

EXPLORER AND WRITER

Dr. Fritz Wilhelm Holm of New York is a former newspaper man of China, Denmark and the United States. He was born in Copenhagen, Denmark, in 1881, is the son of the late Consul General Frederick P. Holm and has traveled all over the world several times. In 1906 Doctor Holm organized and commanded a scientific expedition into the interior of China, from which after many month of dangerous and arduous work, brought back the famous nestorian monument of A. D. 781, a replica of which stands in the Metropolitan Museum in New York.

Phrase of Ancient Origin. Long ago unscrupulous people used to take a cat tied in a bag to market, where they tried to sell it for a pig. If, however, a purchaser opened the bag before buying, the cat, of course, jumped out, displaying the fraud. Hence the term "letting the cat out of the bag."

THE UNWELCOME MRS. HATCH AT THE STAR MONDAY, MAY 10th

FIRE SHOTS IN HIS SLEEP

Roumanian Dreams of Chicken Thieves and Opens Up With a Gun.

Kansas City.—Joseph Sharder, a Roumanian, was discharged in the North side court as the result of an unusual story of somnambulism. He was arrested by Patrolman P. L. Saylidge for discharging firearms near his home.

Sharder told Judge Charles Clark that he had been asleep and dreamed someone was stealing his chickens. He said he took his revolver from a drawer and began shooting at the chicken thieves and that he was not awakened until the officer arrested him, although the shots he fired awakened the entire neighborhood.

Sharder had to be overpowered by the patrolman before he could be disarmed.

NOT PARTED EVEN BY DEATH

Married Sixty Years, End for Aged Couple is Almost Simultaneous.

Stamford, Conn.—In Creadley Heath, England, more than eighty years ago, two children were born—a boy and a girl—within a stone's throw of each other. They played together, they went to school together, they courted and sixty years ago they married. They moved to this country and died here within seven hours of each other.

These two people, whose lives ran happily side by side for more than three-quarters of a century, were Mr. and Mrs. William Woodhall, 195 Henry street, Stamford.

The Boy Who Dreams. It is a good thing for the farmer boy to have an imagination, says the Prairie Farmer. It is a good thing for him to "dream dreams and see visions." It takes a dreamer to see the transformation that intelligent effort will bring to pass on the old place. It takes a dreamer to see how much more desirable that place will be in ten years than a job in a dry goods store.—Emporia Gazette.

LEGAL ADVERTISING

AN ORDINANCE An Ordinance prohibiting Restaurants, Lunch Counters and Coffee Stands on wheels from doing business in certain locations in the city of Sanford. Be it ordained by the mayor and city council of the city of Sanford, Florida: Section 1. That it shall be unlawful for any person or persons operating or maintaining restaurants, coffee stands, or lunch counters in any vehicle or who uses any vehicle or wagon for the sale of goods and merchandise with the exception of wagons used in and for the sale of peanuts and popcorn; to use portions of any vacant lot within the present brick limits of the city of Sanford, or any public square, park, street or sidewalk for the purpose of selling or offering for sale, any goods wares or merchandise, except as herein and hereinafter provided. Section 2. Any person or persons violating any of the provisions of this ordinance shall, upon conviction, be fined not exceeding Thirty Dollars, or imprisoned or imprisoned not more than thirty days for each offense. Section 3. This ordinance shall go into effect immediately upon its passage and approval by the mayor. Passed this 3rd day of May, A. D. 1915. H. W. HERNDON, President City Council. I hereby certify that the foregoing ordinance was duly passed by the city council of Sanford, Florida, in session, this 3rd day of May, A. D. 1915. M. W. LOVELL, City Clerk. Approved by me this 3rd day of May, A. D. 1915. D. L. THRASHER, Mayor.

