Sylvester Shattuck and Gil Plunkett's old maid sister have been seen, keeping company of late.

Demetrius Atwater and Doremus Pixler are each going to take a course in surgery in Charlie Hand's veterinary college.

Gil Sloan, our weather prophet man, says the late heavy rains are largely due to lowering barometers and atmospheric changes.

Aunt Betsy Jones sold five gallons of buttermilk to the Buster house last week. Aunt Betsy runs a two-cow dairy and sells more or less real cow butter.

Ground has been broken for a new two-room cottage at Sucker's Corners.

Jim Hilliker and Josie Spuds seem quite apathetic when seen in each others' company of late.

Mrs. Roxana Dingman and her two accomplished daughters were quite severely chigger bit yesterday at the picnic at the shell mound.

Consider Bigley and wife of Whoopia Station are here visiting Zeke Scroggins' family, who are kin folk. Zeke took Consider over town in his new rubber-tired buggy, and as they were quite late in getting home it is thought they ran over a blind tiger somewhere on Cameron avenue.

Skinny Jane Slocum was badly chewed by chiggers at the Jessup picnic last Saturday.

Bob Dunk's blind mule which expired last week, was buried next day.

Eph Dittmore's wife has joined the Knight's and Ladies of the "Jumping Je-sokus."

Punk Jones got a letter from his cousin, Blinky Jones, in Iowa, last week. Blinky writes that when he lit in Iowa six years ago he was dead broke and hadn't any under clothing, and was sick with chills and fever. He's only been there six years and now owns a third interest in a two-cow dairy, and has plenty of new second hand clothes to burn.

**Clears Land Cheaply and Quickly**

Palatka, Fla., July 29.—A trucker here has devised a plow for clearing land of scrub palmetto. It is drawn by four mules. He can clear two acres a day and reduces the cost of such work from \$60 to \$15 an acre.—Produce News.

**GENEVA GLEANINGS**

Special Correspondence to The Herald.  
W. H. Howard is attending court in Jacksonville this week.

Miss Della Jones is spending several days with Mrs. A. A. Morgan.

Mrs. Hilly Grant, accompanied by Mrs. Lang of Osteen is on a visit to relatives near Jacksonville.

Miss Annie Peters has just returned from a short visit to Orlando.

The condition of Mr. Walter Flint, who has been sick for two weeks, remains practically unchanged.

A. J. Worthy left last Wednesday to join his wife who is visiting her mother, Mrs. Emma Watson in Havana, Fla.

Mr. and Mrs. Eshton Baxter of Washington, D. C. are expected soon, on a visit of some length to Mrs. Baxter's parents, Mr. and Mrs. Huddleston.

Little Lois Grant entertained her friends at a "spend the day party" last Friday in honor of her eighth birthday; dinner was served to these tots under the trees and all hope Lois will soon celebrate another birthday in like manner.

H. H. Pattishall is having his home fitted throughout with waterworks; has set up a tank, pumps the water into this by a gasoline engine from his artesian well, this adds much to this already modern home. The plumbing work is being done by David Speer.

Miss Lidia Geiger celebrated her birthday on last Friday night by giving a party. Quite a number of young people attended, music and games were indulged in until a late hour, when all were invited into the dining room where tempting refreshments were served. All went home reluctantly, wishing Miss Geiger many happy returns of the day.

**SUB-EXCHANGE IS ORGANIZED**

**Enthusiastic Meeting Held in Orlando And Well Attended**

On last Saturday afternoon at 2 o'clock a called meeting of the orange growers was held in the opera house in Orlando for the purpose of organizing a sub-citrus exchange.

The attendance, considering the very warm weather, was fair, though the faces of some larger growers were missing.

The meeting was called to order by temporary chairman Mahlon Gore, and Mr. Carl Jensen was elected temporary secretary.

Mr. Gore stated the object of the meeting and that since the last meeting held he had been to the Tampa general meeting and had secured certain information and was provided with copies of the contracts which might be had on application.

Nearly every person present asked for a copy.

