Get Weight Lower For Blood Pressure

Dr. Lamb

DEAR DR. LAMB—What does a person do when he can't take high blood pressure medicine? Even small doses give such bad side effects I can't take them. The doctor has given me Enduron and tried Apronolone. He's afraid to try anything else. When I ask what to do about my blood pressure, he says it isn't so high to be concerned. However, I am worried as strokes and heart attacks run in my family. Also I am a mild diabetic. Enclosed are some of the readings and I'd appreciate your opinion.

So why don't you try to get your weight down as much as possible, stay on a low-salt diet, exercise sensibly, avoid coffee, tea and cola and see if your blood pressure doesn't turn out to be normal most of the time anyway.

I am sending you The Health Letter number 1-8, Blood Pressure. It will tell you more about the factors that affect it and what can be done about it. Other readers who want this issue can send 75 cents with a long, stamped, self-addressed envelope for it. Send your request to me, in care of this newspaper, P.O. Box 1661, Radio City Station, New York, NY 10101.

In many people who have fluctuating high blood pressure with intermittent normal readings the blood pressure is reacting to stress. If you can remove the cause of the stress, that is great. Short of that, tranquilizers sometimes help—but I hate to see a person form that habit. Rather than taking tranquilizers to calm you down, it's smarter to eliminate coffee which tends to speed you up, particularly if you are a sensitive person and tend to overreact to stress.

Incidentally, if you have a few excess pounds of fat and are able to eliminate it, that may improve your blood sugar levels too.

DEAR DR. LAMB—If your readings are correct, I am not concerned. One reading of 177 over 74 is perfectly normal. A number of your diastolic readings (the lower blood pressure reading) are less than 60. You have fluctuating blood pressure. Some doctors would call you a vascular hyperreactor. They would want a series of blood pressure determinations taken on you while you're resting and recumbent, perhaps over several days time.

The trouble with giving a patient high blood pressure medicine when he has intermittent readings is that the medicine can cause the pressure to be too low part of the time and create symptoms.

It's true you do have some high readings. Under such circumstances, perhaps one of the best procedures is to lose any excess body fat that you have, eliminate smoking if you happen to use cigarettes and make a particular point to eliminate coffee, tea and cola. These all contain caffeine which stimulates the nervous system and can increase anxiety tension reactions.

You might also find that a regular progressive exercise program such as walking at least once or twice a day might

HOROSCOPE

By BERNICE BEDE OSOL

For Tuesday, November 27, 1979

YOUR BIRTHDAY
November 27, 1979

Some happy surprises are in store this coming year regarding ventures which at first appear to hold only small promise. You get yourself involved, you'll find ways to enlarge them.

SAGITTARIUS (Nov. 23-Dec. 21) It's possible that you could be a bit of a sluggish starter today, but once you get moving you're a strong force and will successfully complete whatever you begin. Find out more of what lies ahead for you in the year following your birthday by sending for your copy of Astro-Graph Letter, Mail #1 for each to Astro-Graph, Box 608, Radio City Station, N.Y. 10101. Be sure to specify birth date.

CAPRICORN (Dec. 22-Jan. 19) Treat your friends cordially today, but don't try to better them up. Sincerity will win their good will. Follow praise won't.

AQUARIUS (Jan. 20-Feb. 18) Financial conditions could be against you today, but you should come out on the plus side if you use your smarts. Be practical and prudent.

PISCES (Feb. 19-March 20) You can be a real achiever today, as you don't waste your time on insignificant goals. Spend your energies on things which really matter.

ARIES (March 21-April 19) Something that has been most unpleasant for you could quite suddenly be terminated. However, you may not fully appreciate the beneficial

Did Mechanical Failure Cause Fatal Collision?

By DAVID M. RAZLER
Herald Staff Writer

Mechanical failure may have caused the head-on collision between a car and bus Monday night near Lake Monroe in Sanford, which killed a 23-year-old Sanford man and injured the five persons aboard the bus.

When his car collided with a northbound Greyhound bus on U.S. Highway 17-92 at 8:45 p.m. Monday.

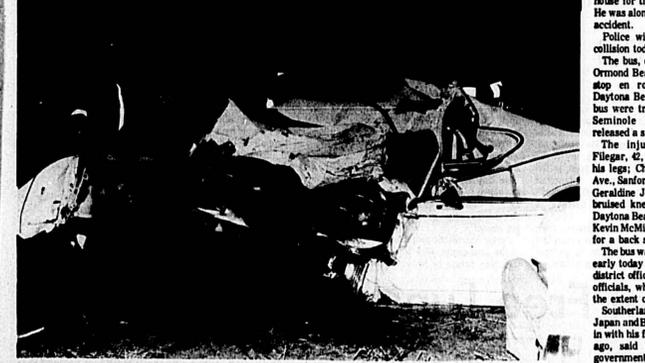

The force of the collision drove the bus off the road and partially into Lake Monroe. The bus driver and his four passengers were taken to Seminole Memorial Hospital where they were treated and released.

