Dull Delinquents

It has now become usual to demary youthful disturbance which mar big holiday weekends at many of the nation's seaside and other resorts.

They are deplorable. But they are something else, too, They are a great big crashing bore, not only to those who have to deal with them, but to many who hear of them.

If some of our psychologists are right and this sort of behavior is de-signed to be attention-getting, its tiresomeness for others ought to be something of a blow to the unruly participants.

Why is it a bore?

Because underlying this inexcusable conduct is the assumption that life in this country for some young people just isn't worth a thing un-iess it can somehow be juiced up with beer drinking, wild driving, rock-throwing, general vandalism and riot.

We all know that America has come a long way from the captivat-ing innocence that marked its earlier history. But can we really accept the ides that for some of us there is no shred of this left?

The answer ought to be "no," which is why these tales of youthful depredation are so wearying.

What is the matter with enjoying a beach as a beach instead of as no more than a setting for a raucous brawl?

Why can't trees in a park or wood be appreciated for what they are, instead of hacked at, cut down or otherwise marred as if they were

Who says playgrounds have to be-come battlegrounds? Why should the baseball park, the football stadium, baseball park, the football stadium, the swimming pool, ever be the scene of marauding misbehavior? Whatever became of just plain fun, as distinguished from "kicks?" We've all heard that youngsters' search for "kicks" reflects their

quest for identity, for attention, for manhood or womanhood, for a way, too, to express feelings of hostility engendered by the complex age they live in.

Grant all this. It still doesn't let the unruly kids off the hook altogether. For many who get beyond asphalt, brick and concrete, the marvelous world is still here to be taken at its, worth.

And you don't need a primer at hand to respond warmly to the sky, the sun, the water, the trees, the sand and all the games and pleasures linked with them.

Unless we are ready to concede that a good many kinds are monstrous automatons incapable of feeling the stimulus of these things, then we have to say they have the eyes, the hearts and the minds to respond.

Those who react instead by wrecking, corrupting and depreciating what they see about them are indeed incredible bores. They are still baffled by one of life's most easily fathomed secrets.