Upon suggestion Mr. W. C. Temple was requested to read and explain the contract so that it might be the more readily understood.

Mr. Temple consented and read the contract by paragraphs, commenting as he read and answering questions as they were propounded. Certain parts of the contract were very fully explained and commented upon. Notably the clause giving permission to the grower to withdraw from the exchange if he so elected upon proper notice being given; the reservation that the grower might at all times regulate his own products, shipments, selection of markets and sales under certain restrictions, though the final proposition would naturally be that the exchange would assume control as the grower will himself desire.

In explaining the expenses Mr. Temple stated that the real heroes of the exchange were the first of those who marched-up at the Tampa meeting and signed the contract in the face of the fact that the total expense of the whole exchange would be \$150,000. They had faith in the project.

But now as 200,000,000 boxes were represented the pro rata expense would be about 6 to 8 cents per box for all the labor of experts and the sellers in every city of consequence in the United States, the accumulation of information as to markets, etc.

A number of pertinent questions were asked by Mr. W. L. Palmer, Dr. Phillips and others.

In answer to Mr. Palmer's inquiry as to the relation of the county exchange to the general and local exchanges it was brought out that the directors of the local exchange were the executive force of the county exchange which would collect all information and be in the nature of a clearing house. Also that these associated directors would select the county managers.

After the reading of the contract and the discussion of the work a call was had for signers and the following persons walked up and signed, becoming members:

H. C. McDaniel, J. R. Wright, Jno. Vick, M. Gore, D. Cary Elwes, J. C. Hull, Gust Jacks, L. M. Larson, Jonas Larson, W. L. Palmer, McNeill & Davis, A. G. Branham, N. S. Passmore, J. N. Alden, O. S. Robinson, J. W. Hart, M. B. Burket, Frank A. Eton, Mrs. C. W. Jacobs, L. L. Payne, J. B. Reddett, C. F. Grannis, C. G. Lee, T. W. Russell, C. A. Dudley, W. R. Graham.

Other persons, not quite prepared, signified their intention to join the exchange and it is believed that most of the growers will quickly join.

The sub-exchange then being formed the following persons were elected officers: Chairman, Mahlon Gore.

Secretary, L. L. Payne.  
Directors to the above were added W. L. Palmer, H. C. McDaniel.

It is estimated that 40,000 boxes of fruit are represented in the names of persons who signed up.—Reporter-Star.

HUMUS-AS A SOIL IMPROVER

BY A. W. BLAIR

The dark colored material that we call humus consists of partly decayed organic matter, either animal or vegetable. Stubble, grass, roots, corn stalks and the like, are not humus; but these materials when turned under the soil soon begin to decay and fall to pieces, and it is then that humus is formed. This process of decay and humus formation goes on as long as the conditions are favorable and there is any organic matter left. Humus may be called an intermediate product, for under favorable conditions the process of decay goes on until there is no longer any vegetable or animal substance left, nor yet any humus; but instead, water, gases that escape into the air, and a small amount of mineral matter. We thus see why it is that we need to renew the supply of humus from time to time. If a crop of velvet bean vines is turned under it the winter or early spring, and an examination is made in April or May, much of this decaying matter or humus will be found: If now a crop of corn or cotton is grown during the summer, and the land thoroughly cultivated, it is probable that some of the humus would be used if an examination should be made in September. It does not follow, however, that all the humus has been used up, but it has been so thoroughly incorporated with the soil that the eye does not detect it, except that the land would look darker. During all the time the humus was gradually being transformed into simpler compounds, it was serving its purpose.

THE USES OF HUMUS

Humus improves the mechanical condition of the soil, by making it looser and mellow; it increases the water-holding capacity of soil; it furnishes food for useful micro-organisms, which in turn convert the nitrogen of the organic matter into a form that is available for the crops; it holds in solution difficultly soluble minerals that contain plant food; and it yields a small amount of mineral plant food itself.