Preliminary investigations indicate only that Southerland's car, heading south with the front end of his car, said path on U.S. Highway 17-92 between Mangoustine Avenue and Meador's Road, struck and partially crushed the Greyhound bus.

No other vehicles were involved in the collision and it is not known what caused Southerland's car to cross into the oncoming lane, he said.

Rescue personnel work to free the occupant of the demolished car, which collided with a Greyhound bus.

The pavement on U.S. Highway 17-92 bears the scars of the violent collision of the car and bus.

But Southerland had been having trouble with the front end of his car, said his father, Benjamin Southerland III, who speculated today that mechanical problems may have caused the accident.

"He'd been having problems with that car since the day I met him" added one of the dead man's co-workers at the Victoria Yacht Company in DeBary.

Southerland told his family he was "heading for the store" before he left his house for the last time, said his father. He was alone in his car at the time of the accident.

Police will begin reconstructing the collision today, Bernosky said.

The bus, driven by Robert Flieger of Ormond Beach, had just left a Sanford stop en route from Dinswerywood to Daytona Beach. All five persons on the bus were treated for minor injuries at Seminole Memorial Hospital and released a short time after they arrived.

The injured were identified as: Flieger, 42, suffering from abrasions to his legs; Charles Powell, 28, 150 Lake Ave., Sanford, treated for bruised knees; Geraldine Jones, 23, of Live Oak with bruised knees; Glen O'Connell, 18, of Daytona Beach with an injured wrist and Kevin McMillon, 17, of Palm Bay, treated for a back sprain.

The bus was hauled out of Lake Monroe early today and taken to the Greyhound district office in Orlando, said company officials, who are embarking on an investigation of the extent of the damage to the bus.

Southerland was raised in Tokyo, Japan and Bangkok, Thailand and moved in with his family in Sanford three years ago, said his father, a former U.S. government worker.

He was a Navy veteran, who worked at the Victoria Yacht Company for the last year as an assembler.

Khomeini Rejects U.N. Security Council Intervention

TEHRAN, Iran (UPI) — Ayatollah Ruhollah Khomeini today rejected any action by the United Nations Security Council on Iran, declaring his Islamic regime could not accept the verdict of "any council or court formed under direct influence of the United States."

The Islamic leader also renewed his threat to put the remaining hostages on trial as spies and said their trial will be held at the occupied U.S. Embassy.

"Formation of any court or session contrary to judicial principles is rejected by our nation."

More Iran stories on Page 2A

"Our beloved people should know that they will be victorious in this field by the will of God and reliance upon Islamic faith and would thwart the ominous plots of the powerful one after another," he said.

At the besieged U.S. Embassy, Muslim students holding 49 American hostages for the 24th day said they had placed mines and explosives in their prisoners' rooms in an effort to thwart any rescue attempt.

Ray Offers Himself For Hostages

NASHVILLE, Tenn. (UPI) — In a letter to the Iranian Embassy in Washington, James Earl Ray has offered to exchange himself for the 49 hostages currently held in the U.S. Embassy in Tehran, Iran.

Charles Galtbreath, Ray's attorney, said Monday Ray's offer is about as likely to succeed as his client's last escape attempt — which was nipped in the bud by an alert guard.

"I think it's a great idea," Galtbreath said of the offer, "and I'm sure they would be glad to consider it. But I don't think it would be for what he's asking."

Ray, who is serving a 99 year term for the slaying of Martin Luther King Jr., told the Iranians they could give him the full trial he's been seeking on the King slaying charge.

"I am agreeable to being exchanged for the aforementioned detainees and after the exchange I could be tried in an Islamic court in the Martin Luther King Jr. homicide — there has never been a public trial in the United States because numerous previous private citizens have advocated a trial," Ray wrote.

Sanford County May Sue Over Annexation

By DONNA ESTES
Herald Staff Writer

The county may be filing its fourth lawsuit against a Seminole County city. It all depends on what Commissioner Robert Starn, who he looks into a proposed annexation by the city of Sanford.

The Sanford City Commission Monday night unanimously instructed City Attorney C. Vernon Mize Jr. to prepare an ordinance to annex a parcel of land on Woodson Avenue at the intersection of Woodson and U.S. 17-92.

Asked by Mayor Lee P. Moore if the annexation would create an enclave, City Manager Warren Knowles said no enclave would be created. But, he added, a "jutting out" would.

County Commission Chairman Bill Kirchoff said today any county action against the city would be contingent upon a report from Starn, the district commissioner of the area.

Starn said he will be looking into the annexation and the proposed use of the land in question and try to determine if the tract creates an enclave or a "finger" or a jutting out.

According to county officials, property in that general area had been rezoned by the county for a better use.

Knowles insisted the annexation would not create an enclave.

What is an enclave?
State law forbids the creation of an enclave, but does not define the term. Currently the county has three lawsuits in the circuit court against Lake Mary, Longwood and Casselberry insisting those cities have created enclaves. No case law is presently in record in the state giving a clear definition of the term. The cities define the word one way while the county defines it another.

