Russians Are Defeated On Franco Issue

Dulles, Malik Confer With Far Eastern Commission About Japanese Treaty

LAKE SUCCESS, Oct. 27—(AP)—The U. N. Assembly's special political committee today defeated a Soviet bloc attempt to delay debate on a proposal to soften U. N. restrictions against France, Spain.

Poland asked for postponement until Monday of the discussion on a United States-supported resolution which would revoke the ban on full diplomatic relations with the Franco government and would permit Spain to join specialized U. N. agencies.

The vote was 34 against, six in favor and six abstentions.

As the debate opened, Latin American and Philippine co-sponsors of the resolution emphasized that the lifting of restrictions would not imply a favorable judgment by the United Nations on the "domestic policies" of the Franco regime.

An American source said the United States will vote for the resolution, which does not permit full Spanish membership in the U. N. or repeat an earlier formal condemnation of Franco's government.

Secretary of State Dean Acheson forecast the new American policy in a letter to Senator Tom Connally (D-Tex.), chairman of the Senate Foreign Relations Committee, last spring.

He said that if the U. N. re-

20 Year Sentence Given Student For Murder Of Infant

Girl Admits Killing Newly Born Illegitimate Child

TALLAHASSEE, Oct. 27—(AP)—Barbara Louise Gupill, 24-year-old Florida State University graduate student, today was sentenced to serve 20 years and 20 days in prison for the murder of her illegitimate child.

Judge Wm. May Walker,

Miss Gupill pleaded guilty to second degree murder of the baby girl which she said she bore unattended in an FSU dormitory bathroom last August.

By the end of next week all prison trash should be removed from highways and parkways, Mr. McKibbin stated.

Electrical and telephone facilities have been restored, and City forces under Sid Richard have repaired the street lighting system.

The City Hall, Yacht Club building and the city storage warehouse on the lakefront had minor repairs completed. The front of the Municipal Hall Park grandstand had several sections of the fence blown off, and portions of the fence were blown down, said Mr. McKibbin.

Foundation reinforcing steel for the Municipal Stadium has arrived, and pouring of the concrete for the foundation was started this week. J. A. Rovire heads the Jarco Corp., Orlando, which has charge of the construction.

Stakes locating the structure were set by Fred Williams.

Widespread rumors, said Mr. McKibbin, have been plaguing Sanford people to the effect that a new order by the National Production Authority might block construction of the stadium, as base ball parks and grandstands are mentioned as being prohibited for new construction.

President of the Memorial Stadium is such, however, he added, that the construction can proceed with the construction since the grade stakes were located Monday and excavation and pouring of some of the concrete foundations was completed yesterday.

CURFEW EXTENDED PHILADELPHIA, Oct. 27—(AP)—Love's young dream was given a boost yesterday by Philadelphia's city council.

Council voted to extend from 11 P.M. to midnight the legal hour for parking on the highways of the city's Fairmount Park—long a favorite haunt of guys and their girls.

Christmas Seal

An exhibit of Christmas Seal stamps has been placed on display in the window of the Florida Power and Light Co., and is sponsored by the Seminole County Tuberculosis and Health Association. The Christmas Seal signs of the double barrel cross and the single barrel significant to tuberculosis control in this county. Shown here is the latest Christmas Seal stamp.

Help Fight TB

NEWPORT, R. I., Oct. 27—(AP)—Three men whose baggage included a check-writing machine, a small printing press, a typewriter, and blank checks were questioned today after a food store manager questioned one of their checks.

Shea said "no charge has yet been placed against the men" and added "we can't go through questioning them."

Shea said he would call in Federal Bureau of Investigation agents to question the men also.

The trio was taken in custody yesterday after the manager of a First National Food Store received a \$40 check they offered after making purchases of \$2.00.

CHECK WRITERS

NEWPORT, R. I., Oct. 27—(AP)—Three men whose baggage included a check-writing machine, a small printing press, a typewriter, and blank checks were questioned today after a food store manager questioned one of their checks.

Shea said "no charge has yet been placed against the men" and added "we can't go through questioning them."

Shea said he would call in Federal Bureau of Investigation agents to question the men also.

The trio was taken in custody yesterday after the manager of a First National Food Store received a \$40 check they offered after making purchases of \$2.00.

WRONG BOTTLE

WATERLOO, Ala., Oct. 27—(AP)—A 4-year-old boy died after drinking almost a quart of whisky Coroner William Chisholm reported today.

The coroner said the child, Billie Wayne Brown, apparently found the bottle on the back porch of his home while the family was eating breakfast yesterday.

He was discovered in the back yard of the home. The parents first put him to bed at home and later carried him to a Florence hospital, Chisholm said.

The boy was pronounced dead on arrival.

Florida Juvenile Courts

TALLAHASSEE, Oct. 27—(AP)—Florida voters will decide in November whether to give the Legislature the right to set up statewide system of children's courts.

The first proposed constitutional amendment you'll see on your general election ballot Nov. 7, is one to authorize a law establishing

eight of its 67 counties. However, they have no authority to handle criminal cases, so children charged with such offenses must go to adult courts.

This, says the Bar Association, leaves to the juvenile courts only the minor违法犯罪s of childhood so that those children who most need the intensive methods of the juvenile courts will be the ones who were denied them.