If one would get a good idea of the value of humus, he need only compare fields where a legume crop has been grown as part of a system of rotation, and where stable manure has been used liberally, with those fields where corn and cotton have been grown steadily year after year on commercial fertilizers. The latter are devoid of humus, and have lost much of their power of holding water and plant food. The value of humus is also emphasized where an old barn or house has been left standing in the middle of a field. Among these the crops are usually much superior to those on the surrounding portions of the field.

HUMUS AND SANDY SOILS

Sandy soils, on account of their open, leachy condition, are especially in need of a good supply of humus. Furthermore, the conditions in Florida favor a rapid disappearance of the humus. This "burning out" of the humus is caused by certain bacteria, and whatever is favorable to their development hastens the destruction of the humus. Warmth, moisture, and a good supply of air are conditions which favor bacterial development; and since these conditions are fulfilled to an unusual degree in Florida it follows that the humus will disappear with more than ordinary rapidity. In such soils it is necessary to supply humus-forming materials more often than it is in a heavy clay soil. This loss of humus is compensated for, by the production of nitrates as the humus-forming materials more often than it is in a heavy clay soil.

This loss of humus is compensated for by the production of nitrates as the humus disappears. Analyses of some pineapple soils have shown that samples taken from surfaces where vegetable matter is decaying, are much richer in nitrates than those taken from clean bare surfaces, or from the subsoil where there is but little organic matter.

HOW HUMUS MAY BE INCREASED

The growing of leguminous crops is one of the best ways to increase humus, for in this way nitrogen also is added to the soil. Among the Florida crops which are suitable for this purpose may be mentioned the velvet bean, beggar weed and cow pea. Humus may also be increased by a more general and liberal use of stable manure, and by turning under stubble, weeds or grass, instead of burning them. When these materials are burnt, nitrogen is lost as well as humus.—Florida Experiment station.

Complain of Express Company

Jacksonville, Fla., July 29.—The way the Southern Express Co. treats the commission men of Jacksonville is outrageous. Packages which arrive on the early morning trains in many cases are not delivered until 3 o'clock in the afternoon. The commission men telephone about the shipment and are told if they are in a hurry they had better send for it. The main trouble is that the express people are busy with the wholesale liquor men, and the commission men must wait till they get good and ready to deliver their produce.—N. Y. Produce News.

An Ordinance

To amend Section 171 of Chapter 12 of the ordinances of the City of Sanford, Florida, of 1892, entitled "Fire Limits and Building Restrictions." Be it ordained by the Council of the City of Sanford, Florida, that Section 171 of Chapter 12 of the revised ordinances of said city of 1892, and is hereby amended to read as follows:

FIRE LIMITS

Section 171. No person or persons or corporation or corporations or individuals, their agents, employees or others for or on account of such corporations or individuals shall build, contract or enlarge, or repair in any wise or authorize the construction, enlargement or repair of any frame or wooden building or structure or any tent or booth, or in any wise alter or repair such building as aforesaid upon or remove any such building, structure, tent, booth, or upon any lot or parcels of land within the following limits, that is to say, beginning on the south side of Fifth street and the west side of the alley east of Sanford avenue, thence running north on what would be a continuation of said alley to the city limits in the waters of Lake Monroe; thence following said city limits in Lake Monroe to the east side of Elm avenue, thence south on said Elm avenue on Third street, thence east on the north side of Third street alley between Palmello and Sanford avenues, thence south along said alley to south side of Fifth street, thence east to point of beginning.

And any ordinance or parts of ordinances in conflict herewith is hereby repealed. Approved, MARK L. SCOTT, Clerk. FORREST LAKE, Mayor. 48-4t

# BASE BALL THIS WEEK

The most spectacular battle seen thus far this season on the local diamond was waged Tuesday afternoon, when the home lads went up against Sanford. A big and enthusiastic crowd was on hand to see our boys "turn the trick," and when it was all over there was not a fan or fanabelle but who felt that he or she had gotten the money's worth. It was the sort of exhibition that carries a fellow to thoughts of professionalism. It was devoid of all punky plays and abounded in optic-opening stunts. In short, it was a sight good for the sore eyes.

