

THE VIRGINIAN AT THE STAR MONDAY, MAY 24th

Lot2 of Poor Stuff

How long will some shippers think it a wise policy to ship poor, inferior vegetables to the different markets with a hope of getting "something" out of them? They certainly never stop to think how well it may look when they pack their shipment that it will not look of industry needs legislation the imso well when it reaches destination. of the stuff that is now leaving the should not be permitted to leave the It is positively foolish to ship much state. Shipment after shipment is refused by the consignees because they will not bring freight charges.

Many times consignees accept stuff, hoping to save the shipper the cost of his packages at least. In fornia vegetables in any of the marmany cases when this is done the kets? Did you notice at any time once in the middle of June, or twice near it. These conclusions are idenshipper cusses the consignee for how attractively ALL packages from in the early part of June and July. swindling him. If the consignee that state were put up or branded fails to get back his freight charges or labelled? Did you ever notice and notifies the shipper that he has the lot of junk from Florida in the been unable to get the charges, does different markets? It is enough to here from Messrs. About Citrus Canket

The following copies of letters have been received from Senator Duncan U. Fletcher and will make interesting reading for citrus fruit growers:

Imperial Japanese Embassy, Washington, May 12, 1915. Honorable Duchan U. Fletcher,

United States Senator from Florida, Washington, D. C.:

In referring to the latter part of my note sent to you under date of February 10th last; I have now received from the foreign office at Tokio a copy of the report made upon the citrus canker by the Agrieulta, al-damentiaent Station of the Department of Agriculture and Commerce, the translation of which I have the pleasure of forwarding you enclosed herewith.

Yours very sincerely, (Sgnd.) S. Chinda.

Round Scab

be effectively checked, if the BOR-DEAUX MIXTURE IS SCAT-TERED over the fruits twice-once, when the fruit grows to one-quarter of an inch in diameter and then again when the fruit is half an inch

his head when he sees much of the larity between the so:called CITRUS Companion.

its first appearance in Japan in 1899 upon Navel oranges and afterwards expanded to the other citrus fruits just referred to in the above. Its origin cannot be traced, but it is the concensus of opinion among the fruit growers of Japan that it was brought to Japan from some foreign countries in conjunction with the Na vel orange.

The Location Affected by the Round

Scab and Extent of the Damage As above stated, the Round Scab has affected Navel oranges and other citrus fruits, but there was no case when the Onju orange was infected by it. This disease has extended to localities from the west of Tokio to Kiusiu Island. The damage from it, however, has been tof-little-impostance, for the cultivation of those kinds of oranges which were affected is limited in Japan, and also because an effective preventive measure has been found.

Iceberge and Sea Water.

ward, but they stood cowed and shivering with fright. Some were blindfolded; but the effect was the same, and only one horse showed any willing-

Thereupon the driver jumped down and, cutting the traces of the other horses, drove the willing one at full gallop through the fire. The wagon passed through without exploding, and after the war the horse was decorated in the manner described and the driver promoted.

Unhappy Bulgaria.

It was not until 1885 that eastern Roumelia revolted from Turkish rule and united with Bulgaria, and it was not until October, 1908, that Prince Ferdinand proclaimed Bulgaria an independent kingdom. Thirty years passed after the Bulgarian war for independence before their freedom was ometally recognized in Europe Virile, laborious, thrifty, persevering, courageous, and anxious for progress, the Bulgarians are daring to dream great dreams for their little country. and today, as ever, their immediate future seems to be beset by all manner of difficulties.

Fate's Perversity.

"One of my daughters has tonsilitis," exclaimed Mr Growcher, "and the other aprained her wrist!"

"That's hard luck."

"Yes Nothing seems to work out the way it eacht to. The girl who last the way it each to the girl who last the way it each to the girl who last the way it each to the girl who last the way it each to the girl who last the way it each to the girl who last the sprained her wrist sings and the one with the sore throat plays the plane.

