

Soyuz Returns To Earth Safely; Apollo Still In Orbit

SPACE CENTER, Houston (AP) — The Soyuz cosmonauts, partners in history's first international space mission, blazed safely back to earth today, parachuting to a pinpoint landing on a flat, featureless plain in their homeland.

They left the Apollo astronauts behind in space for three more days of exploration.

Alexei Leonov and Valeri Kubasov rode their spaceship, dangling under a single red and white parachute to a touchdown, or a "thumpdown" as newsmen here dubbed it, at 6:51 a.m. EDT.

For the first time, the world had a televised look at the landing of a Soviet spacecraft. TV cameras

mounted in helicopters picked up the Soyuz as it descended from the skies toward the plain in south central Russia, about 300 miles east of the Baikour Cosmodrome, where they were launched last Tuesday.

About eight feet above the surface, small braking rockets fired downward to cushion the landing, stirring up a great quantity of dust.

Within 30 seconds a helicopter had landed beside the beblashed Soyuz and a team of rescue workers walked across the plain towards the capsule.

Within one minute, they had begun to remove the hatch.

Just two minutes after the landing, Leonov and Kubasov stepped from the spaceship in their white space suits and both gave bearhugs to the rescue workers and waved at cameramen.

Doctors at the scene reported both were in "very good condition."

Mission Control reported they landed just 6.2 miles from the intended landing point.

Ten minutes after landing the cosmonauts were taken to a helicopter for transport to a nearby medical facility.

The astronauts, Thomas P. Stafford, Vance D. Brand and Donald K. Slayton, are to splashdown in

the Pacific on Thursday.

The astronauts were still asleep at the time of the Soyuz landing, with their spaceship orbiting along 18 miles above the Pacific south of Japan.

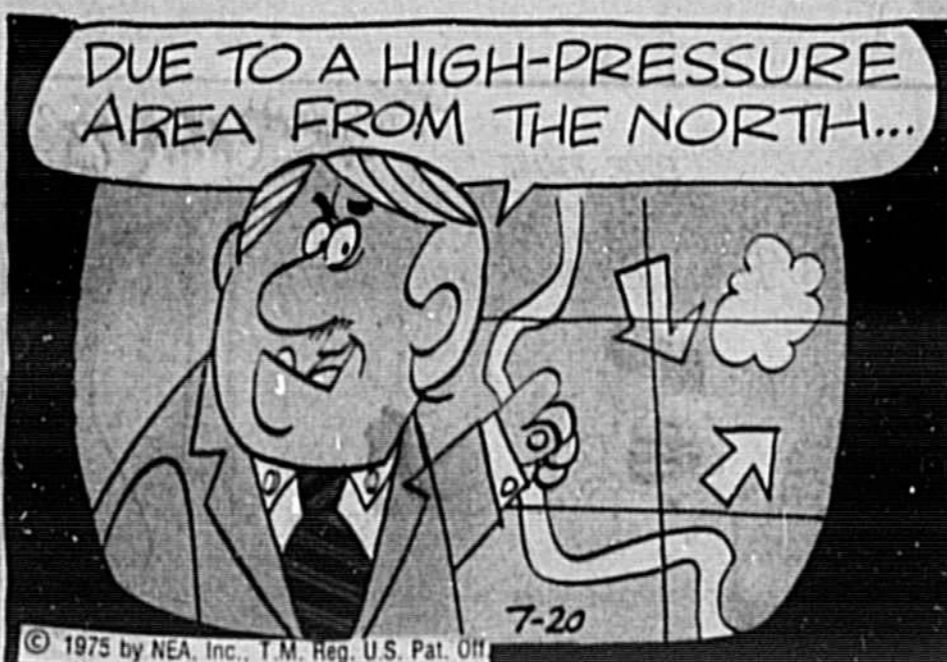

A short time later Houston mission control awakened them with the word of the successful Soyuz landing.

"Very, very good, give them my best. Glad everything went good," Commander Stafford said.

Stafford, Brand and Slayton will remain aloft until Thursday to conduct earth observation, solar astronomy and other scientific experiments.

Harris: 'Local Effort Up \$3-Million' Schools To Seek Full Eight Mills

By ED PRICKETT Herald Staff Writer

School administrators will seek an eight-mill property tax levy to raise more than \$10-million in local funds required to continue education at last year's level. Supt. Roger Harris said today.

Harris said the School Board will be asked to approve the full eight-mill limit and not the 5.97 mills which County Property Appraiser Terry Goebel says will return the same amount of operating revenues as last year.

Harris said Florida Education Commissioner Ralph Turlington told school officials at a meeting last week that between 6.7 and 7.03 mills will be needed to generate the proper amount of local funds.

The state has put up more than \$1 billion and Florida counties must put up \$543 million in local matching money generated by hometown

tax dollars to participate in the state's formula.

School officials refer to this sum as the "local effort." The Florida Department of Education (DOE) decides what the local effort will be, Harris said.

Last year's "local effort," Harris says, was \$5-million, compared to more than \$8-million required by the state this year. In essence, he says this year's local effort is greater than the \$6-million in local taxes collected last year.

He also stressed the fact that the "final decision rests with the board."

A full eight-mill levy would place an additional \$12 million in what Harris calls a "discretionary fund." That money, Harris says, is needed to meet the "demands the state has put on us."

But, he says, skyrocketing operating costs require Seminole school officials to push past the state's projected 6.7 to 7.03 mills and go for the full amount allowed by law — eight-mills.

"It would be impossible to continue the same type of programs we've had in the past without levying the full eight-mills," Harris said.

Ruling On Mace Under Review

CASSELBERRY — The Civil Service Board has decided a patrolman acted with "proper restraint" in macing a 20-year-old Melbourne man during a May 21 melee.

Mace was loaded into the back of a police cruiser. Back at the station, Morris said Perkins again became violent. Then Clapper sprayed mace in Perkins' face.

Perkins was treated at a hospital, later filed charges of police brutality with the State attorney's office and with Karcher.

Patrolman William Morris. "From the evidence presented, the board felt Clapper acted with what he felt at the time was proper restraint," Grier said. The mayor said he usually goes along with whatever decision the board reaches.

WEATHER

Yesterday's high 90. Over-Night low 67. Rainfall was 2.36 inches.