Organizations backing the plan are drafting a proposed juvenile court law to be offered to the 1951 Legislature if the amendment is adopted.

The amendment is supported by such organizations as the Florida bar, the State Children's Commission, the Florida Probation and Parole Association, Florida Juvenile Court Judges Association, State Chamber of Commerce, Florida Council of Teachers, League of Women Voters, Florida American Legion, the Masonic Grand Lodge, and other court attaches would be appointed or elected.

No organized opposition to it

has been announced.

Taxes, Credit Curbs To Be Tried Before Wage And Price Controls

By SAM DAWSON

NEW YORK, Oct. 27 (AP)—Wage and price controls may be but off for a while—some top government men assure us today—until controls on money, credit and materials are given a shake-down test, and until Congress can give the tax screw another twist.

Businessmen keep in mind that all such discussions in the next two weeks could be colored by pre-election campaigns, many of which are inclined to take heart. Some of them who former- ly thought all-out controls would be in force before the end of the year now hope they may be, very off indefinitely.

Other businessmen are loud in denunciation of controls already being tried, because these curbs on credit or use of materials either have cut down business and production or threaten to soon.

Still more businessmen are being called to Washington this week to hear what is in store for them—how much materials they will be allowed to use, how much of their production may be retained for civilian goods.

Controls on materials, money and credit probably haven't reached their peak yet. And certainly the protests against them haven't reached their peak either, since the real pinch won't start until defense orders crowd manufacturers' order books.

But here are this week's reasons for concern: wages, price and power controls.

Top economic mobilization coordinator Symington calls for a fair trial for limited controls before any decision is made to adopt total controls. Limited controls hit at credit, money supply and civilian production. Total controls would mean regimenting wages, prices and jobs.

Leon H. Keyserling, chairman of the President's Council of Economic Advisors, says stricter controls are needed, although the inflation seems to be planned, but he, too, prefers for the present to rely on higher taxes and credit controls to curb inflation and assure arms production.

Dr. Edwin G. Nourse, Keyserling's predecessor, calls for a "sober and loyal" planning for an "all-around ten-year program," and thinks hasty controls now would mean economic waste.

A labor department official, Robert C. Goodwin, executive

director of the Federal Office of Defense Manpower—says manpower controls are "not needed at this time." But the already tightening labor market, he adds, still hasn't felt the effect of defense production.

Now that these official reassur- ances, businessmen are stacking few bunches of their own.

D. F. Hahn, manager of the National Retail Dry Goods Association's merchandising division, predicts price and inventory controls in the near future.

Businessmen learn today the National Production Authority has decided to go ahead with a ban on building amusement places.

NPA has called in machine tool manufacturers and steel products producers today to discuss controls including allocations of steel for building 10,000 freight cars a month for six months.

Radios and television manufac- turers meet NPA officials tomorrow, and so do makers of refrigerators, washing machines and vacuum cleaners.

A 60-man committee from the rubber industry urges NPA to lift its overall curb on new rubber consumption, and substitute an industry plan. This would mean scaling up the amount of natural rubber used in each product, rather than the present rule which says how much natural rubber each company can use a month.

The industry, for example, now uses 60 per cent natural rubber in tires. It wants that cut to 40 per cent, with synthetic making up the rest. The ratio would be different in other products. Under the present NPA ruling, the industry contends, the amount of natural rubber in tires might drop as low as 20 per cent.

And the building and credit men continue their blasts at the curbs laid down on home mort-

*Combination of Powerglide Automatic Transmission and 301-h.p. Engine optional on De Luxe models at extra cost.

It operates more economically

You'll enjoy extra-fine performance and save money, too; for Chevrolet is the only low-priced car with a Valve-in-Head engine—trend-setter for the industry.

Marine Shot Down

(Continued from Page One)
ments.
Maj. Dan Davis of Itta, Miss., returning from a mission, flew alone.

Together the Marines strafed and rocketed houses into which the North Koreans had fled. They destroyed one truck and several ammunition packed carts. Then Reilly noticed his oil pressure was falling.

The two Corsair pilots turned for home. They had gone five miles when Reilly's plane gave out.

The Texan brought it down on the rocks.

He had heard the second bump was harder than the first on a water landing. But the first was so rough I said "son of a gun." It hit the second time in the middle of the last word and they're right—the second is the worst. I almost bit my tongue off," Reilly said.

"There was about 15 feet of water. I slipped out of my parachute because it was dragging me down, grabbed some emergency stuff and swam and waded to shore."

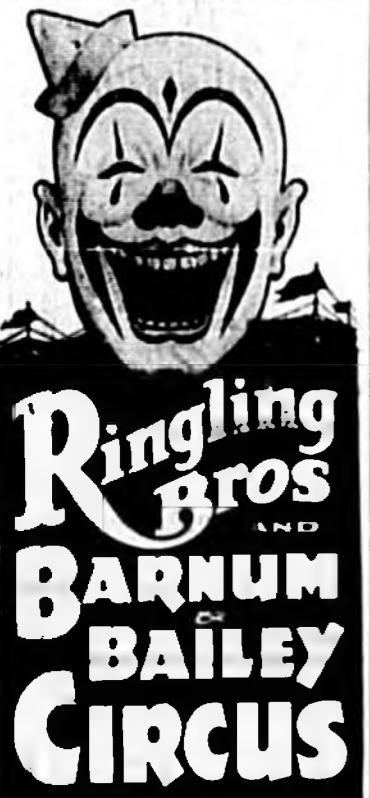

"There was a couple of inches of snow. I hid in a thicket. Then my clothes and shoes started to freeze and I had to stand up or freeze."

