NUMBER 306

CHINO, SOVIET ARMIES DRAW UP FOR BATTLE

Situation Is Tense As
40,000 Troops Stand
Ready To Engage In
Clashes On Frontier

HARBIN, MANCHURIA,
Sept. 10—(INS)—Two Soviet
and Chinese armies totalled
about 40,000 men, each equip-
ped for field service and
drawn up in battle array,
face each other in the
Pagan-chinay (Suifenho)
region today.

This area has been the scene of
violent fighting in the past 72
hours, the Soviet forces having
bombed Pagan-chinay with
artillery during intermittent fight-
ing between infantry. The Chinese
troops in that zone are estimated
at 20,000 and the Soviets are 10
times as many.

Only 1,000 civilian residents re-
main in Pagan-chinay because of
the continued dangers from fight-
ing between land and air forces.

The International News Service
staff correspondent arrived in
Harbin today after a visit here to
the Pagan-chinay sector where
he visited the Chinese front line
just before the battle began on
Saturday.

The Chinese defensive trench-
dugouts and machine gun positions
are excellently constructed
after the manner of such military
works in France during the World
War. They are manned by de-
votedly determined troops.

The correspondent visited the
Chinese position along the Com-
munist railroad, three miles from
Pagan-chinay.

The Chinese have four up the
rails beyond the third tunnel to
prevent the movement of Russian
armored trains.

The first Mukden army corps

manoeuvring about 50,000 men

under the force of Marshal Chang

Tsue-lung, military governor of

Manchuria, and one of the late

Marshal Chang Tsue-lung, is sta-

tioned about 100 miles east of

Mukden.

The Chinese troops on the east-
ern frontier are in a hellish

land as the result of numer-
ous fires of Russian shell craters

and Chinese subjects. The auth-
orities circulated reports of Soviet

troops upon the Chinese.

ROGERS HORNSBY CLIMBS STEADILY IN BATTING RACE

Chicago Slugger Now Threatens To Oust Herman And O'Doul

NEW YORK, N. Y., Sept. 9—(INS)—Should you ask Lefty O'Doul, who, in his opinion, will lead the National League in batting this year, he would doubtless reply, "Mr. Frank J. O'Doul."

The same question put to Babe Herman would do just the same, reply, "Mr. Floyd Caves Herman, out of which show that optimism is not confined to Mr. Habicht and members of his family. For should either of the above gentlemen, one the pride and joy of the Phillips, the other the fair-haired child of the Robins, face the facts they would be forced to admit that it seems extremely likely that neither of them should be leading.

Who then? You guessed it. That man perennial among hitters, Rogers Hornsby, seven times winner of the crown, six of which came in a row, time or two peek at the figures and you will see just why O'Doul and Herman have cause to worry.

Two weeks ago Herman was leading the league with .400 and Hornsby was barely in the big figures with .358, some 45 points in the rear. One week ago Hornsby's .363 was just 37 percentage points behind Herman's .397. Today the blazing Hornsby's .397 is exactly 21 points away from O'Doul's .398. A gain of 2 in two weeks, but the most significant point is that while O'Doul and Herman are slipping, Hornsby is moving forward and showing no signs of slowing down. As witness yesterday when his team mates bowed to the Braves, 2 to 1, Hornsby managed to get four out of five including his thirty-fifth homer, two double and a single. Despite the loss the Cubs still lead by 1½ full games.

St. Louis and Philadelphia divided a double-header, the Phils rallying for five runs in the eighth to take the opener, 8 to 6 and the Cards coming from behind to seal their closing affair, 4 to 3.

Dazzy Vance scored his third straight victory as the Brown trimmied the Pirates, 2 to 1. Battened bear to bring his strike-on total for the year to 106, Dazzy now has 12 triumphs to 11 disasters. New York at Cincinnati was called off account of rain.

New York's return to its old fine form was the feature in the American Ruth, Gehrig and Diener smacking homers as the Yankees battered Detroit, 3 to 2. Babe Ruth was hit 42nd of 1925 vintage and put him ahead of his 1923 mark of 41. He has had six years in which he has made more than 42.

Chicago got off an early lead, and they stood Washington off to win, 4 to 3. The defeat prevented the Senators from going into fifth place.

