

Plan Concerns Urged To Enter Timber Field

NEW YORK CITY, Mar. 2.—Present and future possibilities of pulp can best be viewed from wide entrance of pulp and with mills into the business of timber growing, B. W. Fisher, president of the American Paper & Pulp Association, said today.

Speaking at a meeting of the Timber Association, he outlined the A. P. P. A.'s annual convention in the Waldorf Astoria. Mr. Fisher said this course was not only economically feasible, but covered "the only avenue" to present pulp supply conditions. He described a study made in the case of a Michigan mill which now imports its wood at considerable cost in freight rates. By growing its own timber, the mill could make a saving of 25 cents, the study indicated.

Thomas H. McAfee, president of the Timber Association, urged the pulp industry to support the program for the International Paper Organization, stating his confidence in the success of the program. He said the program would be a first step toward achieving an economic basis for the pulp industry in the world.

The industry's growth opportunities at home and abroad, he said, are being hampered by the lack of a timber supply. He urged the pulp industry to support the program for the International Paper Organization, stating his confidence in the success of the program.

PHILADELPHIA (AP)—A young girl, who is blind, is shown in the foreground of a photograph taken in the city of Philadelphia. The girl is wearing a dark dress and is looking towards the camera. The background is dark and indistinct.

Philadelphia Bank Men Rule On Blind

PHILADELPHIA—What would you think if you came to work in an office and found a blind man sitting at his desk? The Philadelphia Trust Company has decided to employ a blind man as a typewriter operator. The company's decision was based on the effect of the blind man's presence on the other employees and the public. The company's president, J. H. Smith, said that the blind man's presence would be a source of inspiration and pride for the company's employees.

Financial matters that arose from the matter, the Philadelphia Trust Company has decided to employ a blind man as a typewriter operator. The company's president, J. H. Smith, said that the blind man's presence would be a source of inspiration and pride for the company's employees.

Hospital For Aging Rivers In Hazard In Mississippi

By GEORGE BRADLEY

MINNEAPOLIS—Hazardous in the water of the main Mississippi river channel here is a "hospital" for aging rivers.

The Lewis H. Brown, director of the St. Anthony Falls Hydraulic Laboratory for the University of Minnesota, calls the water-enclosed structure of these dams and concrete a "cure" for old rivers. Aliments which have already been diagnosed are now being treated.

Sedimentary particles in streams and other streams of water. These particles are carried by the river and water currents. "Weak backs" suffered by river and irrigation dams.

But even of the banks, allowing all rapid flow channels. "Infections" that sometimes occur are striking water.

There is always a possibility of sudden under way in the river. The water is carried by the river and water currents. "Weak backs" suffered by river and irrigation dams.

Through the main river and by sediment at the top of the river. The water is carried by the river and water currents. "Weak backs" suffered by river and irrigation dams.

This danger is illustrated by hundreds of dams and levees. The water is carried by the river and water currents. "Weak backs" suffered by river and irrigation dams.

Most recent project completed is that which will give the city of Houston, Texas, an unlimited drinking water supply. The water is carried by the river and water currents. "Weak backs" suffered by river and irrigation dams.

Laboratory tests indicated that the dam would have to be built to withstand a potential maximum flow of 60,000 cubic feet per second after impounding a reservoir of 100 feet at the dam and entering an area seven miles long and one-half mile wide. The water is carried by the river and water currents. "Weak backs" suffered by river and irrigation dams.

The dam is being built to withstand a potential maximum flow of 60,000 cubic feet per second after impounding a reservoir of 100 feet at the dam and entering an area seven miles long and one-half mile wide. MILITARY MEN FOR TODAY... MANY GREAT MILITARY MEN HAVE ENDED IN DISHONORABLE DEATH BECAUSE THEY COULD NOT BRIDLE THEIR PASSIONS...

We see where old Mount Lima is in eruption again. Well, with everybody carrying on the way they are all over the world, you can't blame Lima for blowing her top.

Herman Talmadge accuses the Atlanta Journal of "yellow journalism" because it exposed a political fraud in the election of himself and his father.

Congratulations to the patrons of an Indianapolis supper club who filed out quietly when the place caught fire the other night. No one was killed.

Editor & Publisher tells of a man of 16 named Pietro who was sent by the New York Times to the Communist publication to see if it could continue printing.

A Fortune magazine survey of public opinion would seem to indicate that President Truman has very little chance of being re-elected next year and gives Governor Dewey the lead over three or four other Republican aspirants.

A big decision will have to be reached in the State Department this week on what to do about Greece, if the question, indeed, has not already been decided.

There is a lot of talk these days whether certain people in daily headlines are Communists, and just what in the dickens is a Communist anyway.

The New Directory

Sanford's first Polk City Directory in 20 years, completely standardized, is now being delivered to subscribers...

The new directory is an attractive volume of 314 pages listing 9,648 names in Sanford and Seminole County...