Followed pilots swarmed around Reilly as he stopped shivering, but unbuckled from the helicopter. One threw a blanket over his shoulders. Another thrust a quart of whiskey into his hands.

"Boy are you shivering," one said.

"You should have seen me a while ago if you think I'm shivering now," replied Reilly.

Hollywood

By BOB THOMAS

HOLLYWOOD, Oct. 27— North Koreans popped up in scattered areas.

Two battalions of U. S. and ROK marines were rushed south of Wonsan port to stop a maraud from the diamond mountains. That band of 1,000 Reds striking is 30 to 40 miles from the big east coast port where U. S. Marines and infantry and ROK marines began landing Thursday.

An American Marine battalion from Wonsan landed at Kojo. A battalion of South Korean Marines landed farther south to sweep a trail and the terrain, led by a Red Korean Brigadier General.

A U. S. 10th Army spokesman at Wonsan said the situation was not serious, but added,

"There are more North Koreans behind us than ahead of us. They are coming out of the hills all down the coast raiding towns, holding up trains and generally annoying us."

One unconfirmed report said Red raiders killed all villagers at Iki who had been friendly to American troops. The town is north of Wonsan. There was no estimate on the loss of life.

A spokesman for the Marine first air wing said pilots had killed 1,000 Red raiders south of Wonsan in four days.

An 8th Army spokesman at Seoul said he could not verify ROK frontline reports of facing large forces of organized Chinese Reds. He doubted if they were true.

AP correspondent O. H. P. King quoted one high staff officer.

"The rumor of 6,000 Chinese Communists in North Korea is purely rumor as far as I am concerned. I have not seen any."

But reports that Chinese Reds were fighting on the North Korean side persisted.

One Chinese Red prisoner was quoted as saying two divisions of Chinese Reds troops had crossed the Yalu from Manchuria to get into the fight.

AP correspondent Hal Boyle reported an 8th Army officer as expressing the belief the Chinese encountered by the ROKs were "unfit" for service in the dying border inhabitants induced to "volunteer" into the North Korean Army's last stand.

Correspondent Boyle said all sources he talked with expressed disbelief they were fighting segment of the Chinese Communist army.

A U. S. Fifth Air Force spokesman said no movement of Red troops from the north had been seen by pilots since the fall of Pyongyang Oct. 20.

"The movement of the enemy today," he said, "was still toward Manchuria—not from it."

The British Commonwealth 27th Brigade and the U. S. 24th Infantry Division were preparing to move toward the Manchurian border on the far western side of the peninsula.

On the east coast AP correspondent Stan Swinton reported Red bandit groups ranging from company to battalion size foraging for food and supplies.

He said one gang of 1,500 Red

Korea

Continued from page one

Reds had been captured near the town of Ikuo on the Sea of Japan coast.

Far to the north of these scattered forces, the ROK capital division plodded over two inches of snow toward the Manchurian border. It was only 38 miles away at last report.

Miss Crawford won't disclose where she obtained her four kids.

"I figure it's nobody's business," she said. But she admitted she did not get them in California. "Under the California law, I couldn't adopt a child," she said, "but single persons are not allowed to. I think that is wrong. There are a lot of single men and women who would like to have children and could give them good homes."

A spokesman for the Marine first air wing said pilots had killed 1,000 Red raiders south of Wonsan in four days.

An 8th Army spokesman at Seoul said he could not verify ROK frontline reports of facing large forces of organized Chinese Reds. He doubted if they were true.

Minimum Wage Act Is Clarified For Retail Businesses

WASHINGTON, Oct. 27— A Wage and Hour Administration bulletin issued today explains to retail and service establishments how to determine whether they are exempt from paying their employees a minimum wage of 75 cents an hour with overtime beyond 40 hours a week.

An Administration spokesman said "a few thousand" of the estimated 12,000,000 workers in the service would be exempt from the minimum wage requirements as

a result of amendments to the Fair Labor Standards Act. These amendments became effective last Jan.

The bulletin lists "exemptions" by which an employer may determine if he is required to meet the wage-hour law minimum requirements.

Here are two examples:

1. A laundry is exempt if it does not do more than 25 per cent of its annual dollar volume from sales or services to customers engaged in mining, manufacturing, transportation or communications business.

2. Contract telegraph agencies are exempt if they handle less than \$500 business a month for a telegraph company or messages for the public.

There are also three general exemptions for employers seeking exemption under the wage-hour law:

1. The establishment must be engaged in making sales of goods or services in a volume of at least \$5,000 annually.

2. Of the establishment's total annual dollar volume from these activities (A), at least 75 per cent must be from sales of goods or services which are designated as retail sales or services and are not for resale, and (B) more than 20 per cent must be from sales of goods or services which are made within the state in which the establishment is located.

Retail firms selling goods and

their own premises would be exempt provided more than 75 per cent of their sales receipts come from goods produced within the state.

