring the Derby over the NBA game which got only 19 percent.
Westerners, however, preferred NBA baskeiball over the Derby by a 2-1 margin - 26 percent to 13

In the also-ran department were the Indianapolis 500, at 16 percent, and the Stanley Cun champion ship game at a pitiful 8 percent. Thirteen percent nably those who wouldn't know a hockey puck from a touchdown — had no opinion at all. But the networks are not the only folks rut scorting events these days. Cable increasingly

preoccupied with garres people play and last week officials at ESPN pronounced themselves happy with response to the new United States Football League games and the National Football League After rating seven USFL games, they came up

with an average rating of 3.9 which is considerable better than the 2.0 considered the cable norm. The 10-hour NFL draft pulled a 1.9 which was considered a good showing since there are only but as many television sets on by day as by night.

Everyone knows television is big business, but the average viewer was in no position to know just how big until Frederick S. Pierce, president and chief operating officer for ABC, addressed his network's affiliates Tuesday in Los Angeles.

Asking that no one hold him "to the last nickel." Pierce set the price tag on ABC's total investment in network programming for the next five years, and in so doing, he sounded more like a congressman than a television executive "Over the next five years," he said, "ABC's total investment for its television network service - the

total resources required to put our broad range of network programming on the air - will probably be at least \$10 billion That's billion - with a "B Now network advertisers may know why it costs more than the average man's annual salary to put a 30-second spot on the Super Bowl.

Member Of Gun-Fencing Ring Pleads Guilty **Action Reports**

One of six people arrested in March as part of what law enforcement officers described as the largest gun-fracting ring ever in Semisole County has pleaded guilty in U.S. District Court in Orlando. Bernie Ball, 67, of Longwood, a retired coal miner who said he was selling guns as a hobby, entered the guilty plea Menday to a charge of selling guns without a feenese.

Posey, Seminoles Seek To Shed Trying Times

Herald Sports Editor

When Thomas Payne unitered those eight chilling orders in 1776, he was questioning the patriotism of hose around him. The Revolutionary War was about to egin and Payne let it be known it wasn't a war for Sumshine Patriotis. Sumshine Patriotis was not to make its break, a received front from all most — winers and lovers allow make a successor. The Widdle's who were frontrunners or were good to dimbing on the bandwagon.

These are also trying times for coach Jerry Possey and his Fighting, Seminole football team, although, hopefully, they won't be as trying as last year. The 1986 casm will live in infamy in Seminole football history, it lost all 10 games, something that seemed improbable; in Sanford — a town which has always produced competitive, and sometimes, championably football teams.

Yet, there it is, etched in the record books — 0-10. Posey and the returning members have heard enough about last year's holocaust. Spring football practice his been underway for two weeks and Posey was greeted by the largest turnout in several years — which probably the largest turnout in several years.

Posey and Payne have a lot in common. Both are loading to weed out the "Sumhitine Patriotis" from the men. Posey needs the add who will suck it up and not be discouraged if 1963 gets off on a wrong foot like 1982. He these what he seen, thus far. "They're dead serious out here." he says. '90s Car: Lighter, Fuel Efficient

with electronics. Smaller in size.
That's a start.
Because of rapidly-changing technology and an increasing number of external influences, no one can say exactly how that new car you buy in the year 2000 will look.
There are some indications, however, in

one can say exactly now that new car you lany in the year 2000 will look.

In the year 2000 will look in the year 2000 will look in projections of how the cars being built in the next 10 years or so will shape up = in design, in powerplants, in materials. A composite picture comes from members of the Society of Automotive Engineers, a nonprofit, technical members in 79 countries, the Automotive Information Council, the Motor Vehicle Manufacturers Association and, yes, the automakers.

themselves. Many of the concepts for these vehicles of the future already are on the drawing boards. The final dreades of the 20th century should prove exciting and challenging for the people whose job it is to develop the ear you'll choose to drive a score or more years from now.

Become of the measure mount of totals registering design work, testing, and relooling that is necessary (all of which require large capital expenditurs, the lead time to bring a new vehicle to the driving public is measured in years.

Many of the new breed of front wheel drive cars, for example, began to take shape on

drawing boards as early as 1974, the control of the

dictated most changes, design today is primarily influenced by four external forces — energyenvironment, economics, and government regulation.

Because these forces will continue to dominate the future design of passenger curs, the

innovative automotive engineer will lead the way and the stylist will have to conform. Much engineering emphasis is currently being placed on developing new powerplants – ones that will not only use less that will not different ways of translating combustion into power. Through the end of this century, it is probable that the engines familiar to us today will continue to be our predominant power. Clearly, the regan of the Ves engine as king of

the highest is over and, if it survives in any form at all, it will be in the form of the 86-4 variation introduced on some Cadillacs. The main reason for these changes is the federal regulation that requires each car company to achieve an average of 27.5 miles pergallon across its full line of the company of the person of the company of the company of the comtrol of the company of the company of the Stall, manufacturers are optimistic they will beat the 1985 standard by at least three miles over the next five years to produce such a free average amounts to 860 billion, making fact efficiency the No. 1 goal for the domestic automakers. Tomorrow's engines are likely to be 25 to 30

percent smaller than today's standard powerplants and will use super-chargers and turbo chargers to boost their modest output. The future may place more emphasis on diesel engures and more sophisticated electronicallyelectric cars also may debut, such as the electric electric cars also may debut, such as the electric vehicle General Motors is talking about introducing in 1985.

