IN THE HEART OF THE WORLD'S GREATEST VEGETABLE SECTION

VOLUME 1

SANFORD, FLORIDA, MONDAY, MARCH 23, 1920

NUMBER 131

STATE SHOULD ADVERTISE OUR GREAT RESOURCES THROUGH CHAMBER COM.

World Should Know More About Real Florida

FIVE MILLION PEOPLE

PEOPLE SHOULD BE LIVING IN FLORIDA INSTEAD OF ONE MILLION.

As it pays to fertilize, if good crops are to be assured, so it pays to advertise, that is if you have the goods.

Florida needs a live, active intelligent, progressive State Chamber of Commerce, and it needs the activity of such a body right now.

We grow pompous and swell up with pride as others tell us of our wonder state, and then expect George to do something, and George is such a lazy dog that he rest in peaceful contentment, for he desires but to lead the simple life.

Florida has a port several hundred miles nearer the Panama Canal than any other port. What of it? Is it proving to be of any material advantage to the state, or the people of the state?

Florida has a population of over Fifty Millions within a ride of from 24 to 30 hours. What in being done to enlighten those millions as to what Florida really is? A million people in the state, and a million people in each of several cities in other states. Something radically wrong somewhere.

Florida could easily have a population of five millions within the next ten years, if the people east, north and west really knew anything about the resources of the state, and its mighty possibilities.

Larger in acreage than the entire six eastern states, and each acre of soil productive of wealth, yet but ten per cent under cultivation. The earth restless from inattention when it offers to yield the wealth of an Empire.

Tourists, winter visitors, citrus fruits, phosphate, lumber and turpentine, that's the prevailing opinion of Florida and its resources. All good and helpful, but that's not Florida; it's but just the smallest mite of the most prolific and wonderful state in the union, which was carved out by the Almighty at Earth's creation, as the one section on the continent in which a combination of all nature's products were to be embraced.

It is unnecessary to add coloring to any pen and word picture of the distinguished advantages and marvelous resources of the Peninsular State. The most precious gift bestowed by the Creator was that of health, and the climate of portions of Florida is unexcelled on the globe. Indeed it was here where was discovered the fountain of youth.

In location, for the markets of the world, no state excels. The soil is diversified, much of which yields two and three crops annually. Florida has three products, corn, cotton, and tobacco, which alone would make her prosperous and independent. Add to these practically all the other products which mother earth bestows, and one only begins to realize what Florida really is, and mind cannot begin to estimate what it can be made.

We have seen one man (Flagler) build a railroad from Jacksonville, several hundred miles in length, to the southern limit of the state, Key West, and a portion of this over the ocean, yet as a combined people we have as yet, never really entered the immense areas of earth's richest lands, the Everglades. Our pace is too small like. Our people given too much to little affairs, while the big rich game is at our very doors.

Have we no one that is big enough to start the ball rolling which would mean a thorough, development of this most tremendous agricultural asset to the Nation.

It is being proposed to grant a certain acreage of land for farming purposes, to those who served in the recent war. Are they to be located in a section and on land which would

mean a life of continuous drudgery for years to come? If the brave lads who crossed the waters to aid in civilizing humanity deserve anything more than they have received, they deserve the best. Why not the Everglades, as well as other rich land in the state where living is worth living?

Florida can supply the nations needs in sugar, yet she will be importing sweetness for ages to come, unless we get busy now. Two former presidential candidates have landed interest near or in the Everglades, William Jennings Bryan and Judge Alton B. Parker, the latter now raises sugar cane on his estate near Lake Okechobee.

Again we ask, why not a State Chamber of Commerce?
C. S. HAINES.
Altamonte Springs

LAKELAND LOSES STORES BY BIG FIRE

SUSTAINS LOSS OF \$300,000 WHEN BUSINESS BLOCKS GO UP IN SMOKE.

Lakeland March 8.—A disastrous fire started in the lumber sheds of the Lakeland Manufacturing Company tonight about 7:45 o'clock, wiped out two of the principal business blocks of Lakeland and narrowly missed the city hall and the remainder of the business section of the city. The burned section includes practically everything from Missouri avenue to Florida avenue, and from Main street to the railroad. The Peacock home on Florida avenue and the Reagan block on Main street were destroyed.

In the Peacock block were located the Martin hotel, Simons and Weeks garage, Sid Caskey's garage, Phillip Fishers's shoe store and the Fonda restaurant. The Lakeland Steam Laundry is a total loss. R. W. Weaver the owner, having recently installed nearly \$20,000 worth of new machinery, and improvements, and carried no insurance, owing to the prohibitive rate because of the proximity of the lumber yards.

Maxwell and Vealy's garage was destroyed, as was the garage of S. S. Milton and the two hardware stores, the Model and Todd's, the latter saving a portion of the stock although its loss was about \$30,000 with \$22,000 insurance. Tyrell's wagon shop was also burnt and two box cars on the A. C. L. tracks are a total loss.

Soon after the Lakeland fire department got its apparatus into action two of the city mains burst from the pressure, with the result that no water was available for nearly an hour. Assistance was asked from Bartow and Plant City and the fire departments from both towns responded, and hose was sent from Mulberry.

The big Lakeland packing house was damaged but was saved from destruction by hard work on the part of the firemen. But for a fortunate shift of the wind the city hall and the block east of it would have gone, and probably the entire business portion of the city.

The estimated loss of the buildings will be in the neighborhood of \$100,000 with an estimated loss of \$200,000 on other property. Two firemen were overcome by heat and smoke but were able to return to duty after being revived. The combined efforts of the different departments got the fire under control about 11:30 o'clock.

Mrs. Best of New York City is among the visitors to the city the guest of the Vajdez Hotel. Mrs. Best was on the train going to Daytona when she met Mrs. R. J. Holly who expatiated at length upon the beauties of Sanford with the result that Mrs. Best came back here to see Sanford for herself and she is so delighted with the hotel and the people that she will remain during the month of April.

DYNAMITE WRECKED THE HOME OF MIKE STONEFF OF CELERY AVE LAST NIGHT

Someone Thought To Get Even By This Method NARROW ESCAPE

OF STONIFF AND HIS FAMILY WHO WERE SLEEPING OVER PLACE WHERE DY- NAMITE WAS PLACED.

The resident of Celery avenue and many of the people in Sanford were awakened this morning by a loud explosion that sounded like heavy artillery on the Somme front. The explosion was at the home of Mike Stoneff and R. G. Hixon who lives just opposite the Stoneff house was the first one to get to the scene of the explosion and found Stoneff and his wife and baby crawling out of the ruins of the home and the balance of the family followed. Investigation showed that a charge of dynamite had been fired at the corner of the house and just beneath where Mr. and Mrs. Stoneff were sleeping with the little baby. Stoneff and his wife found themselves on top of the dresser when they came to where the force of the explosion had blown them out of bed. The little baby was thrown with the mattress and bed through the hole in the bed room floor and was the first one to crawl out of the house. Suspicion pointed to George Steiff another Bulgarian who had been working with Stoneff on the farm and with whom he had some words yesterday about the settlement on the farm where these share croppers had been working and recently when Stoneff sold this place the controversy arose. Steiff was arrested and is now in jail where if the charge is proven will suffer the

full penalty of this distasteful act that jeopardized the lives of Mr. and Mrs. Stoneff and the family of four children. The house is a two story affair and while the house remains standing the floors are all torn out and the entire interior of the home is a wreck and it is nothing short of miraculous that anyone inside the building escaped with their lives. It seems that the men working for Stoneff who are all Bulgarians had been using the dynamite to blow out stumps on the farm and had learned how to use the dynamite and when the trouble arose over business matters the idea occurred to use some of the old world stuff and kill Stoneff and the family by blowing up the house and all that it contained.

The home of R. G. Hixon just across the avenue had many of the windows broken by the explosion and the house was rocked as by an earthquake. The sheriff's office is working on the case and it is thought that other developments may lead to the arrest of others who might have been implicated.

The distasteful act has aroused the community and these Bolshevick methods will not be tolerated in this peaceful community where such tactics will be squelched with an iron hand. The explosion tore the house inside so badly that it will have to be practically rebuilt which will be a big loss to the owner in this time of high prices for building material.

Floods Threaten Many Cities

NEW ENGLAND WATER FRONT CITIES WILL SUFFER BY SWOLLEN STREAMS.

Boston March 29 (By Associated Press) Swollen rivers caused by the mountain streams and thaws of the lakes are a continued menace on the river front property of many New England cities today. The mills at Lawrence are closed by floods which are the highest in many years.

Regular German Troops

ARE ENTERING OCCUPIED ZONE CONTRARY TO TERMS OF ALLIES.