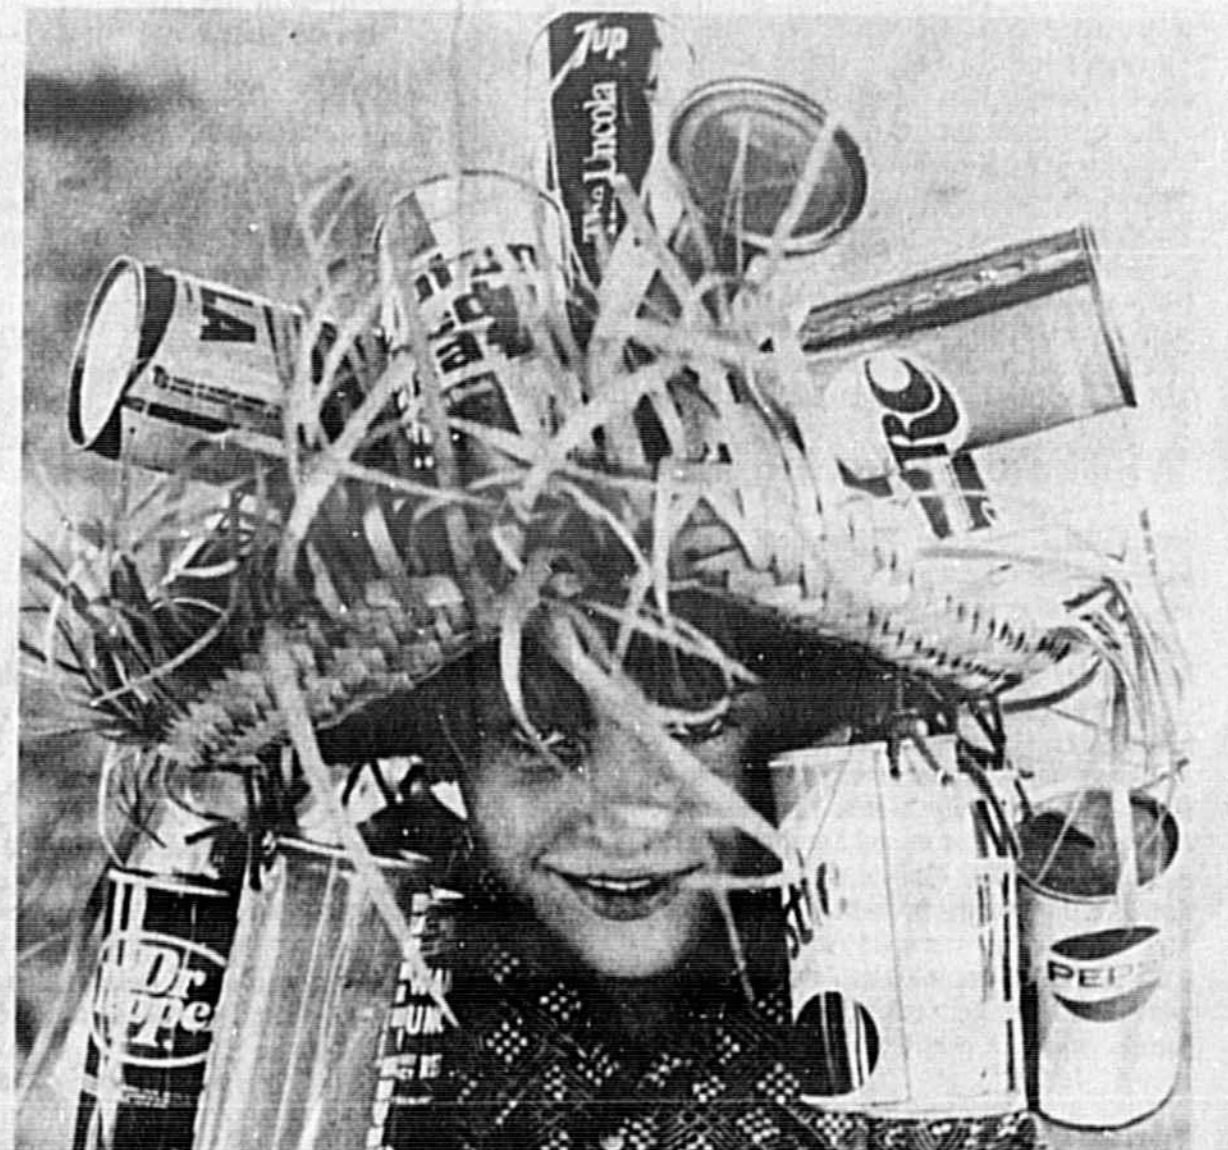

Partly cloudy through tomorrow. A chance of thunder showers mainly during the afternoon and evening hours. Highs near 90. Lows mostly in the low 70s. Variable mostly southerly winds 10 mph, stronger and gusty near thunder showers. Rain probability 30 to 40 per cent during the day, 20 per cent at night.

Complete details and tides are on Page 5-A.

OVERRUN WITH WEEDS

C.C. Carlson of Sanford says the Florida Department of Transportation (DOT) has failed to live up to its obligation of keeping its roadway right-of-way cleared and this ditch, which is located on SR 45 west of Sanford is a good example. Carlson says the ditch, which runs in front of his home, hasn't been cleared by the DOT in approximately 12 years and has become overrun with weeds, rodents and reptiles. He says he's killed three water moccasins and a rattlesnake in the ditch in the last year. Here, he's pictured trying to clear the ditch so it can drain off some of the weekend's 2.36 inches of rain. (Herald Photo by Bill Vincent)

HATS ON; HEAT'S BAT

A shady hat, a little something cool to slip on, and you've got the summer heat beat. At least, that's what Joe Linabarger, 6, of 1403 Windwood Ave., Sanford, seems to be saying with this hat snapped by Herald photographer Gordon Williamson at today's crazy hat contest sponsored by the Sanford Recreation Department.

Postal Rate Hike Foreseen This Year

WASHINGTON (AP) — A new labor agreement for the nation's postal workers is expected to contribute to an increase in the cost of mailing a letter before the end of the year.

The Postal Service in 1973 asked the independent Postal Rate Commission to make present postal rates permanent. The commission is expected to approve a schedule of permanent postal rates within a few months, and the Postal Service then can raise the rates by instituting new temporary rates.

The average postal clerk, postman or pick-up truck driver now makes about \$13,500-a-year at top scale, plus fringe benefits.

Users said ratification by all of the four postal unions would take "upwards of 30 days."

Jim Daniel: Now He's Joined SCIDA's Huddle

By MICK LOCHRIDGE Herald Staff Writer

Jim Daniel is 6 feet 5. He speaks in an easy, inviting tone as he rolls back, relaxed in his high-back chair. He does not maintain a lot of eye contact.

The 36-year-old Daniel is the executive director of the Seminole County Industrial Development Authority (SCIDA), a five-member county tax-supported advisory board. He was chosen four weeks ago to head it.

He is formulating a business strategy to initiate a drive for industry which will put Seminole County residents to work and give the overall economy a shot in the arm.

Daniel admits it "takes a long time" to develop an effective economic development program, but he says it is more important to make sure that when the industry does locate in the county it will be able to stay.

commissioners, who hired him for the \$19,000 a year position, are "anxious to see that the county grows in the proper manner." The commissioners are "encouraging" his efforts, he says, but adds "I don't feel any pressure from the commissioners."

A former Florida State University football and baseball star in the early 1960s, Daniel philosophizes about his new job with the same phrases he once used in the huddle.

"You win a few, you lose a few," Daniel says, his "self-discipline" learned from his athletic days, helps him through his work.

"Sports teaches you what life is all about. When you get knocked down, you learn to get back up," Daniel says.

And his career on the sports fields carried him further than the university scene. He stepped just short of hooking up with the Minnesota Vikings as a

free agent under an \$8,500 contract as a wide receiver after graduation. Instead, he pitched in the farm system of the Cincinnati Reds for two years, because "the salary was better."

After a couple of years in baseball, Daniel says he was tired of "getting my head knocked" and looked for a more lucrative career. He found it in developing real estate.

Accumulating economic development experience, with oil companies, Florida Power and Light, a real estate broker, and a land development company, Daniel came to his Seminole County job brimming with business contacts and savvy for the SCIDA position.

He is the current president of the Florida Industrial Development Council (FIDC). He lives in South Seminole with his wife Jackie, and their two children, Susan, 11, and Jimmy, 6.

His job with SCIDA is simply

JIM DANIEL

stated he says: to develop interest and attract industry to the county. He says he considers his job more of an "economic development" rather than "industrial development," bringing in new business and helping current

But, enticing new Commission to be used to hire manufacturers to the county is his primary goal.

To that end he recognizes two obstacles in his way: the slow moving economy, and getting the Seminole County name to prospective industrial clients.

He is requesting \$26,000 in his \$62,000 budget proposal for advertising from the County

Commission to be used to hire an agency to professionally promote the SCIDA operation. His method of operation, only the needed paperwork to keep the office running and otherwise out in the field, shaking hands, promoting the County and working with other groups interested in attracting industry to Seminole.

He says he intends to coordinate the entire county into working together to attract industry, not just in the northern part of the county.

"You've got to look at it from both sides," he says. "Will the county be good for the company and will the company be good for the county?"

Locally-Based Firm Refurbishes 'Copters

Giant helicopters and Nationalist China? And Sanford and its airport. How do they fit together?

Simple. Orlando Helicopters Inc., recently sold a giant Sikorsky S55T to the Nationalist Chinese Republic. The chopper was loaded on the boat for shipment last week after it was moved from its hangar at the airport.

The going price for one of the refurbished choppers is \$750,000, according to J. E. Eiselein, the marketing manager for Sanford Airport Authority.

The turbine-powered helicopter — as tall as a two-story building — is refurbished by the airport's 54 agency tenants — businesses which operate on the premises.

Previously, a helicopter was delivered to Thailand and one was shipped to Iceland for construction purposes.

The Sikorsky which went to China will be used to transport VIPs. After it's rebuilt, 10 to 18 passengers can fit into one of the flying machines.

And, believe it or not — the same copters are made into "helicopters" or helicopters with many of the same conveniences found in a modern camper.

All that for only \$750,000.

month for the child is 18 or over the child is 22 and attending at an approved institution, he receives \$55 a month in addition to education. NATION IN BRIEF

Henry's Trash Yields Liquor Lists, Secret Service Papers

LANTANA, Fla. (AP) — The household garbage of Secretary of State Henry Kissinger recently yielded a shopping list for three cases of whiskey, a prescription envelope for a tranquilizer and hundreds of Secret Service documents the National Enquirer says.