Other firms subject to exemption

stores, furniture stores, restaurants, hotels, repair garages, watch repair establishments, beauty parlors, barber shops, newspaper companies, farm implement dealers, automobile service companies and other such local establishments.

TODAY'S BIBLE VERSE

Ignorant and superstitious people have a great dread of the supernatural. God rules both realms and both are benevolent. A good man needs fear nothing in this life or the life to come! They were troubled, saying, It is a spirit; and they cried out in fear.—Matt. 11:26.

Fort Myers has a new mayor. And of all things, she is a woman. Well, well! will Mrs. Gatchell can beat her cooking.

Not many people know that Al Jolson, popular "Mammy Singer" of "Sonny Boy," "Sweeney," and "Avalon," was born in Russia of Jewish ancestry. He would have had a hard time adjusting himself to Communism and trying to sing the "Internationale" if he had remained in Russia.

The Orlando Sentinel's campaign to raise funds for the Negro whose house was burned down by a group of white night riders was reported in New York newspapers and probably elsewhere throughout the country. That's the best way we know to combat the ignorance and prejudice which exists in some places up there against the South.

The State Milk Commission is about to throw a Tampa dairymen in jail for failing to raise the price of their milk from 24 to 25 cents a quart. With everybody in the country howling about high prices and the federal government studying price controls to head off inflation, it is paradoxical that a man who tries to keep his prices down should get in trouble with the law. It just goes to show how completely screw ball we have gotten to be in this country.

Despite the fact that the South was dubbed a few years ago the nation's "Economic Problem No. 1," people from other parts of the country continue to pour into this section. The Department of Commerce reveals that since 1940 the South has gained 12.6 percent in population, compared with 10.2 percent for the North Central region and 9.2 percent for the Northeast. Furthermore, the population of the South is 46,931,354, compared with slightly more than 44 million in the North Central, 39 million in the Northeast, and 19 million in the West.

We have read statistics about there being 10,000,000 habitual drunks in the United States, 15,000,000 people who take dope in one form or another, 12,000,000 mentally incompetent, and so forth, but still it came as somewhat of a shock to us when President Truman pointed out, as he bluntly did, that one-third of all the young men in the country are either mentally or physically unfit to serve in the armed forces. Now you don't have to be a football giant or wear a Phi Beta Kappa pin to be accepted by the Army. All they ask is that you be able to read and write, and have two feet that aren't flat. And yet every third man between the ages of 19 and 26 you meet on the streets can't qualify.

President Truman's statement that this country is "not too proud to fight" is a reference to President Wilson's blunder back in 1916 when he was trying to maintain "peace at any price" and made the public statement that "There is such a thing as being too proud to fight". Germany and everyone else took that to mean that this nation would not go to war "no matter what", with the inevitable result that the Louisiana was sunk and submarine warfare was carried right to our shores. It was one of the few great mistakes Wilson, a truly great president, ever made. And it is wise to say that he did not mean what nearly everyone took his statement to mean. Whenever a nation is "too proud to fight" and won't fight, it

Men Without Countries

One of the tests of the new Communist control law will be in dealing with stateless aliens. These are the foreigners who cannot or will not qualify for naturalization, yet who have no other land they call "home" and have no intention of leaving the United States. Deportation proceedings against such persons end in frustration unless there is a nation to which they can be deported. Where none exists, the suspicion is bound to arise that no nation is willing to claim or admit these people because they are incorrigible trouble-makers. It has not heretofore been hard for anyone alien or otherwise, to stay clear of American police if he does not make trouble for them.

There are more such persons than might be supposed; these are not the few individualists who occasionally make a public display of renouncing the land of their birth to become citizens of the world. Those are the ones who quietly disappear from their native lands, and thereafter seek places where they can live in the shadows, unnoticed, without ties. Some of these were wont, in the old days, to drift from place to place in Europe. It is now harder to cross frontiers in Europe, and behind the Iron Curtain presumably it is impossible to live in anonymity. One of their most famous gathering places used to be Shanghai, but the new Communist regime is trying to change that, too.

More of them may be turning to America for refuge in the past gladly given to those who want to live peacefully. Strangely some of them try to promote here the evil which has closed other hands to them—Communism. This is hard to understand. Perhaps they dream of being heroes in the new world of which they talk so glibly. Perhaps it is enough to be heroes of the moment in the little worlds of discontent they breed around them. Whatever their reasoning, they pose a perplexing problem of what to do with them.

Materials From Europe

It is good news that the Marshall Plan is bringing some return to the United States in the form of strategic materials, even though the returns are small. Purchases of materials wanted for military and civilian industry stock-piles have been made in a number of Marshall plan countries, mostly from the counterpart funds which these countries provide in their own currencies, to match the American funds they receive. The Economic Co-operation Administration argues, therefore, that they are bought at no additional cost to the American taxpayer.

The quantities of materials which have been purchased since the program was initiated are insignificant in relation to both the total cost of the program and the American consumption of the materials involved. The ECA has been giving most of its attention, as regards the purchase of materials, to bauxite, lead and zinc. The quantities of lead and zinc which are obtainable in Europe are not of great importance in any case, in relation to quantities obtainable from our own mines and other sources of supply. With bauxite, source of aluminum, the story is different. Not only are there substantial deposits of the ore in Europe, but some of the most important deposits in the world are in colonial possessions of Marshall Plan nations. An interesting footnote is that the third rank nation of the world in bauxite production is Hungary, a Russian satellite, on the border of the Marshall Plan area.

