## Firm Employs 100 **In Research Work**

Seminole County today obtained a new industry which employes about 100 and has an annual payroll of some \$500,000.

The firm is Dynatronics, Inc., of Orlando, an electronics firm. A plant to house the manufacturing and research facilities will be erected by Odham and Tudor on a 10-acre

site one half mile south of Big Tree Road on the east side of Highway 17 92.

The building is scheduled to be ready for occupancy by June 18. Announcement of plans to locate in Seminole County by Dynatronics climaxed four months of TIFTON, Ga. (UPI)—A school negotiations and planning. The bus jammed with more than 80 selection of Seminole County was Negro children plunged almost based on a series of imusual out of sight into a pond today, events.

First. Dynatronies wanted "elbow room." ## 'Courteous' Sanford Gets Visitor's Vote

If Sanford loses its claim to "Most Courteeus City in Florida" late this year when judges of Florida Courtesy Week render their decision, an Atlanta, Ga., woman most certainly will disagree.

In a letter to City Manager Warren E. Knowles, Miss Dorothy Virginia Beall of Atlanta had nothing but praise for Sanford and its people. Miss Beall was hurt in an automobile accident in Sanford on Feb. 6. She was here to visit her brother, Ledr. Madison Lamar Beall, stationed at the Naval Air Station.

Said Miss Beall: "This is an open letter of thanks to you and the people of Sanford for their kindness, thoughtfulness and help to a visitor in your city.

"Capt. Arnold Williams of the police department, who answered the call, was most courteous and kind; the staff at Seminole Hospital could not have been nicer, and Dr. Robert J. Smith, the attending physician, not only provided the necessary medical attention, but erased my feelings of hysteria by his calmness and gentleness.

"Your city can well be proud of these people and the many other private citizens, although strangers to me, who called and inquired of my condition. From the bottom of my heart, I thank them all and I'm so happy to know that in 18 months, on 20-year retirement from the U. S. Navy, my brother has chosen Sanford to be his home. Blessings on

Miss Beall said it all. Anything we might add would be

# Paper Plugs Sanford

The Sanford Naval Air Station, Sanford and Seminole County were tossed several bouquets by the North American Aircraft Corp. in its latest publication, "North American Take-Off."

The article, illustrated with pictures, told the story of Heavy Attack Wing One in Sanford. In the course of the story, North American told of the friendship which has been characteristic of Sanford and the Navy. The story also contained fine publicity for Seminole County.

It cited the many advantages Sanford and Seminole have to offer, such as climate, facilities and a friendly atmosphere, North American, it seems, is "sold" on us.

### OODLES OF OOMPH ON A HATFUL OF GAS

-regular, low cost economy gas! A mere sprinkling of it takes The Lark for miles and miles with peak performance, whether you drive the spirited six or the super-responsive V-8. And you drive it so easily, park it so tidily, turn it so neatly-because it's a sensible three feet shorter outside than conventional cars. (But plenty of room inside for six.) And with all its economy (cuts insurance, repair and maintenance costs), it's so richly, rightly styled, it's fashion approved by Harper's Bazaar. And beautifully engineered. This is common sense on wheels, folks-and

## FUTURE FLORIDA DESIGNER: Fantasies today ... fashions tomorrow!

Today, it's make-believe . . . tomorrow, perhaps, she'll design for the world as even today all America looks to Florida for the finest sunshine fashions. Just what will her opportunities be?

Today in Florida, fashion is big business . . . and it's growing! Aggressive, forward-looking designers, artists, seamstresses and models are taking the lead in the world of sunshine fashion ... creating a flair in sunshine wear that is the challenge of style centers around the world. Each year, literally thousands of dollars worth of Florida-made fashions are shown and bought in markets overywhere.

But what about tomorrow? Will this girl with talent and imagination be able to contribute freely? Will she be free to create the fashions the public desires? Or will she be obliged to design utilitarian garments to fit a plan conceived by a meddling bureaucracy? She will be free to serve her patrons and her industry only if we preserve our system of free enterprise . . . the system which has belowd build our living standards to the highest in the world . . . a system which allows each of us to think and create freely.

Just as our apparel indus-try is creating better things in fashion, so Florida Power & Light Company is creating better things electrically. Great new plants and generators, new substations and additional lines now under construction will soon supply literally thousands of added kilowatts for HAPPIER FLORIDA LIVING ... ELECTRICALLY!