The trash was retrieved earlier this month by Jay Gourley, a reporter for the Enquirer, a weekly newspaper based in Lantana. Gourley sifted through five bags filled with newspapers, old potatoes, empty jars, and other common items.

In a copy of its story released Sunday, before its publication in this week's editions, the newspaper said the discarded material "would be of vital interest to a potential assassin."

The Enquirer says documents retrieved by Gourley included:

—Work schedules which revealed the exact number of agents on duty at Kissinger's home and the names of most of the agents assigned to him.

—A document revealing that the Secret Service is testing a new code light signal system for all its limousines.

—A handwritten note on the back of an activity report which gave the number and type of arms and ammunition supply carried by each Secret Service agent and indicating that a shotgun had been left behind during Kissinger's trip to the Virgin Islands last month.

Washington (AP) — President Ford concentrated on sports and relaxing at Camp David in the Maryland mountains over the weekend.

The President was enjoying his last weekend off before his departure next Saturday for a 10-day trip to five European capitals, including the Stratton European summit meeting July 30-Aug. 1 at Helsinki.

He played 18 holes of golf Saturday afternoon at Burning Tree Country Club in suburban Maryland before flying in the evening by helicopter to Camp David with Mrs. Ford for an overnight stay.

The Ford's 23-year-old son, Jack, and two of his friends were there for the weekend, too, and the presidential family enjoyed a private showing Saturday night of the movie "Jaws."

Washington (AP) — A member of the Senate panel probing the CIA says there is a possibility of a reopening of the investigation into the assassination of President John F. Kennedy.

Sen. Richard S. Schweiker, R-Pa., said Sunday that a fatal flaw of the Warren Commission that looked into the Kennedy assassination is that it made no reference to a number of attempts to kill Cuban Premier Fidel Castro prior to Kennedy's death.

San Francisco (AP) — A woman who was the only female member of the Seminole County School Board has been elected to the board.

Pat Telson, 33, of Deland, was elected to the board in a runoff election against two men.

Telson, who has been a member of the board since 1972, said she was "pleased and honored" to be elected.

She said she will continue to work for the improvement of education in Seminole County.

Telson said she will continue to work for the improvement of education in Seminole County.

Wekiva Weekend Before Paddling On

The Bartram Trail Canoe Expedition crossed Lake Monroe and picked up the Wekiva Marina over the weekend, before portaging to the Kissimmee River to continue toward its Miami Beach destination.

The nine-man, one-woman expedition hopes to be in Miami Beach on August 8, two months to the day from the journey's start at Macon, Ga.

The trip is a Bicentennial re-enactment of Col. Philip Bartram's 1773 scientific exploration of the rivers of

Georgia and Florida — a journey that spawned one of the most widely-read nature textbooks of the next century.

W. Ronald Green, a student at the University of Florida in Gainesville, is the leader of the expedition, which by now should be somewhere on the Kissimmee, heading toward Lake Okechobee, Big Cypress Swamp and the Miami Canal.

According to Seminole County Bicentennial Chairman Jack Horner, about 100 spectators and picnickers were on hand, with many of them in

canoes, to accompany the travelers into the marina. Three airboats going full blast led the expedition.

The canoeists all said they were in fine shape and all were well-lanned from their days in the sun.

They were presented with a bottle of champagne to be opened at journey's end and also given the keys to Seminole County by Longwood Mayor James Lormann.

One Killed, Five Injured In Accidents

By BOB LLOYD Herald Staff Writer

Weekend accidents in Seminole killed a teenage pedestrian, and injured five persons in a five-car smash-up on U.S. 17-92 at Longwood and an Altamonte Springs man who fell into a lake while kite-gilding.

The Florida Highway Patrol reported that 14-year-old Carolyn Capps, of Elder Road, Lake Monroe, was killed when she was struck from behind by a pickup truck while walking on Orange Boulevard near SR 46 west of Sanford.

Her brother, Herbert L. Capps, 17, was killed Oct. 2 in the same area in a motorcycle accident.

Officers said Miss Capps was walking north on the east side of Orange Boulevard about 3:20 p.m. Saturday when she was struck by a pickup truck driven by William Clifford Peak, 31, of 332 E. Volusia Ave., Deland.

Trooper Robert Lovering jailed Peak on \$500 bond on a charge of driving while intoxicated.

Action Reports

- ★ Courts ★ Police ★ Fire

Sanford patrolman H. J. Shea Jr. reported a two-pound chunk of concrete was used by thieves early today to smash a plate glass window at Cherry and San Imports, 1220 W. 13th St. and take costume jewelry valued at \$200.

Officers said several pieces of clothing and other items were apparently dropped by the fleeing thieves. Sanford police are also investigating a burglary early today at the Eastern Oil Station, W. 13th St., in which an office building was entered and vending machines ransacked of an undetermined amount of money.

Ransom E. Mitchell, 19, of 1603 W. 11th St., Sanford, was charged with police on a charge of assault with intent to commit a felony in connection with a New Orleans car rental in William D. Howard, 21, at 1511 W. 12th St. Police said there were no injuries in the incident.

Sanford patrolman Tony Brooks Jr. discovered a chain-lock and center post on a gate at Gold-shore Elementary School had been removed and two classrooms and a storeroom forcibly entered.

Deputy Donald McCormick and detective Doug Huth reported two black males with braided hair entered the L.I.F. Camp store on O'Brien Road about 10:30 p.m. and three clerk Sandra Nix, 20, of the door and forced her to stay there while they removed currency from cash registers.

Investigators said the robbers told the clerk to "stay on the floor, we're not going to hurt you," before fleeing on foot with the money.

Sanford police today were looking for two teenagers suspected by an officer at 4:47 a.m. inside a burglarized school. The youths fled on foot.

Military Benefits Are In A Muddle

We are attempting for the first time in our history to maintain a massive defense establishment in peacetime without a system of compulsory military service. So far, the all-volunteer experiment seems to be a success.

But its chances for success in the future would be improved if the military pay system were reformed, simplified and brought up to date.

That is made clear in a recent study published by the Brookings Institution, an independent government research institute in Washington.

The study suggests the military pay system is a muddle, full of costly anachronisms, geared to the needs of an earlier era when military pay was unduly low. If it were reformed, our all-volunteer forces could either be upgraded in personnel quality or the current level of defense spending for personnel could be reduced.

Personnel costs have become a major item of defense spending as a result of the all-volunteer experiment. They have made it harder for the Defense department to get money for research and development and production of new weapons. So reform of military pay is more important than ever for the future of national security.

Military men are now paid according to their needs instead of their services—unequal pay for equal work. A married sergeant receives compensation of \$10,063 a year in cash, quarters and subsistence allowances, dependent health care and commissary benefits, compared to \$8,778 a year for an unmarried sergeant. The benefits attract married men. Only 7 per cent of Army recruits were married in 1955 as against 22 per cent in 1974. The increase in the number of dependents increases defense costs.

The hedgepodge of military pay allowances and tax benefits could be converted to a single salary system that would be easier for personnel to understand. If this were done, and single personnel were paid as much as those with dependents, an Army recruit's pay would go up from \$344 plus food and lodging under the present system to \$570 a month. That would make it easier to compare civilian and military job opportunities. It would make it easier to attract highly qualified volunteers and retain them in the service.

In fiscal 1975, base pay accounted for only \$15 billion of total military personnel costs of about \$37 billion.

Realignment of the military pay structure to align it more closely with civilian employment and the needs of an all-volunteer defense establishment should be given consideration in Congress.

Much of the difficulty, says the AWWA, is that the Environmental Protection Agency wants to consider silt as pollutants. They are not, the AWWA argues, nor are they caused by water treatment plant operations in the first place.

"Treatment plant removal is only a temporary separation of the sediment from treated water," says one portion of the AWWA report. "It is then returned to the original water course with no discernible change in sediment content of the surface waters."

Calling blanket regulation impractical, the association maintains that efficient discharge guidelines must be flexible and related to the quality of the streams that receive the discharges—streams where riparian and least where stream—flows allow. "It is then returned to the original water course with no discernible change in sediment content of the surface waters."

By 1985, the world will have another one billion mouths to feed, says the population experts. This will place a heavy burden on American farmers to produce more food. But it will also create many new opportunities for farmers in agriculture—careers calling for specialists never before associated with farming, on jobs often far removed from the land itself.