Boston staged a ninth inning rally of one run to turn back St. Louis in the first game of a double header, 4 to 3. The night cap, after 10 scoreless innings, was called. Morris pitched the opener for the Sox and hung up his fourteenth victory of the year. Cleveland and Philadelphia were not scheduled.

Restrictions Upon Fruit Shipments To North Made Easier

ORLANDO, Fla., Sept. 9—(INS)—Division of car-carrying shippers of Florida fruits and vegetables from southern points to northern points under strict regulations will now be allowed. Modifying some of the existing rules governing the movement of fruits and vegetables from the state initiated because of the deadly Mediterranean fruit fly, the Department of Agriculture at Washington has advised local directors of the eradication field of the lessening of quarantine regulations.

Except for unsterilized fruit produced in eradication areas the movement of most fruits and vegetables via the usual diversion points in Alabama, Georgia, North and South Carolina and Tennessee will be permitted, the Department of Agriculture advised.

FLIER IS QUESTIONED

NEW YORK, Sept. 9—(INS)—Henry Ramsell, 32-year-old aviator, was questioned today by District Attorney Frank Higgins, as a result of the first accident of its kind, Ramsell, flying through a thick fog in Jamaica Bay, is thought to have been the one who struck a motorboat a distance from shore. William Brown, 52, James Kilby, and his companion, John Dee, badly injured. Ramsell said his plane left what he thought was a log.

GIRL IS RUN DOWN

NEW YORK, Sept. 9—(INS)—Beatrice Nolan, six, was in a Brooklyn hospital today suffering from a fractured skull sustained when she was run over by a baby carriage.

Learn Art of Dueling

Temple University students learn the art of dueling, not so much as a possible means of self-defense but as a course of physical discipline that builds graceful and well-coordinated bodies. Here are twin sisters crossing swords. They are Maude (left) and Leona Sealey of Langhorne, Pa.

Critical Point Is Reached In Navy Question

(Continued From Page One)

The difficulties of the situation come immediately apparent when America's present and authorized building strength in cruisers is ranged alongside the British figures.

Congress last year ordered the immediate construction of 15 units of 10,000 tons each, or 150,000 tons. Thus even with completion of this program—which President Hoover has been working to avoid—the American Navy would still be some 45,000 tons short of what Britain considers her irreducible minimum.

Great Britain has only 15 cruisers mounting 8-inch guns, her admirals consider the smaller type of ship more adaptable to British needs. Upon completion of the present building program, the American Navy will have 25 in the 8-inch type. The British think this will give the American Navy too much constant superiority over her smaller cruiser, and it is understood they have proposed to allow the United States only 18 ships of the 8-inch class, as compared to their own 15. The 30,000 tons so saved, could have to be devoted to the smaller type of vessel which the American experts don't want.

Thus the experts have warned and argued. But the important point to President Hoover apparently is that no plan whatever has yet been devised which will stop the completion of the 15 cruiser program. That program is going on a cost approximately \$200,000, or a no insurable item in his administration's financial plans.

Meanwhile the Senate, which in the end may approve any agreement reached, is getting considerably heated up over the naval situation. Enough concerning the negotiations has "leaked" to Capitol Hill to make the advocates of absolute parity with Britain apprehensive that this parity is to be sacrificed. Any treaty presented that does not insure parity is certain to be nay-sayed, fought and probably rejected.

Boston staged a ninth inning rally of one run to turn back St. Louis in the first game of a double header, 4 to 3. The night cap, after 10 scoreless innings, was called. Morris pitched the opener for the Sox and hung up his fourteenth victory of the year. Cleveland and Philadelphia were not scheduled.

News Notes On Agriculture

Alex R. Johnson
Department of Vocational Agriculture for Seminole County

WHY TEN FARMERS FAILED:
1. Wasted and misdirected capital. Too many hogs and not enough cattle, sheep and poultry.
2. Receipts too small. Should increase receipts from sheep, poultry and dairy cattle and also from cash crops.

3. Wasted available man labor which should take care of additional live stock.

4. Inefficient use of available horse labor, causing high feed per crop acre. Should either cut down the number of horses or increase the acres of cultivated crops.

5. Low returns from pasture lands, due either to poor quality of pasture or insufficient live stock. Should improve pasture so each acre will support more livestock and bring increased returns.

6. Low returns from dairy cattle, due to low average production per cow. Cows should be tested and the low producing ones eliminated from the herd. All other known means should be used to increase the average production.