The cities of Seminole County have generally defined the term as a city area completely surrounded by county property. The county has generally defined the word as a city or county area partially surrounded by foreign property. The proposed Woodson Avenue property is contiguous (attached) to the city only by its touching U.S. 17-92 and it is surrounded on three sides by county property. Knowles told commissioners Monday night. He added it does not create an enclave. Contiguity is another requirement of state law for a valid annexation.

The property involved is located near Sunland Estates on the east side of 17-92. Property on the western side of the highway is within Sanford city limits.

The annexation will create a "jutting out," Knowles said, noting the city limits currently run down the center line of 17-92.

Assistant County Attorney Robert McMillan said today none of the three lawsuits against other cities in the county have been settled as yet.

The suit against Casselberry involves its annexation of the Deer Run planned-unit development while the suit against Longwood involves a tract adjacent to 17-92. The suit against Lake Mary involves the proposed Healthrow planned-unit development.

Officials Order Building Torn Down

Knowles told commissioners the city's action may have the effect of encouraging the insurance company involved to settle the issue. Knowles said the owners can at any time during the 30 days take out the demolition permit. "The official action will assist the owners," he said.

In response to questions from Davis, Knowles said city inspectors have found that the remaining two walls of the structure present an extreme hazard. The inspectors have also said, according to Knowles, that the structure is not repairable.

Commissioner John Morris said his major concern at this point is the possibility the walls, both cracked severely, could fall during the Christmas parade. "With thousands of people here for the parade, a falling wall could mean a tragedy," Morris said.

Cost-Of-Living Rises Another 1% In October

WASHINGTON (UPI) — The cost of living rose 1 percent in October, with prices of gasoline, home heating oil, food and other items climbing more sharply than they have in recent months, the Labor Department reported today.

The overall increase in the Consumer Price Index last month — measured mostly on a sharply rising housing price — was a 1.1 percent rise from September. But it was the 10th straight month in which price increases have hovered around 1 percent.

The index, however, ignores brought the total increase in consumer prices during the last 25 months to 22.5 percent, tying the inflation figure for calendar year 1974, which was the worst inflation year since World War II when prices rose 16.5 percent in 1946.

Labor Department analysts said, however, that for the first time in several months they have begun to see some changes in the pattern of individual prices. They cautioned that this may not last, and said it would be premature to conclude that inflation has begun to improve.

Today's report showed:
— Gasoline prices rose 1.8 percent in October, compared to average monthly increases of about 1 percent during the last six months. It was the smallest increase since December 1978.
— Home heating oil rose 1.3 percent, compared to a recent average monthly increase of 1 percent.
— Food and beverage prices rose 0.7 percent compared to 0.5 percent in September.

WORLD IN BRIEF

Treasury Secretary Meets Kuwait In Plea For Oil

KUWAIT (UPI) — Military jeeps with mounted machine guns and rifle-toting troops protected the U.S. Embassy today as Treasury Secretary G. William Miller began the final leg of his three-million Middle East visit.

Miller was meeting with top Kuwaiti officials to deliver the same message he had given earlier in Saudi Arabia and Abu Dhabi: World oil production must remain steady and U.S. energy conservation efforts must be increased.

Diplomatic sources said security was stepped up Monday on the eve of Miller's visit as a precautionary measure in the wake of attacks on U.S. embassies in Iran and Pakistan and on the Grand Mosque of Mecca in Saudi Arabia. Tents for Kuwaiti troops were erected inside the walled U.S. Embassy compound.

Miller met Monday in Abu Dhabi with Mani Al-Otaibi, the outgoing chairman of the OPEC oil cartel, who called on members of the Organization of Petroleum Exporting Countries to show restraint in setting 1980 petroleum prices.

Muslims Still In Mecca

RIYADH, Saudi Arabia (UPI) — Some of the armed band of Muslim "fanatics" who invaded and occupied the Grand Mosque in Mecca a week ago still hold out today in the labyrinthine catacombs of Islam's holiest shrine.

Saudi Arabian security forces, who had announced earlier that they regained complete control of the mosque, combed its ancient underground passageways in search of the last remaining Muslim militants, who the government has labeled "fanatics."

The rebel gunmen, who may have numbered up to 500, retreated to the mosque's catacombs after being ousted by Saudi troops from the halls and minarets in a bitter room-to-room battle Saturday. There were "hundreds" of casualties in the clash.

South Korea Indicts 8

SEOUL, South Korea (UPI) — Martial law prosecutors today announced the indictments of the former director of Korea Central Intelligence Agency and seven other men in the assassination of President Park Chung-hee.

If they are convicted at their public trial, the seven civilians accused face death by hanging, and the lone military man in the group faces death by firing squad.

The martial law command indicted former KCIA chief Kim Jae-hyun and six presidential secretaries Kim Ka-yeon Monday on charges of murder with the aim of insurrection, the prosecutors said. The case was transferred to the Military Summary Court for public trial. Prosecutors said the first public hearing on the case will be held next week.

Longwood Hiring 2 Police, 1 Fireman

By JANE CABELLETTY Herald Staff Writer

Faced with the cutoff of CETA (Comprehensive Employment Training Act) funds and the loss of three CETA jobs, Longwood City Commissioners voted Monday night to solicit an additional \$10,000 to hire a police dispatcher, a policeman and a fireman.