Departments of the new guidebook are as follows, in order: Story of Sanford, Sanford list of names, Sanford rural routes directory...

Special features of the alphabetical lists of names are the listing of the names of wives; the listing of the names of men in the national services...

The street, or pink, section, in addition to showing locations of streets and who lives or does business on them, denotes by symbols the homes that are owned by the occupants thereof...

As a part of its local directory service, R. L. Polk & Co. is sending copies of the new directory to Chambers of Commerce throughout the Southeast...

First and last on the new Sanford roster are Cliff M. Ables and Robert Zittrower. But Kirby is not here, the directory shows.

Feeding Foes

There are, naturally enough, many people who frankly grudge the funds for which Herbert Hoover asks, to feed the Germans...

If by a virtual forgiveness, of our recent enemies in Europe and Asia we can do away with these disastrous struggles, and shame them into permanent peacefulness...

In practicing such a policy, following the ways of the Quaker ancestry of Herbert Hoover, we will be justified.

Compulsory Music

It may surprise many people that Western Reserve University, in Cleveland, is including in its curriculum a compulsory course on "cultural music."

Music was naturally more primitive in his time, with much less variety than we moderns are accustomed to; but the main essentials were there...

It is not so many years since any study of the appreciation of music was regarded as "sissy" by boys. But that idea has gone with the snows of yesteryear.

Little Prospect for Low Increasing House Rents | Not Enough Votes in Sight To Override Certain Vets

Special to Central Press WASHINGTON—Although there is much agitation—especially among the senators—for legislation permitting rent increases or doing away with rent control altogether, there is not much chance of such a bill becoming law in the immediate future.

It takes a two-thirds vote to override a veto which, in this case, means 63 Senate votes. If the Republicans voted solidly to override a veto they would have to pick up 12 Democratic ballots.

President Truman's FAILURE OF THE Supreme Court in act in February on the John L. Lewis contempt conviction, increases the possibility of a new coal crisis.

McKellar has voted for 100 much New Deal legislation to attack Lillenthal forthrightly on that issue. But he got it in. Rightly or wrongly, the veteran Tennesseean has done a very able and shrewd job.

SUBMARINE SINKING TOLD

NEW YORK, Mar. 4—Navy Vice Admiral Charles Lockwood described today for the first time how the submarine Tang was sunk in 1944.

The Tang was hit along one of its own torpedoes set like a boomerang and circled around to sink the submarine. Seventy-eight crew members lost their lives and nine survived the freak accident, which occurred during a raid off the China Coast.

Cotton Exchange

(Continued from Page One) ... the Senate, but the proposal has failed. There are no bills required to be made in the House.

About 800 members of the A. F. of L. Seafarers' International Union joined the financial employes in a picket line around the building that houses the exchange and building service employes refused to cross the picket line.

The House of Governors of the exchange was believed to be meeting this morning.

The first federal charter for the American National Red Cross was granted in 1900 and revised in 1903. The latter, with minor changes, prevails today.

THE OLD HOME TOWN By STANLEY

Concern Over

(Continued from Page One) documents. The former secretary urged the Senate not to lose any time in ratifying these treaties because, he said, they are a necessary step toward world stability and peace. Byrnes made the point that normal conditions could not return in Europe until the occupation armies are withdrawn, something which waits on the general approval of the peace pacts. He noted that while most of the American and British forces have been pulled out of Italy, the Russians still are in Bulgaria, Romania, and Hungary, and that they are due to remain there officially until 90 days after the treaties go into effect.

Byrnes reviewed the tug-of-war between Russia and the other three big powers over the disposition of Trieste. He acknowledged that the final decision to make the contested area a free territory will present many serious problems. But, Byrnes explained, it was a choice of that or not having an agreement at all. He said he was reconciled to the compromise for another reason, his fears as to what would have happened if Trieste had been given to Italy. He speculated that rioting would have broken out, that Yugoslavia would have said it was necessary to put down the trouble on its border, and that it then would have sent troops into Trieste, which might have produced another problem for the UN Security Council.

ANGLO-FRENCH TREATY SIGNED DUNKERQUE, France, Mar. 4.—Great Britain and France today signed a 50-year treaty of alliance. The purpose is to provide mutual protection against any future German aggression. It also calls for closer economic collaboration.

GREEKS ARREST 250 ATHENS, Mar. 4. (AP)—Greek police rounded up 250 persons today. The 350 are accused of recruiting guerrilla forces and sending arms to the irregulars who are fighting the Greek army in northern Greece.

Foster Honored

(Continued from Page One) Robson started making buying trips to the north in 1944 and has since visited the home of Mr. and Mrs. Foster twice a year. Others well acquainted with Mr. Foster when he was here include John Brumley, W. A. Adams, Clarence Fields, J. M. Moye, R. A. Williams, Mrs. J. P. Ridge and Mrs. H. J. Binbee. He was a member of the Brotherhood of St. Andrew organized by Father A. S. Peck and served in the Boys' Choir of the Episcopal Church.