Aluminum, already pressing steel as the dominant basic metal of industry, seems destined to become increasingly important. An additional point of justification will be made for the Marshall Plan if it can assure some of our future supplies of bauxite.

A Matter Of Salt

The importance of salt is attested by the long series of much-quoted remarks about it. To this series might some be added the conclusions of Douglas Walkington, a Canadian chemist, who says it started kissing. He thinks love dwellers licked each other's faces to obtain the surface salt, and so the kiss was discovered, rather than invented as Jonathan Swift supposed. Among other uses, salt is taken, a grain at a time, with tales like this one.

Too Late To Classify

By RUSSELL KAY

There is nothing that can equal a playful hurricane when it comes to making a monkey out of the weather man. The best way to do this is to start a panic, to take one alleged hurricane, mix it with a mess of newspaper headlines, a flock of radios and a professional weather prognosticator. I don't know whether the Governor issued a proclamation or not, but if last week wasn't National Hurricane Week it sure ought to have been. I've been living in Florida nearly 40 years but I can't remember so many hurricanes in so short a time.

Now a mere enough American is really unusual. It can do what's a lot of damage like the one that hit the Miami area a few days ago. It came so fast and hit so hard that the weather men were hard pressed to keep up with it.

According to all the information we could obtain, that storm was supposed to hit Tampa. According to radio and newspaper stories it was heading straight somewhere in the Gulf. It was said to have winds of 100 miles an hour or more and was supposed to hit the West Coast within the next few hours.

As the day wore on I kept watching for signs that might indicate a storm; there were none. The sun continued to shine, there were few clouds to thicken, and the wind and no wind whatever.

Every hour and half-hour radio reports and newspaper stories continued to build up this mysterious visitor that was traveling in our direction and would probably knock us cockeyed around midnight. No storm ever had a more dismal or impressive build-up.

Everyone was alerted from Ft. Myers to Clear Keya and began to evacuate the low-lying and low-lying areas. Officials in various communities opened school houses and public buildings and made preparations to take care of refugees. One friend who lived in one of the most substantially built hotels on Davis Islands became panic-stricken and, throwing a few things in a suitcase, moved to a downtown hotel.

Coast Guard and Red Cross personnel were called to duty and just about everybody made preparations for a grand and glorious pushing-around by Mother Nature.

Each succeeding radio report throughout the evening proved more distressing. Folks fearsome of property damage boarded up their windows, took their cars to garages, filled their bathtubs with water, got out candles and oil lamps while others just sat and prayed.

Now I don't know the first thing about weather forecasting from a professional standpoint, but somehow, from my experience with other storms, I just couldn't get excited or even believe that we were going to have on such

reports as we were hearing did not ring true with the barometer holding fairly steady, no rain, no

'JUST A LINE TO SAY WE ARE NOT FORGETTING YOU!'

Free Press Value
To Democracy Is
Told By Speaker

By BILL ROSS
(For HAL BOYLE)

TOKYO—(AP)—Most newsmen who covered the Korean war gave their overseas address as No. 1 Shinbun alley. This is the location of the Tokyo correspondents' club.

During the past four months the traffic that flowed in and out of the five story building at times rivaled that of a state-side hotel caught in the crush of an American Legion convention.

He addressed a luncheon of the 40th convention of the Southern Newspaper Publishers Association, which will be in session at the Greystone Hotel here through Saturday.

Dr. Gaines made the point that there are two chapters in the nation's history relating definitely to journalism in its widest implication.

He said the importance of the guarantee in the first constituent principle of a free press setup as a guarantee in the first constituent agreement has been given a new and a very kind of proof by the most recent story in impounding that four controlled sectors of the earth.

Every one of those despotisms, he continued, "has sought first of all the police or military power adequate for its terrorism and second, the control of all sources of information."

Thus, it poisons the springs of knowledge which feed the restlessness current of public opinion."

Dr. Gaines said the other chapter was started "when Robert E. Lee first proposed a modest program for the larger preparation of journalists on the level of highest education."

"In any true sense," the editor continued, "this vision of the first constituent principle has to have a guarantee in the first constituent agreement given to those correspondents who covered it."

But perhaps the ultimate indignity was stirred by the man boxes, with ever increasing stacks of letters and packages, addressed to those correspondents who would never return to the clubs those who lost their lives on the embattled peninsula or enroute there.

A tiny pump organ is the correspondence club's monument to the war, you could almost always see a correspondent with an arm or a leg in a cast resting in the lounge. There were others battered and beaten—reminders of the toll the Korean war inflicted on newsmen who covered it.

It isn't a pretentious club and definitely was not intended to accommodate and nearly 300 correspondents who called it home while the fighting raged in Korea.

Celery Feds Meet St. Augustine Here Hoping For Upset

Contest Promises To Be Thriller As Locals Strive To Get On Victory Road

By VERNON HARDIN—
The five times beaten Seminole High School Celery Feds, with upset on their minds, will tackle the rough and ready Yellow Jackets of Kettellius High School from St. Augustine here tonight at 8:15 P.M.

The Ancient City eleven, winners over Douglas High School of Douglas, Ga., by a score of 34-0 in their homecoming tilt last week, will bring with them one of the best aerial combinations ever to visit the Celery City.