Paris March 29 (By Associated Press) Absolute confirmation of the entrance of regular German troops into the Ruhr district on the edge of the allied occupied zone without permission of the allies has been received here at the French Foreign Office it is stated today. The subject will probably come up in the Supreme Council at London.

SUGAR REFINERY HERE WOULD STIMULATE CANE GROWING IN BIG ACREAGE

United Sugar Corpora- tion Wants Site For Factory FOR BIG OPERATIONS

WILL RESULT WHEN RE- FINERIES ARE STARTED IN FLORIDA.

How about a sugar refinery here in Sanford where there are thousands of acres of land suitable for cane growing that have never been cleared and where there are all kinds of facilities for the operation of a refinery. Palatka is going after the refinery and Miami has already landed a few and other Florida cities are wanting them badly.

Says a special from Palatka: A. F. Stillman, of Aldine, N. Y. R. T. Northrup, of Philadelphia, Capt. E. Johns, of London and J. C. Reilly

of Philadelphia, all stockholders in the United States Corporation, have been here four days going over Palatka and surrounding country with a view to locating a sugar refinery here. So impressed were these capitalists that they remained four days instead of two hours, as they originally planned, and Capt. Johns returned here to begin a careful canvass of land owners in this section with a view to ascertain just how many acres of cane will be planted here in event a two and a half million dollar refinery is located here.

At a meeting of the Business Men's Association the matter was thoroughly discussed, and reports from committees which have been entertaining the visitors and showing them around were received. From these reports it is believed that the sugar corporation will certainly locate its big refinery at Palatka on the St. Johns river.

It is a well known fact that the potato lands of Hastings and East Palatka, as well as all other sections of the country, need a rest. It is

TORNADO SPREADS DEATH AND DESTRUCTION IN OHIO IND., MICHIGAN AND SOUTH

claimed by those who should know that no better crop to follow potatoes and build up the land can be found than sugar cane. Northrup who is a practical farmer, and especially well posted on sugar cane growing, said that if the potato growers will try sugar growing for a few years he knows that they will never raise another potato with the uncertainties of the crop.

The purpose of the capitalists is to find an area where a sufficient amount of cane can be raised to keep the big refinery going, to secure the best possible freight rates and transportation facilities to all parts of this state and other parts of the United States.

The party left for Tampa and Miami where they will inspect sites that have been offered.

SAVING IN DAYLIGHT IN EFFECT

33 AMERICAN CITIES TAKE UP IDEA DESPITE THE LAW

New York, March 29.—Daylight saving went into effect at 2 o'clock Sunday morning in at least 33 American cities and towns, notwithstanding the repeal of the law by Congress last summer over President Wilson's veto, according to the National Daylight Association in a statement here today. At that time clocks will be set ahead one hour.

The cities and towns which have adopted daylight saving or in effect are as follows:
New York—New York City, Buffalo, Cohoes, Troy, Utica, Syracuse, Yonkers, Gloversfield; New Brunswick, Hohen, Plainfield, New Brunswick, Hoboken, Jersey City, Massachusetts—Clinton, Lynn, Worcester, Marabon; Pennsylvania—Philadelphia, Pittsburg, Corry, Allentown, Harrisburg, Easton; Connecticut—Hartford, Putnam; Maine—Portland, South Portland; New Hampshire—Manchester; Michigan—Detroit, St. Joseph, Colorado—Denver, Ohio—Columbus, Delaware—Wilmington.

"We do not anticipate any confusion," said Marcus M. Marks, president of the organization which has been fighting for daylight saving. "The time adopted by New York City, for instance will be automatically observed by all cities and towns within a radius of 50 miles or more of the metropolis. The same can be said of Philadelphia and Pittsburg. The New York Central, New York, New Haven & Hartford, Lackawanna, Reading, Boston & Maine and Maine Central railroads are preparing to operate their local trains so as to take care of the commuters in the territory affected. Cleveland last year operated on time an hour ahead of contiguous territory but there was no confusion.

Donations to the Hospital
The management of the Fernald-Laughton Memorial Hospital wish to express their appreciation for the following recent gifts.
From Miss Virginia Smith \$10.00.
From Miss F. W. Taber, \$10.00.
T. W. Lawton, Pres.

ORDER IN GERMANY SEEMS SURE

REPORTS INDICATE THAT SOCIALISTS WILL SUPPORT REPUBLICAN RULE.

Berlin March 29 (By Associated Press) The news today indicates that order will gradually be restored in the rebellious districts it is declared officially. Hague despatches say that three Socialist parties have decided to withdraw from Mulheim the seat of rebel control and it is necessary to fight under republican leadership. A similar decision it is stated is expected from Dortmund, Eberfeld and Bremen.

Georgia and Ala. Seems to Have Suffered the Most

AN AWFUL DISASTER

SWEEPS CENTRAL PART OF UNITED STATES YESTERDAY KILLING MANY PEOPLE AND RENDERING THOU- SANDS HOMELESS.

Chicago March 9 (By Associated Press) With wire communications demoralized and the known death list stood sixty four today with hundreds injured and millions in property damage in the central states by the tornado which swept that part of the country yesterday but foreboding rumors came from Michigan and the rural districts of Indiana and Ohio said to be in the path of the-twisters but are cut off from communication. Thousands are homeless and relief is necessary in a number of places. Twenty nine were killed in the Chicago district and eight in the vicinity of Toledo, near Elgin and seven each in West Liberty, Indiana, and Eenton Michigan, five in Zulu, Indiana and a lesser number in many of the smaller towns.

Atlanta March 9 (By Associated Press) Thirty six known dead were counted this morning in the tornado which swept Alabama and Georgia yesterday but the estimates list will reach seventy when the full reports are all in. Many hundreds were injured seriously and hundreds of thousands of dollars lost in property damage that has been sustained at La Grange Ga., where twenty bodies have already been recovered at West Point Ga., with ten reported killed and Agriola Alabama with the loss of five lives and this part of the south seems to be the heaviest sufferers. Three hundred residences were destroyed at La Grange and five followed the tornado, destroying many frame buildings. The Red Cross help was rushed from Atlanta to the stricken towns. Property was also destroyed by the high winds at Macon, Washington and Warren Georgia and Deatville, Alabama.

Lima Ohio March 29 (By Associated Press) Seven persons were killed in small towns near here in last night's tornado. Immense property damage has been sustained and inter-urban traffic is suspended and wire communication paralyzed.

Macon Ga., March 29 (By Associated Press) The Ocmulgee river overflowed its banks today as the result of torrential rains which followed the windstorm yesterday. One death in this vicinity is reported, that of a negro struck by lightning; but property damage will be several hundred thousand dollars. The wires are down and no reports from outlying sections. Two hundred thousand loss is reported at Washington, Ga., by telephone message this morning.

La Grange, March 29 (By Associated Press) Fifty persons were killed and one hundred and twenty five injured in this section yesterday by the tornado the latest figures show. Property damage of a half a million is reported and the hospitals and public buildings are filled with the injured.

WEEKS WEATHER

Forecast For The Period March 27 To April 3 Inclusive.
South Atlantic and East Gulf States: Generally fair, although some prospect of rain Monday or Tuesday in east Gulf states; temperatures nearly normal.

Weather Report

For Florida generally fair tonight and Tuesday. Colder tonight in north and central portions. Modern northwest to north winds.

Revival Grows in Power

Hear Dr. Walker Sunday Morning on "Power in the Christian Life." In the Evening "Influence."
Hear Miss Houston Sing the "Golden Bells" Sunday Morning.

COUNTY HAPPENINGS

GENEVA

Mr. Claude Olmstead and son Gordon Olmstead left Geneva last Tuesday for their home in Fr. Pierce.

Those attending the movies in Sanford last Saturday evening were Miss Elizabeth Stones and Ross Franklin, Miss Helen Moran and Gordon Olmstead, Miss Katherine Flynt and William Kilbee, Miss Edith McClellan and Ralph Geiger, Miss Clare Harrison and Lester Brown, Miss May Morris and Frank Barrs and Miss Alexia Muse and Oasie Flynt.

Rev. and Mrs. Abrocrombie and Miss May Stenes of Umatilla spent the week end with Mrs. Stones and Mrs. Hart.

Mrs. H. H. Pattishall entertained her Sunday School class of young people last Tuesday evening with music and games. Mrs. Pattishall served cake and lemonade.

Bert Pattishall and Meade Baker of Stetson spent the week end with home folks.

The Ladies Aid of the M. E. Church met with Mrs. Daniels last Thursday afternoon after a busy afternoon. Mrs. Daniels served cake and lemonade.

Mrs. W. B. Ballard and Mrs. Porter Wakefield entertained with a fish fry at Lake Harney last Saturday, in honor of Geneva's winter visitors who are now returning to their homes in the north.

Mr. and Mrs. Tillis and children of Sanford spent last Sunday with Mr. and Mrs. Troy Proctor.

