Bottleneck At Park Ave., 25th Would Aid Traffic If Removed

as traffic, and the free flow of transportation is concerned, is located at the intersection of South Park Ave. and 25th St.

For one thing, the thoroughfare, used by travelers and city folks, as well as city-tocity shoppers, is too narrow. You can see where the street narrows into the proverbial "hottleneck", from the bottom of the hill, traveling south, to the intersection of 17-92 and French Ave.

Now is the time to remedy this situation. before French Ave. is completed, One of the problems at this busy intersection would be the widening of the street so that the normal flow of traffic can be handled.

We don't condone fast driving, but we must realize that traffic is getting faster

Watch for the school children is the hue cry from every side new, as school gets underway for the 1955-56 school year. There's no way to compare the value of life of a child taken in a traffic accident. Perhaps he or she would be the one person who could solve the peace problems of the world

Sunford and Seminole County's growth can be seen in the construction, repairing, and developing that is going on from one end of the county to the other. Seems as if the prediction that we will triple our growth in ten years will be far exceeded.

TODAT'S BIBLE VERSE

They that wait upon the Lord shall renew their strength - Isa. 40-We have en-

Sanford's number one bottleneck, as far | and faster, by public demand. To meet the public demand is one way to become wellliked, and certainly that is exactly what Sanford wants to do. If we don't become wellliked, then our visitors will go elsewhere for the fond affection they like to have bestowed upon them.

> All of us are the same. There's not a person in our community who would not want that same affection bestowed upon them should they be in another community.

> Let's get as many of our traffic, street widening, and travel problems ironed out at one time as possible. Then we can plan a lot of that "affection" business for our visitors and friends who come in to see us

Local News Coverage

News isn't something that is dreamed up-it has to happen!

And you will find that the columns of The Sanford Herald are dedicated to bringing you a word picture of the events that have taken place in your community.

When there is something to portray, in way of pictures, better then words could de- the Illinois State Fair when the there were a newspaperman, two a great deal which they consider performed some service for the age monthly wage in East Gen acribe, you'll find that your own newspaper Russian farm delegates went by: university professors, and a radio valuable. will provide those for you too.

News people depend on the public for their beat. DEADLY SKIDS ARE LESS LIKELY ON CONCRETE

The difference between a deadly skid and a safe, quick stop is often the pavement. You can stop faster, even in the rain, on concrete. That's because concrete's gritty surface provides uniformly high skid resistance, wet or dry.

Besides permitting better vehicle control, concrete makes night driving safer tool Its light-colored surface reflects up to four times more light than dark-colored pavements. You see farther and have more time to slow down or stope

Concrete roads also are safer because they're free from hazardous ruts, washboard wrinkles and raveled edges. It's worth remembering that when the weather is rough you're

much safer on concrete, the skid-resistant safety pavement.

Dodgers Head
The Big Three in the American League race put you in mind of a bunch of old married guys. They've been knotted up so long they don't know how to cut loose on a spree even when they get the chance. They had their chances in the Laber Day double-headers, but only fourth-place Boston whooped it up, sweeping Washington 10-z and 7-2. Cleveland, New York and Chicago split in their twin bills with the second division.

After sweeping into first place by taking three straight from the phia in a Labor Day double-waters the sader.