Walker was put in to do the heaving, and to say that he was all to the candy is but half to tell. He had the visitors where he wanted 'em, and his puzzlers were never solved by the lads who soaked it to us on that rain-soaked diamond down in Orange county only a few days ago. White did the receiving and was the good boy. In fact, the support was all a tosser could have desired. Jones, the Tennessee flinger, was on the hill for the celery lovers and in the pinches he was found with the real goods. Swain intercepted his benders.

Early in the game the home laddies got one to their credit on the board, and the same was chalked up to Sanford. Inning after inning passed with no man getting beyond third, and very few reaching that far station. It was a pitchers' battle, but when a swatter was so fortunate as to biff the berry it went into the ether and landed into the gluey paws of some ever-ready and waiting fielder. Finally the ninth round rolled round and still the score was on the level, but not for long, for Calhoun, after pilfering second and third, used his legs and his head, and before the celery-ites recovered from their paralysis he was darting for home. As he dived for and touched the plate Catcher Swan had the ball on him. It was a close shave, but his Ump said the runner was safe, so the most deserved and best victory of the year was then credited to our account—Palatka 2, Sanford 1—and pandemonium broke loose.

### WEDNESDAY'S SETTO

Much interest was manifest in the result of Wednesday's setto, but Jupiter Pluvius had to be considered in the beginning, for heaven's flood gates opened soon after noon and for a couple of hours remained so. Finally the torrent ceased and a few of the more courageous fans waded or swam out to the park and saw the contesting nines try to play on the slippery, sloppy diamond. Considering the wet grounds the boys did well, for their stunts were executed under trying conditions. Mansell did the flinging for us, which Godwin twirled for the visitors. Five innings were played, and then the rain again descended and the agony was called to an end. Score: Palatka 2, Sanford 3.—Palatka Times-Herald.

### The Games at Gainesville

Sanford came and conquered two out of three and made a tie out of the third game, which was called at the end of the fifth inning that the visitors might catch a train for their home city.

There is nothing to say, except that the article of baseball that the home boys are now playing is nothing like that being put up by the celery lads. Their fielding was almost errorless, a good, strong infield, and their captain knew well his men, and did not fall to go for a misplay.

The first game here was lost by errors and poor base running on the part of Gainesville in the tenth and eleventh innings. The second game went to the visitors by errors of Gainesville in Sanford's part of the first inning, but the visitors also made a few errors before this game was over, but nothing like the costly ones of Gainesville.

If the last few games are a sample of the way the boys will play ball, they had better not seek such fast company, and try a few rounds with Waldo, Micanopy, and possibly High Spring, for the latter team beat Newbury last Tuesday 35 to 28.

There are some mighty good players on the Oak Hall team; it's a clever crowd of jolly good fellows, but what the people want is some winning ball. Other cities have raised large sums of money and gone after the best stock to be had, and this is just about what will have to be done here if we expect to count for anything in the final windup of the season.—Gainesville Sun.

There is considerable talk of a baseball league next year composed of Live Oak, Lake City, Gainesville and other towns. The promoters might as well count Perry in right now. Few things advertise a town like a good ball team, especially a league team, and Perry can put up the stuff and be "it" if the league materialize.—Perry Herald.

The Times-Union says that "It is rather hard to believe that less than 200 people turn out to witness a ball game in Jacksonville, the big city of the state. In Ocala, Gainesville, Palatka, Sanford, Orlando, and

other Florida towns, the attendance at ball games often reaches the 1,000 mark, and when you stop to think that less than half that number are turning out to the Jacksonville games it is not speaking well for the city." The people like to see good ball playing and in these "inferior" towns they get it. Hence the enthusiasm.—Palatka News.

"The game they might have won" is the caption over a baseball article in The Tampa Tribune of last Friday which could have been just as appropriately used in The Sun of the same day.—Gainesville Sun.

### Another Balloon Ascension (Contributed)

It is rumored that a few of the Sanford rooters went to Orlando yesterday to witness a ball game. What they saw instead was another balloon ascension. Too awful bad Mable.

