VETERANS' BONUS BILL BECOMES LAW

Many Expected At President's Birthday Ball

Sanford To Join In Festivities Next Thursday Evening In Mayfair Hotel

Applications For Tickets Received

10 Pct. Of Receipts Will Be Used For Home Relief Work

Every detail in connection with the President's 60th Birthday Ball in the Mayfair Hotel next Thursday evening has been attended to, committee members reported today and from present indications the 1936 thirty-annual participation in the festivities will be an outstanding success. Many applications for tickets have already been received. Tickets can be obtained from any member of the committee on the Chamber of Commerce office.

Invited individuals will include the form of a bridge party as well as a dance. Bridge will be played from 7 to 10 p.m. and the dance from 10 p.m. to 1 a.m.

Recently provided the most complete from the Birthday Ball will be the dancing. The E. K. Linn, Kivela, R. J. and the P. T. A. to be held in the ballroom of the Chamber of Commerce, and 50 percent will be sent to the Warm Springs foundation in Georgia.

Two thousand and six hundred tickets are to be held throughout the nation on the President's birthday and the event will be marked by what is believed will be the greatest party looking over attempted. Nearly 500 tickets in 1935. Tickets are available in Sanford, including many independent stations as well as those of the National Broadcasting Company and the National Association of Broadcasters.

The program will be broadcast by the President. Mr. E. K. Linn, R. J. and the P. T. A. will be featured by a short talk by the President. Mr. E. K. Linn, R. J. and the P. T. A. will be featured by a short talk by the President. Mr. E. K. Linn, R. J. and the P. T. A. will be featured by a short talk by the President.

HE'S 77 TODAY

William II, exiled former Kaiser of Germany, turned on his 77th birthday today for his cousin, the late King George V of England. Commemoration of his birthday was put off for four days because of the death of the British king.

Several plans for getting more money into the city's depleted coffers have been suggested, but it was reported after last Monday evening's informal discussion that the proposal to license all drivers of motor vehicles seemed to have the most promise. Under this plan, a license fee would be assessed against every person who drives a car in Sanford, not simply a tax against the owner of the vehicle. The fee would be \$1.00 for each driver, and the license fee would be \$2.00 for each car. The fee would be assessed against every person who drives a car in Sanford, not simply a tax against the owner of the vehicle.

Discussion Of City Finances Is Scheduled

Revenue Sources May Be Discussed By City Commission At Meet Tonight

City commissioners may tonight discover new sources of revenue which more tax money can be painlessly extracted. The meeting is the regular bi-weekly session of the municipal government, but the commissioners decided at an informal discussion a week ago to make the search for new revenue sources a special order of business for the meeting to be held tonight.

Under this plan, a license fee would be assessed against every person who drives a car in Sanford, not simply a tax against the owner of the vehicle.

AL SEES PERILS IN NEW DEAL

Years of "class war" and bureaucratic "suppression of American liberties" under the New Deal, were voiced by Alfred E. Smith, principal speaker at the American Liberty League dinner in Washington. The "happy warrior" is shown waving in response to greetings of 2,000 diners as he entered the hall. (Associated Press Photo)

10,000 Slain In Battle In Italy Report

Engagements Won By Italian Force On Northern Front As Claim Of Fascists

(By The Associated Press)

The Italian government announced today its military forces in Ethiopia had reported the slaying of 10,000 Ethiopians in a series of battles on the southern front.

The Italian army reported it has moved as far north as Wadara, 43 miles northwest of Neg-Beni. The advance was that of a partly organized division under General Agostini. The latter is meeting stiff resistance, but it was reported to have led the Ethiopians counter-attack into trap, massacring thousands of natives caught in a snuffing fire of machine guns.

Still no definite word was received from the last fronts to substantiate just who was the victor in last week's three-day battle on the northern front near Makale in which thousands of veterans in Florida figured as well as both Italian and Ethiopian are claiming the upper hand.

Legion Will Help Make Application For Compensation

Commander L. F. Boyle of the local post of the American Legion said this afternoon, upon being advised of the passage of the "bonus" bill over President's veto, that the Legion will be supplied with the necessary blanks to be used in applying for compensation. He will fill them out for any veterans it will make as a difference whether he is a member of the Legion, the commander said.