David Speer of Sanford was a visitor in Geneva last Sunday.

Miss Marie Napp who is spending the winter with her aunt Mrs. J. T. McLain is spending a few days in Sanford with Mrs. Will Raynor.

Mr. and Mrs. T. J. McLain Jr., of Orlando and Mr. and Mrs. W. L. Seig of Sanford were visitors at T. J. McLains last Sunday.

The friends of Mrs. J. Q. Adams will be sorry to hear she has been ill. Wedding bells are being faintly heard.

Bass Is Bound Over

Fred M. Bass, candidate for the state senate from the 19th senatorial district, comprising the counties of Osceola, Orange and Seminole was Saturday afternoon in the county

court, bound over to the circuit court in the sum of \$5,000 as the outcome of the encounter between him and Editor W. B. Harris of the Kissimmee Valley Gazette, which occurred Saturday, March 6 last on the parking on Broadway, during which Editor Harris received serious injuries to his right eye, necessitating regular visits to an eye specialist at Tampa, Dr. Rollin Jefferson.

Judge T. M. Murphy presided and after hearing about a half dozen witnesses for the state quickly made his decision. Bass made bond a short time after the court proceedings ended.

The case of the state was looked after by Joseph H. Jones, state attorney. A Akerman, of the firm of Kilber, Akerman and Steed, represented Mr. Harris. The interests of the defendant were in the hands of the law firm of Johnston and Garrett-Kissimmee Gazette.

Who Was The Sanford Man

Queer people drift into communities and Kissimmee is no exception in playing un-dilling host to them at times. This statement can be verified by City Marshal Floyd Tison.

Saturday there was an auto wrecked between here and Campbell. It was a Sanford man who formerly lived here, and a young woman, styling herself Mrs. J. C. Sellers of Cleveland, Ohio, and a girl about 5 years old, whom the woman claimed as her child, but subsequent developments proved the little one was her niece and the mother of the child resided in Jacksonville.

The auto was speeding and in trying to pass another car, turned over. The man escaped unhurt and disappeared, the child had its collar bone broken and the woman her knee bruised. The auto is in a local garage and will take two weeks to repair it. The wife of the Sanford man was here Monday looking after it and daggers at the woman who was with her husband at the time of the accident. Kissimmee Gazette.

FLORIDA WOMEN VOTE

(Continued from Page 1)

white women Democratic voters to register and no doubt the Democratic press of this state will do like wise. Any directions to supervisors of registration, if needed, should be given by the governor of the state.

"Yours truly,
"GEORGE P. RANEY,
"Chairman"

Does Not Refer to Sex

The resolution mentioned by Mr. Raney in the letter follows:

"Be it further resolved by the State Democratic Executive Committee of Florida, that in the primary election to be held on the first Tuesday after the first Monday in June 1920, those legal electors and only those legal electors, shall be declared and taken as proper members of the Democratic party of Florida, and entitled to vote in the aforesaid primary election as members of said Democratic party, who, in addition to the qualifications provided by law, possess the following qualifications to-wit:

- "(1) That they are white.
- "(2) That they are members of and believe in the principles of the Democratic party.
- "(3) That they will vote for all the nominees of said primary election in the general election to be held on the first Tuesday after the first Monday in November, 1920."

NO DANGER OF LOSING STATE APPOINTMENT

(Continued from Page 1)

within the next few years through this elimination of 'red tape' to facilitate road building.

"The road department has now under way and almost ready to submit to the government for its approval 12 miles of road in Putnam county and 20 miles in Velusia county on road No. 3. It is also constructing 11 2-3 miles of bituminous concrete road No. 2 in Alachua county; has completed nine miles of concrete and grouted brick on road No. 7 and six miles of concrete on road No. 2 in DeSoto county. It has six miles of brick under construction in Santa-Rosa county on road No. 1.

The department is also constructing a highway bridge across the Apalachicola river on road No. 4; is advertising for bids for the construction of a bridge across the Choctawatchee and Blackwater rivers, both

on road No. 1, has completed 10 miles of road in Okaloosa county on road No. 1 and is building six miles in Madison county on road No. 1. "This department also built or aided in the construction of 15 miles of road in Liberty county; it aided in the construction and completed 12 miles of grouted brick road in Osceola county on road No. 2 and is supervising the construction of approximately 20 miles of asphalt road in Osceola county on the Kissimmee-St. Cloud-Melbourne state aid road, and in addition to the foregoing the department has today 18 camps of units of prisoners at work, which units are composed of approximately 650 prisoners.

Bought Forster A Rabbit Pie

E. A. Douglass the genial Clerk of the Circuit Court who acted as auctioneer at the chicken pie supper at Geneva last night bid up so high on a rabbit pie that he was forced to buy it in self defense and this morning presented the pie to Hon. F. P. Forster at the First National Bank. When asked why he gave the rabbit pie to Mr. Forster he said "so he can run so fast that no one will be able to catch up with him in the race for Representative."

Death at Longwood

Word comes this morning from Longwood of the death of J. B. Clouser a well known and prominent citizen of that section. The funeral services will occur from the home at Longwood today Dr. Brower of this city officiating.

Will Discontinue Trains

Fast trains Nos. 91 and 92 will be discontinued after the 31st of March, making the last run on that date. This is in accordance with the usual custom as these trains are run during the winter months only in order to take care of the increased travel. No. 91 is the southbound train leaving Sanford at 12:48 P. M. and No. 92 is the northbound which leaves here at 3:50 P. M.

Florida Man Appointed

Washington, March 7 (By Assoc-

iated Press) Robert W. Williams of Florida has been appointed Solicitor of the Department of Agriculture.

Biblical Petroleum.

Petroleum is first mentioned in the Bible in the account of the destruction of the tower of Babel. The partially evaporated fluid is there referred to as "asphalt" which "they had for mortar."

READY-TO-WEAR has reached such a high state of perfection nowadays that getting a good fit is a small matter. However, finding apparel which has that elusive simplicity and elegance that marks one frock in a hundred, is just as long a chase as it ever was. Unless, of course, you have learned the secret of just where such things may be found.

TRACK MEET IN ORLANDO

High School Teams Will Compete This Week

With the guarantee of four high school to put teams in the Central Florida track and field meet to be held at the Fair Grounds here on Saturday of this week (April 3) the success of the meet seems assured. Daytona, Leesburg and Orlando High three of the best known school thru-out the state will be represented in the coming meet by strong teams, while Lakeland High, who has not taken very much interest in the state athletic activities until this year says that it will be here with bells on.

The track meet association is working hard every day making preparations for the coming event and there seems to be no doubt in their minds but what the meet will be a large and hotly contested one. Much credit is due the association which is working to put the Central Florida Meet through as the meet will bring high school boys to Orlando from all over Central Florida and will create interest and rivalries between the various high schools and will be a big advertisement for the local school, as it is the one that is behind the project.

The silver loving cups to be presented the winners have been received and will be displayed in one of the windows of some Orange avenue business firm at an early date.

Officials for the meet are being carefully selected and will be announced in the Reporter Star later.

Entries for the meet will close Saturday night, March 27 and it is thought probably Ocala, DeLand and Kissimmee will send teams also. —Reporter Star.

Wire Tappers On Trial

Clearwater, March 25.—Judge O. K. Reaves has issued a written order against newspapers within the jurisdiction of his court publishing testimony in the trial of the five alleged wire tappers, until the case has finally been disposed of. A verbal order was issued Thursday afternoon, but a written order was substituted Friday morning. The order is binding on all newspapers of Pinellas and Manatee counties only. Newspapers within the jurisdiction of Judge Reaves' court are doubtful relative to the order's legality.

Taking testimony began Thursday afternoon with J. W. Shaffer of Pennsylvania, the principal witness in the preliminary hearing as the first witness. Detective William Anderson of Tampa was called to the stand Friday morning as the second witness. Both Anderson and Shaffer gave almost identically the same testimony as at the preliminary.

All paraphernalia found by the officers at the Tarpon exchange when the men were arrested, has been brought here, and Friday morning was set up in the court room just as it was operated at the exchange. Telegraph instruments, telephones, tables, blackboard, etc., were connected up and placed in working order and will be used for jury demonstrations during the trial.

Search Suitcases Without Warrant

New York, March 7. The perils of carrying liquor about in over-night bags and suitcases has been enhanced in Brooklyn by a ruling of U. S. Commissioner Coldrick that such containers may be searched on sight by official enforcers of the "dry" act.

The ruling resulted from appeal of attorneys that their client's suitcases had been opened against the clients' protest and that as a result suit was brought against them.

The commissioner held that anyone found carrying around a package or bag may be detained and the receptacle searched without a warrant. "I do not believe the recent federal ruling regarding the necessity of a search warrant applies here."

PREMIER BAUER AGAIN

New Head of German Cabinet.

