HOW WOULD YOU LIKE TO COOK IN COMFORT?

You can cook all day long with electricity, yet you will notice hardly any rise in the temperature of your kitchen. Why? ... Because electric heat works on the bottom of your pots and pans or is sealed up in the oven where it belongs. This is true because electricity is the only kind of a cooking fuel that does not need a draft...

Shooting The Works

When the \$4,800,000 work relief fund was appropriated by Congress, the pump-and-priming theory of the country was definitely abandoned. No longer were vast sums to be scattered hither and yon in the vain hope that putting money into circulation in this manner would end the depression in the bootstrapping lifting fashion. There must be more of this done business. We must get down to work on really useful projects which would be a permanent addition to the nation's wealth and resources.