Measure Put Through Senate By Vote Of 76 To 19, Far More Than 2-3 Majority

\$2,491,000,000 To Be Paid To Vets

Not Yet Determined Whether New Tax Will Be Required

WASHINGTON, Jan. 27.—(AP)—Immediate payment of the soldiers' bonus was made into law today by Congress over President Roosevelt's veto. The Senate with its big Democratic majority voted 76 to 19 to override the Chief Executive's veto. The House had made its own law last week by a vote of 328 to 61.

The two ballots which saw the Democratic leaders in opposition to the President on the 16-year-old issue put the \$2,491,000,000 bonus payment plan on the statute book. Whether new laws will be required to meet extra outlay is not known.

The first bonus bill was passed by the House on June 16, 1924, by a vote of 211 to 176, but two days later it was defeated in the Senate by a vote of 65 to 35. On Apr. 28, 1933, it was added as an amendment to pending legislation, but the Senate vote it down 67 to 28.

Bonus legislation was next introduced on Jan. 27, 1934, in the House by an amendment to the Reconstruction Finance Corporation bill. It was passed by a vote of 215 to 158, but the Senate on June 8 was reported unfavorably by the Senate Finance Committee and it did not come to a vote in that branch of Congress. However, on June 11 it was proposed as an amendment to pending legislation, but was lost 61 to 23.

The bonus bill bobbed up again last March, passing the House on Mar. 22 by a tremendous vote of 318 to 80, and the Senate on May 23 by a vote of 282 to 92. The Senate today, however, rejected the bill by a vote of 19 to 76.

Seminole County World War Vets To Get \$279,732

Total Bonus Payment Coming To State Is Nearly 22 Million

WASHINGTON, Jan. 27.—World War veterans residing in Seminole County, Florida, will receive \$279,732.23 in payment of their adjusted compensation certificates, according to a statement released today by Congressman Lee Green. The total to be paid veterans in Florida figured at \$2,491,000,000.

It is estimated that 100,000 veterans in Florida are claiming the upper hand.

It is estimated that 100,000 veterans in Florida are claiming the upper hand.

Walheim Mourns On Birthday For Cousin George V

Celebration Put Off Because Of Death Of English Ruler

WILHELM II, exiled former Kaiser of Germany, turned on his 77th birthday today for his cousin, the late King George V of England. Commemoration of his birthday was put off for four days because of the death of the British king.

Smith Hits Administration For Failing To Stand Upon Democratic Party Platform

WASHINGTON, Jan. 27.—Down on your dining table, side by side, and set a heavy lead pencil, and scratch out the word "Democratic" and scratch out the word "socialist," and let the two platforms lie there.

These words were the chief message of Alfred E. Smith, New York Gov., in an address before the Liberty League luncheon at the Waldorf-Astoria hotel in Washington today.

Mr. Smith took of the platform, and let them lie there.

Many Are Injured When Train Jumps Elevated Tracks

CHICAGO, Jan. 27.—(AP)—Ten persons were injured seriously and more than two scores others, including many independent stations as well as those of the National Broadcasting Company and the National Association of Broadcasters.

Democrats Cheer Speech In House Answering Smith

WASHINGTON, Jan. 27.—Cheering Democrats in the House were told today that Alfred E. Smith would not "take a walk in Philadelphia" but he would walk in Chicago.

Treadway States That He Will Not Run For Governor

TALLAHASSEE, Jan. 27.—C. E. Treadway, of Tallahassee, chairman of the State Highway Commission today announced that he would not run for governor.

Florida's Straw Vote

Interesting if not surprising, is the tabulation of Florida cities in the Literary Digest's recent poll of New Deal sentiment, in which this state as a whole split almost fifty-fifty, or 5,794 in favor of the New Deal and 5,971 against it.

The following is the final vote in all Florida cities of population of 5,000 or more and shows the sentiment as recorded not only in the recent poll but also in the poll on the same subject taken one year ago.

Table with columns: State & Town, 1934 (Yes, No, Total), 1935 (Yes, No, Total). Lists cities like Barrow, Braden, Clearwater, Daytona Beach, Deland, Fort Lauderdale, Fort Myers, Gainesville, Jacksonville, Key West, Lakeland, Lake Worth, Miami, Ocala, Orlando, Tallahassee, Tampa, West Palm Beach, Winter Haven.

We would particularly call attention in the above tabulation to the apparent influence which the cross state canal produced on the voting. In those cities directly benefited by the canal, voting in favor of the New Deal was very strong. Elsewhere in the state, the opposition to the New Deal was more apparent.