As the trend toward fewer but larger farms continues, economics and logistics will become more and more important to efficient farming in the 1980s. Larger, maintenance-free machinery with high productivity will raise the cost as well as the complexity of tractors and other equipment.

Farmers will depend heavily on off-site experts to help them decide such questions as the feasibility of using one big tractor or two small ones, purchasing capital equipment outright, leasing it seasonally or buying it co-operatively with other farmers.

The result is economic chaos and social injustice.

Britain's Prime Minister Harold Wilson was pleading recently with the nation's coal miners, asking them to restrain their wage demands, which go as high as an increase of 50 per cent.

That makes the wage increase of nearly 30 per cent recently granted by the Labor government to the railroad workers seem modest by comparison.

Unreasonable wage demands such as these have fueled Britain's runaway inflation (now at an annual rate of 25 per cent), undermined the value of the pound and weakened the competitive position of British industry in world markets and caused unemployment in Britain to rise sharply.

The Labor government thought it had a social contract with the British workman which assured restraint in wage demands in return for assurance of price stability. That contract, if it ever existed, has been broken repeatedly with the consent of the government.

Unemployment in Britain is now at an annual rate of 25 per cent.

The Seminole YMCA Middle School Athletic Program is in its infancy and needs lots of help if it is to be a success.

"Total participation by all participants" is the theme of this program and its organizers—and it's a good theme.

We were fortunate enough to be among a handful of individuals who organized a youth football program in another Florida county some 17 years ago when it dawned on us that there were bigger players in the high school band than there were on the football field.

Too, we saw a need for early indoctrination of the sport if the schools in that county were ever to come up to the level of its position in high school athletics.

Today, that county compares favorably with any in the State of Florida with its sports program and its teams are consistently near the top in all athletic endeavors.

To give you an idea of how well that football program has progressed, one high school in particular, which at one time had to cancel a junior varsity schedule in order to bring up enough players to round out the high school team, currently dresses

out 88 varsity, 77 jayvee and 66 freshmen when the schedule is underway.

Seminole's YMCA program can be just as successful—if it gets some volunteer assistance.

You say you know little or nothing about football and doubt that you could be of much value?

There's always a need for people to be in helping to check players' birth dates, weight, height, issuing equipment, helping to lead in callisthenics, providing transportation, helping to mend this or that, etc.

Coaches in all sports will be needed, too, as well as lay people who will serve as coordinators on a board in each of the middle schools involved (which include Milwee, Teague, Lakewood, South Seminole, Tuskawilla, Jackson Heights and Sanford).

Currently, there are no less than 30 positions to be filled and it is obvious the program is in need of help—which has always been given generously in the past, but is especially needed now.

Some of the districts have already established boards, with officials elected, but time is drawing nigh for the program to get underway and all should be set when the bell sounds for that first endeavor to begin.

If you can offer any assistance at all, contact the Seminole YMCA at 662-0444.

And, keep in mind, the football portion of the program starts in two weeks, so don't delay in calling.

The program needs you!

Around

The Clock

DON OAKLEY

Sometimes No Controls Are Needed

If a city takes water from a muddy river, cleans and purifies it for the use of its residential and industrial customers and sends the separated dirt and other solid matter back into the river, it would hardly seem to be guilty of polluting the river.

Yet it would in the eyes of the Environmental Protection Agency. Or so claims the American Water Works Assn. In a hefty, three-inch thick document it presented the other day in the House Public Works Subcommittee on Investigation and Review.

The central theme of 17 separate exhibits offered by the AWWA, an organization representing some 30,000 public and private water utilities and others in the water treatment field, was that the present environmental effect of most treatment plant discharges is "inconsequential" and that elimination of the discharges would produce "no noticeable benefit."

However, if the federal Water Pollution Control Act is not changed, it warned, major construction and increased operating costs would result in substantially higher water bills to users.

Much of the difficulty, says the AWWA, is that the Environmental Protection Agency wants to consider silt as pollutants. They are not, the AWWA argues, nor are they caused by water treatment plant operations in the first place.

"Treatment plant removal is only a temporary separation of the sediment from treated water," says one portion of the AWWA report. "It is then returned to the original water course with no discernible change in sediment content of the surface waters."

Calling blanket regulation impractical, the association maintains that efficient discharge guidelines must be flexible and related to the quality of the streams that receive the discharges—streams where riparian and least where stream—flows allow. "It is then returned to the original water course with no discernible change in sediment content of the surface waters."

By 1985, the world will have another one billion mouths to feed, says the population experts. This will place a heavy burden on American farmers to produce more food. But it will also create many new opportunities for farmers in agriculture—careers calling for specialists never before associated with farming, on jobs often far removed from the land itself.

As the trend toward fewer but larger farms continues, economics and logistics will become more and more important to efficient farming in the 1980s. Larger, maintenance-free machinery with high productivity will raise the cost as well as the complexity of tractors and other equipment.

White House News Flow Still Slow

Daily around the noon hour the public address system in the White House press room interrupts the poker games and dice rolling to proclaim the convention of the regular briefing. What happens then is testimony to the truth that the gathering of presidential news, like the making of lunchmeat, is often a process best witnessed by the consumer.

Example: Some months ago when the tax cut bill was given to the White House, reporters at a briefing asked Press Secretary Ron Nessen if the President was going to sign it or veto it. Nessen replied simply: "The President is deciding."

That answer, meaningless, was succeeded by 15 minutes of the following:

"Ron, can we say firmly he has made a decision?"

A. He is deciding.

"Then is it firm he has not decided?"

A. He is deciding.

"What does that mean, Ron?"

A. He is deciding.

"Well, is he, uh, leaning in one direction or the other?"

A. He is deciding.

By purpose the briefing is the shortest line between White House activity and the public's right to know. In reality it is more often used for propaganda by the administration and posturing by the press. The result commonly is that hard information seldom surfaces above the overlay of gossip, routine pronouncements.

Actually, such is to be expected. Presidents have seldom been willing to freely divulge news other than that felt prudently obligatory, or self-serving. Press briefings, therefore, have rarely supplied as much data as they've suppressed.

What makes the situation more serious today is that the press remains culpable—in circumstances that cheat the public. The lessons of Watergate be damned, reporters have done almost nothing to increase meaningful White House news flow and almost everything to, in effect, deny it.

Not that reporters inhibit the news purposely. The rub is that their attempts to get more of it have been largely counterproductive. Where the pre-Watergate idea of White House coverage was to lounge around the press room asking questions, the idea now seems to be to lounge around asking loaded questions. Briefings remain the principal news source, therefore, but they have become so raucous that even what small value they have is diminished. Press Secretary Nessen has been so upset during briefing encounters that he has at times forgotten to announce (or purposely withheld) news items on the agenda.

Indeed the affairs have grown overripe. A minister who is also a newspaper columnist attends regularly, in collar, to ask nonpartisan questions of the White House. A woman correspondent from Texas, "a briefing regular since the days of Grant," is so irritating even fellow reporters groan and snicker.

As if all the above were not enough, the investigators speak of the rigid attitudes of the employment officials, of the inflexible guidelines they live by.

With all this, the applicant's time is wasted. The employer's time is wasted. And the taxpayer's money is wasted.

Apollo To Stay Aloft Until Thursday

Continued From Page 1-A
The Americans are able to stay up longer because of the greater fuel and life support capacity of their spaceship.
Apollo and Soyuz separated Saturday after two days of tandem flight that rested detente to a new plateau, tested a common docking device that might be used in space rescue missions and perhaps opened an era in which the world's two most powerful nations will cooperate to probe space to the planets.
Leonov and Kubasov were anxious to come home as they neared the end of their journey.
"When you travel around the earth you finally come home, you finally realize how good it is," Soyuz commander Leonov said Sunday.

Apollo and Soyuz drifted farther and farther apart and on Sunday passed out of radio range.
"We lost them. We don't hear from them anymore," Soyuz reported.
But the cosmonauts did speak by radio with other space travelers. They talked about two minutes with the crew of the Salyut 4 space station. Pyotr Klimuk and Vitaly Sevast'yanov, who wished them a "soft landing."
Klimuk and Sevast'yanov, who have been in space since May 26, are expected to return to earth later in the week.
Aboard Apollo, Stafford, Brand and Slayton concentrated on a heavy schedule of experiments.
"Today seems more like a normal workday than the other five," commander Stafford said Sunday, referring to the time leading up to and including the joint mission with the Soviets.
Among ground targets for Apollo's earth resources survey cameras were the Sahara desert, ice fields in Antarctica, ocean currents off the coast of South America, the Alpine peaks of Europe and the salt flats of Australia.
The astronauts also aimed instruments deep into space to probe faint pinpoints of invisible light millions of miles from earth.
A high temperature furnace was fired up on board Apollo and the crew melted samples of metal to test the effects of casting in the absence of gravity.