City Administrator David Chacey told the commission prior to the vote the Seminole County CETA office had given up hope of funding CETA positions in the city until about February.

The budget will be amended to show the transfer at the mid-year budget review.

The commission was two members short Monday night with the absence of Commissioner Ray Lathrop and the vacancy in the District 1 seat since the August resignation of Larry Goldberg. Both the District 1 seat and the District 4 seat now held by Lathrop were to be filled at the Dec. 4 election.

Mayor James Lawrence in support of re-election in District 1. Action was delayed on four bids ranging from \$12,440 to \$18,880 for construction of a 700 sq. ft. addition to city hall until the city attorney can give an opinion on the legality of the bid procedure. Commissioner G. G. Grant questioned the fact that Chacey did not advertise for bids, bids were not sealed with proper blueprints and specifications were provided.

Grant said, "I am not against the building, but I am for building it right."

10 Or More In Line For Hospital Board

At least 10 applicants are in line to fill two openings on the Seminole Memorial Hospital Board, according to Bill Moore, chairman of the Governor's Reorganizing Commission.

Moore's commission will recommend to Gov. Bob Graham three board members for each opening, will meet in the hospital Monday at 6 p.m. tonight to review the applications. Moore said another meeting may be scheduled if the final recommendations are not made by then.

The two openings were created through the expiration of Tom Rippey's term on Dec. 31 and Alan Kern's earlier resignation at the last board meeting.

Rippey said he knew the board would be reconstituted, but he was not sure when. He said he was not sure when he would be asked to resign.

The night hospital appointments are Bill Rippey, Superintendent of the Hospital, and Alan Kern, Chairman of the Board. The day hospital appointments are Bill Rippey, Superintendent of the Hospital, and Alan Kern, Chairman of the Board.

Members of the reorganizing commission, in addition to Moore, are Larry Baker, C. C. Phillips, Ann Allen and G. F. ...

Frustrated

Elections Staff Mourns Loss Of Office In Courthouse

By DIANE PETRYK Herald Staff Writer

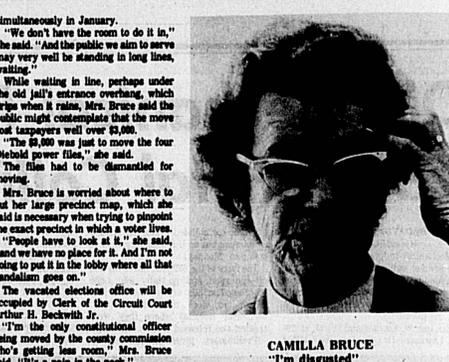

In 1961, County Elections Supervisor Camilla Bruce was to work for the Seminole County elections office in the new county courthouse. She was planning the building, "if you've never done anything for anybody, do something for the elections office. Give us the space we need." And he did, she said.

"We were the happiest people in the world when the new courthouse opened," Mrs. Bruce said.

She said she told the architect when he was planning the building, "if you've never done anything for anybody, do something for the elections office. Give us the space we need." And he did, she said.

"We were the happiest people in the world when the new courthouse opened," Mrs. Bruce said.

She said she told the architect when he was planning the building, "if you've never done anything for anybody, do something for the elections office. Give us the space we need." And he did, she said.

CAMILLA BRUCE "I'm disgusted"

Investigation Of Public Defender Begins

By DIANE PETRYK Herald Staff Writer

A formal investigation into the charges of favoritism, "close friendships," and other wrongdoing in the Seminole-Brevard public defender's office is to start today, a governor's office spokesman said.

Dick Schodtlich, state assistant general counsel, said he forwarded information on specific allegations and a cover letter signed by Governor Bob Graham to the Florida Department of Law Enforcement Nov. 21.

The Department of Law Enforcement indicated its investigation would begin today. Schodtlich said, "While the investigation is going on, he said, no specifics on any of the allegations will be released. In the cover letter, however, 'numerous instances of official misconduct' were said to have been charged, he asserted.

"If true, the allegations show malfeasance, negligence, and dereliction of duty and/or inability to perform official duties," Schodtlich said.

Public Defender David M. Porter, against whom the charges were made, said today he still has not been told the specific complaints.

"While the investigation is going on, he said, no specifics on any of the allegations will be released. In the cover letter, however, 'numerous instances of official misconduct' were said to have been charged, he asserted.

"If true, the allegations show malfeasance, negligence, and dereliction of duty and/or inability to perform official duties," Schodtlich said.

Thieves Get Free Lunches In Sanford

By DAVID M. BAILEY Herald Staff Writer

While thieves didn't exactly bring home the bacon, they did bring home sandwich fixings and pizza in two unrelated thefts reported to Sanford police.

Thieves broke into the cooler behind the Hudson Sub Shop 2704 S. Hwy. 17 on Sunday morning and stole a large roast beef and a bag of submarine rolls, said police.

"With the damage to the cooler, the total value of the theft is estimated at \$70."