Berlin, March 25.—The new German cabinet, constructed as the result of yesterday's negotiations, will be headed by Gustave Bauer, the present premier, according to the Morning Post, today. It gives the list of remodeled ministry as follows: Premier, Gustave Bauer. Vice-chancellor and minister of justice, Dr. Schiffer.

Minister of foreign affairs, Dr. Hermann, Mueller, interior, Kerr Koch; defense, Herr Gessler; finance, Capt. Fisher Cuno; treasury, Herr Boltz; transport, Dr. Bell; labor, Herr Schlike; economy, Dr. Schmidt; posts and telegraphs, Herr Gebhardt; minister without portfolio, Edward David.

Ministers not in the old cabinet are Herr Gessler, mayor of Nuremberg; Capt. Cuno, who is director of the Hamburg-American Steamship Co., Herr Boltz, who is the leader of the builders' trade union. Newspapers generally, do not appear to be satisfied with the makeup of the cabinet especially the socialist organs, who appear to think that the position entitled them to a strong percentage of the members. The appointment of Capt. Cuno is particularly displeasing to them, he being regarded as a member of the right.

"Burglar By Proxy" Steals Girl's Heart at The Princess Today.

Loving a youth who seems to be everything an up-to-date suitor should be, but to whom all circumstances point as a burglar, is the role of Gloria Hope, who takes the part of Dorothy Mason, in Jack Pickford's latest picture, "Burglar by Proxy," which will be shown at the Princess today.

Jack and Dorothy fall in love with each other despite the fact that Dorothy is engaged, and that Jack has a oothache, a flat tire, and a reputation as an amateur burglar. Epitide No. 4 of Adventures of Ruthsalso.

Stetson University Is Given \$100,000

Birmingham, Ala., March 23.—The Southern Baptist educational board this afternoon authorized the following appropriations from the \$15,000,000 recently raised for educational purposes:

Southern Baptist Assembly, Ridge Crest, N. C. \$100,000.

John B. Stetson University, DeLand, Fla. \$100,000.

Montezuma Baptist College, East Las Vegas, N. M., \$50,000.

The board is expected to act on the request of the Southern Baptist Theological Seminary at Louisville for \$100,000.

Steamer Ashore at Daytona

Daytona, March 23.—One man Melville Ludwigen, was drowned, another, Arthur Venes, suffered a badly crushed foot, following the foundering of the steamer Northwestern, near Matanzas inlet Monday night, according to Capt. P. E. Jensen, who accompanied Venes to a hospital here. The Northwestern was a steamer of 1,645 tons, registered of New York, bound from Charleston to Havana with coal. She carried a crew of twenty-eight.

The Northwestern sprang a leak when she encountered heavy weather Sunday afternoon. The leaks increased and Capt. Jensen headed the vessel nearer the coast in case it should become necessary to beach it. By Monday noon, the water had risen in the engine room so as to flood the condenser and clog the pump-suction pipes, leaving the vessel helpless and in this condition it drifted upon the beach. After all but Capt. Jensen and five of his crew had made their way to shore, an attempt was made to pull the ship through the breakers, but the line parted. Venes was one of those to remain, and as he jumped from the vessel his foot was caught between some wreckage and crushed to a pulp.

Supporting himself on the roof of a deck house, he swam the mile and a half to shore, where his shipmates made a litter for him. He and Capt. Jensen were picked up by the Seagull and brought to Daytona. The rest of the crew started for Jacksonville on their way back to Charleston. The body of Ludwigen was not recovered.

Lakeland March 27.—Decorators from Atlanta are in the city making contracts for decorating the business houses of Lakeland in preparation for the first of the three big conventions which will meet here next month—the Elks of the State who will gather here several hundred strong, April 7-10. The four-story Elks' home, which is one of the handsoners in the south, will be the headquarters for the convention, and Lakeland Lodge No. 1291 is preparing a splendid series of delightful entertainments for the visiting Bills and their ladies, which will include a minstrel shows banquet, automobile drives, etc.

Duval Takes First Game

Duval in the last home games of the season won a doubleheader last night at the Y. M. C. A. The Duval Tigerines beat the Sanford girls to the tune of 19 to 12, while the Duval Tigers beat their old friends, the Senior Leaders, by the score of 32 to 20.

The Tigerines discovered a new star last night in the playing of Miss Sompayrac. This young lady performed in grand style, throwing baskets from all angles. Miss Sompayrac played her first game of the season last night and if she keeps up the pace she has started she will make a wonder in the near future. Miss Williams at center also performed creditably, her breaking up passes and covering the floor being wonderful.

The Sanford girls had a good team but were simply outclassed by Duval. Their forwards were not good enough to get around the Duval guards and during the entire game the ball was mostly in Sanford's territory.

Misses Easterby and Miller, for Sanford, played stellar ball. It was these young players that kept the score down so close. A return game will be played in Sanford in about a week and the Sanford team is expecting to turn the tables when the Duval girls visit the Celery City.

The line up of the team, follows:

Sanford (12)	Position	Duval (19)
	Forward	Webster (9)
Mason (2)	Forward	
Easterby	Forward	Williams-Capt
Rines	Jumping Center	Hyde
Henry	Running Center	Duval
Miller (Capt.)	Guard	Badger
	Guard	

Gallagher, substitute for Sanford; Turner, Morse, Baker, Tyler, Marr, Hyde, Peace substitutes for Duval. Referee, P. J. ... time keeper, Haskell; scorer, Seiler. —Times Union.

IN FERTILE FLORIDA

What Is Going On In The Land of The Orange and Grapefruit.

Moore Haven—Cabbage shows no frost injury. Less than 100 cars remain to be harvested.

Pasco.—Beans, potatoes, cucumber and watermelons were slightly damaged by the cold. Citrus trees suffered slightly. Early March plantings of corn are now going forward.

Tampa.—Frosts caused much yellowing of the celery in this vicinity, but no permanent injury was done. There is some foot rot apparent, but this condition seems to be improving to a great extent.

Center Hill.—The frost of the early part of the month damaged the beans, but fortunately the crop was only recently planted, so that the damage was less than it would have been later in the month.

Florida City.—Beans are moving from about 50 acres at an average price \$4. The crop is about 80 per cent good condition. Cabbages are being shipped from 300 acres at \$2; peppers are bringing \$4 and tomatoes from 1,000 acres are selling at \$2.75. De Soto.—Much damage was done to unprotected truck crops on the lower lands in this section. The tender growth on the citrus trees was damaged quite a bit. Fresh tomatoes are coming in slowly and at present are scarce, but turnips, celery, carrots, lettuce and strawberries are in abundance.

Marion.—The cold did not do much damage here. Winter vegetables such as cabbage, lettuce, onions and turnips, were not injured at all, and very little of the Spring planting was up. Citrus suffered in the loss of some of the tender growth, but it is believed that there will be sufficient bloom to produce a normal crop.

Fort Myers.—Shipping of tomatoes has begun, there being about 100 acres to pick from. Cash prices are now about \$3. There are about 600 acres of peppers in a 50 per cent condition of crop, which are now shipping at about \$4.50. Egg plants are bringing \$3.50 and there will be about 50 acres of cucumbers which should commence to move by April 1. —N. Y. Produce News.

Governor Assails N. Y. Rent "Hog" Albany N. Y., March 27.—Gov. Smith sent a message to the legislature today assailing profiteering landlords and recommending:

Laws providing for the appointment of local housing boards and a central state housing agency for coordinating local effort.

A constitutional amendment permitting extension of state credit on a large scale and at low rates to aid in the construction of moderate priced homes.

Laws permitting cities to acquire and hold, or let, adjoining vacant lands and if necessary to carry on housing.

MARNE MEMORIAL POSTER

JUST as the school children of France gave for their country's gift to the United States—the Statue of Liberty—so will American school children contribute "one cent and upward" for "America's Gift to France," a monumental statue by Frederick MacMonnies, the noted American sculptor. Mr. MacMonnies is contributing his services toward the monument which, it is estimated, will cost \$250,000.

The poster shown herewith, is by Albert Sterner, noted American portrait painter. It typifies the tribute which this country will pay to the French through the Marne monument. The poster will be displayed in cities, towns, and villages, and will designate many of the places where contributions may be made during the week of March 22—a free-will offering, in which numbers of contributors, rather than size of contributions, will be sought from school children and others. Contributions are now being received at National Headquarters, 150 Nassau street, New York, by Charles H. Sablin, president of one of New York's largest trust companies, who is treasurer of the fund.

The memorial will be erected at

Pretty New York School Girl Helps Spread Appeal for Pennies for "America's Gift to France."

Meaux, on the Marne, and will rival in size and grandeur of design the Statue of Liberty.