Port Authority Eyes Facility
The Seminole County Port Authority (SCOPA) tonight will consider a report from Port Administrator Jim Ryan on locating a metal fabricating plant at the port.
The SCOPA board meets at 7 p.m. at the port.
Administrative Assn. Dennis Dolger said today that Johnson Metal Fabricators and Manufacturers Ltd., approached SCOPA in May with the proposal of building a plant on more than four acres at the port. Dolger said Johnson's is a newly-formed company and makes steel structures and stainless steel materials.

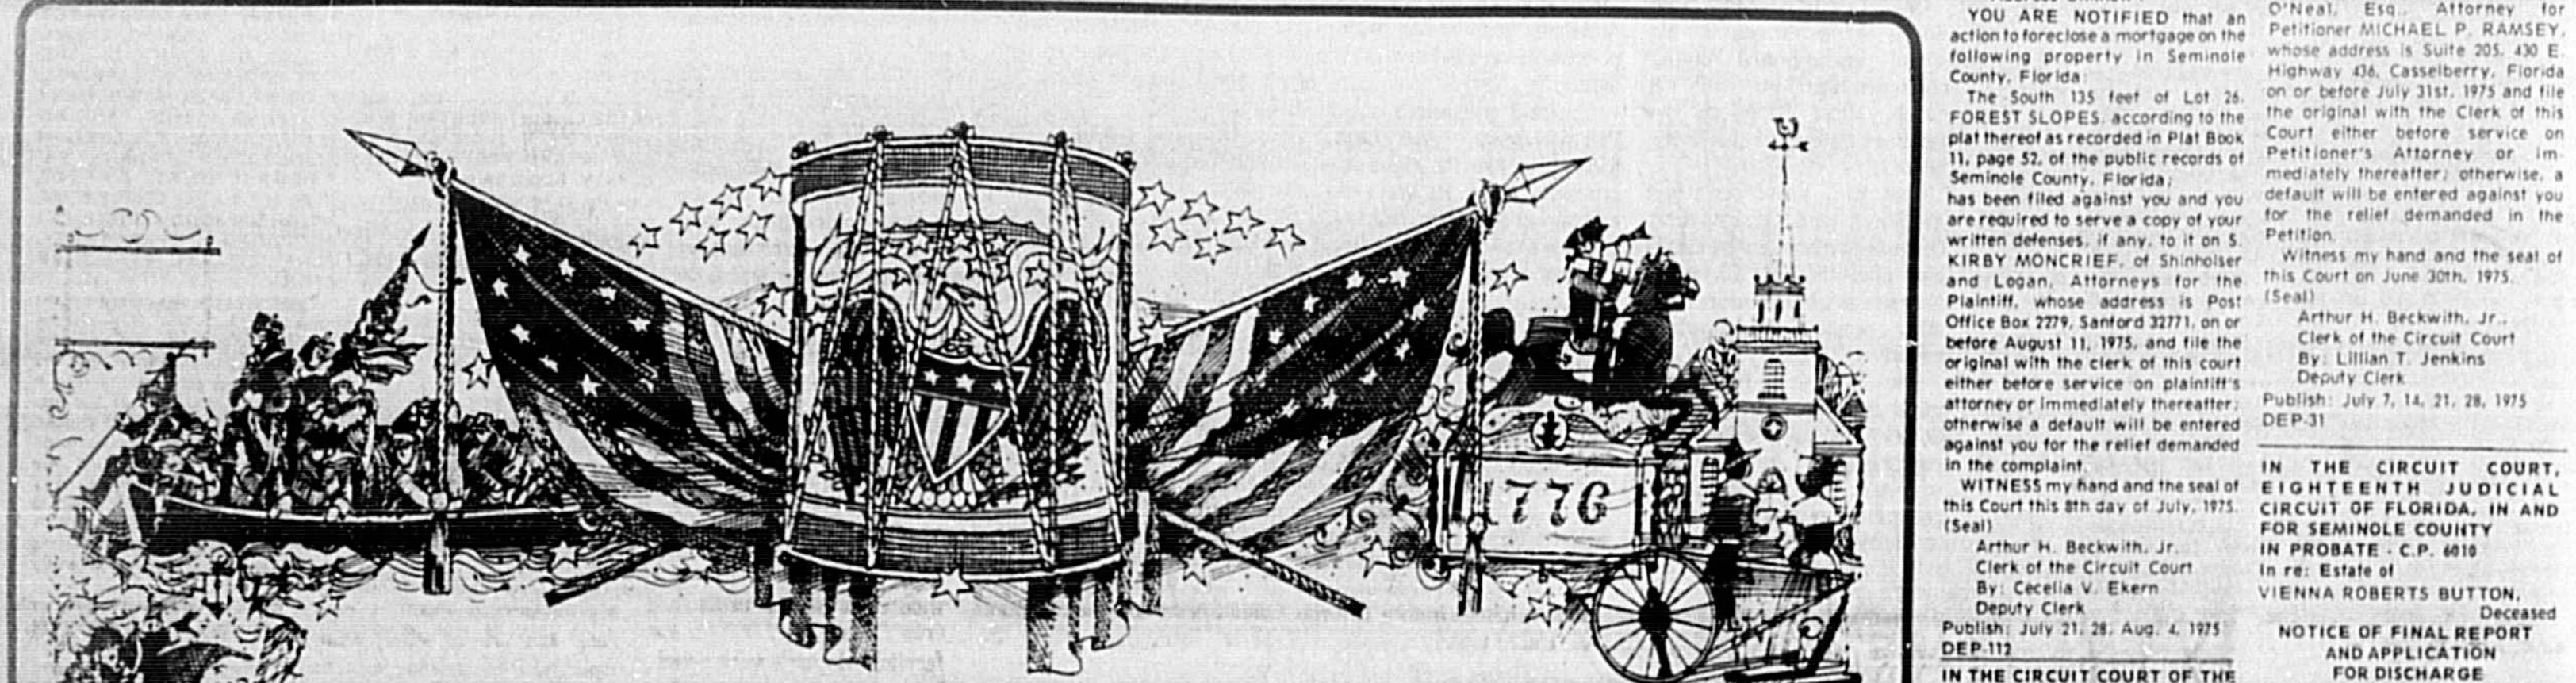

Sanlando Utilities Hearing To Resume

Seminole County Commissioners tomorrow night resume a public hearing to consider rate increases requested by Sanlando Utility Corp.
Ned Woolfolk, county utility attorney, is expected to present the county's case against the requested rate hikes by the firm serving more than 2,000 customers in the Longwood area. Public hearings began at 7 p.m. in the courthouse.
On July 1, Sanlando officials and attorneys presented for hours of testimony citing needs for the rate increases to ensure that quality water and sewer operations would continue.
Requested rates are hikes from the present base rate for water of \$3.50 to \$5.80 for a flat \$12 per month. Hearings begin at 7 p.m. in the courthouse.
Sewer rates for residential service would go from a \$3.50-6.80 charge to a flat \$12 per month. The sewer charge for multiple dwellings would increase to a flat \$8 per month.

Requested rate hikes are from the present base of \$3.50 to \$5.80 for water. Sewer rates would go from \$3.50-6.80 to a flat \$12 per month. Hearings begin at 7 p.m. in the courthouse.
Bill Dale, county environmental services director, said the engineering information on the current use and capacity of the firm's treatment facilities could be a "determination" for the commission's decision on the rate increases.

Announcing The Evening Herald's Bicentennial Progress Edition...

On the last Sunday of each October, The Herald publishes its largest issue of the year — our PROGRESS edition.
This October The Herald will help celebrate our nation's 200th birthday with the publication of a special bicentennial progress issue tracing the history, growth and projections for the future of each area of Seminole and southwest Volusia counties.

We'll tell the world what life was like in our communities in years past, how our lifestyles have changed, and what is predicted for the years ahead.