Two boxes of frozen pizza were stolen from Southeast Elementary School some time between Wednesday and Monday. The pizza were the only items taken or disturbed by thieves who broke into the school, said police.

A 300-pound sow and three 65-pound hogs were reported missing by Thomas Collins, of 2727 Truman St., Sanford.

The sow is described as white with black spots while the hogs are white without markings.

NO CHARGES FILED

No charges will be filed against a Longwood woman involved in an auto-pedestrian accident, which killed a Longwood man Nov. 24, police announced Monday.

Corporal A.G. DePuy, of the Longwood Police Department, said no charges will be filed against Kimberley Yates in the accident which took the life of Robert Andrew Kelly of 748 Lorraman Circle, Longwood.

"She just stepped out into the road — he didn't see her," said DePuy, adding police are still awaiting testimony from witnesses to determine whether Kelly was sober at the time of the accident. The accident occurred on U.S. Highway 17-92 near Florida Boulevard.

Carter: U.S. Honor At Stake In Iran

WASHINGTON (UPI) — President Carter today said the United States is at stake in the Iranian crisis.

Sen. J. Bennett Johnston, D-La., questioned Carter as saying at a hearing breakfast session at the White House.

"We are not going to do anything to nullify the honor of this country," "I think he made clear that the release of the hostages" will not suddenly clear up relations with Iran, said Johnston.

"We will take other actions, not necessarily military," Johnston added.

Sen. Russell Long, D-La., emerged from the meeting to call the president's "dove" line in the U.S. Embassy in Tehran more than three weeks ago an act of war.

"I personally think we ought to regard it as an act of war," Long said. "To raise our embassy is an act of war."

"That doesn't mean you ought to bomb them, but in due course we ought to take military action," Long said. He thought that the president was "doing the best he can," but "in due course, I think he ought to do more."

Carter briefed the lawmakers on the hostage situation, now in its 35th day.

Rep. John Brademas, D-Ind., said the leaders "strongly support" Carter's demand for immediate release of the hostages.

"Everyone felt we should take a restrained posture on Capitol Hill," said Brademas, "but we are not going to let the president's comprehensive energy package."

Johnston said. "He (Carter) said his first concern is the honor of this country."

Long conceded what military experts have been saying: "There is no way we can go in there and get the hostages out."

The leaders indicated that the Iranian crisis has given a new impetus to congressional passage of the president's comprehensive energy package.

Washington Frowning At Hansen's Iran Trip

WASHINGTON (UPI) — Regardless of the outcome of Rep. George Hansen's trip to Iran, it appears unlikely the Idaho Republican will receive a hero's welcome on his eventual return to Washington.

Many critics from the White House, the State Department and his congressional colleagues Monday greeted Hansen's announcement that he would make a two-week trip to Iran as a congressional hearing on U.S. involvement in the crisis.

White House press secretary Jody Powell said the administration does not approve of Hansen's efforts to try to influence the release of the 49 American hostages held in Iran.

"It doesn't make sense" for anyone to make a private tour of visits outside of the administration, he said. "I don't think that sort of thing is helpful."

Hansen said he would be accompanied by a number of aides and would be accompanied by a number of aides and would be accompanied by a number of aides.

NATION IN BRIEF

Manson's Parole Chance Only Slightly Improved

VACAVILLE, Calif. (UPI) — Charles Manson's prospects for winning a parole date today were only marginally better than last year when a state officer described him as a "schizophrenic in remission."

Manson, 46, is serving a life term at the California Medical Facility for murdering the blonde slayings of actress Sharon Tate and eight other people in Los Angeles 10 years ago.

The wide-eyed ex-coordinator and leader of a drug and sex band became eligible for parole consideration after serving seven years. He lost his first bid for freedom in November 1978, but under the law he must receive a parole hearing every year.

Eastern: Crash Our Fault

CHARLOTTE, N.C. (UPI) — Eastern Airlines has admitted it was negligent in a crash that killed 72 persons five years ago and says it should not be forced to pay punitive damages, an attorney told a federal court jury Monday.

That jury was expected to begin deliberations today in civil suits filed by two surviving passengers and the estate of a third seeking \$20.5 million in actual and punitive damages.

Eastern and its insurance carriers are also seeking \$5 million in damages in a counterclaim against the Federal Aviation Administration and four Charlotte air traffic controllers.

Darryl Zanuck Comatoses

PALM SPRINGS, Calif. (UPI) — Movie mogul Darryl Zanuck, in relapse with pneumonia, is comatose and in critical condition at Desert Hospital, said his doctor, Zanuck, 77, cotubator and former chairman of 20th Century-Fox, was admitted to the hospital late last month and was reported in fair condition last week.

Dr. George Kaplan said Monday that Zanuck slipped into a coma last Saturday and the outlook for his recovery "is very grim."

Zanuck ran the 20th Century Fox studios with an iron hand for more than a third of a century and at one time was one of the highest paid executives in the country with an annual salary and dividends of more than \$400,000.