But GM still is seeking a good supply of nicket prowder and better lightweight plasties for its batteries. Iower fabricating costs for plates and separators, more efficient motor designs, better speed controls and an inexpensive, reliable way to monitor the supply of energy remaining in the supply of energy remaining in Look for some hybrid englues to emerge, too, combining, say, a liquid-level engine with an

comoning, say, a nquid-fuel engine with an electric motor.

Alteredy the six-cylinder engine has replaced the V4 in many curs, but sometime during the twist dominate the highway. It is now the chief source of power for the subcompact and compact entries.

Weight also is a key factor in fuel economy.

Hundreds of paints have been shed from cars since the mean state of the control o

alaminams, plastic and other lightweight materials. Because of advancements in metal treatment and painting, car owners of 1990 will no longer need to worry about rust. Better lubercants and bearings will help increase economy and improved tires will reduce rolling. Perhaps the most dramatic changes, however, will be in the area of electronics. While most

1981 cars include some helpful electronic components, cars of the near future will include a variety of electronics that will control fuel metering, door bocks, exhaust gas recirculation, ignition systems, and steering systems. On-board computers will monitor system-wide sensors including those on bearings, brakes, usingernsion, steering, and even time. Electronics

suspension, steering, and even tires. Electronics will enable cars of the later 80s to double present-day fuel efficiency. The dashboard of these vehicles is likely to have a black matter linish aglow with red light-emitting diodes delivering messages from the on-board com-

Designers are paying particular attention to accordynamic styling to reduce wind results — another fuel economy loc. Wind tunnels to test styling concepts have been employed to a far greater degree in the last few years.

Future cars (artist's conception above) will include an increasing number of helpful electronic components. Plastics for will play a more dominant role. Industry people expect four-passenger cars will be in the majority on inmorrow's highways, with only about 25 percent of all the vehicles on the road capable of carrying five or six persons.

Rooflines in the late: 80s will stay where they are, but hooks and trunk lids will rise steeply to need them. Chrome hood ornaments and models. Cars will become very slippery, yet aesthetically pleasing. The engineers' windtumed and the styling studios will cooperate to produce cars that will be lithe, efficient, and While it was once felt that the most efficient

design for combating wind resistance was a long tool and a short rear deek, the cars of the late 1980s and 1990s will have a small hood, small rear deek, and a large passenger comparatment. With a wind drag rating half as much as current sedans. 1990 cars will not only be more fuel efficient but also will be much quieter. It won't be long until upright grills and the

stubby box shapes and opera windows that now express luxury disappear. Grills may even become extinct because they hinder aerodynamise efficiency. The cooling system of the future will surk its air from a lip undermeath the ear— freeing the stylist to form through the air. If we have the efficient path through the air.

with the perfection of run-flat tires, lowering vehicle weight just a little more. Some of these changes are already represented on the want lists of the automakers. General motors, for example, is seeking a base-metal calalysis, better electrostatic painting, more efficient machine tools, plastic windows, run-fast tires, better turbochargers, windows, run-fast tires, better turbochargers, more durable plasties especially for large body nanels and better ways of forming, welding and

finishing sheet aluminum.

Church's Chicken Great For Boaters, Picnickers

What's so hot about Church's Fried Chicken? Many things, says Willie Pegram, franchise licensee of the restaurant at 2561 French Ave., San-

The fresh chicken is first marinated for 20 hours in special ingredients before it is cut. It is then battered and deep fried in vegetable shortening. And, the chicken is served very hot, right from the deep fryer, to you.

That, Willie feels, is the reason that he has stayed with the Church chicken family for so long: "A good product for a good price." Willie, easily distinguishable by his

six foot-eight inch frame, says that, other than chicken, the french fried okra is one of the most popular items on the menu The menu is also supplemented with french fries, corn-on-the-cob, cole slaw,

jalapeno peppers and desserts, apple Fresh food, quick service, the right price brings customers back to Church's Fried Chicken

Church's Chicken Great For Boaters, Picnickers

What's so hot about Church's Fried Chicken? Many things, says Willie Pegram, francaise licensee of the restaurant at 2561 French Ave. San.

The fresh chicken is first marinated for 20 hours in special indredients before it is cut. It is then battered and deep fried in vegetable shortening. And, the chicken is served very hot right from the deep fryer, to you.

That, Willie feels, is the reason that he has stayed with the Church chicken family for so long: "A good product for

Willie, easily distinguishable by his six foot-eight inch frame save that other than chicken, the french fried okra is one of the most popular items on the menu.

The menu is also supplemented with french fries corn-on-the-cob cole slaw lalapeno peopers and desserts, apple and pecan pie.

Fresh food, quick service, the right price brings customers back to Church's Fried Chicken.

The service here by the team memhere as the staff is called is efficient and cheerful

Order anything from two large pieces of chicken and a roll for \$1.09 to the Super Family Pack from \$7.59 to \$9.80. Extras can be ordered with family packs, such as french fries, or special choices. Church's can take any size order to fit your needs. The family packs are great go-togethers for