Dick Watson, Kettellius back, will be one of the Fed's biggest problems... Watson is St. Augustine's best air-mailer and is just as tricky on land. In the Douglas-Kettellius game last week Watson led the Ancient City's ground attack with 48 yards while racking up a total of 120 yards passing.

The Jackets' kicking is better than par with a lad by the name of Dennis LaPrade doing the honors. LaPrade is a brother of the Florida Gators' Charlie LaPrade and is known as one of the conference's leading kickers. He will do most of the Yellow Jackets' point-aftouchdown kicking.

Jacket Coach Walt Slater has pronounced his boys ready for Sanford after putting them through a week's paces and preparation for the meet tonight.

The Jackets came through the contest last week with no serious injuries and boasting both a first and second string, will be at full strength for the game with the SHS eleven.

Meanwhile, at Seminole High School, Fed Coach "Goose" Ketters has kept his eleven busy during the practice sessions putting them through several days of scrimmages in an effort to prepare them for the Ancient City eleven.

Although still not at full strength, the Feds may pull a few tricks out of the bag and furnish what they started in Palatka last Friday night. After being rated the under-dog of last week's contest, the Feds started the game like the big tropical wind that passed through Florida last week and surprised everyone by grabbing a six point lead. The jackets had to give it back in the second half and were defeated by the Maroons by a score of 13-6.

At any rate, win or lose, when the final quarter ends the Feds are expected to have played a hang up ball game.

The probable Sanford starting line-up is as follows:

Dennis Bass, 170 left end

David Hester, 185 left tackle

Mike Whelchel 175 left guard

Terry Cordell 150 center

Jack Schirard 155 right guard

The barbary at Kew Gardens near London contains 45,000 living plant specimens.

The U. S. is self-sufficient in most fats and oils.

Governor Warren Will Dedicate New Stadium At FSU Homecoming

TALLAHASSEE, Oct. 27.—(UPI)—Florida State University's biggest homecoming celebration starts today.

Alumni of the university and various fore-runners of the Senate, Reps. Charles E. Bennett of Jacksonville and Bob Sikes of Crestview; members of the state cabinet, Supreme Court and Legislature.

The Seminole pow-wow, pep rally and student show, will be presented in the new \$250,000 stadium right after the banquet.

The main event will be the presentation of the student queen.

Governor Warren will dedicate the new 15,000-seat stadium at University President Doak S. Campbell in ceremonies just before the homecoming game between the undefeated FSU football team and the University of Tennessee.

Governor Gordon Browning of Tennessee will be the speaker at the first formal event of the weekend—the annual garnet and gold banquet tonight. It is sponsored by Garnet Key, honorary women's leadership organization. Gold Key, men's leadership group. Other guests will be Governor

Warren, whose sister Alma is president of the FSU alumni association, U. S. Senator Oscar E. Holland, Rep. George Smathers, Democratic nominee for the Senate, Reps. Charles E. Bennett of Jacksonville and Bob Sikes of Crestview; members of the state cabinet, Supreme Court and Legislature.

The Seminole pow-wow, pep rally and student show, will be presented in the new \$250,000 stadium right after the banquet.

The main event will be the presentation of the student queen.

The master of ceremonies will be A. M. Megill, Tallahassee lawyer who was a graduate of the Florida State College class of 1903. Two years later the institution was turned into Florida State College for women. In 1947, the legislature reconverted it to a co-educational institution.

TARGET OF AMERICAN B-29 SUPERFIRES. The marshaling yards and railroads at Wonson, North Korean railroad hub, are now a mass of twisted tracks, overturned and burned-out cars and engines, and demolished buildings. The Red industrial city was recently captured. (U. S. Air Force Photo from International)

Graziano, Janiero Fight Return Bout, Rocky Is Favored

NEW YORK, Oct. 27—(UPI)—
He's not as vicious in the ring
as he used to be but Rocky Graziano
still talks a tough fight.
"I'll knock his teeth," said
Rocky who meets Tony Janiero in a
return ten round bout at Madison
Square Garden tonight. They
met in their first clash last
Mar. 31.

The Rock is a 1 to 2 choice to
win over bland Tony, a flashy
boxer from Youngstown, O.

Tony, however, deserves his in
his last fight ever and I'll
wear him out. Rocky's slow and
easy to hit and I may even
knock him out.

If he can turn that trick, Janiero

will shoot right up into the higher tax brackets. As it is we
make a pile out of tonight's show.

Boxing Club hopes to cash its
\$80,000 gate there attracted the
last time at a \$10 top. This is
to be \$12. Some 11,000
fans, mostly students of the
wild-swinging New York, are expected
to show up for the re-opening of the garden boxing
season. The roden has been
enjoying the big arena.

Since the Janiero draw, Rocky
has hung up five layers in a row,
all on the road. He stopped Dan-
ny Toy Williams, Vito Colone,
Henry Brum, Gene Burton and
Pete Mead. Janiero, who celebrated
his 25th birthday, was unpointed
as last three loss. Al Guido,
Sonny Levitt and Chico Pacheco,

both metal contains approxi-
mately four parts copper and one part
tin.

Acorns found on Guadalupe Is-
land, off Mexico's west coast, are
two inches in diameter.