Lower Windfall Taxes Endorsed

Independent Oil Gets Break In Senate

WASHINGTON (UPI) — The Senate, which refused earlier to substitute the \$277 billion House windfall profits tax bill for its own committee's \$138 billion version, endorsed a \$10 billion exemption for independent oil producers.

The Senate voted 52-32 Monday not to kill an amendment that would exempt from the windfall profits tax the first 1,000 barrels of oil per day produced by any independent producer.

Both opponents and supporters of the measure said Senate Majority Leader Robert Byrd, D-W.Va., to postpone any further action on the amendment by Sen. Lloyd Bentsen, D-Texas, apparently so they could muster forces for a later vote.

Earlier Monday, the Senate voted, 50-32, to table, and effectively kill, a proposal by Sen. Dale Bumpers, D-Ark., to substitute the revenue features of the \$277 billion House windfall profits tax for the \$138 billion Senate Finance Committee bill.

Can Dinosaurs Bring Energy?

WASHINGTON (UPI) — Sen. Paul Tsongas, D-Mass., proposed today the United States undertake a "crash program" in dinosaur production to provide a new reservoir of fossil fuel.

In a Senate speech prepared with both checks filled with tongue, Tsongas pointed out "alternate energy strategies" now being considered for petroleum replacements all leave something to be desired.

"Solar energy sounds too good to be believed. Low-head hydroelectricity is hard to get excited about. Windmills were used years ago. How can we go back to them and call it progress?" he said.

"Even synthetic fuels — the summer sensation — are finite. They are derived from our existing supply of fossil fuels."

"This nation's vision must be bigger and better. If we are really serious about producing new oil, I suggest that the best, the simplest, indeed the only solution is a major research and development program in dinosaur resources. We will raise them, bury them, and produce oil from them," he proposed.

In answer to the question "Why not really be looking for them lately, or just going our separate way?" he said.

creatures ever to appear on Earth.

"An Energy Department expert advises my office informally that each 60,000-pound Diplodocus might yield about 20,000 gross pounds of crude oil."

"That's over 70 barrels of oil per beast."

The senator conceded opposition might arise from critics who contend dinosaurs are extinct and "we cannot make them in a laboratory."

"I say that reports of their death may be greatly exaggerated ... Have we really been looking for them lately, or just going our separate way?" he asked.

Major Banks Set Lower Prime Rate

By DAN CHESZAR

Major banks signaled interest rates have peaked this year by reducing their prime lending rates a quarter point to 15 1/2 percent, sending volume on Wall Street's Big Board up and the dollar on European markets down.

The prime rate applied to short-term loans made to the largest corporations and rates for smaller borrowers are adjusted more slowly.

The prime rate could mean a break for consumers on interest rates and make credit more available, but not for some time.

The prime rate applied to short-term loans made to the largest corporations and rates for smaller borrowers are adjusted more slowly.

Nixon 'Risk Is Too Great To Use The Military'

LOS ANGELES (UPI) — Former President Richard Nixon said today using military force in Iran at this time would jeopardize the lives of the American hostages being held at the U.S. Embassy in Tehran, but he said if any of them are harmed, then the United States should retaliate.

Nixon, in a nearly two-hour, live television interview Monday night, also said the SALT treaty should not be debated in the Senate until the crisis in Iran is settled, and he emphasized his political career is over.

The situation in Iran, he said, is "a very serious crisis. The options we have are very limited. Everybody wants to get the hostages back."

"My gut feeling is, 'Why don't we go in there and knock these people over?'" Nixon said. "Iran is an irrational country, and an irrational leader."

But, he said, "If we were to move, the life of the hostages would be in danger. The risk is too great to use the military option in this case."

Nixon said he believes the 49 hostages being held at the U.S. Embassy in Tehran will be released if the United States maintains its strong position. He said the United States should not extricate Shah Mohammed Reza Pahlavi from Iran, as the Muslim students holding the hostages have demanded.

Although he said he normally receives briefings every two weeks from the White House, Nixon said, "I am not privy to any more information" than anyone else about events in Iran. He said he has not requested a briefing about Iran because he feels the situation is too delicate.

The Shah, he said, "is a friend of the United States," whatever his shortcomings might have been, and was a much better ruler for Iran than the Ayatollah Ruhollah Khomeini. Consideration of the SALT treaty, Nixon said, should be postponed by the Senate until after the situation in Iran is settled.

"SALT should be considered on its merits, apart from Iran," he said.

Regarding his political career, Nixon said, "It is over. I have no plans to run for office."

"I see no useful purpose to engage in any political activity. I am aware I might be a liability to any candidate."

"I have stated my views and his experiences on foreign situations, he said.

Crime Lab May Determine Identity Of Ashes

DELAND, Fla. (UPI) — The mystery of whose ashes were buried in William Brown's grave is being turned over to a crime laboratory for solution.

The 73-year-old Brown was supposed to have been cremated following his death Oct. 23 after a gall bladder operation at Daytona Community Hospital. A brass urn, purported to contain his ashes, was buried at Cedar Hill Memorial Gardens in Daytona Beach.

But Brown's body was discovered in the back seat of a car driving through north Georgia Nov. 7. The body was not identified.