Really Hyglenic Sausage. The Javanese cat sausage that is office.

absolutely free from dog, cow, plg, horse or other animal that is popularly supposed to enter into the construction of the common sausage. Instead it is made only of rice, which is well bolled-usually in water, but sometimes in milk-until the entiromass has reached the proper consistency. After being cooled the rice is molded into sticklike lengths with the ences. \$20 per month (fingers. These are put in pil-paper months, includes water cases instead of the skin used in the enson, 906 Myrtle Ave. regulation sausage. This nonmest sausage is served either whole, or cut up and eaten along with other foods.

"Old King Cole" Really Lived.

"Old King Cole," who was so fond of "his pipe, bowl and fiddlers three." is believed to have really existed in rent by the season or month the flesh in the third century A. D., according to a liritish legend. His daughter, Helena, a very beautiful creature, married Constantinus Chlorus, a Roman general, and the "merry old soul" of "Mother Goose" annals thus became the grandfather of Constantine the Great.

Candelly, I If a man thinks women are poor, ill feeling in an already unfortunate really wants it.—Indianapolla Star.

True, there is some work now being done in Sanford by non residents, both union and non-union, but who is there among us all can consistently "cast the first stone?" And, really, why should any stone Acts Surely, Safely be cast at all. It's all right, isn't it, when we are out of work, to go to some other town for a job? We were all outsiders once, and for whom would we be building houses, churches, stores, if we refused to allow strangers to come in? Don't we want Sanford to grow. It is exactly this narrow minded policy that dominates organized labor; they want everything for themselves. It is the same policy that is retarding Sanford's growth today. Each and every little clique wants a monopoly of its own particular line. They are too shortsighted to see that no class can be favored or allowed to dominate affairs without serious damage to the whole,

I want to call attention to a pernicious and dangerous doctrine taught by organized labor generally -that any individual, corporaion or organization that does not conform to the mandate of unionism is unfair and an enemy of such labor. A striking example of this is found in Mr. Rogers' attack on Mr. Taft. I am not a Republican and never voted that ticket but want to say that Mr. Taft is undoubtedly one of the most respected citizens of America today and his honor and integrity has never been questioned by any other reputable citizen. His judicial decisions were invariably given in conformity with the law. And if they were invariably against organized labor, as charged, it is very convincing proof to most-people that the acts of such labor were in conflict with said laws. If the laws are unjust, chango them.

Mr. Pearson says the methods of organized labor are always peaceable. Doc. Rogers says they are not. Le also refers several times

The Bell Telephone System in Sanford To Be Modern and Efficient

WE have purchased the local telephone system of the Sanford Telephone Company and will soon begin reconstructing the Sanford Exchange, making it common battery and all-cable system of the very latest type.

The purchase of the plant was made only after a majority of telephone users had expressed a desire for us to come to Sanford and the Mayor and Council had approved our plans by granting us a franchise and entering into a rate agreement. The approval of this rate agreement by the State Railroad Commission was made one of the conditions of the trade.

When the matter was presented to the Railroad Commission, the Commission, acting fully within its powers, declined to approve in advance the rates for the new and improved service, stating that after the new plant was in operation and the improved service actually rendered to the community, it would grant a hearing upon this question.

Recognizing the wisdom of this decision the City Council passed another resolution requesting us to purchase the plant and declared the proposed rates reasonable. A majority of the telephone subscribers signed a petition containing the same request and declaration.

With this demand for such a plant and service as we can furnish and so strong an assurance from the public that they are willing to pay reasonable rates for the service, we purchased the plant.

We shall proceed at once to reconstruct the exchange and make it modern in every respect. The plant is now a part of the Bell System and the service and equipment will be brought up to the Bell standard. A larger cash expenditure will be required in doing this than our engineers at first estimated.

We are now a citizen of Sanford and the success and prosperity of our exchange here depends upon the success and prosperity of Sanford. We shall exert our best energies for the advancement of the community and shall provide conveniences and comforts for our employes so that they may serve you cheerfully and be happy in their work.

We seek your co-operation and good will. Our endeavor shall be to render adequate and efficient service at all times and be prepared to care for the future growth of the city. When things go wrong with the service we ask that you tell us your troubles and give us an opportunity to correct them. We wish to work with you and shall appreciate any constructive criticism.

While the work of remodeling the plant is in progress there will be occasions when service will be rendered under difficulties. Workmen will be stringing cable on the outside and rearranging the equipment on the inside, so that the service during the next few months will be no criterion of the service you are to receive when the new plant has been installed and is in smooth, working order.