We expect to make this special bicentennial project the finest special issue we've ever developed. And we need your help. Dust off your old photo albums, diaries, family histories, and join The Herald in writing the history of our area. Write and let us know what you have that might be suitable for publication in our bicentennial issue. After all, you won't have another chance like this for 200 years!

Seamstress Is Also Machine 'Fix-It' Lady

By JEAN PATESON
Women's Editor
She wields a screwdriver as naturally as she does a needle and thread. Her fingers are equally nimble whether she's tinkering with the insides of a sewing machine or using it to run up a garment or two.
Mary O'Day is charming proof that you don't have to be a man to know how machinery works; and she will insist that you don't have to be a woman to be good at sewing.
"In fact," says Mary, "I've got to admit that the best sewers I know are men. They're such perfectionists. Women tend to think, 'oh, if I can't get it better this time, maybe it'll be better next time.'"
Manager of Powell's Sewing Center in the Sanford Plaza, Mary divides her time equally among office management, dressmaking and machine repairs. She is the only woman in Florida qualified to do sewing machine repairs and maintenance, and was amused by the surprised comments she evoked when attending a recent repair seminar in Orlando.
"Without being 'woman's

lib," I must tell you that I finished my assignments before the men," she grinned. "I did feel rather smug about that!"
Mary doesn't see any reason why women shouldn't be capable of doing mechanical work. "It's just that they usually don't have the background; they haven't had access to it. I've always tended to be mechanically inclined," she added.
When Mary's not stripping, cleaning, repairing and reassembling machines, or pouring over accounts and order forms, she's dressmaking. Even at home or on vacation, most of her interests and activities revolve around sewing. At the Grace Methodist Church, for example, she is arts and crafts director. And at present she's wrapped up in designing costumes for the Sanford Junior Woman's Club's "Great American Doll Show."
"This doll show, which should be ready for display by the time schools reopen, is a collection of dolls dressed in authentic historical costumes and representing a good cross section of the people contributing to America's heritage. Mary has also designed the costumes worn by many local majorettes and cheerleaders. And if she's not designing or sewing herself, she's teaching others.
Her classes are held at the Sewing Center almost daily throughout the fall and winter months. Beginner and advanced classes, as well as instruction in tailoring, stretch-and-sew and special classes for seamstresses are all part of her repertoire. Her students' ages range from 10 to 84.
"The thing I stress most often," said Mary, "is that a sewing machine is a lifetime investment. Buy a good one, but buy a machine that is suited to your needs."
"As far as tools go, buy the best, even if it means saving up and getting just a bit at a time. And do get a good pair of scissors," she pleaded.
Mary does all her own sewing for herself and her two children, Colleen, 7, and Tommy, 3. The savings, she is convinced, are considerable.
For those mothers and daughters getting down to preschool sewing, Mary offers some useful hints. Fashions for

Designing, sewing are among Ms. O'Day's talents

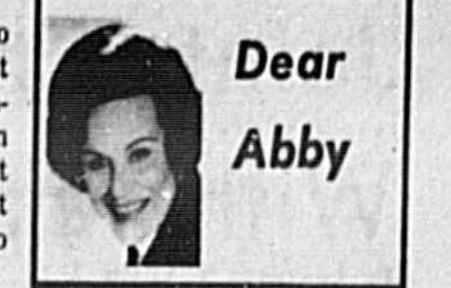

Mary O'Day is Florida's first woman sewing machine repairs technician

WOMEN

Delinquent Citizen Wants To Pay Up

By ABIGAIL VAN BUREN
DEAR ABBY: I would like to know if the U.S. government has what they call a "conscience place" where a person can go and pay the government what he has cheated them out of. If so, where is it? I want to die clean.
WANTS TO REPENT
DEAR WANTS: THERE IS no one place. If you've cheated on your income tax, write to the Internal Revenue Service, Washington, D.C., with a note of explanation. If you've cheated on something else, send your remittance to any U.S. Treasury office with a note, and they will channel it to the proper place.
(P.S. In the meantime, pray. You know how slow the mails are.)
DEAR ABBY: This is for "Trapped," the young woman whose husband beat her and kept her a prisoner in her home with no money of her own. You told her to go to a family service agency for help. How could she get there? She doesn't drive. My husband also kept me a prisoner, and I didn't drive. He never allowed me to have any money of my own. I really appreciated it.
NO NAME PLEASE
DEAR ABBY: You had a pretty good flap going some time ago about printing the Ten Commandments on bed sheets. To make a long story short, we have been married three years and now have a child of our own. I couldn't be happier. Please print this, Abby. If it gives just one woman the courage to gather up her self-respect and leave a situation that's as hopeless as mine was, it will be worth it.
DEAR ABBY: You had a Social Security agency some time ago about printing the Ten Commandments on bed sheets. To make a long story short, we have been married three years and now have a child of our own. I couldn't be happier. Please print this, Abby. If it gives just one woman the courage to gather up her self-respect and leave a situation that's as hopeless as mine was, it will be worth it.

Dear Abby

'Doctor' Treats Furniture, Guarantees Full Recovery

The quaint sign dangling above his work bench reads "The Furniture Doctor — aides, remedies and elixirs — and fine antique refinishing."
Joe Girault is the furniture doctor. He has been "practicing" in Sanford for the past two years, and in his home state of Pennsylvania for a good 30 years before that. And Joe, with his stains and strippers and glue, his tools and talent guarantees complete recovery after treatment, no matter what ails an item of furniture. A large space in the rear of Briggs' Antiques building on SR 46 a couple of blocks west of French Avenue in Sanford is his "consulting room."
Fine work is his joy. The more detailed and intricate the antique, the more complex the restoration problem — the more he likes it. But Joe's a realist; it's not everyone who comes to him with priceless antiques to be restored to glory.
Joe doesn't scorn such work. Instead, with characteristic enthusiasm, he throws himself heartily into the task — and at the same time into the owner's life.
"It's people who really turn me on. They fascinate and intrigue him. 'I'm nosy,' the furniture doctor openly admits. "But I get my kicks this way."
And to Joe, the furniture he "treats" is simply an extension of his owner. "Take this table," he invites the mustachioed Joe, pushing his peaked cap further back on crisp greying curls that get a better look at the rather battered item.
"See this darker area here in the middle? It's so easy to get lost in a lot about how the housekeeper did the dusting!
"It really bothers me," he rattled on, "the way some people just throw their old furniture in the corner, always meaning to fix it some day but never getting around to it. That's why I started giving lessons."
Joe had them all figured from one glance at their ornate cabinets.
"It really bothers me," he rattled on, "the way some people just throw their old furniture in the corner, always meaning to fix it some day but never getting around to it. That's why I started giving lessons."

Scout Goes 'Sanibel Shelling'

Wildlife Refuge and she will have the experience of walking on the same beach that inspired Anne Morrow Lindbergh to write her poetic book, "Gift From The Sea."
Scouts going to "Sanibel Shelling" will learn to find and recognize shells and observe how mollusks live in the sea. They will work with conservation groups dedicated to preserving Sanibel's unique and fragile environment.
Also attending the "Sanibel Shelling" is Melanie Hobbs, daughter of Mr. and Mrs. Edward Hobbs, formerly of Altamonte Springs and now of Atlanta, Ga.