Children's Love Of Acting Can Be Used In Education

By DAVID TAYLOR MARKE
AP Education Writer

Children love to act out any incident. And this love of dramatization may serve, educationally, in many ways. It holds attention while a story is being told, helps to fix a story or fact in mind, stimulates inventiveness and quiet restlessness.

Here are a few suggestions to parents and teachers which have been prepared by the National Kindergarten Association:

"Tell a Bible story, for instance, the finding of Moses. Then choose children for the characters in the story. Let the group select the place to be the river and other spots for scenes of special interest. Appoint one child to retell the story, while the others pantomime it. State the general plan beforehand and all will be delighted with the performance."

All the nursery tales, from "Red Riding Hood" to "Little Miss Muffet," lend themselves to this treatment, points out the association. Stories of history of heroism are excellent, too. The Boston Tea Party, Washington crossing the Delaware, and the little Dutch boy holding back the sea by keeping his hand at the hole in the dike are illustrations. The children can imagine a little in the case of the little dutch boy by naming his father, mother, and brothers and showing what they all did, also what the village people did.

The association points out that "tolerance and intercultural understanding can be absorbed through dramatization of national games played by children in other parts of the world. One can find a book of such games in almost any library."

Sometimes the children like to act out a theme such as "Helping Mother." The story can be improvised by one child or by the group. In other cases you may be surprised at the ability shown.

"Of course," observes the association, "in dramatizing by children the parent or teacher should never try to bring about a highly finished production. If the children are to be benefited, the aim must always be for free expression on the part of each child. This, with a little help, will develop physical as well as emotional control and coordination.

The entire activity must be just "make-believe" to the child — fun — and it should never be allowed to become an overstimulated show, which would tend to develop self-consciousness and vanity. Dramatization can become one of the most unfortunate, but it should be and can easily be made to be — one of the most delightful influences in a young child's life."

United Nations

Afternoon Oct. 26, Paris, said, solution did not constitute outright approval of France, the U.S. would have not objected to repealing the ban on ambassadors.

Britain, whose Labor government has been one of the most outspoken critics of France, let it be known it would not oppose the resolution and would abstain in the voting.

Earlier today an American spokesman announced that John Foster Dulles and Soviet deputy Foreign Minister Jacob A. Malik had conferred on a peace treaty for Japan. A further meeting is expected.

The conference last night at Dulles' Manhattan apartment completed the initial presentation

Candidates In City Election Favor Growth

Krider, Sam Martina Chase And Ivey Are Speakers at Meeting Of Sanford Jaycees

The future progress of Sanford was the keynote of talks Saturday night by all four candidates for the City Commission at the barbecue held by the Jaycees for more than 250 persons at the Seminole Country Club.

The speakers were Commissioner John Krider and Sam Martina in Group No. 1, and Commissioners Randall Chase and John Ivey in Group No. 2.

John Krider, incumbent in Group No. 1, pointed out that Sanford, with more than \$3,000,000 in new construction during the past three years has achieved more of a building record than in the 20 years combined, and added that vacant lots are now disappearing.

Among other City accomplishments he listed the revaluation of all property, rezoning the city, modernizing its charter and traffic laws, and adopting an up-to-date building code. The new swimming pool costing \$52,000 including the \$30,000 donated by Chase and Co., was pointed out as a major accomplishment. He declared that he favored going forward on the stadium and terminal projects.

Sam Martina, opponent of Mr. Krider, declared that the City is hampered by its four and a half million dollar bonded indebtedness which he declared is a burden upon the shoulders of the citizens.

"We must strive to get additional industry and taxpayers in Sanford," he declared, "and not let people with alike warm attitudes leave us."

An example, he told of having talked last year with a large paper manufacturer in Hackensack, N. J., who told him his intention to seek a location in Central Florida. "I came back enthused, but when I broached the idea I was told here that people were not interested because paper mills smell bad." He added that Pabst is getting a "spiffy payroll" from the Union Paper Mill.

Randall Chase, incumbent in Group No. 2, urged that all citizens vote on fire control in Seminole County, terming it a very progressive measure, and he pointed out that more than one-half of the land owners in the county had signed a petition asking the County Commission that the measure be included in the

Sweden's King Dies

Sweden's beloved King Gustaf V worked on state affairs until five days before his death. His son and new King of Sweden (Top right) has for some time represented his functions outside the palace, but the old king, seven inches monarch, who excelled at tennis, continued to govern actively. At bottom the popular ruler posed with Carl Gustaf, now Crown Prince.

Gustaf VI Made King Following Father's Death

Democrats Name E. B. Donnell For Senate Election

92-Year-Old Monarch Reigned 43 Years On Swedish Throne

STOCKHOLM, Sweden, Oct. 30.—Gustaf VI today was proclaimed "King of the Swedes, the Goths and the Wends," the first ruler to ascend the ancient Swedish throne in nearly half a century. He succeeds his father, 92-year-old King Gustaf V, whose death yesterday morning after a reign of nearly 43 years plunged the nation into deepest mourning.

To all effects and purposes the son, born Prince Oscar Fredrik Wilhelm Olaf Gustaf Adolf, has been Sweden's monarch since his father's death. But at colorful ceremonies today in the cabinet council room of Stockholm's Royal Palace he took the Royal oath, pledging himself to adhere strictly to the constitution and to rule "a righteous king and gracious father of the Swedish people by God's grace."