Bridges pitched the game but it all can not be laid to him as the boys did not play very good or their usual game behind him. The Orlando bunch got next to him and for several hits; but the runs were mostly made on errors.

Bridges started the Merry-go-round by not being able to distinguish a foul ball from a fair one.

Our hope is to-day, as the Orlando team plays here and we trust we can get revenge.

### Sanford is Well Advertised

William D. Osgood, a former newspaper man from Windsor, N. Y., spent last Saturday and Sunday in the city. He purchased some valuable celery land while here and will return later to put in a crop. A Herald man inquired of Mr. Osgood the reason for his coming to Sanford and he stated that Sanford was the best advertised section in the South, and everyone was talking about the wonderful crops of this section. Mr. Osgood stated that several more families from his section would be here in the early fall.

### Who is The Association?

The following item appears in the New York Produce News:

"Orlando, Fla., July 29.—G. W. Moore, manager of the Orange County Celery Growers' Ass'n, states that the company is in flourishing condition and work has begun on celery, and that over 300 acres will be set out. The plants are looking strong and healthy and no trace of blight."

The 300 acres of celery is undoubtedly located at Sanford for nowhere else could so much of it be raised at one time, but who is the Orange County Celery Growers' Association and who is G. W. Moore?

For the past week Mexico has been experiencing a series of earthquakes, which have proved more disastrous than any of recent years. The towns of Acapulco and Chilpancingo on the Pacific side of the country have been practically wiped out of existence. In the City of Mexico much damage was done by the cracking of walls and upheaval of land.

### LUCAS PAINTS

Used in Uncle Sam's Paint Shop

During the past year the U. S. Navy has consumed 691,000 pounds of LUCAS WHITE PAINT and 278,700 pounds of LUCAS COLORS, sufficient to produce more than 100,000 gallons of paint, equivalent to 50 carloads of 200,000 gallons each, and which would make a train more than one-half mile long.

In Uncle Sam's service, as in everybody else's, LUCAS PRODUCTS have an unbroken record for satisfactory results.

### Betting On The Games

The Reporter-Star is right. Something should be done to put a stop to the wholesale betting indulged in during the games of base ball. Not only men but boys are being inoculated with the gambling virus. And some of the ladies are manifesting evidences of the prevailing madness. Some of the scenes that have occurred during the test games between Sanford and Orlando were not creditable to the citizens representing these towns, presumably ladies and gentlemen. If a halt is not called in some of the proceedings attending the games base ball may soon cease to be the clean, manly sport it was intended to be primarily. It was played for recreation, friendly rivalry between teams of neighborhood towns, as well as the pleasure and pride of these interested in athletic sports. It certainly was not the intention of any base ball association or promoters to vitiate whole communities with the betting and gambling mania. A MOTHER.

### Wiring For Electric Lights

Sanford's new electric light plant will soon be installed and you want the work done by a competent and experienced electrician. The work must bear inspection and conform to the regulations prescribed by the Southern Tariff Association. W. A. Parr of this city has had ten years experience in electrical work of all kinds and can wire your house in a satisfactory manner. Everyone should have their house wired at once, to be ready when the current is turned on, and W. A. Parr is now equipped to take your order and fill same at once. You can get him any time at the telephone exchange, or leave orders at Fernald's hardware store

### CULLED FROM THE STATE PRESS

An Epitome of the Week's Most Important Happenings in the State's Domain.

A shipment of 30,000 pounds of wool was made from Pensacola last week. It was shipped by Penden Brothers, who are probably the largest growers of sheep in Florida. The price paid for the wool was 30 cents a pound.

Mrs. E. A. Littleton, a former resident of Tampa, was found dead at her home on St. Simons Island last week. She was living alone and had been dead several days when found, the howling of her watchdog attracting people to the place.

Chico Gonzales was held for trial for the murder of Alfredo Alvarez in Tampa a few weeks ago.

Jacksonville's new Jewish synagogue, costing \$40,000, is to be ready for occupancy next February.

H. C. Atwater, postmaster at Waldo, died suddenly last week. He complained of a queer pain in his head, took a seat, and died before help could reach him.