New Guinea Love Tokens. When a New Guinea woman falls in love with a man she sends a piece of string to his sister. Or, if he has no sister, to his mother. Then the lady who receives the string tells the favored man the particular woman is in love with him.

Family Men Favored. In one chemical factory in Switzerland, which is representative of other chemical and dye concerns, married men receive 10 per cent more a week than single men engaged in the same occupation, and still above this married men receive 54 cents a week extra for each child under fifteen years of age.

"Father of the Chapel." This term, as applied to the printing industry, is one of religious derivation. When, centuries ago, printing was done in monasteries, it was customary to discuss all matters connected with the work in the chapel, with the father superior in the chair. Hence the term "Father of the Chapel."

Evidence Stork Had Traveled. Julia had been over to see the neighbor's new baby and upon her return was asked how she liked it, to which she replied: "Well, mother, it is all right, only the stork must have been a long time on the way with it, for it certainly is awfully tanned."

"Smooth as silk, eh?
—Same here"
—Chesterfield

TALK about a smooth, even-burning smoke, Chesterfields are all that and then some—never "miss," never fail to "satisfy!" You never hear a "knock" on Chesterfields.

For Chesterfields are made of the real thing—genuine Turkish tobaccos, mind you, the pick of the crop, blended with the very choicest Domestic tobaccos that grow.

And what a blend! It actually brings out the hidden flavor of the leaf—a flavor you never guessed was there.

What's more, no other blend is like it, or can be, for the blend is our private formula—it can't be copied.

Ligarette & Tobacco Co.

And the flavor is sealed in by the extra, moisture-proof wrapper on every package.

Subscription Price in Advance: For One Year \$6.00 For Six Months \$3.50 Delivered in City by Carrier 15 Cents Per Week

Entered as second class matter October 27, 1914, at the postoffice at Sanford, Florida, under No. 107 of March 2, 1917.

MEMBER OF THE ASSOCIATED PRESS.

Yes, every man has a will of his own—provided he is not a politician or his wife is not around.

Mr. Hoover, at least, is entitled to some form of distinction. He admits that he is not a candidate for president.

And yet it is quite easy for an ordinary pilgrim to perk up, when he has the perkings with which to do the perking.

Our daintiest little maid says she has one grave criticism to pass upon the year 1919. There was too much sameness to the figures—of the year.

Sooner or later we'll get in on this profiteering game ourselves. Have you an automobile you want to trade in on a subscription!

Rumor has it that modern man in order to keep pace with the women will soon be tripping daintily down the street garbed in decolete shirts and short pants.

Now that about every state has a favorite son in the wild and woolly presidential scramble, it is time for the cities, towns and villages to trot them out. Who's ours?

What, we wonder, portends this ominous quiet south of the Rio Grande! Vic Carranza hasn't erupted for at least 24 hours, and that is some record for he of the whiskers.

The latest breeder of revolution and bolshevism in this country is the rent hog. In most cities rents are being boosted from 50 to 300 per cent, and no agency seems capable of curbing the capitalistic thieves.

America is large, and we have much room to spare, but not one inch for the cuss who seeks to overthrow the government of the United States.

The war department announces that one out of every 666 American officers and soldiers in the great war was some kind of a decoration.

Our Good Coffee has arrived Ferris Bacon ALSO! Best Western and Florida Beef and Pork

City Market Phone 106

It's coming right along—the Four Hour Day. No longer is the weary laborer to be compelled to drag out six or eight toilsome hours at bench or anvil, after this "reform" is once established as the law of the land.

BUILD MORE HOUSES

The men who were present at the meeting of the Board of Trade the other night were struck by the sound logic expressed by A. P. Connelly of the Sanford Building & Loan Association when he made the statement that if every business man in Sanford would take ten shares of Building & Loan stock every one who wanted to build a home now could get the loan from this association and the dearth of houses in this city would be materially decreased.

There are two ways to hold down the price of rents, or to keep them from going higher. One is the arbitrary method of rent-regulation by public authority. The other is the natural method of building more houses.

It is easy to make a mistake in this matter. There is no assurance that the cost of materials and labor will go down for some time yet. It may hold up for years. It may go higher.

AND THERE WAS A NEWS-PRINT SHORTAGE. (Not a Fable).

Once upon a time a man entered a watchmaker's shop, to have his watch repaired. "When may I have my watch?" asked the man. "In about six weeks," answered the watchmaker.

And the man fared forth, and slipped and fell upon the pavement, which, owing to the scarcity of shovels, was icy.

The man tried to telephone to the automobile service station, to get his car, which had been promised to him that afternoon, but the foreman told him that there was a shortage of mechanics and that he could not have his car for two weeks.

"Well," said the man, "the subway is crowded; the streets are replete with humanity; the restaurants brim with human beings. Surely the population is not dwindling."

And he went to his office and opened his mail. And it came to him in a vision, for he said, "I know what all these ex-watchmakers, ex-

snow shovelers, ex-mechanics, ex-telephone operators are doing. They are in the publicity, or, as it used to be called, press agent, business.—F. P. A. in the New York Tribune.

TRUTH TWISTERS

How often have you heard it said: "You cannot believe what the newspapers say!"

There is a reason for questioning what one sees in a newspaper, and the reason is that newspaper writers must depend on the truth of human beings for their news stories.

People do not intentionally tell false stories to newspaper reporters as a rule, neither do newspapers publish false stories as a rule.

But unfortunately we are not all infallible or we would not have had the experience we had last Friday morning.

It is the custom of the Advocate to have all its pages made up on Thursday nights ready for the press early P-I-day morning. If nothing of importance happens during the night the forms are put on the press as made up the night before.

Last Friday morning we learned that our friend, Mr. Joe Wilson, had died suddenly during the night. We lighted our typewriter and started to his home early in the morning.

We went to the Wilson home, returned to the office, wrote a short account of Mr. Wilson's death and started out to find the other two.

It did not take very long to learn that the death of an infant Thursday afternoon had furnished the material for one of the supposed deaths during the night, but everybody was positive that a lady died at the crate factory early in the evening.

A score of reliable citizens informed us of this fact and every one had the story the same. She had worked at the mill all day until about five minutes of quitting time when a was take with a pain in her side.

Being told the same story by so many reliable citizens we had no doubt of the death but could not learn the full name of the unfortunate lady.

We asked a number of business places and while every one had heard of the death, none knew the name, next we attempted to call up the crate factory and after the usual experience with our efficient phone system were informed "that the line must be out of order as they will not answer."

We were anxious to get on the press as we do not miss the morning mails once a year, but we started out to learn the facts. We called at Dr. Wright's home he had heard the story but knew no particulars. Next we called at Mr. L. F. Stephens' home and he had left for the mill.

If we were going to catch the morning mails it was time we were going to press, so we wrote up a little story about the death and had the press clipping off Advocates when a phone message from a friend at the mill said the story was perfectly true except the lady was up and had cooked breakfast.

Yes, newspaper will lie occasionally it's a habit.—Wauchula Advocate

BUSINESS IS EXTRA-HAZARDOUS

If any sort of calm reflection were possible on trade or mercantile conditions in the country at present a very dangerous aspect would probably present itself.

And he went to his office and opened his mail. And it came to him in a vision, for he said, "I know what all these ex-watchmakers, ex-

JUST LEAVE IT TO TERRY

Harvard Authorities and Students Rely on Memory of Colored Human Encyclopedia.

No one knows how he does it. He doesn't know himself. Yet Terry never forgets a face or a name. He never took a memory course. He never did any special mental gymnastics to develop his memory.

Terry is a roly-poly little colored man who for 19 years has been the human encyclopedia of the recorder's office at Harvard college. Every Harvard man since 1900 knows Terry.

His extraordinary faculty for remembering names and places caused his being installed in the position of living encyclopedia, not only on all Harvard men, but on Harvard history generally.

LIKE EACH OTHER'S COMPANY

Stones Found in Nevada Seem to Have a Distinct Aversion to Being Separated.

In Nevada are found curious mineral specimens known as "sociable stones." No better name could be given them, since when a few are distributed over a level floor two or three feet apart they will begin to move toward one another to a common center with an alacrity that is ludicrous.

The next time he looked around the stones were back in the heap again. Once more he replaced the stones and sat down to watch them. They began to roll and hitch along toward one another again until they were in a pile.

"Who Wrote It?"

When Demetra Yaka, author of "Jaremlik" and "In the Shadow of Islam," first came to America she was governess for a year to the two little grandsons of J. Fenimore Cooper.

The Trend of the Times.

President Kroeze of Jamestown college was talking about the trend of the times.

"A minister," he said, "had a forcible reminder of the trend of the times the other day. His brother-in-law, a lawyer whom he'd always rather looked up to, balled him and asked humbly for the loan of a two-dollar bill.

Passing of a Pre-War Pet.