If you, unfortunately, experience trouble with your service during the reconstruction period or at any other time you will please notify our local office promptly and give the details so that repairs may be made quickly.

The interest manifested in our purchase of the Sanford Telephone Company has been very gratifying and is appreciated. Our effort shall be to deserve your cordial good will and to make the Telephone Exchange in Sanford a public institution of which every citizen may justly feel proud. It shall be our constant aim to serve our patrons efficiently at all times.

Lexington, back doors of certain restaurants; and other places that have food acrapa, rotten fruits and vegetables to dispose of by throwing it out the back door and allowing it to stay there until the trash man comes around. Until quite recently the home fly was regarded as a pest annoying, but tarmies. A sort of naremary exil seemed to be the gen eral view about the insect. Of late though the work of the many scientists, who long ago recognized the danger that lurked in the fly has borned fruit in the public mind. People are beginning to realize there is comething in the caying "The More Flies, the Less Health "

Experiments employed by Profuncor Graham Broth of Harvard have proved conclusively that with the fly, harteria thrive, both internally and externally. The legs of the fly are covered with a fuzzy substance, an ideal medium for the transmission of germs, as observations have shown. It is said that the number of disease germs on the legs of a fly runs as high as 4,400,-000, while internally the total reaches 28,000,000.

The widespread recognition of the agency of files in spreading disease has resulted in a movement to exterminate them. Men, women and children are learning the necessity of "wiping out" the deadly fly. A new alogan has sprung up; a alogan of health-FriGHT THE DEADLY

T Consider the editor. He weareth purple and fine linen. His abods is amongst the mansions of the rich. His wife hath her limousine and his first born sporteth a racing car that can kit her up in forty flat.

Lol All the people breaketh their necks to hand him money. A child is born unto the wife of the merchant in the bessar. The physician gettoth ten golden plunks. The editor writeth a stick and a half and telleth the multitude that the child tippeth the beam at nine pounds. Yes, he liveth even as a centurion. And the proud father giveth him a

IN SANFORD Life Is Worth Living

VOLUME 'VI

SANFORD, FLORIDA, FRIDAY, MAY 28, 1913

NO. 80

IITNEY BUS LINE WILL START IN SANFORD

NEW IDEA IN TRANSPOR-TATION CIRCLES WITH A FIVE CENT FARE

this season and Sanford being in the cepted. forefront of civilization at all times will discard the street railway and take on the new style jitney bus.

The jitneys will be operated by the Sanford Transfer Company and they are arranging the jitneys this week preparatory to starting this new wrinkle in transportation. The specisl bodies have arrived and will seat eight passengers comfortably. The bodies will be placed on Ford running gears and will be greatly strengthened to stand the heavy traffic. \ Since the fitneys will not go anywhere except on the good paved streets the busses ought carry eight passengers very nicely. A ten cent fare to the depot will be mainthined and the regular schedule to and from the trains will be adhered to just as the street car lines would do. A schedule around the city for a five cent fare will also obtain and the jitneys are bound to prove popular with the travelling public and the commuters.

The pitney Invasion in Sanford is only a forerunner in Florida for the jitney has put the street car service in many of the larger cities out the regular schedule, can go to any place the street car can go and many places where the street car does not go and with the nickel fare the popularity of the jitney is assured. The Sanford Transfer Co. will sell six five cent fares for twenty-five cents, thus making very cheap transportation. The princy will start in Sanford about June 10, and the new idea will be watched! with much interest in this city where the hack business has reached amounts to a goodly sum especinly with the public.

Beach Resorts Open

summer season and many Floridians from the interior will soon he mak ing arraygements to spend the array mer months at the famous easet coast resorts. In the Herald will to noticed the advertisements for the Seaside Inn that is now under the ace Stewart. These good people need no introduction to Sanford people as they have been residents of Daytona for many years and are proprietors of the Seaside Inn. The Daytona Beach Hotel has also opened for the season under the management of W. F. and E. R. Ayers who expect to give the patrons the best there is in the way odf service. Go to Daytona Beach.
