NEW PARTY IN HOUSE IS BI-PARTISON COALITION WESTERN, SOUTHERN MEN

WILL JAM NEW EMERGENCY TARIFF BILL THROUGH

SPEEDING UP
THE OLDER HEADS WHO HAVE BEEN TAKING TIME FRAMING BILLS

WASHINGTON, Dec. 23.—Undismayed by reports of a probable presidential veto and of senate opposition, "new party" in the house—the bi-partisan coalition of western and southern representatives—today began the work of jamming through the emergency tariff bill on agricultural products.

So powerful has been the "new party" that it has forced the ways and means committee to frame a tariff measure—usually the work of months—in two days, and according to all indications will obtain favorable action on it in the house in the same time, plans being to take a final vote tomorrow night.

The emergency schedules established rates so high that a virtual embargo on the importation of the products would be affected.

Leaders of the "new party," the strength of which frankly has alarmed members from the western manufacturing sections claim that the bill will receive sufficient votes in the house to assure its passage over a presidential veto. Test votes indicate the majority are to have the bill forced through the senate within two weeks, but this is rather doubtful because of Democratic opposition there. In the house it is probable half the Democrats will cast aside their historical antipathy to protective tariff.

The first move of the farmer tariff makers in the house today will be to seek a rule that will prevent the burdening of the bill with numerous amendments to extend its "protective wing" to other raw materials and many manufactured products.

Chairman Fordney of the ways and means committee estimates that the emergency bill will produce about \$130,000,000 in revenue whereas the commodities enumerated now yield about \$5,000,000. The products included in the bill are wheat, flour, corn, beans, peanuts, potatoes, onions, rice, lemons, cottonseed and soybean oil, cattle, sheep, lambs, frozen mutton and lamb, wool and wool manufactures.

The importation of these products amounts to only about one-fourth of the home consumption. The total value of the products included is placed by the department at about \$4,000,000,000, while the imports the last year amounted to only \$90,222,000.

Proponents of the bill also rely on the department figures to win support for the bill. They point out that importations of wheat from Canada and Argentina this year have amounted to 15,050,966 bushels. Corn, rice and other crops are estimated to be larger this year and consequently will stur in increased degree by importations, advocates of the bill contend.

Wool producers have insisted that they face the greatest menace. American wool production was estimated at 260,000,000 pounds this year, and foreign importations have amounted to 192,000,000 pounds.

Importations of soy oil bean from the Orient have exceeded in value the entire soy bean crop in the United States this year, but all the vegetable oils imported—peanut, soy and cottonseed—were only about one-tenth of the American production. The new tariff proposes a 20 and 25-cent per gallon duty on these oils.

CHICAGO, Dec. 23.—A "Christmas burglar with a heart" heeded the pleas of Ruth Malley, aged 10, not to take her Christmas presents when she found him in her room yesterday noon on her return from school for lunch. The burglar was eating her lunch, which had been left by her mother before going down town shopping. He took her to the parlor and played little jingles and Christmas songs on the piano for her.

When she told him she would have to return to school he said: "Tell your mother I'll return some day and at all everything in the house," and he left without taking anything.

CHARGE AGAINST U. S. CONSUL IS TO BE INVESTIGATED

ENGLISHWOMAN SAID HE REFUSED TO VISE HER PASSPORTS

WASHINGTON, Dec. 23.—Charges made by Mrs. Minnet E. Robinson, of Manchester, Eng., that American Consul Wells at Manchester had attempted to prevent her from coming to this country to testify before the commission for the committee of 100 investigating conditions in Ireland, are to be investigated by the state department.

Consul General Skinner, in London, has been asked for a full report of the circumstances surrounding the visa of Mrs. Robinson's passport. In making this statement today officials remarked that Mr. Wells was a new appointee and that if he had at first refused to vize the passport, as she testified yesterday before the commission here, he had exceeded his authority.

She told the commission that Mr. Wells finally had vized her passport after she had visited Mr. Skinner, at London, but that he had required of her a promise that she would not further propaganda nor give interviews to the American press.

Miss Susanna Walsh, sister-in-law of the late Lord Mayor McCurtain of Cork, told today to the commission of the committee of 100 investigating conditions in Ireland the story of the killing of the mayor last March 20. She declared the mayor was shot down by Royal Irish constabulary men in the presence of the lord mayor's wife and two small children. Twenty raids had been made on the mayor's home previously and come since, she said.

Miss Walsh declared that she was held up at the point of a pistol in her home a week before she left Cork and questioned concerning inmates of the house and that on another occasion she was locked in a vermin-infested cell and jeered at by the police.