Virginia Haas

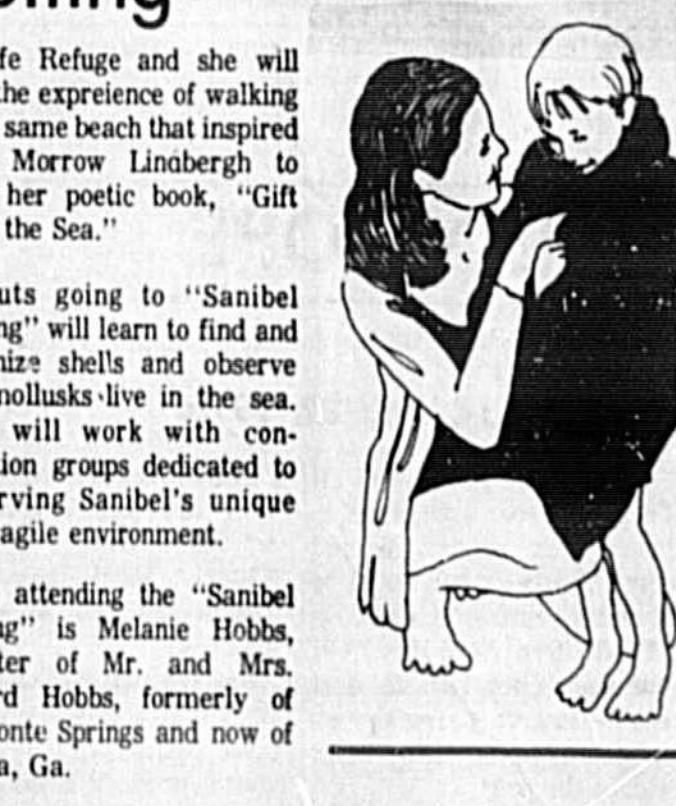

Aid To Senior Citizens

Senior Floridians who find their Golden Years tarnished by inflation have a new source of aid in a paperback book, "Successful Retirement in Florida."
Subtitled "A Survival guide to the pleasures and pitfalls of Florida retirement," the book offers practical advice and information for Florida's more than 1.3 million retirees.
The author, Carroll L. Scott, is a veteran Florida news reporter and editor who has worked closely with Florida retirement groups and government agencies in promoting improved services for the state's senior citizens. He also publishes a newsletter for Florida retirees. His home is in Longwood.
According to Mrs. Margaret Jacks, director of the Florida Division of Aging, Scott's book "fills a definite need. It gets across to people the need to plan retirement." Planning — on a continuing basis — is stressed throughout the book.
"Your life in retirement is not static," Scott maintains. "And your needs and circumstances will change as they did during your working years."
In addition to explaining how the retiree can prepare for

Despite the hour—2 o'clock in the morning—friends and family were at McCoy Jet Port in Orlando to greet the Central Florida Chorale on their return from a three week tour in Poland. Singer Lucy Nagil was one of the Chorale members welcomed with a warm hug.

YMCA Is Still In The Swim

Two more sessions remain in the Seminole Y.M.C.A. swimming classes at Sabal Palm Country Club, SR 434. The sessions are from July 28-Aug. 8, and Aug. 11-Aug. 22, both sessions holding 45-minute classes at 9:35 a.m., 10 a.m. and 10:45 a.m. Monday through Friday.
Swimming instructors are Krista Steyer, Julie Reudinger and Dave Kiekman.

Children who do not complete requirement will receive certificate of participation.

Children are placed in classes based upon age and skill. The classes follow the National Y.M.C.A. Aquatic Program and include: Tadpole 1, for children ages 3-5 who are afraid of the water; Tadpole 1, for children ages 3-5 who are not afraid of the water. Classes for children six years of age and older include: Pulling, for beginner swimmers; Minnow, for children who can swim front crawl but have not mastered side breathing; and back crawl is introduced; Fish, for children who have achieved proficiency with the front and back crawl strokes, and breast strokes is introduced; Flying Fish, an increased amount of endurance; Shark, greatly increased endurance is required, added importance on stroke technique, and life saving skills are presented; Porpoise, the most advanced class with children working toward qualifying times for their age group among other extremely stringent requirements.
In addition to swimming skills, each class has a particular life saving skill which the children must be able to perform. Water safety is stressed with one day each session spent on this area.
Children must be registered through the Y.M.C.A. prior to the beginning of the session. The Seminole "Y" is located in Forest City on Palm Springs Road behind Lake Brantley High School. For registration and more information, call or write to Seminole Y.M.C.A., P.O. Box 305, Altamonte Springs, Florida.
DEAR BROKEN: Though adultery has been committed, the marriage is still considered legal and valid in the eyes of God and man. However, if a couple wants to start fresh, I think renewing their marriage vows is an excellent idea.

Joints Change With Arthritis

By Lawrence E. Lamb, M.D. DEAR DR. LAMB - My husband recently completed a series of tests and learned he is suffering from rheumatoid spondylitis, Marie Struppel arthritis.

and the nature of the illness becomes obvious. The joints in the spine may become fused, giving the patient a "rocker chair" effect. He won't be able to bend over normally because of his stiff back.

The unique feature of the disease is that it usually strikes young men (in about 90 percent of the cases) in their later teens or early 20s. It begins with involvement of the sacroiliac joints, where the spine joins the large hip bones, of the pelvis.

The initial complaint is often low back pain. Examination of the spine, even with X-rays, may not show anything. It is not hard to realize, then, that not another healthy, strong, young man may get tagged with a label of a malingerer or a hypochondriac, when in fact he has a serious problem.

In nearly a third of the patients other joints in the body, particularly the knees, will become involved. This will be temporary, and the joints recover entirely. In other instances the joints continue to show progressive changes, and the disease becomes almost indistinguishable from ordinary rheumatoid arthritis.

It is fair to say that the disease is often milder than many cases of common rheumatoid arthritis. There may be intermittent attacks of low back pain and, before attacks the patient may feel fairly well. Of course, if the whole spine becomes fixed, the normal flexibility is lost, and causes difficulty.

BEETLE BAILEY by Mort Walker. BEETLE, DON'T WALK AROUND IN YOUR SOCKS... BUT MY FEET ARE COLD... 'YEAH, WELL, IT LOOKS FUNNY AND IF THERE'S ONE THING WE DON'T NEED IT'S A FUNNY ARMY... OKAY... PUT THEM BACK ON... MORT WALKER

ALLEY OOP by Dave Graue. WELL? WHAT'LL IT BE, GENTS? WE'LL TAKE A COUPLE GLASSES OF WATER, PLEASE! 'VHEAR THAT, BOYS? THESE DUDES ARE GONNA DRINK WATER! WE CAN'T LET 'EM DO THAT, SAM! IT'LL KILL 'EM!

THE BORN LOSER by Art Sanson. HEY, ACE, CAN YOU SPARE FIVE BUCKS? ISN'T THAT AN AWFUL LOT? 'YEAH, BUT I'M GOING ON VACATION NEXT WEEK.

CAMPUS CLATTER with BIMO BURNS by Larry Lewis. I'M SORRY THE CHAPLAIN IS BOOKED FOR THE NEXT FEW DAYS. REALLY? I NEVER HAD TO HAVE AN APPOINTMENT BEFORE. SEEMS LIKE ALL THE STUDENTS ARE SEEKING DIVINE GUIDANCE... 'DURING FINAL EXAM WEEK!

BUGS BUNNY by Heindahl & Stoffel. HEY, DOORMAN? GRAB THAT SUIT—GIVE IT TO THE SEAT. 'HASTEN TO DO YOUR BIDDING? HERE YOU ARE AND THERE'S A LITTLE SOME EXTRA FOR A TIP. 'YER ALL NEARST FUDDY! WELCOME TO EL SWANKO HOTEL? 'COULD YOU TAKE THESE 'DOGS?

BLONDIE by Chic Young. 'BUMSTEAD! WHY AREN'T YOU WORKING? I DON'T KNOW WHAT'S WRONG WITH ME, BOSS. I JUST DON'T SEEM TO HAVE IT TODAY. 'EVEN IF I HAD IT HE WOULDN'T KNOW WHAT TO DO WITH IT!

WINTHROP by Dick Cavalli. CREEK CREEK CREEK YAWP! WOLF WOLF HOWL! WHOOO GRANK! NOOOO! YOW! WIR BREEBEEPRE! BREEP WOLF! NEON RRRR! RRRR! 'REOW! 'NEON JUBBA JUBBA HOOOO! HOOOO! 'KAF! 'KAF! 'BREEP BREEP!

CAPTAIN EASY by Crooks & Lawrence. YOU BRUTE! WHAT'S THE BIG DEAL DRIPPING ME?! YOU SAID "LET GO OF ME!"—SO I DID! I WAS MERELY OFFERING YOU THE USE OF MY HUT AND MY COY—BUT IF YOU PREFER "SLEEPING ON THE BASE GROUND"—OKAY, OKAY... NOT SO FAST! I ACCEPT YOUR APOLOGY AND YOUR OFFER!

FRANK AND ERNEST by Bob Thaves. I LIKE TO THINK OF MYSELF AS MIDDLE-AGED... EXACTLY HALF-WAY BETWEEN 80 AND 90.

WIN AT BRIDGE

By OSWALD and JAMES JACOBY

Table with bridge scores for North, West, East, and South (D). Includes a note: 'Both vulnerable'.

By Oswald & James Jacoby. Jim: "On many occasions we have discussed the slight extra chance that the real expert gives himself when it is there..."

starts to think when the time for thinking is long past... Oswald: "That way would be for South to play queen of trumps at trick two. West could do no better than take his ace..."