Nowadays, if you decided to make a present to your youngest nephew, you couldn't find a Japanese walking mouse in the country.

Gum From Sorghum Husks.

French scientists have found that sorghum husks yield a gum which can be used for dyeing wool, silk, leather and vegetable fibers.

Unless a Bank is MORE Than a Mere Commercial Machine

Unless it is more than simply an institution for paying dividends to stockholders; unless it is imbued with a real spirit of public service and a desire to be a CONSTRUCTIVE and UPBUILDING FORCE in the community—then it is falling far short of what a bank should be.

While this bank, like all banks, must be operated for profit, it does not for a moment lose sight of its higher duties to its customers and to the public.

Society Personals Miss Edna Chittenden came home on Thursday from the Woman's College for a few days visit with the home folks returning to Tallahassee last night.

Mrs. Lederer who has been the winter guest of her sister, Mrs. Will Hand left last week for her home in New Washington Ohio.

Fred Cochran spent a few days in Sanford while en route from Tampa to Miami.

Mrs. Barber and little daughter Carmeta are spending a few days in Jacksonville.

Mr. and Mrs. S. J. Carnes and the attractive niece, Miss Francis Martin left Saturday for Miami where Mr. Carnes will attend the hotel men's convention.

Mrs. C. C. Laramore was among the Sanford visitors in Orlando Friday.

Mr. A. D. Parrish came up from Ross, Fla., to spend the week end with his family.

Mr. and Mrs. D. P. Drummond and Mr. and Mrs. John C. Smith and little son Wilson spent Sunday at Daytona Beach.

Mrs. R. M. Groverstein chaperoned the girls basket ball team to Jacksonville Friday.

Lee Peck and Harvey Parrish went up to Jacksonville Friday by motorcycle, to root for the home team in the basket ball game.

Mrs. J. H. White and son and Mrs. A. H. Piester and niece, Miss Josee Hamilton who have been spending the winter at the home of Mrs. E. D. Chittenden leave today for their home in the north.

Mr. and Mrs. H. D. Dunnison of Waveross are visiting their sister, Mrs. C. J. Wolfe. Mr. and Mrs. Dunnison are a recent bride and groom. The latter will be remembered here as Miss Mary Kennedy, a lovely, charming young girl.

Dr. O. J. Miller spent Sunday in the city with his father, Mr. T. J. Miller, and his family. Theodora returned to Jacksonville with Mr. Miller last night and Mrs. Miller and the children will go back in today.

Miss Muriel was among the Sanford visitors in Jacksonville for the week end.

Mrs. Cora Lee Akers has accepted a position as book keeper in Jacksonville and is residing there for the present.

Miss Alida Hiley of Ft. Valley, Ga., is visiting Mr. and Mrs. Turner Houser.

T. N. T. The T. N. T. Sewing Club was delightfully entertained by Mrs. Fred Daiger on Thursday afternoon with a splendid attendance of members. At the refreshment hour, strawberries with whipped cream was served with cake and coffee. The next meeting will be held with the G's.

Chinese Engineers Skillful. Chinese locomotive engineers have the gentlest sense of touch with the brake of any in the world. A break in two is almost unheard of, and there is very little damage to cars in shunt-ing on Chinese railways.

Clean-Up Sale. Here is a humorous definition that is rather timely: "Indian summer is merely an arrangement between the weather man and the ice man to enable the latter to get rid of his remnants." - Boston Transcript.

TIME TO BE WISE

Yes; I write verses now and then, But blunt and flaccid is my pen, No longer talked of by young men As rather clever;

Farthest that ever sprang from Eve! When Time allows the short reprieve. Just look at me! would you believe 'Twas once a lover?

Through gallopade I cannot swing The entangling blooms of Beauty's spring; I cannot say the tender thing,

I fear that arm above that shoulder; I wish them wiser, graver, older, Sedater, and no harm if colder, And panting less.

Arabian Inventor Said to Have Been First to Devise Airplane and Make Flight

Abbas Ben Farnas, an Arabian inventor, it is said, was the first human being to invent and fly an airplane. He died as a result of his first flight in the year 783 A. D., during the reign of the Caliph Haroun al Raschid, history records.

Abbas is supposed to have conceived the idea of effecting mechanical flight as a means of approaching the heavens and aiding astronomical observations, from historical documents still in existence in Bagdad. With the consent and assistance of the Caliph he set to work to construct a machine in the likeness of a bird, with a clockwork motor to actuate the wings.

In the presence of a great multitude Abbas actually effected a flight which lasted several seconds, but in landing his machine was wrecked, and the inventor was hurled headlong against a tree and killed instantly. The secret of the construction of the first airplane died with the inventor. The Caliph al Raschid offered huge inducements to other eminent scientists to pursue the study of aviation, but none was found with sufficient genius to repeat the pioneer flyer's exploit.

Many Places Are Named for Ornithologist and Artist

John James Audubon, famed ornithologist and artist, will not be forgotten so long as New York lives. In the upper section of the city there is a fine street named after him; there is Audubon park, Audubon theater, a hundred or so Audubon restaurants; a telephone exchange is Audubon and the old Audubon mansion at One Hundred and Fifty-fifth streets and Riverside drive still stands. In this ancient dwelling remains the artist's studio and the laundry in which was installed by his friend Morse the photographic instrument by which was secured the first long-distance message to Philadelphia.

First Idea of Sleeping Car

In 1850, on the 2d of December the first patent for a sleeping car was issued to Theodore Woodruff, the inventor. The idea was developed by Webster Wagner two years later, and by George Pullman in 1859.

Remarkable Watson!

Speaking of bulls, Conan Doyle wrote, recommending a certain dictionary, "I once amused myself trying to find words which were not in it, but I didn't succeed." - Boston Transcript.

Jacksville, Fla. S. A. W. Co., City.

Gentlemen: This is to certify that I have been using your S. A. W. Hair and Scalp Remedy for the past two years and can unhesitatingly recommend it to be the greatest hair and scalp remedy ever offered to the commercial world. I have yet to find the first case of dandruff or any kind of eczema of the scalp that this remedy has failed to cure. It will absolutely clean up the scalp and put the scalp in a healthy condition quicker than any remedy I have ever used. We are using more of it today than ever.

If you people don't make a success in this business it will be your fault and not the remedy's fault as all it needs is push and get it before the people.

You are at liberty to use this letter in any way you see fit in order to get it before the suffering people. Yours very truly, C. O. BURBAKER Proprietor, Palace Barber Shop, 23 Main St For sale by Bower & Roumillat.

LOST

time is never found again. If we must kill time, why not work it to death. And why should we lose time in grasping an opportunity especially when there are so many of them being placed before us every day. If we but grasp a few of these opportunities NOW, some day SOON this busy little town of ours will be away up there. And

Society Brand Clothes will help you when this busy little town of ours sizes you up, because a man now days is sized up at first glance. It's a case of the "first glance lasting the longest." That means that the kind of clothes that we sell is one of man's most valuable assets. We respectfully ask you to call and see the new styles for this Spring. They are different.

REFUGE SPOTS FOR ELOPERS

Fleet Prison and Gretna Green Were Highly Desirable Places in the Olden Time.

Gretna Green, whose chief industry was once matrimony, is a village in Scotland less than a mile from the River Sark, which marks the English-Scottish boundary line in that vicinity, near the Solway firth. The English marriage laws sent eloping couples to Scotland just as the divorce laws of 47 of our states make Reno desirable for would-be divorcees, and therein lies Gretna Green's first claim to fame.

Fleet prison was the figurative "Gretna Green" of England until the passage of the famous Hardwicke act of 1754, which made unauthorized marriages voidable. Gretna Green thereupon becoming the romance spot of the British isles. All the Scottish law required was that two persons should declare their intention to be married in the presence of witnesses, and the British law then, as now, recognizes marriages as legal so long as they conformed to the laws in the places where they were performed.

BE THANKFUL YOU CAN SMELL

English Woman Writer Went Through Life Keenly Regretting Her Lack of That Sense.

Did it ever occur to you to be grateful for the sense of smell? Probably not, and yet those who have been deprived of it have felt their loss keenly. Harriet Martineau, the famous English writer, lacked the sense of smell and consequently the sense of taste, which depends on smell. Once and only once she tasted in all the intensity of flavor a slice of a leg of mutton. The sense came to her suddenly and she thought and hoped it had come to stay.

"I was going out to a great dinner that night," she said when telling of her one taste, "and I looked forward with great eagerness to the dainties that I knew would be set before me. How I should enjoy practicing my new-found sense of taste!"

But, alas, the sense of taste disappeared as suddenly as it had come, and never returned, and she went through life remembering that taste of roast mutton as one of her keenest joys.