Gov. Gilchrist has pardoned M. Henry Cohen, former major of the first battalion infantry, National Guard of Florida, and reinstated him in his position from which he was removed by court martial several months ago. His offense was obeying orders from Gov. Broward in violation of those given him by Adjutant Gen. Foster.

Napoleon Artis and son, farmers, living near Madison, were killed by lightning last week, while trying to get their fodder stacked before the approaching storm hit their field.

Miss Mary Sandlin of Punta Gorda died last week from effect of burn received by the explosion of gasoline which occurred when she struck a match to light a patent iron, the heating force of which was gasoline.

James H. Scarr, government weather forecaster at Tampa, has been transferred to the important station at New York city.

A bill was introduced in congress before adjournment providing for a national public highway from Washington to Miami. The highway is to be known as the Lee National Highway, to begin at Washington, in the District of Columbia, and to be constructed by the most direct practical route through Virginia (via Richmond), North Carolina (via Wilmington), South Carolina (via Charleston), through South Carolina and Georgia to Savannah, and then through Georgia and Florida to Jacksonville and Miami. The route south of Savannah will probably follow the coast as closely as possible as this is the plan of the advocates of the highway system.

The East Coast Fruit and Vegetable Growers Association reports a membership of over 300.

Metropolitan Grays of Jacksonville won the Tallahassee trophy at the annual shoot last week.

The Mable Paige Company are to go on the road again. The lease on the theater in Jacksonville has been given up.

While intoxicated, last Saturday night, W. C. Morgan of Lakeland was run over and killed at Seffner by a train on the A. C. L. Portions of the body were scattered all the way to Port Tampa.

Miss Rebecca Womac and Ella Freeman of Havana, daughters of prominent men, were drowned Monday while swimming.

F. J. Lissman & Co., bankers and brokers of New York, have purchased the bonds and a large share of stock of the Tampa & Jacksonville railway, formerly known as the Gainesville & Gulf, and the indications are that work of completing and equipping the road will soon be resumed and pushed to completion.

West Palm Beach school board have secured Prof. L. I. Hime as principal of the schools of that city at a salary of \$250 a month. For many years Prof. Hime was at the head of the Palatka schools. He is regarded as one of the best educators in the State. The school of which the professor will be head, has one of the best buildings in Florida, with a campus of some seven acres, and thoroughly furnished with latest school appliances. The total cost was about \$70,000.

## GREAT PLANS FOR ENTERPRISE

### Will Be Site For Auditorium, Industrial School And Hotel

There is on foot among the Methodists of Florida a movement to organize and operate a great Christian assembly hall at Enterprise, Fla. It will be the headquarters for conferences, Bible institutes and training schools and religious gatherings of various kinds. It is intended to make it a center of influence on all Christian work, not only in Florida, but all over the country.

An industrial school for both boys and girls will probably be added to the Methodist orphanage located there and already in fine running order.

The estate on which this enterprise starts consists of the Epworth Inn, a fine hotel of about two hundred rooms, fine offices, parlors, all well equipped; also a large number of lots in Enterprise and 1,200 acres of good land adjacent to the town; also the famous Benson Springs, which will be developed into a good paying business for the benefit of the institution.

The hotel will be conducted on a Christian basis by Christian people, also for the benefit of the institution. The whole estate, valued at about \$30,000, is donated for this grand enterprise by Miss Emma Tucker, the owner, who is filled with zeal for the cause of humanity and well known all over the South.

Other features will be added as the work develops, such as preparing young preachers for work, and a home for old and wornout ministers without other home. Some of the leading ministers and laymen of the church are at the head of this great undertaking. Several very wealthy philanthropists of Cincinnati, Atlanta and other cities are deeply interested in the enterprise and will put their money and business experience into it. A joint stock company is being formed, with a board of directors, to develop and manage the institution. The officers of the company will be announced later on. Sufficient stock has already been subscribed to complete the organization. The matter is in the hands of Professor Griffith, who for the present is acting as secretary and treasurer, and the papers of incorporation are being prepared in the office of Hon. J. C. Cooper. After the incorporation is complete stock will be sold at \$100 per share.