The above reasons give failure to ten out of a group of thirty one dairy, truck and poultry farmers in Kentucky as reported by a study and analysis of the business of the group by Harry A. Ward, of the Farm Economic Department, University of Kentucky. They are given in this column because they clearly bring out the need of diversification and efficiency on the farm.

Plant Sweet Peas Now For Christmas Bloom

September and October are the months for planting sweet peas for winter flowers, says W. J. Floyd, professor of horticulture in the College of Agriculture in Gainesville. Those planted in September will make flowers by Christmas, while those planted in October should bloom in January.

The seed should be planted from three to four inches deep. A trench should be dug the desired depth and the seed dropped about two inches apart. They are covered about two inches deep leaving the remainder of the soil in a ridge beside the trench. At the seedlings begin to come up the soil is worked over them until the ground is level.

The soil on which sweet peas are to be grown should have plenty of organic matter. In addition about one pound of commercial fertilizer should be used for each square yard planted. Select the heavier soils for sweet peas whenever possible, advises Professor Floyd.

If you are interested in soil improvement crops, you are invited to see the demonstration crop of crotalaria now growing in comparison with cowpeas on the demonstration farm operated by this department on 18th street west of French Ave. It was planted July first and is now four feet high and still growing strong.

Fashions for the Smart Woman

SPORTS ENSEMBLE

One of the season's smartest sports ensemble, which is also suitable to wear in the city, is shown here. It is made of a light-colored fabric, such as moire or boat, is illustrated above. The sunny coat has raglan sleeves, smoothly finished with a lapped-and-tucked effect. The skirt is a chintz detail. The simple one-piece frock achieves a two-piece appearance by the skillful use of contrasting colors, for the top is of a rich color, contrasting sharply on the fabric in which it is developed. This one uses tweed for coat and skirt, with a diagonally striped jersey blouse.

Patent Printed Pattern No. 4679.

Sizes 14 to 40, 50 cents. Frock No. 6731. Sizes 14 to 40, 45 cents.

INA CLARE

Already having seized the attention of the screen colony in Hollywood with her sly, brilliant conversation and fine wardrobe, Ina Claire and her new husband, John Gilbert, are the stars of the Pathé all-dialogue picture, "The Awful Truth,"

On the conclusion of her belated honeymoon trip abroad Miss Claire will return to the studio to make her second picture, "Negligee."

RELIICS JUST FOUND IN WEST DISCLOSE NEW FACTS ON U. S. CHRISTMAS BLOOM

LAS CRUCES, N. M., Sept. 9—(INS)—Human and animal life roamed this continent some fifteen to twenty thousand years ago, and horses roamed the plains centuries before Cortez, the Spanish explorer, brought the equine to North America according to recent startling discoveries made in the Mescal valley, New Mexico.

The seed should be planted from three to four inches deep. A trench should be dug the desired depth and the seed dropped about two inches apart. They are covered about two inches deep leaving the remainder of the soil in a ridge beside the trench. At the seedlings begin to come up the soil is worked over them until the ground is level.

The soil on which sweet peas are to be grown should have plenty of organic matter. In addition about one pound of commercial fertilizer should be used for each square yard planted. Select the heavier soils for sweet peas whenever possible, advises Professor Floyd.

Millions
of users say—

there are just two kinds of spark plugs—AC's and the other kind.

AC's are known as the better spark plugs because of their patented one-piece gas-tight construction and welded side electrode—35 times better in electrical conductivity than the old "staking" method used in ordinary spark plugs. AC quality in design and construction insures easy starting, fast pickup, brilliant performance.

Here is the evidence: AC Spark Plugs are endorsed by the world's leading engineers

and used as standard equipment on such cars as

Buick	Kissel
Cadillac	La Salle
Chandler	Nash
Chevrolet	Oakland
De Soto	Oldsmobile
du Pont	Plymouth
Essen	Pontiac
Hudson	Viking
	Yellow Cab

But even the best spark plugs wear out. For increased power—and even for better gasoline mileage—change spark plugs every ten thousand miles. In a few minutes, any AC dealer will equip you with the right type of plug for your car.

...in a horse it's SPIRIT!
...in a cigarette it's TASTE!

"SAWING WOOD and saying nothing"...

aging, blending and cross-blending, the standard Chesterfield method that makes good tobacco deliver its last atom of good taste...