Brown's coffin was cremated Nov. 16 while his body, discovered nine days earlier, lay unidentified in a Catosa County, Georgia, morgue.

The body was found in the back seat of a car driven by funeral director Thomas Galentine, who used to work in Daytona Beach. Galentine was stopped near Ringgold, Ga., on a traffic violation Nov. 7 by a Catosa County deputy sheriff. The officer suspected Brown's body under tarpaulin. The body was not identified until two weeks later.

Galentine was arrested and charged with concealing a death. So was his brother, Gerald, a Chattahoochee, Tenn., optometrist, who was following close behind in another car.

An investigator for the Catosa County sheriff's department said Thomas Galentine told him of discovering the body accidentally under a tarp lying by the side of the road in north Georgia. He told investigators he loaded the body into his car in hopes of receiving a reward.

The Galentine brothers were freed on \$25,000 bond each.

School Polygraphs On Board Agenda

The Seminole County Board of Education will hear further complaints about threats of polygraph testing and a proposal from a board member that a policy on the subject be written.

PUBLIC SERVICE SPINAL EXAMINATION FOR VICTIMS WITH ACUTE & CHRONIC PAIN

Danger Signals of Pinched Nerves:

1. Headaches, Dizziness,
2. Blurred Vision
3. Neck Pain, Tight Muscles, Spasms
4. Shoulder Pain, Pain Down Arms, Numbness in Hands
5. Pain Between Shoulders, Difficult Breathing, Abdominal Pain.
6. Lower Back Pain, Hip Pain, Pain Down Legs

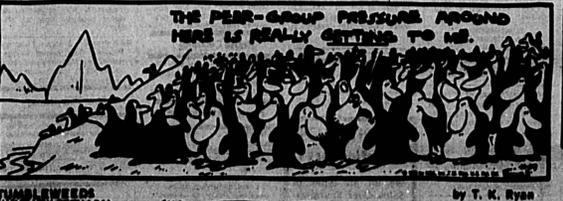

Why PUBLIC SERVICE? Thousands of area residents have spine related problems which usually respond to chiropractic care.

Nephritis Is Really Nephron Inflammation

DEAR DR. LAMB - My husband just found out that he has nephritis. He was diagnosed his illness as nephrotic syndrome. He took a kidney biopsy and the report proved that to be true. He has had a lot of swelling. Can you tell us something about this kidney disease?
DEAR READER - The disease really means inflammation of the nephrons in the kidney. Nephrons are the little filtering units that make up the kidneys. Hence the term nephritis. I am sending you The Health Letter number 12-12, "Your Kidneys and How They Work. It will give you a diagram of the architecture of the kidneys and what a nephron is. The little nephron in the kidney that is inflamed allows a lot of the albumin protein in the blood to leak into the urine. This massive loss of albumin ultimately is the cause for the swelling that your husband is experiencing. One of the reasons that all of us don't have a lot more swelling normally is because of proteins in the blood stream. These, particularly albumin, literally suck the fluid back out of the tissue spaces into the bloodstream. When you lose too much albumin, this doesn't occur and so when fluid leaves the little capillaries to bathe the cells in the tissues, it's not drawn back into the circulation. Sometimes the swelling in nephrotic patient is enormous. Water retention is also affected by sodium salt retention. That's why many of these patients are put on a low salt diet. There are medicines that are helpful. Sometimes steroid hormones are used at least for a short period of time. In the course of time the nephrotic stage disappears and at that time the degree of remaining kidney damage can be better evaluated. The Raynaud's disease, as you undoubtedly know, is associated with severe spasms of the arteries. Cold weather can trigger these and this can cause numbness of the lips and face. Sometimes Raynaud's disease is caused by underlying disorders but one factor which can contribute to it is smoking cigarettes.

257 Feared Dead In DC-10 Crash

WELLINGTON, New Zealand (UPI) - A U.S. rescue helicopter crew reported it saw no signs of survivors today in the wreckage of an Air New Zealand DC-10 that crashed in the frozen Antarctic with 257 people aboard, including 81 Americans.
New Zealand's Search and Rescue Helicopters said the helicopter carrying the rescue team was unable to land because of strong wind currents over the crash site on the slopes of Mt. Erebus. But a spokesman said the helicopter crew said it saw no sign of survivors.
Another attempt to land was made within a few hours, Search and Rescue Headquarters said. New Zealand police said that in addition to the eight Americans - initial reports had said 12 - the plane was carrying 191 New Zealanders, 24 Japanese, one Australian, one British along with crew and other passengers - mostly tourists.
Antarctic experts thought it unlikely anyone could survive in the harsh, sub-zero temperatures where the plane was down.
The search for the tourist plane began early today when the aircraft was overdue on its return flight by several hours.
A Navy Hercules plane searching the frozen Antarctic sighted the wreckage of the plane 2,500 feet up the slopes of an active volcano, Mt. Erebus, on Ross Island, one of the peaks in the Antarctic viewed during tourist flights.