While this assembly hall will be under the management and control of the Methodists, yet it is to be conducted on the broad platform of Christian endeavor, and a center of Christian work in many ways for the betterment of her people and the advancement of the cause of Christianity.

## MARRIED IN JACKSONVILLE

### Popular Young Couple Stole A March On Their Friends

Miss Rosa Higgins and J. L. Hurt were married in Jacksonville last Monday morning at 9 o'clock by Father Mohr of the Cathedral. The marriage was a great surprise to their many friends as Miss Rosa had left for Jacksonville with her father and mother, presumably to make a short visit. Mr. and Mrs. Higgins and Mr. and Mrs. Clifford Denton of Jacksonville, cousins of the bride were present at the ceremony after which the happy couple left for Richmond, Virginia on their bridal tour.

The bride is the daughter of Capt. and Mrs. J. C. Higgins of this city and has resided for the past six years in Sanford. Capt. Higgins being the superintendent of this division of the A. C. L.

Miss Rosa has for some time been stenographer in her father's office and Mr. Hurt being a dispatcher, the young people met and Cupid started another romance that culminated in the marriage last Monday.

Mr. Hurt, during his stay in this city was very popular with the young people and has a host of friends who wish him and his estimable wife a prosperous journey through life. At present Mr. Hurt has a position with the Big Four at Harrisburg, Illinois and here the young couple will in the future reside.

## MECCA FOR GROWERS

### Sanford Is Attracting Hundreds Of New People

### BEST PROPOSITION IN FLORIDA

### Lands Have Been Thoroughly Tested And Proven To Be The Real Article

At the present rate the new residents are coming into the Celery Delta this season will see nearly a thousand families quartered in this section, clearing up new lands and planting the profitable crops that have made Sanford famous over the civilized world.

Since the first of August over fifty sales of vegetable lands have been recorded and the best class of people from the northern farms are making Sanford their home. These people are not coming here to subsist upon the community but are purchasing land and building homes. Many of them are successful farmers from the West who realize that the returns from a ten acre tract in this section will double that on a hundred acre tract in the north and the fact that the vegetables are raised during the winter also appeals to many of them. In fact many northern farmers are purchasing land here to work during the winter and expect to work their northern farm in the summer, thus making money the year round and having the advantage of living in an ideal climate during the winter.

Not only is Sanford attracting people from the north, east and west but from many of the southern states and from our own Florida. Several growers from other sections of this state, discouraged by the small returns and exorbitant freight rates of their own section have sold out and come to Sanford to get the superior advantages to be derived from the celery delta both in growing crops and the low freight rates. This is quite an item and for those who might be interested the table of rates is given below:

### RATES ON VEGETABLES FROM VARIOUS POINTS IN FLORIDA TO BASING POINT AT JACKSONVILLE, FLA.

Point	Rate
Bradentown	20 Cents
Denia	25 "
Delray	25 "
Ft. Pierce	22 "
Ft. Lauderdale	22 "
Lakeland	17 "
Palmdale	22 "
Miami	25 "
Manatee	20 "
Louisburg	22 "
Lakeland	17 "
Tampa	14 "
New Smyrna	12 "
Daytona	12 "
SANFORD	10 Cents

### POTATOES AND CABBAGE In Barrels or Barrel Crates

Point	Rate
Bradentown	40 Cents
Denia	50 "
Delray	44 "
Ft. Pierce	44 "
Ft. Lauderdale	50 "
Orlando	34 "
Palmdale	50 "
Manatee	40 "
Louisburg	22 "
Lakeland	24 "
Tampa	28 "
New Smyrna	24 "
Daytona	24 "
SANFORD	20 Cents

The St. Johns river is the factor in securing to Sanford the advantageous rates recorded above.

On an acre of celery irrigated land 1200 crates of celery and lettuce, two crops yearly, are raised. Ten cents saved on every crate is \$120 per acre made every farming season. This item alone figures largely in the calculations of those who are seeking to locate upon the vegetable lands of Florida, and is one of the main reasons why so many new people are buying lands here at \$100 per acre when other sections are offering land at from \$10 to \$20 per acre.