And as a result, the most steadfast army of smokers any cigarette ever had! It's plain that smokers get out of Chesterfield precisely what we put in:

"TASTE above everything"

MILD... and yet THEY SATISFY

SOUTH WITH THE BIRDS

Traffic Increase

As a specific example of the increasing tourist travel into Florida, the St. Johns River Bridge at Jacksonville records the following figures:

For the month of June, 1928, 3,644 Southbound out-of-state automobiles carried into Florida 11,389 passengers.

For the month of June, 1929, 6,067 Southbound out-of-state automobiles carried into Florida 18,917 passengers.

An increase of 2,363 automobiles and 7,528 passengers.

Dick Brown!

Prepare Now ~ A True Florida Welcome

TO the South lies Florida! Sunshine and perfect climate—fishing and golf and boating and tennis—summer all winter, with surf and sand and every conceivable form of out-of-doors entertainment. Nowhere else can the traveler find greater comfort and enjoyment, and as a result, these factors of Florida's perfection have brought millions of visitors and millions of dollars into this state.

Tourists are a perpetual source of wealth to Florida and each passing year records an amazing increase in their numbers. Authentic reports of their worth to Florida indicate that there is no other source of income of greater importance. And many who come to visit, remain to live—adding materially to the normal growth of population.

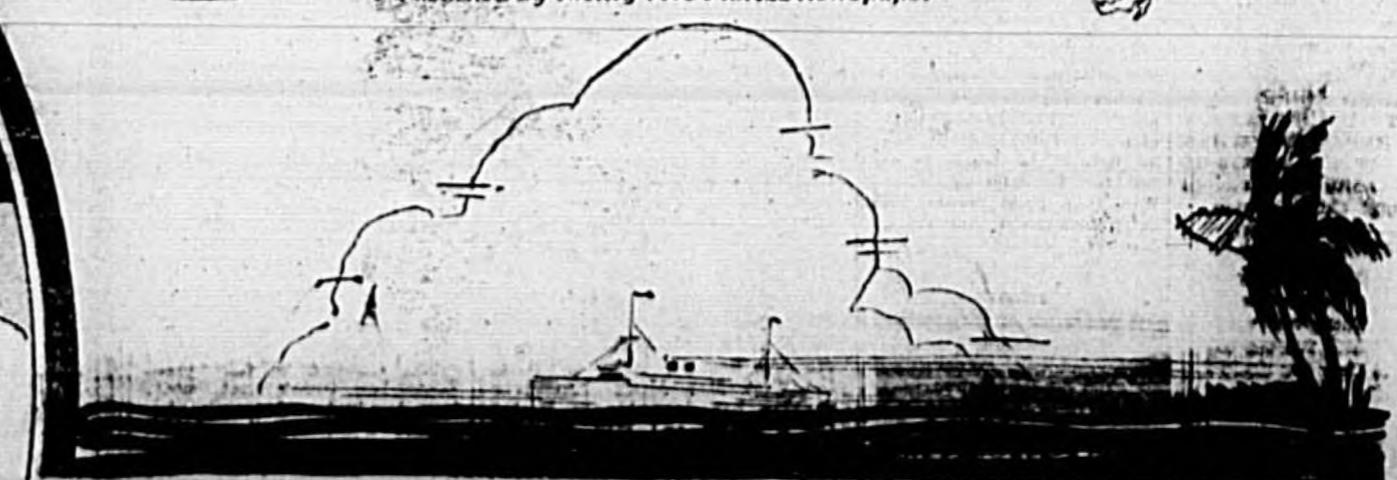

It is this period of the year that the tourists of other climes are planning for their annual invasion of this state. Within a few weeks they will be coming into Florida by motor, by rail, by air, and by water. Indications are that the 1929-30 tourist season will outstrip other years by a wide margin.

It is NOW that we in Florida should prepare to welcome this army of visitors. Their favorable attitude and their good will must be fostered and maintained. Our house must be in order to receive them. Every Florida community should be making preparations now for this annual migration. Tourist travel is a definite and dependable asset to this state.

Just so long as Florida is bathed in the healthful rays of continual sunshine—refreshed by cooling breezes from Southern Seas—warmed by the Gulf Stream's limpid embrace—so long will the lure of its semi-tropic locale beckon invitingly to the rest of the world to "Fly South With The Birds"—AND SO LONG WILL FLORIDA REAP THE BENEFITS OF THEIR COMING.
