

YOU NEVER KNOW what you'll run across walking in the woods these days, but you'll find it if you know where to look. Behind the fierce visage of a hunter, is a 51-year-old resident of the semipalmated reservation who pursues the ancient tribal art of mask-making. MICHAEL CAINE'S NEW ROLE as a proud father is far from typical. The British actor and his wife, Shakira, had the press in London with their daughter, Natasha Halima, born July 15.

WORRY CLINIC

George W. Crane, Ph.D., M.D.

Kathy's query illustrates the widespread belief of children that adults NEVER are afraid.

CASEY's baby, aged 4, is typical of many timid toddlers.

And that was the heading of a very attractive full page advertisement by Metropolitan Life Insurance Co., many months ago.

For youngsters often are afflicted with all sorts of inner tensions and turmoil.

Parents are usually regarded as giants and goddesses in physical size, for Kathy's daddy is twice her height and 6 times her weight.

It was the end of the hour this toddler looked on the world, just try to imagine that you are now surrounded by men who are all 12 feet tall and weighing 1,000 pounds.

And the women adults, as mothers, teachers, sales clerks and waitresses, would be over 11 feet tall and weighing 750 pounds.

That's the giant adult world in which little Kathy is living.

Moreover, we adult giants seem unannounced to kiddies, for we know when Kathy has been into mischief during our absence, though she can't figure out why we do it.

In numerous addresses before State Teachers Conventions, I have thus urged teachers to devote an hour to a "Fear Party," wherein they casually mention one of their own terrors when they were a child.

One 4th grade teacher started such a "confidence-building" telling how she was terrified of snakes when she was 9 years old.

And how her brothers made her life miserable the rest of her life by scaring her with snakes.