Could See Resemblance. In a downtown store the other day a woman stood near the cash desk very pardonably and proudly showing off a little baby girl, of whom the exhibitor quite obviously was a aunt. The child's effectiveness consisted mainly of its head-dress and a cluster of rich golden curls. An admiring group soon gathered around, while the woman pointed out the baby's finer points of beauty, concluding with the rather far-fetched statement that "Everybody says she looks just like me!"

The woman, busy talking, did not notice that the child had become restive and was tugging with both hands at the ribbons which fastened the dainty cap on her head, and suddenly the knot was untied, and off came the cap. And off came the curls, too, which were fastened to the cap, leaving the baby as bald as the floorwalker who stood grinning nearby. There was a moment of charitable silence, and then someone in the crowd turned away with the remark: "Well, she does look a good deal like the old lady, at that." - Kansas City Star.

Canals.

A suggestion made by a Londoner that the bed of the Forth and Clyde canal should be converted into a highway of traffic has not been received north of the Tweed with the indignation that might have been expected. The Glasgow Herald says the notion is not so extravagant as it might appear. The swift progress of motor-transport threatens the railways, and it can scarcely fail to affect the position of the canals in industrial and commercial economy. The canal belongs to those leisurely periods of the world's history which saw Egypt and China at their apogee. It was, it is interesting to remember, in the fifteenth century, a time of development if ever there was, that canal engineering received its great impetus in the Western world owing to the discovery of the "lock" system. England applied the new idea with such thoroughness that her canal system became second probably, only to that of Holland.

Accident Policy's Limit.

If a man die of blood poisoning as the result of giving himself a hypodermic injection, his family can collect nothing on his accident insurance policy. For the possession of a hypodermic needle is a violation of the New York public health law, Article 11A; therefore the man commits a crime and dies as the result. This was decided by the appellate division in a recent case.

Next Antarctic Expedition.

Great Britain's next expedition to the antarctic regions will endeavor to learn something additional about the habits and migrations of whales and to ascertain the mineral and other deposits of economic value.

H. T. CORY.

H. T. Cory, a California engineer, has been made the third member of a board of experts which will apportion the waters of the Nile for irrigation.

How to Be Happy. To be happy with a husband a woman must learn to be happy without him a good deal of the time. - Cincinnati Enquirer.

Will Be Aged Liquor Then. A jug of Jamaica rum left at a Pennsylvania farmhouse by some British officers in 1778 came into the possession of the Wistar institute. University of Pennsylvania, and after being tipped and the contents "tasted" by the members of the board of managers in 1892 when the building was dedicated, was sealed, and will not be opened again until the centenary celebration in 1902.

Time's Unfortunate Change.

The little boy who is afraid to step a piece in school in many cases grows up to be the man who isn't happy less he is talking by the hour.

Something About Olives.

Like other fruit trees, the olive has many enemies, including birds and insects. The most dreaded of these is a small fly called drosophila, the size of a house fly. It is calculated that a single fly will destroy 300,000 olives. The only remedy is to gather the fruit early, and by crush it at once destroy the larvae.

Wanted It Underfoot.

In the 1850s days when street fares were 5 cents for grownups 3 cents for children under 12, small boys of 12 and 7 mounted platforms. The younger boy had promised the 2 cents change from dime they had for carfare. He held the coin to the conductor, who not immediately turn over the penny. The anxious child then remarked litely but forcefully, "I'm worth 3 cents." - Chicago Tribune.

Scottish Superstition.

A death in the family, it is believed in many parts of Scotland, is sure follow if a flowering hawthorn brought into the house. Among "sea-going" superstitions of Scotland are those which prevent a sailor from speaking of any four-foot animal while on the sea, lest he be taken into bad fortune, and the notion the fish will be frightened away. A fisherman should pass a bar before a woman before boarding his ship.

Plea for Natural History.

We content ourselves with a little edge of the tongue, and a little in philology, or history, perhaps, antiquity; and neglect that which seems more material, I mean natural history. I do not discountenance derogate from those other studies should betray mine own ignorance and weakness should I do so; I wish they might not altogether exclude this. I wish that might be brought in fashion as usual. - John Ray (1691).

GEOLOGIST NOW ALL-ROUND MAN

He Adequately Combines the Functions of the Miner and Practical Engineer.

SUCH MEN ARE IN DEMAND

Mining Engineer of the Future is Likely to Be More Liberally Educated Than the Engineer of the Past.

New York.—The new type of geologist is coming into his own, if the opinion of Dr. Charles P. Berkey, professor of geology at Columbia university, is given weight. This modern geologist has an instinct for practical problems, is qualified to give prompt, decisive advice when minutes mean dollars, possibly hundreds of them, in connection with big exploration or engineering works.

In the old days the mining engineer or explorer was his own geologist, making his observations and collecting his own data. Later came the day of the purely scientific geologist, who, according to Professor Berkey, "failed to make good in the applied science field," or at least not "to any greater degree than the practical engineer."

The modern geologist, said the professor recently, has taken advantage of "the very detailed observations made in underground explorations and developments of all kinds, checking his original conclusions and advice by the actual findings after the work has been done.

An Applied Science. "Geology has become an applied science to a very considerable extent," said he. "It is now well understood that great numbers of so-called accidents in engineering and mining work of catastrophic or costly failures, of excessive expense and delay, of inappropriate design and plan of operation, and of entirely mistaken or erroneous conception of the problem in hand have been due to ignorance or neglect of the geologic factors involved, quite as often as to mistakes on the strictly engineering questions.

"A dam that is built, a tunnel that is constructed, a mine that is developed, a bridge, pier, or other heavy structure that is located, or a natural resource that is exploited without due regard for all the geological conditions has not the same certainty of success that attends a proper consideration of these factors."

This is the field of the new type of engineering and mining geologist. According to Columbia authorities, a marked and growing demand is now being felt for geologists of this type, having the point of view of the applied sciences man—the engineer. The engineer of the future is likely, it is pointed out, to be more liberally educated than the engineer of the past.

Foundation Training. "The best foundation training," says Professor Berkey, "for the men who are to do work in this field of engineering and mining geology is the educational foundation given to engineers and the best additional training is connected with the fundamental engineering subjects."

This must be accomplished, he thinks, by a thorough working knowl-

edge of geology almost equivalent to that given to a Ph. D. candidate. The practical education problem at Columbia has been solved by the adoption of a course in mining geology in engineering schools as a definite branch of applied science training.

"This three-year course trains men for advisory and professional work," he says, "in connection with engineering and other operations, involving a knowledge of ground structure and conditions, as well as for special studies of mining prospects and mine development or other more formal geological investigations. The course leads to the degree of engineer of mines in geology. Men preparing for the operating or construction fields or for the ore-dressing side of mining work, take the regular mining schedule.

"The principal members of the staff are men of much experience in advisory work, in connection with extensive mining and engineering operations, and accustomed to handling practical problems of the greatest possible variety. Columbia's setting, in this great business center, with its own immense undertakings and its worldwide interests, adds further to this atmosphere of the practical, the applied and the economic."

SLEEPING PLAGUE IN LONDON

Physicians Puzzled Over Ailment Which Resembles "Sleeping Sickness."

London.—Eight or nine cases of what appears to be a new phase of the deadly "sleeping sickness" are puzzling the London hospital doctors.

A representative medical committee is investigating the new diseases.

The house surgeon states it is too early to make a definite statement. So far no common factor save the overpowering desire to sleep has been found in cases under notice, nor has it been possible yet to trace the origin of each. There is said to be no cause for alarm as to the possible spread of the disease.

MRS. MILES POINDEXTER

New portrait of Mrs. Miles Poindexter, whose husband, Senator Poindexter of Washington, is a candidate for the presidential nomination.

Tale of the Olden Days.

In a five and ten-cent store a wobbly individual stood in front of a counter on which was displayed a number of mechanical toys.

Picking up a large bug, he asked the girl behind the counter:

"How much is this?"

"Ten cents," the girl replied, and then she asked, curiously:

"Taking it home to your little boy?"

"No," the man returned. "I get other uses for it."

"I wonder what?"

"I want to take it with me to a banquet."

"To a banquet?"

"Yes. A wine supper."

"What's the idea?"

"Every time I take a drink I am going to put this bug on the table in front of me."

"Uh, uh—"

"And when I see two bugs I'll know it's time to go home."—Youngstown Telegram.

WOMEN NOW SUPERIOR SEX

"Take Off Hat to Them," Says London Judge, Imposing Fine.

London.—After fining a man at the Thames police court for demanding that women pedestrians should step aside and allow him to pass on the sidewalk, the magistrate said:

"Ladies now sit in the seat that I sit in, or shortly will to administer justice. You must give them their due and pay them proper respect. We are no longer the superior sex. Take off your hat to them politely, for they are your superiors."

Progress in Burma.