Ocala, the cornerstone of the cross state canal, voted 88 to 19, or better than 3 to 1 in favor of the Administration's policies. Palatka, another city on the proposed canal, was 45 to 21 in favor of the New Deal, and Jacksonville, chief proponent of the canal, voted 965 to 702 or a majority of 263 in favor of the New Deal. But in Miami, which is opposed to the canal, the vote was 714 to 823 against the New Deal. In St. Petersburg it was 413 to 284 against.

Tampa showed a slight margin in favor of the Administration. The vote there was 783 to 714, but last year, before the construction of the canal had been started, the sentiment in favor of the New Deal was 1866 to 451. It is also interesting to note that in Sanford sentiment is recorded as 67 to 71 against the New Deal, whereas one year ago it was 189 to 29 in favor.

How To Reduce Automobile Accidents

Alfred P. Sloan, Jr., president of General Motors, gives the manufacturers' point of view as to how to reduce automobile accidents. He declares that the public wants high-powered cars and that the way to avoid accidents is to modernize driving instructions and train car-owners how to use the power safely.

"Too many 80-horse-power cars are being driven with a 30-horse-power point of view," he says in the February Good Housekeeping. "Driving at sixty miles per hour is just as different from driving at twenty as bicycling is from horseback riding! You can't possibly express the complications introduced by saying merely that you're going three times as fast."

It is haste instead of speed which causes accidents, Mr. Sloan states. Thirty-six percent of accidents occur in urban centers where the prevailing rate is thirty miles per hour or less.

"I wish," he said, "we could alter the scale we use to designate speeds. Instead of saying 'We are driving fifty miles per hour,' we should say, 'We are driving at one hundred sixty-six feet stepping distance.' Then it might be more apparent that if you could see only one hundred feet around the turn, you'd slow down to six, thirty-five miles per hour and leave yourself some breathing room."

Recently several thousand motorists in Memphis were asked how quickly they could stop their cars from forty miles an hour. No less than ninety-five percent were wrong. And seventy-two percent were wrong by twenty-five feet or more. Why, a railroad engineer or a football captain who knew no more than that about his own performance wouldn't stay on the payroll thirty months.

Commenting on the fact that the death rate of cancer today is one hundred and thirty-one percent higher than the all other cancers, Dr. Brown says that the cause of this is the use of the automobile.

Commenting on the fact that the death rate of cancer today is one hundred and thirty-one percent higher than the all other cancers, Dr. Brown says that the cause of this is the use of the automobile.

THE COMPASS

By ARTHUR BURN

Our Silver Policy. MEXICO CITY—Jan. 27.—It is the policy of the United States to buy silver and to sell it at a price which will give it a value equal to one-third the value of our gold, or unit silver roughly \$1.29 per ounce.

We have bought 80 million ounces since June '34, when the law became effective, and have 1.2 billion 200 million more ounces to go. We use the price to buy 45 to 51 cents, then back to 45.

Our domestic consumption of gold for the arts and industry is negligible—of silver, about 20 million ounces per annum. Our silver production is 10 million, added to our stock on hand gives the amount to be bought, reported enough for our commercial purposes for most 100 years. Besides, we produce every year in excess of our requirements.

As the world's silver reserve is over 10 billion ounces, and nature's supply inexhaustible, it is not clear how we could have ever expected to reach and maintain a price of \$1.29 per ounce. We now have half of the world's gold and a fifth, and a half ounce of silver. You win one a month—our buying almost a billion dollars of additional gold and silver just to hold over in vaults!

Perhaps about 500 million dollars of the 4 billion represents production of these metals in the United States—the balance coming from other countries, paid for with American securities and goods—automobiles, machinery, etc. In selling silver and gold we received nothing we could use. By almost doubling the price, the same ounce would buy more of our goods and result in the employment of more of our people to produce the goods. This is the only thing which can justify our gold and silver buying policy.

A similar thing happened during and after the World War. We saw billions of commodities abroad and received back pieces of paper—promises to pay—most of them destined to be of no use to us. Yet we were never so prosperous, with so few workers idle. It must be that buying power, even though given away, pays an important part in the distribution of products and the prosperity and employment resulting therefrom.

Mexico affords a excellent example. By being paid a much higher price for a greater output of silver, her people gained a large increase in buying power, especially in the United States. Thousands of new automobiles and credits of American banks are visible witnesses of this. Many high cost silver which cannot operate when silver is low, were opened. Employment was given to many. In a word, our silver policy has brought great prosperity to Mexico. It brought similar good things to our own silver producing states.