He succeeds his father, 92-year-old King Gustaf V, whose death yesterday morning after a reign of nearly 43 years plunged the nation into deepest mourning.

Other candidates were Russell Q. Morrow, former state representative of West Palm Beach and Joseph A. Peel, Jr., West Palm Beach lawyer. Morrow got 17 votes and Peel 31.

There was a lot of debate over rules and procedure prior to the ballot.

Speaking in behalf of Donnell veteran Democratic Party worker in Palm Beach County, Vasco Peoples, chairman of the Charlotte county committee, denied there was any "deal" between them.

"Rumors of anything like that are just what they were—idle," he said.

Donnell, who had the backing of his county committee, reluctantly agreed to call the election.

POLIO BIRTH

BOSTON, Oct. 30.—(AP)—A young New Hampshire wife, whose legs have been paralyzed by polio, yesterday gave birth to a seven pound, six ounce daughter.

Doctors at lying-in hospital St. Mary's Reginald Sharpe, 24, of Stratford, and the infant are doing fine.

Mrs. Sharpe, who also has a 20-month-old son, will return to Children's Hospital for polio treatments.

SYRIAN KILLED

BEIRUT, Lebanon, Oct. 30.—A brigadier general for nearly half an hour yesterday cracked a safe at a food market last night.

You don't have to take the arresting officer's word for it.

There were about 200 eyewitnesses.

It seems the brigadier chose to work on the safe with hammer and chisel practically out in the open. There were several lights on inside the store and a full view into it through a large plate glass window.

A large crowd collected to watch the show before the police forcibly removed the main perpetrator.

Anniversary Is Celebrated By Lions Club

McNulty Says Inflation Is Grave Threat To Nation; Club History Told

Inflation is a greater threat to this country than North Korea or Russia and its leaders, H. C. McNulty, banker and past international director of Lions International, told more than 100 Lions, wives and guests Friday night at the Sanford Club where the celebration of the 25th anniversary of the granting of the charter to the Sanford Lions Club was held.

Pointing out the good will created in South America and in all 29 foreign countries by Lions Clubs, he declared that one of the greatest jobs of Lions is to create international understanding. Lions clubs now number 6,000 with a membership of more than 403,000 he said.

Urging that Lions take more interest in civil government, he contrasted the 39 percent average vote in the last presidential election with the 89 percent who in Italy went to the polls last spring.

Two new Lions, Harold Lewis, grocery store manager, and Carl Williams, wholesale oil distributor, were inducted as members by Mr. McNulty.

Alfredton Harry Robson president, and Henry Witte, past-deputy district governor, served as toastmaster, and provided some "Witte" remarks.

Ross G. Witters, chairman of the Board of Governors of Lions International, declared that Finland is the 20th country to have a Lions Club, and stated that one is now being established in Helsinki.

We could organize Lions clubs in every community and other clubs do the same, so we don't have to build all this was natural," he declared.

A high spot of the program was the presentation by Al Rehmann Jr., Mr. Dora, district governor of the Lions to King Lion Robert of a silver plaque celebrating the 25th birthday of the Sanford Club. A big candlelit birthday cake also graced the anniversary.

Four of the original charters members of the Sanford Club were

Chinese Reds Reported To Be Invading Korea In Strength As Allied Rear Is Threatened

Among First U. N. Soldiers Freed In North Korea

These bearded and weary soldiers are among the first of the United Nations troops to be freed by the North Korean Reds in the bombing drive towards the demarcation line. From left to right: Sgt. William H. Jones, Fort Meade, Tenn.; Pfc. Alexander G. Matlakatos, Los Angeles, Calif.; Pfc. Charles C. Gajakowski, Homestead, Fla.; Pfc. Edward J. Huland, Belmont, Mass.; Pfc. Edward J. O'Leary, Boston, Mass.; and Capt. William D. Lash, Endicott, N.Y. (UPI photo)

Rioting In Puerto Rico Increases As Schools Close

Nationalist Party Is Attempting To Oust U. S. From Islands

JACKSONVILLE, Oct. 30.—(UPI)—The Security Council today overrode Russian objections and voted to let the veto-free General Assembly take up tomorrow a proposal to extend the term of U. N. Secretary General Trygve

Lundt and end the Soviet's hold on the government police here to bay and attacked police stations in several other towns with bombs, bullets and fire in an attempt to bring the shape of an organized uprising.

Three Nationalists were dead in the government police. Two police men were wounded. At least 10 others were believed to have been killed in other areas and a number of Nationalists were killed and wounded.

The Nationalists, campaigning tooust United States government in this island, bombed and burned police headquarters at Bayamon and burned down the post office and telephone building at Utuado, both towns in the center of the island.

Mrs. Jones was fighting fire in the stove to prepare breakfast when the "whole thing flared up and she narrowly escaped injury. Mr. Jones, who was in bed at the time, was nearly overcome by the smoke.

Only the prompt action of the firemen save the main portion of the two story house, and the fire trucks were used, including the large Seagrave, the extension ladder of which proved very handy enabling the firemen to direct a stream of water on the second story kitchen partition without one story in height.

The Governor conferred with the head of the National Guard on the situation throughout the island, the commissioner of education in each public schools closed.

At the southern coastal town of