The protection of the lakes also give this section a great advantage over those not so situated, and the cold snap of last season, when other sections were devastated by a cold wave and Sanford vegetables were untouched, was a good example of just how far this lake protection entered into the calculation of the growers.

There are other vegetable lands in Florida, but none so well situated, and none upon which the chances for profit are so great. Even the new people here last season made good returns, and while there are some who fail to make good, the percentage is small, and the man who will work and combine practical knowledge of the soil with it, will make good in nine cases out of ten in this section.

Fairy tales and romances are not related about the great celery delta. There has never been a prospective customer who came to Sanford and went into the proposition carefully, that was not con-

## HERALD'S PATHFINDING TRIP

### Scout Cars Will Try For Short Road To East Coast

The Herald offers a year's subscription to the owner of any automobile in Sanford who in open competition and an even start from Sanford arrives at Daytona Beach first. Each competitor may select any route and may carry as many passengers as he desires. Full particulars will be given later when all plans have been formulated for this pathfinding trip by the Sanford Garage under whose direction the race will be run. The Herald makes this race to find the most accessible and shortest route between Sanford and Daytona Beach and to make it possible for the autoists from the west to drive their cars through without being mired between Osteen and the ferry. Messrs. Herndon, Lake, Daniels, Keeler, Thigpen and Connolly will be appointed as judges of the contest and will walk beside the cars to render aid and assist the cars in every way and will also help pull the ferry boat at the river crossing.

During the recent rains several autos were left in the mud near the ferry and the pathfinders will look up these cars and endeavor to dig out the unfortunate drivers who are probably encased in the mud between Enterprise and the ferry and being unable to move would desire to communicate with their friends.

Any one desiring information regarding this trip can get the particulars from this committee or from Paul Keely and Dr. Puleston.

## TWENTY FOUR YEARS OF SERVICE

### Agent Barnes Retires From Employ Of Atlantic Coast Line

Twenty-four years of active service, twenty-two of which were spent in Sanford and only eleven days last is the record of Agent Cruse Barnes, who retires the first of September.

Mr. Barnes has been in the employ of the different roads that afterwards became part of the A. C. L., and as freight agent at Sanford has spent over twenty years. In that period of time he has been absent from duty just eleven days and were it not for the fact that he wishes to retire to his farm, he would probably be with the same road twenty years longer. He does not give up the work on account of old age or ill health for today he is as young and active as a ten year old boy, but he feels that his farming interests are getting large enough to require his individual attention and being conscientious to his employers would not give his time to his own interests while in their services. Everybody knows Cruse Barnes, and his face is as familiar to the patrons of the A. C. L. as the freight depot itself—in fact he had almost become a fixture and will be greatly missed by everyone.

In the last two years Mr. Barnes has purchased some valuable celery lands and also owns a fine house and farm just east of the city limits where he expects to retire from the active pursuits incident to the position as freight agent and lead the simple life of an agriculturist.

The faithful service of Mr. Barnes is an example worthy of emulation by the younger generation. Since his first day with the railroad he has never swerved from the path of duty or shirked the labor no matter how arduous, and worry and trouble sit lightly upon him. No matter how you meet him or where, he is the same jolly, even-tempered official, always ready to adjust grievances and yet faithful to his trust.

His legion of friends while regretting to lose him, hope that he will get all the good things of this life.

May his shadow never grow less, and his celery never grow green.

### From the Sunflower State

Messrs. Haynes, Shinn and Rich of Wichita, Kansas, are in the city this week. They have purchased land from the Howard-Packard Land Co., and expect to improve some and put in a crop at an early date.

Veterans of the G. A. R. to the number of 30,000 have been holding their annual encampment this week in Salt Lake City.

One of the wonderful possibilities of this section. There are no cheap lands in this great irrigated district, but the man who buys land now can rest assured that next season his land will have doubled in value, and at the present rate of sales there will be but little land in this section for sale in a few years.