There are two schools for the blind in Burma, one at Bangoon and one in Moulmein. The former, with fifteen pupils, of whom seven are girls, now enjoys the services of a blind Oxford graduate.

GIRL RESCUED FROM SLAVERY AMONG TURKS

Armenian Reaches New York After Frightful Experiences.

FOUND BY BROTHER'S FRIEND

Mother and Sister Fall by Wayside and Died in Turkish Deportation Four Years Ago—Suffering Has Left Her in Pitiful State of Nervousness—Must Be Taught to Smile and Eat—One of Most Pathetic of All the Thousands of Refugee Experiences.

The first slave to arrive in this country since the Turkish deportations of 1915-16, when thousands of Armenian and Syrian women were driven from their homes to Aleppo on the edge of Mesopotamia, is Vartanoush Karaghueuslan, an Armenian girl, twenty years old. She has just reached New York, accompanied by Marshall Ingalls Mays, Near East relief worker, of Topeka, Kan., says the New York Tribune.

An Arab slave mark, tattooed in indelible ink at the base of her right hand thumb, furnished proof that the girl had been a slave of the Muslims. She was met at the dock by her brother, John N. Karaghueuslan, wealthy dealer in Oriental rugs, who lives in Minneapolis. He said he had not seen his sister in twelve years.

"She does not realize she is in New York," he said; "she thinks she is in heaven."

Theaters Fail to Cheer.

Theaters, automobile rides, pretty clothes and all the comfort and luxury of one of the city's leading hotels have failed to bring a smile of pleasure to the girl's lips. The suffering she has undergone has left her in a pitiful state of nervousness. When she met her brother she broke into a fit of hysterical weeping, and since, despite his efforts to amuse and entertain her, the veil of sadness remains.

She will have to be taught not only to smile, but to eat as well, for months of starvation, during which her only food was roots and grass picked from the roadside, have left her digestive organs seriously impaired, and her diet consists wholly of liquid food with small bits of bread.

Mr. Mays, who brought Miss Karaghueuslan to this country after she had served some time as a relief worker, following her rescue from the Turks, said her case was one of the most pathetic of all the thousands of refugee experiences chronicled at the American relief stations. There are scores of houses for refugees maintained throughout Armenia by Near East Relief, of 1 Madison avenue, for the care of women and girls who escape or are rescued from bondage. It is known that at the present time more than 100,000 women and girls are held in harems, but they are being freed as rapidly as facilities for their care can be provided.

One of Big Migration.

With her mother, sister, aunt, uncle and two little cousins, Miss Karaghueuslan was a member of the big migration the Turks forced in 1915. From July until October the captives were on the road in charge of brutal Turkish guards. No food or water was issued, and their only means of sustenance consisted in picking the little vegetation to be found in the fields and stopping a moment at a stream for a drink.

One by one the refugees dropped out of the line to perish of starvation by the roadside. Vartanoush's mother was one of the first to go. She died in the girl's arms. A few days later her sister gave up of weariness. She could not stagger on. After beating her and urging her forward, the Turks kicked her off to one side and left her to die alone. Vartanoush was lashed in answer to her appeals to be allowed to remain with her sister.

Her uncle was massacred en route to Aleppo; her aunt and baby cousins perished, and the girl was the only remaining member of the family left when they reached their destination. Out of several thousand captives Armenians who had started in July on the march under their Turkish captives, only 100 survived in October.

Served as Military Interpreter. As Vartanoush spoke Turkish and Syriah, as well as Armenian, she was used as a military interpreter for a time. Later, to escape the horrors of living with the army, she sought work in a Turkish hospital, and there found a girl friend from her home town, disguised and serving as a nurse. The friend was able to get her in, and for many months she nursed wounded Turks at the Zahleh base.

When the British captured Jerusalem she made her escape to the British lines and was sent by them to the American relief station at Beirut. From then on her story reads like a chapter from some fairy tale.

One day, while doing out soup to the refugees, she became engaged in conversation with an Armenian who had been in America and who was serving with the French army. He asked her name.

"Vartanoush Karaghueuslan," she replied.

Hears of Brother Here.

"I know John Karaghueuslan, who lives in America," she said. "Are you related to him?"

"He is my brother," said the girl.

The Armenian soldier in the French uniform immediately communicated with the rug dealer.

And here is where the brother's story started.

"When I received his letter," he said, "I telegraphed the Near East Relief in New York and asked if they would cable funds to my sister for me. They replied at once that they would, and I came to New York.

"The money was sent, and I heard from my sister in June that she had received it. I then asked the committee if they could have her brought to America, and we have been all this time trying to get her here."

Evidently Mr. Karaghueuslan did not approve of the Paris frock and coat his sister wore, for the first thing he did was to take her to a Fifth avenue department store and order a full wardrobe.

"This time next year I will bring her back to New York, and you won't know she's an Armenian girl," he said. "She's going to school at St. Margaret's Academy in Minneapolis."

ONLY PIGEON SAVED FROM CHURCH FIRE

THIS IS THE ONLY SURVIVOR of a flock of pigeons which inhabited the tower of Westminster church, Toronto, Can. The church was completely destroyed by fire during zero weather and the bird was found embedded in ice after the fire. It was thawed out in a bucket of water and warm milk restored it.

SHOWN HIS OWN GRAVE

Veteran Told He Lies Buried in France.

The war department is stopping at nothing to convince Nathan C. Cooperman of Philadelphia that he is not alive and working as a cooper-smith at Hog Island, but is really dead and buried in an American cemetery in France.

Cooperman, who served with Company H, Thirty-eighth Infantry, of the Third division, enjoyed the unique sensation of looking at a photograph of his own grave, with his name and description of his outfit carved on a wooden cross above a fresh mound of dirt.

Cooperman arrived in France May 1, 1918, with the Third division and was wounded in July near Belleau wood. He believes the mistake was made through the faulting of one of three sets of identification cards he lost during his stay in France.

SPOTTED FEVER IN EUROPE

Ravages in Baltic States Reach Alarming Stage.

Ravages brought about by spotted fever in the Baltic states and Poland have reached an alarming stage, according to investigations made by the Swedish medical board at the request of the foreign office. The situation is considered grave for Sweden and the rest of Europe.

The Swedish Red Cross has decided to send a number of ambulances to Poland and Estonia, where hospitals, doctors and medical supplies are lacking. Appeals will be made to other countries for contributions to fight the disease.

Reports from the Swedish consul at Rerval say there are 4,000 cases of spotted fever among Russian soldiers at Narva, 3,500 cases at Weseinberg and 2,000 at Ziegelkoppel.

WOMEN MASTER CROOKS?

Their Wits and Influence on Criminals Blamed for British Crimes.

"When women use their wits to scheme for men engaged in criminal pursuits, the plots are so well worked out that it is almost impossible to catch the culprit," according to expert detectives of Scotland Yard.

Lawyers are also convinced that feminine brains lie behind the majority of untraced crimes which police are trying to solve, and that the present wave of crime can be traced to women's influence on youths. Hope of a sudden end to the present epidemic is not high.

Tried His Skills on Roof.

Carl Thompson, sixteen years old, on a pair of skis and slid from the roof of a low building in Warren, O. Now he is wearing a broken arm.

LOOK IN THE MIRROR?

When you study others live and observe their actions and constantly strive to imitate some successful man's activities, be CAREFUL that you do not neglect to study as well—Look in the Mirror. Look in the Mirror of the past and ask yourself this question? Am I saving all I can in energy, character and money for the good of all. By helping yourself you help others.

DR. GUILLERMO A. SHERWELL

Dr. Guillermo A. Sherwell, assistant secretary general of the second Pan-American financial conference in Washington. Doctor Sherwell is juristic expert of the international high commission and president of the Spanish-American Athenaeum of Washington, and in charge of the Spanish department of Georgetown university.

Many Countries Ahead of Us.

In normal times Norway, Sweden, Denmark, Holland, France, Belgium, Switzerland, Italy, Germany, Austria, Hungary, Spain and Portugal all publish more books in proportion to population than the United States publishes, and their books have a wider circulation.

Blast by Electricity.

South African gold mines are experimenting with blasting by electricity with a view to minimizing the fine dust, which is thought to be the chief cause of miners' phthisis.

Japanese Training.

Japanese children begin to study Judo in their earliest years, for it is a system of physical culture, hygiene and ethics, and the exercises give strength and flexibility to the limbs. Later the pupil is shown the fine art of using an adversary's strength against himself.

Was Love for Snakes.

Is there such a thing as a snake lover? Just ask the keeper of the reptile house who has been there for years, and he will tell you snakes are beautiful and kind. Of course, you can't expect too much intelligence, but he has one hog-nosed snake who was the pet of an old Quaker for years, and the reverend gentleman read the Bible to him every night, which he seemed to enjoy hearing. This sport has been denied him lately, since the gentleman died.—Exchange.