CAPITAL BEGINS DRIVE AGAINST CLOSED SHOP

MANUFACTURERS OF ILLINOIS SERVE FORMAL NOTICE ON UNION LABOR

CHICAGO, Dec. 23.—Manufacturers of the nation today served notice on union labor that the intensive drive against the closed shop had started, when William Butterworth issued a call for a convention of big employers of the country.

Butterworth is head of the Illinois Manufacturers' Association, vice-president of the Chamber of Commerce of the United States Conference of Manufacturers' Associations, comprised of employers in the following states: Colorado, Connecticut, Illinois, Indiana, Massachusetts, Michigan, Minnesota, New Hampshire, New York, Washington, West Virginia and Wisconsin. He conferred with President-elect Harding yesterday.

Butterworth, in an open letter today, attacked the plan of the railway brotherhoods, who, he said, demand the establishment of a national bureau of adjustment to handle all labor troubles instead of the individual companies handling their own industrial affairs.

Butterworth said if the brotherhoods succeeded in their plan it would influence all other industries.

"The plan of the brotherhoods means the closed shop and union domination over all industries alike," Butterworth said. "This is the most vital question facing the manufacturing and producing interests of the country today and should have immediate attention."

The brotherhoods want to establish the adjustment board under authority of the transportation act passed by congress which provides for a national labor board having jurisdiction over railway employees' wages when controversies are appealed to it. The act provides the adjustment board may be established

MURPHY MAY BE GIVEN A MEDAL FOR BRAVERY

Pat Murphy of Jacksonville, genial editor of the Legislative Blue Book of Florida, is among those spending several days in the city on business mission. Mr. Murphy has received a letter from Josephus Daniels, secretary of the navy, highly commending him for his bravery aboard the U. S. S. Saturn in April, 1898, when by quick thought and action he prevented one of the Saturn's boats, which had been lowered with the drain hole plug removed, from sinking and carrying with it to death a boy named Pierson.

Mr. Murphy at that time was a coxswain and it was through Lieut. W. E. Saord, an officer on board the Saturn, that the act of bravery came to the attention of Secretary Daniels. It is believed Mr. Murphy will be awarded some medal as a reward for his courageous and prompt action in jumping into the boat and thrusting a marine spike into the hole in the bottom of the boat, despite the fact that he could not swim.—Tampa Tribune.

HOLY OFFICE ISSUED DECREE

(By The Associated Press)
ROME, Dec. 23.—The Holy office today issued a decree asking all Catholic bishops to watch "an organization, which while professing absolute freedom of thought in religious matters, instills indifference and apostasy to the Catholic religion in the minds of its adherents. ST. JOHNS RIVER VALUE HARDLY ESTIMATED HERE AT TRUE VALUE IN RATES

by agreement of labor and employers. Butterworth called a convention of the national conference of state manufacturers' associations to be held January 1st. The conference will be in protest against the stand taken by the brotherhoods.

Butterworth invited the following big employers of labor to be present at the conference: Elbert H. Gary of the United States Steel Corporation, Charles M. Schwab, president of the Bethlehem Steel Company; Dwight W. Morrow of J. P. Morgan & Co.; F. A. Steberling, Goodyear Tire & Rubber Co.; Charles Piez, former head of the emergency fleet corporation.

It was indicated by Butterworth that the immigration problem is one of vexation to American industry and will be discussed at the conference.

Robert M. Buck, editor of the New Majority, leading labor paper of the middle west, said labor was aware of the fight on the closed shop and was prepared to go the limit.

"Manufacturers sweeten the open shop proposition by calling it the 'American plan,'" said Buck. "The open shop, if established, would mean the end of organized labor. This fight is vital to our interests."

OTHER CITIES WOULD SPEND THOUSANDS TO GET IT.

FREIGHT RATES ARE KEPT TO THE MINIMUM BY THE WATER TRANSPORTATION HERE

Standing at the Clyde Line dock and watching the boats come in from Jacksonville with the freight of the world brought to our very door makes one who pauses to think, feel that our greatest asset is being neglected unless there is a combined effort to get behind the Sanford Chamber of Commerce in its fight to get better accommodations from the railroads and to take advantage of our water rates in every way. We have never as yet quite appreciated this magnificent artery of trade and travel that stretches from Sanford to Jacksonville—the beautiful St. Johns river—and that from Sanford South through the reaches of the Upper St. Johns river offers so much in the way of transportation. But other cities would appreciate the river if they had it and the following from the Orlando Morning Sentinel shows what they think of water transportation down there and how much it would do for them if they had it:

"President A. Van den Boom, of the American Collapsible Box Co., a concern engaged in the manufacture of corrugated paper boxes, with a plant at Walnut Cove, N. C., in addressing the diners at the Orlando Chamber of Commerce luncheon yesterday, stated his mission to the City Beautiful without parley or delay by announcing that his concern had purchased \$75,000 worth of machinery for the manufacture in Florida of a new patented collapsible box to be used in the packing and shipment of citrus fruits and other agricultural products. He stated that they must secure a site and commence the erection of a plant to house this machinery around the first of the year, and Orlando had been selected in the center of the citrus industry of the state as the logical location for their new plant. But one thing stood in their way, an adjustment of the freight rates of the state that would make it possible for his concern to operate without being forced to pay a double and triple charge in the receiving of raw material from Ohio and Indiana through Jacksonville and the marketing of their product within the state.

"Mr. Van den Boom cited instances of the unfairness of the present freight rates, which seemed to favor Jacksonville to the detriment of other shipping points in the state. He pointed out that the present rates charged made it possible to ship raw material from Noblesville to Jacksonville at a charge of only 20 cents per hundred pounds in excess of a similar charge of a shipment from Jacksonville to Orlando. A shorter haul of 22 miles was cited as another illustration—that of from Winston-Salem to Plant City, in which the charge was \$1.42 per hundred, against the haul from Winston-Salem to Tampa with a charge of \$1.18. This is unfair and it seems that we must locate in Jacksonville to receive the advantage of the present rates, he said. However, he continued, even though we locate our factory in Jacksonville we will establish our main offices in Orlando, as it is the center of the local marketing of our product."

HOUSE COMMITTEE DISAGREES WITH SECRETARY DANIELS ABOUT ARMING NATION

Big Battleship Program Would Be Knocked Out

EVERY NATION QUILTS

ARMING AND MAKES SWORDS INTO PLOWSHARES, MAYBE.

WASHINGTON, Dec. 15.—It begins to look as though disarmament might encircle the world after March fourth if the House Naval Affairs means anything by their statements made in a canvass of the situation yesterday in the house. The committee is undivided on the subject of disarmament and does not look kindly upon the suggestions of Secretary Daniels made yesterday in which he stated that unless America was properly armed she could never enforce peace while all other nations were arming and getting ready for another war.

The prevailing opinion of the majority of the members of the house and virtually all the members of the naval affairs committee is that the United States should do nothing more than carry forward the great naval construction program of 1916—the largest ever authorized by any nation at one time, Representative Butler, Pennsylvania, chairman of the committee said.

The 1916 program, according to Butler and other committee men, upon its completion, which probably will be by January 1, 1924, will make the United States the greatest naval power in the world, even allowing for some uncompleted additional construction by Great Britain.

"The completion of the present building program will give the United States a supremacy of 31 per cent over Great Britain in first line battle cruisers," said Representative Britten, Illinois, a member of the committee. "Our first line tonnage will then be 1,118,000 tons compared with 987,000 tons of Great Britain. No other nation would be anywhere near us, as Japan's navy is now less than one-third of ours, and she can complete no huge building program that would endanger American supremacy within the next few years."

Butler pointed out that most of the big battleships of the 1916 program have not been completed, because of the war policy of building smaller craft and that their completion will require large appropriations, without touching an additional program, as recommended by Secretary Daniels.

Butler and other members of the committee also believe that the United States should not authorize an additional program until it is definitely determined whether this nation is to enter some kind of an international association or will agree with other leading naval powers, particularly Great Britain and Japan, on a disarmament policy.

WEATHER AND CROP CONDITIONS IN FLORIDA FOR THE WEEK ENDING DECEMBER 14.

Temperature: Temperatures were generally equable in most of the peninsula, being normal at all regular stations, except 2 degrees above normal at Key West. Freezing occurred in the extreme northern and western counties on several days and rather heavy frost in the upper portion of the north-central portion.

Precipitation: The rainfall was generally deficient, although it was about normal in the extreme western portion of the section; more moisture is needed in some localities of the South. Rainfall on Monday probably covered the extreme northern counties—being unfavorable on some low lands.

Condition of Crops: The weather of the week, as a whole, was generally favorable for citrus fruits, celery, lettuce, cabbage, strawberries and oats. Some cane was planted, and the planting of the oat crop is not finished in some localities. The fall bean crop has been shipped; it was very satisfactory. Tomatoes in small quantities are being shipped from the south. The planting of spring truck crops is under way. Small quantities of strawberries will be available for holiday markets. The cane crop has been banded and syrup making is largely completed. Ranges are in fair condition in the peninsula. The peach crop has been mostly harvested; it is short—due, it is believed, to the cloudy, rainy weather during the spring months.