People are glad to sell silver but look at what their gold. In India this is accounted for by the fact that, all by our silver buying, foreign trade is nearly unchanged. The current account of the nation is not affected by our silver buying policy.

Commenting on the fact that the death rate of cancer today is one hundred and thirty-one percent higher than the all other cancers, Dr. Brown says that the cause of this is the use of the automobile.

New King Loved Throughout His Dominion For His Democracy, Sportmanship

By JAMES H. HESTON

In the great personality of the new 41-year-old haughty King Edward, the British empire seeks consolation for the death of its father.

Loved throughout his realm, for his democracy and sportmanship, the new king is widely recognized for the part he played in establishing the constitutional monarchy of Great Britain in the twenty days after the war.

In 24 years after the coronation, he made no dramatic journey to college and university, to the United States and South American republics, and the scope of his popularity in these countries is such as to strengthen the confidence of the English people in him.

Not did he neglect the position as king. He made many important trips to the great industrial centers and he was competing in sporting events. In England, he gained popularity from the tennis in sports by the tennis, cricket, and golf, and he played golf, tennis and polo, rode to hounds and drove a sportsman.

Edward VIII has enjoyed the popularity almost from the day of his birth. Born on June 23, 1894, within the reign of Queen Victoria, he was the favorite grandchild of the queen. He grew from Windsor Castle to White Lodge, Richmond, to hold his own in her arms two days after he was born.

An impetuous child, Edward (declined Edward Albert Christian George Andrew Patrick David) was put under tutors very early and soon was studying German and French, including history and being patriotic. He was well liked by his brother Albert, the Royal Naval cadet at Osborne and Dartmouth, when he was in his teens, and from there to the academy of Oxford, where according to rumor, he enjoyed himself so much that he was moved to Cambridge.

The war, however, interrupted his schooling. He created a new problem by rebelling against authority behind the lines. He complained so vehemently about not being allowed to go into the trenches that the state council and the king were called to decide the case. Lord Kitchener rebuffed the plea by saying to Edward:

"Go killed if you will, but what happens if you are taken prisoner?" Immediately after the war he embarked on his first tour to Canada and the United States.

A "one man sales organization" for the empire he now leads. King Edward VIII came first to the United States in 1919. New York greeted up in grand ovation in his honor, wheeled him up Broadway, and a storm of cheer and whistles blew up, his shoulder. There was nothing could still be said about this prince, he said.

Norway, 28.5; Sweden, 27.7; Canada, 25.1; Australia, 21; Great Britain, 17.3; Newfoundland, 19.2. Let us suppose the average of all these (roughly from 1.5 to 2.5) is 20, and suppose that they maintain it from 1.5 to 2.5 (or 10 percent) for 100 years. That is, an average consumption of 20 to 25 tons of silver a year. There is 100 million tons of silver in the world. It is 100 million tons of silver in the world. It is 100 million tons of silver in the world.

Commenting on the fact that the death rate of cancer today is one hundred and thirty-one percent higher than the all other cancers, Dr. Brown says that the cause of this is the use of the automobile.

VETO OR DECISION

PALM BEACH POST

Enclosing a clipping of "It declares an emergency, the state legal... by Governor Brown, the veto... which the Supreme Court is... of unconstitutionality, an... asks: 'Where in the Constitution is the right to declare acts of Congress unconstitutional?'

If the higher will read Article 3 of the Constitution, where in Section 1 of the judicial power is extended to all cases in "law and equity arising under this Constitution, to laws of the United States... to controversies to which the United States shall be a party, he will see plainly that the court's power extends as to law and as to fact.

That, of course, is not a per se emergency government as is that of Great Britain. Whatever Parliament does is law. What Congress does is law if it agrees with the Constitution. And the decision as to whether it agrees or not is wholly left to an impartial body named for life, appointed and not elected.

Those who denounce the Supreme Court as Brown does, calling the emergency in the AAA case "the emergency act" and the "reaction of the emergency" use abuse and sarcasm to carry a point that can be carried with learning or argument or logic.

Carried on down, it would mean that no state supreme court could

at 10:00 o'clock and the body will be taken on the S. P. M. train to Louisville, Ky., for burial.

The judge said his investigation showed Ernest Lee called a sister, Miss Addie Lee, whom he was unable to awaken his brother, with whom he had been closely associated. Miss Anna Lee, another sister who is a nurse, found Dr. Lee, a dentist, was dead.

A. E. Chandler was elected governor of Kentucky by the largest majority in the state's history.