After attending primary and grammar school in Sanford, E. K. Foster finished his high schooling in Jacksonville and was later a call boy for the A.C.L. as may be remembered by many railroad men here. He attended the University of Florida, graduated with high honors, and has the Phi Beta Kappa key.

Following an ocean trip on a merchant ship, he went to work for Western Electric Company in New York and later with the Sylvan Tube Company and with Radio Corporation of America. He became much interested in radio in its early stages, and is a co-inventor of the screen grid tube used in today's sets. He also pioneered in radar work and has to his credit several inventions in both radio and radar. He also invented the torpedo shaped reading lights for beds.

In 1934 he joined the Bendix Radio Company and became their leading production factory manager in New York State. In 1939 he was sent to take over the four Bendix plants in Baltimore and later helped design their present ultra modern plant for Radar and in Towson, Md. During the war, Mr. Foster's plant had the honor of being awarded the first Army-Navy E for production.

During the past fiscal year, over a quarter-million persons affected by disaster were assisted by the Red Cross in 422 counties of 41 states, the District of Columbia and Alaska. Red Cross chapters handled approximately 450,000 veterans' cases for the year ending March, 1945, and 1,000,000 for the year ending March, 1946. They expect to handle at least 1,750,000 veterans' cases during the 12-month period beginning July 1, 1946.

4 People Killed

(Continued from Page One) Warren C. Crockett, about 70, and a man in his 40's, Michael Krivovich. The fire apparently broke out on the ground floor and swept up stairways to the roof. MIAMI, Mar. 4.—Fire Chief D. C. Kennett investigated the blackened ruins of the Miami Beach Marine Basin machine shop where a fire last night destroyed 53 yachts and private boats. Chief Kennett said he couldn't make an accurate estimate of the total loss yet, but the owner of the property said the toll would reach \$250,000.

Mexico Plans

(Continued from Page One) tends to protect weaker countries the world over from oppression. Speaking in the National Palace after a thundering, joyful greeting as his own ambassador of goodwill to this sister republic, the American Chief Executive warned that his country, pledged to non-intervention, can not be indifferent "to what goes on beyond our own border." He defined his interpretation of the doctrine of non-intervention to mean that "a strong nation does not have the right to impose its will by reason of its strength, on a weaker nation."

Mr. Truman spoke after Mexican President Miguel Aleman, extending his warmest welcome, asserted at the conclusion of a state dinner honoring the American visitor. "America's voice is heard in the choral strain of the countries of the world, with ever more distinct and greater clearness." President Aleman welcomed United States investments "with a proper respect" for Mexican laws because "we have economies that can complement one another fruitfully" and "a mature understanding of your own interests could not oppose the program of our industrialization."

Without specifying conflicts in the past, the Mexican chief executive said "if prejudices have been an obstacle (to inter-American harmony) let us make the education of our children and of our youth a liberation from that inexcusable obstacle." Mr. Truman flew in from Kansas City at 10:58 A. M. (EST) for a three-day good-will visit. His trip got off auspiciously with cheering crowds throwing flowers in his path as he drove to the U. S. embassy.

At tonight's banquet reception Mr. Truman said that events in one country may have such a profound effect in other countries that a violation of accepted principles of international behavior is of concern to the

whole family of nations.

Wholehearted acceptance of the doctrine that the strong cannot impose on the weak is "a part of the basic international law recognized by all the American republics," Mr. Truman continued, and added: "My own country will be faithful to the letter and to the spirit of the law." Lawlessness among nations can no more be tolerated that lawlessness among individuals, he added. President Aleman and high dignitaries of the Mexican government shared top spots in the greeting that followed Mr. Truman's arrival. However, thousands of laymen and humble farm workers turned out with their wives to cheer as the American President rode through two miles of flag-bedecked streets to the embassy. Mexican soldiers with fixed bayonets guarded the National Palace tonight as they did the Central Air port when the presidential plane, the "Sacred Cow," taxied to a swift landing after a seven-hour flight from snow-covered Kansas City.

Property Owners

(Continued from Page One) Forest City district for improvement of Balm Beach drive which runs for three quarters of a mile from the Spring Lake Road road to Bear Lake, H. B. Pope, chairman of the Commission, directed Commissioner B. J. Overstreet to investigate the matter thoroughly. James Neal, spokesman for the delegation from Bear Lake, told of how motorists became bogged down in the road, said that new homes were being built in the vicinity by people with children, and that school buses could not negotiate the road at present. Mr. Neal also pointed out that the south end of Balm Beach Drive ends but a short distance from the Orange county clay surfaced road and asked how a connecting link could be made. Commissioner Overstreet told him that if he would secure deeds to a 50 foot right of way for the road extension from property owners that M. E. Hagan, engineer, would be directed to make a survey in order to make the extension.
