It seems to be the irony of fate that Navy Day comes at ment, not because of the outstanding achievments of that bureau but because of Secretary Wilbur's action in handling the Magruder case. Admiral Magruder, like the illustrious Admiral Sims, had the temerity to express himself on certain extravagances and other discrepancies in the department. He declared the navy was "spending three hundred million dollars and getting two hundred million dollars worth of navy." He referred to inefficient administration and the never-ending red tape in connection with the operation of the department. These things apparently have not set well with Secretary Wilbur who administered a stinging rebuke to the admiral and ordered him to be relieved at Philadelphia.

To Admiral Magruder the secretary's action is an "insult"; to Mr. Wilbur it was for "administrative reasons, and not punitive." To the public the case indicates a most deplorable situation. It shows that if an officer of either are now worth a quarter of a milorrest Lake and one of his lieu. the navy or army tells the truth he must pay the price of mants now appears to be nothing public humiliation and transfer to some minor post or take a reduction in rank. The public's suspicion is thoroughly aroused and its interest may be reflected in a demand for a congressional investigation. It is the proper course.