State May Pay For County Audits, Say Commissioners

By DIANE PETRYK
Herald Staff Writer
County Commissioner Bob French and Assistant County Administrator Jeff Eichberger said today they are "very happy and confident the state legislature will budget monies to pay for required county audits."
If approved, the state funding will relieve Seminole County of a minimum \$15,000 burden, French said.
A bill passed by the 1979 Florida Legislature required counties to have audits performed by independent certified public accountants, but counties across the state realize the expense of such procedures would put them in a severe financial bind, county officials said.
A lobbying effort spearheaded by the State Association of County Commissioners will apparently be successful in obtaining financial relief, French said.
"We'll get the money," French said confidently. He and Eichberger were in Tallahassee Tuesday, looking into it.
The state senate Tuesday recommended \$7 million be set aside to fund the audits in their entirety, French reported.
"There was still a minor battle with the House of Representatives," he said.

Utility, Port To Relash Fed

A long-standing quarrel between Lake Monroe Utility Corp. and the Port of Sanford will be renewed next month, term said Dennis Dolger, port administrator.
A lawsuit is in the offing if an agreement is not reached.
A representative of the utility that provides water and power services to the port said the utility board members should pay a \$2.7 million assessment, Dolger said, while the board feels they only owe \$2.4 million.
"There's a bit of disparity between the two figures," Dolger said.
The assessment is for "add to plant capacity" and "add to plant capacity" when a new demand is added to or subtracted from the system.
"We don't agree with the assessment because of the nature of the assessment," Dolger said.
"It's inflated as hell," said Dr. J.W. Hickman, president of the utility.
"Their attitude is that Seminole County (which partially funds the port) can make its own rules and we're just a little capitalist utility company," he said.

President Goes On TV Tonight

WASHINGTON (UPI) - President Carter says the American hostages in the beleaguered U.S. Embassy in Tehran have been treated disgracefully, with some threatened with gunpoint.
Rep. George Brown, D-Calif., and others who have said the Americans appeared to be in good condition.
At a briefing Tuesday for state leaders from New Hampshire, Vermont and Maine, Carter drew a bleak picture of the plight of the captives and was reported as saying, "The hostages are not being treated."
"They have not been permitted to speak a word," he said. "They've been threatened at times at pistol point and encouraged to make statements contrary to their own inclination."
"They've been kept, now, with hands and feet tied for 23 days," he told his visitors. "They have not been permitted to speak. When they have spoken, to say 'Good Morning' or 'Good Night' they have been punished."
"This is a reprehensible thing and a disgrace to everyone who believes in democracy and decency," he said.
Carter's comments, many of which were interrupted during questions and answers at the briefing, appeared to be a warm-up for his televised news conference tonight.

Water Issue Confuses Commissioners

By DIANE PETRYK
Herald Staff Writer
"Support us. We live in Seminole County."
That was the message Water Springs Mayor Fred Piland repeatedly gave the Seminole County Board Tuesday as it considered a \$120-million, 120,000-gallon-per-day capacity at the Iron Bridge regional average treatment plant in Orange County or elsewhere.
Piland asserted that Seminole County had not even joined the Orange County project and that if the county expressed desire for it to go there it would give Water Springs officials bargaining power elsewhere when looking for additional capacity.
Nesbinder indicated that Orange County's problems in the area of sewage treatment needs were "worse than any other entity" but Commissioner Sander's claim made a motion that Water Springs be named their choice for the reserve.
"If someone in Seminole County can use it, I'd rather see it used in Seminole County," she said. The motion was defeated 3-2, however, and the compromise motion to designate no particular recipient passed unanimously.
"You folks made a super political decision," Piland told the board.
He said the move would accomplish the same thing as designating the reserve to Water Springs and would make it easier for him to convince other governments to favor Water Springs.
When Water Springs joined the Iron Bridge project, it was estimated that the city would not use it until after the plant was expanded in 1985. But growing Water Springs may need capacity earlier. Currently, the city is looking to obtain 650,000 gallons.

Thieves Grab \$1,300

Two men wearing ski masks, one armed with a pistol, robbed a Caselberry grocery this morning, as the shop was just opening.
The two made off with about \$1,300 in cash and checks plus assorted groceries but left behind a woman who was lying on the floor.
Shop and Go Assistant Manager Martha Hicks, 27, of Longwood, said she was just opening the store at 1600 Latta Drive and was bringing in newspapers when she was approached by the thieves.
"One of them grabbed my arm, put a gun to me and said 'We're going in,'" Hicks said. She was forced to open the store's floor safe containing \$1,300 before she was tied and placed in the store's bathroom, said Karcher. When she heard the thieves had left, Hicks managed to get out of the bathroom, call police and cut her ropes, he added.
The robbery occurred in Hicks' 1973 Pontiac, which was found abandoned a short distance away on Easton Way of Lake, said Karcher.

TIED UP FOR NOW
San constructioners have long had a reputation for putting the squeeze on their victims. But Terese Gray turns the tables on this resident of the Central Florida Zoo and gives him a friendly hug and kiss as well. The DeBarry miss said she is not afraid of snakes and enjoyed handling the reptile at a recent snake demonstration held at the zoo.