Ask the Jacoobys. "Why do they still score 100 or 150 points for honors in rubber and party bridge?" asks a Wyoming reader...

CARNIVAL by Dick Turner

"My grandpa says he hadda walk five miles to school... he must have been really tough on bus drivers!"

FUNNY BUSINESS by Roger Ballen. YOU WANTED TO SEE WHAT THE NE SIE? 'OH, YEAH!—WHAT THE HECK WAS IT ABOUT? 'OH, YEAH!—'MOOVE FRED!

DOONESBURY

By Garry Trudeau

SAY, MICHAEL, DID I EVER TELL YOU ABOUT MY GREAT UNCLE SAM? 'NO—YOU HAD A COLONY UNCLE? 'YEAH, HE WAS THE GREATEST PATRIOT LEADER IN HIS DAY!

TUMBLEWEEDS by T. K. Ryan. WE'D BETTER LEAD THE HORSES THROUGH THIS PRAIRIE POG TOWN... THEY MIGHT STEP IN A HOLE.

PRISCILLA'S POP by Al Vermeer. IF ONLY I HAD YOUR WAVY HAIR! YOU WANT WAVY HAIR? 'COME WITH ME! 'I'LL SHOW YOU WHY WAVY HAIR!

ARCHIE by Bob Montana. I INVENTED BRAKES TO MAKE THIS BOAT STOP ON A DUNE! 'SHOW ME! 'HOW'S THAT? 'YIPES! 'I FORGOT WE HAD ARCHIE ALONG!

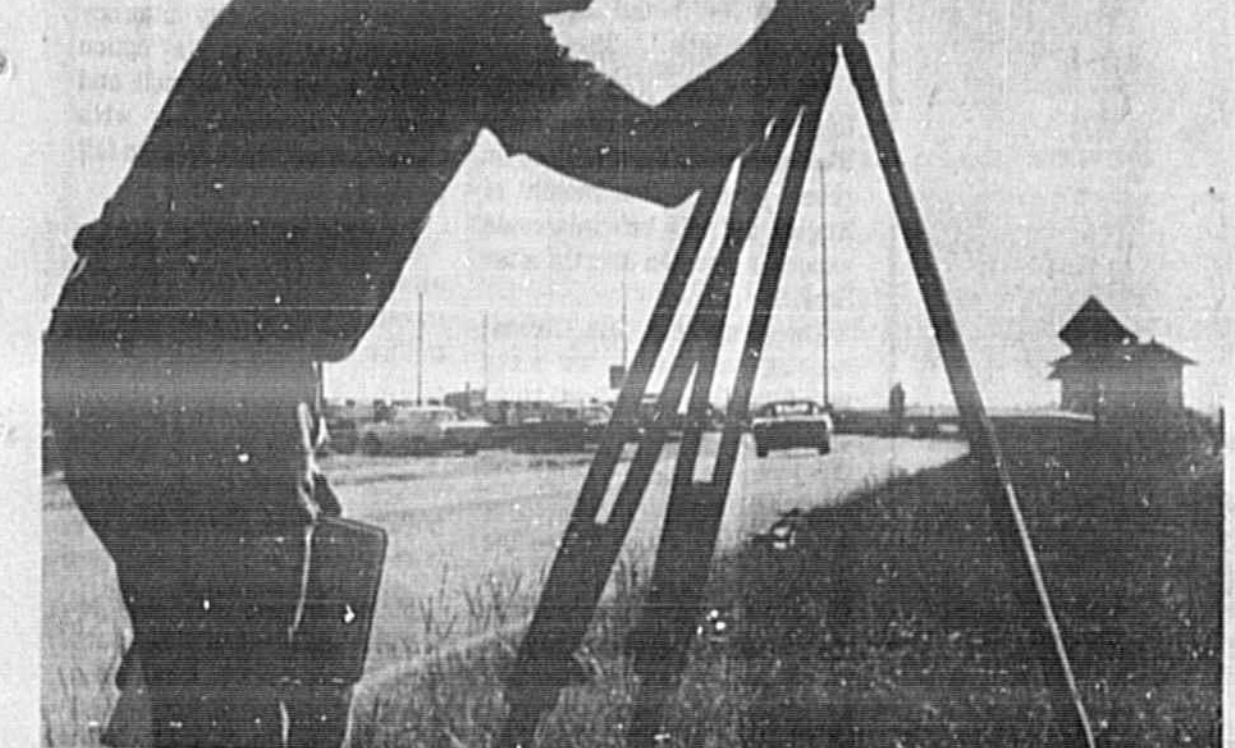

EEK & MEEK by Howie Schneider. WHAT'LL YOU HAVE, PAL? 'BOURBON AND POTATO CHIPS... '...THE BREAKFAST OF CHAMPIONS!

SHORT RIBS by Frank Hill. BOOM! BOOM! BOOM! BOOM! 'HOLD IT! HOLD IT! 'WHEN YOU FIRE A 21 GUN SALUTE, USE BLANKS!

Commissioners Exchange Memos Simcoe Job Switch Blasted

BRIDGE WORK CONTINUES. Work on replacing the aging Osting Bridge is now in its second week and crews this morning were using chain saws to cut trees in the path of the new bridge right-of-way.

By MICK LOCHRIDGE Herald Staff Writer. Seminole County Commissioner Betty Simcoe has blasted Commissioner Harry Kwiatkowski for the job transfer of Administrative Assistant Betty Simcoe because of what he termed Kwiatkowski's "personal efforts to make her existence miserable..."

Staley Illness May Delay Probe

By BOB LLOYD Herald Staff Writer. The Seminole County Grand Jury investigating the June 9 fire of the county jail that killed 10 inmates and one jailer was delayed this morning by the emergency hospitalization of an assistant state attorney heading up the fire probe.

State Inspection Of Jail Awaited

A State Fire Marshal's official is expected to inspect the repaired Seminole County Jail this week and consider a 14-point minimum fire protection package as one of the final steps in returning county prisoners to the fire-damaged facility.

Two Industries Detail Plans

Development of two new industries at the Seminole County Port Authority (SCOPA) gained ground last night during a meeting of the authority's board of directors.

SEA Files For Mediator On Grievance Procedure

The Seminole Education Association (SEA) today filed papers with the Florida Public Relations Commission (PERC) requesting a mediator to try to resolve the SEA's much-contested grievance procedure.

Apollo Crew Looks Forward To Thursday's Homecoming

SPCFC CENTER, Houston (AP)—While the Soyuz cosmonauts celebrate their safe return to earth, the American astronauts of Apollo conduct experiments today and look ahead to their own splashdown parties after their homecoming Thursday.

Planning Council Backs SR46 Railroad Overpass

The East Central Florida Regional Planning Council (ECFRC) has endorsed a proposed railroad overpass for State Road 46, west of Sanford, the Department of Transportation (DOT) announced today.

SEA Files For Mediator On Grievance Procedure

The Seminole Education Association (SEA) today filed papers with the Florida Public Relations Commission (PERC) requesting a mediator to try to resolve the SEA's much-contested grievance procedure.

DBA To Vote On By-Laws

A proposed set of by-laws is to be discussed at a meeting of the Downtown Business Association (DBA) tomorrow at 6 p.m. at the Greater Sanford Chamber of Commerce.

Apollo Crew Looks Forward To Thursday's Homecoming

SPCFC CENTER, Houston (AP)—While the Soyuz cosmonauts celebrate their safe return to earth, the American astronauts of Apollo conduct experiments today and look ahead to their own splashdown parties after their homecoming Thursday.

BETTY SIMCOE. Her departure from the position of administrative assistant leaves commissioners minus an individual to provide inner-office coordination.

(Continued on Page 2-A)

"We want to know about passenger service and things like this," Fuller said. "Plans for extensive use of the crossing by the railroad would, of course, affect the overpass situation..."

Fuller said Seaboard Coast Line officials had been contacted by mail two weeks ago and that DOT had received a letter acknowledging the data request, but no information has been filed by the railroad.

Either side may ask for a mediator, but guidelines also say mutual consent is required before a mediator's decision is binding.

The DBA's 30-plus membership consists almost entirely of merchants, Jacobson says, and efforts are being made to involve more property owners in an attempt to meet and resolve the problems of downtown Sanford.

Every downtown property owner and merchant is urged to cooperate by attending the meeting, joining the DBA and actively participating in its reorganization, Jacobson said.

News conferences are planned by both crews — the astronauts from orbit Wednesday in Moscow.