AN ORDINANCE An Ordinance requiring the grading and paving of portions of Park avenue and Hughey street with vitrified brick. Be it ordained by the mayor and city council of Sanford, Florida: Section 1. That Park avenue shall be graded and paved with vitrified brick from the intersection of Park avenue with Tenth street to the intersection of Park avenue with Hughey street, said brick pavement to be a width of fifteen feet; that Hughey street shall be graded and paved with vitrified brick a width of nine feet from the intersection of Hughey street and Park avenue to the intersection of Hughey street leading to Orlando; said road being an extension of Sanford avenue; said paving to be done in accordance with the plans and specifications attached hereto, submitted by the city engineer of Sanford, Florida; the paving of said streets shall be begun within sixty days from and after this ordinance shall become effective; that should any property owner, owning property abutting on said streets to be paved as aforesaid, fail, within the time above provided to pave said streets with vitrified brick, the city engineer in accordance with the terms of this ordinance and with the plans and specifications thereof, heretofore prepared by the city engineer, said work shall be done under and by direction of the city of Sanford, and the proportionate cost thereof shall be assessed against the land upon which said paving shall be done, but such shall have a lien therefor, enforceable in like manner as other liens. Section 2. That upon the failure of any property owner to make the improvements hereinabove provided for, that such work shall be done by the city of Sanford, or shall be let by a contract by the city of Sanford to the lowest and most responsible bidder, in accordance with the plans and specifications with reference to said work and two-thirds of the cost of such grading, opening, paving, improving and repairing said streets, shall be paid by the city of Sanford, and the remaining one-third of the cost of such grading, opening, paving, improving and repairing said streets shall be paid by the city of Sanford. Section 3. The estimated cost of paving per square yard for the paving of Park avenue is \$1.50 per square yard, and the estimated total cost of the paving of the portion of Park avenue above described is \$9500.00, and the estimated cost to lot owners per foot front on Park avenue is \$1.10. The estimated cost of paving per square yard for the paving of Hughey street is aforesaid \$1.50 per square yard, and the estimated total cost of the paving of that portion of Hughey street above described is \$1500.00, and the estimated cost to lot owners per foot front on Hughey street is 70 cents. The estimates of the cost of said paving of said streets now being on file in the office of the city clerk of Sanford, Florida and open to public inspection during reasonable office hours, for the benefit of the public. Section 4. The city engineer is hereby required, within ten days after the first publication of this ordinance, to prepare and file an estimate of the amount of the lien for which the city will claim against each of the lots fronting or abutting upon the streets to be so paved, which estimate shall be based upon the estimated cost of said work and upon the frontage of lots upon the streets to be paved. Section 5. Any person owning any interest in any of said property abutting on that portion of Park avenue and Hughey street to be paved, as aforesaid, shall have the right at any time, within thirty days after the filing of said estimates, as aforesaid, with the city clerk, to present to the city clerk a sworn petition to be presented to the city council, setting forth, that in the opinion of the petitioner the estimated amount of such liens upon such lot is incorrect, showing wherein it is incorrect, or why it will exceed the special benefit accruing from the work and paving to be done in front of said lot. Section 6. The city council of Sanford, Florida, shall, after proper notice, and within the time prescribed by ordinance, sit as a board of equalization, to hear and adjudicate upon all petitions and complaints which may be filed in reference to the estimated cost of the paving provided for above, and to make due and proper inquiry into the question involved, and if it shall appear to the satisfaction of the city council, sitting as a board of equalization, that the estimated amount of said liens is correctly estimated, the amount so fixed shall stand as the amount of such lien to be claimed by the city of Sanford, for the paving of the street aforesaid, in front of said property, and after the city council had heard all petitions and given all property owners an opportunity to be heard and made all corrections in their judgment necessary to equalize the assessments in proportion to benefits, said estimates, as then equalized shall stand as true and correct. Passed this 3rd day of May, A. D. 1915. H. W. HERNDON, President City Council. I hereby certify that the foregoing ordinance was passed by the city council of Sanford, Florida, in session, this 3rd day of May, A. D. 1915. M. W. LOVELL, City Clerk. Approved by me this 3rd day of May, A. D. 1915. D. L. THRASHER, Mayor.

COUNTY HAPPENINGS

PAOPLA POIGTS

Mr. Zachary was quite indisposed for a time last week. Miss Frances Pearson was on the sick list for a few days last week. Charles and Edith Campbell left for their home in Salem, Ohio last Saturday, going by boat to Jacksonville and stopping a few days in Savannah, Ga., and Washington, D. C., enroute.

Mr. John E. Allen, who has been visiting his cousins, Miss Icenhour and Mrs. Fraser and improving his place on lower Twin Lake, returned to his home in Columbiana, Ohio last Saturday.

Mr. and Mrs. Patton entertained a few friends at dinner Saturday and the younger people came for the evening when cake and ice cream were served. As is usual at this hospitable home, all thoroughly enjoyed themselves.

Mr. and Mrs. John Abrahams were visiting Mrs. Jamies last week. Mrs. Abrahams will be remembered as Miss Rosa Jamies. Miss Helen Igerman and Mr. Alfred Nelson spent the week end with the Misses Pearson.

Oscar Pearson is at work with his brother in Sanford for the present.

Everybody is rejoicing over the completion of the new brick road, which makes a long and tedious journey to the city a thing of the past. A large number of autos drove out over the new road on Sunday and made Paola herself seem quite civilized.

Mr. and Mrs. F. A. Johnson attended the school picnic at Longwood on Saturday.

Some unknown person opened a window in the store room at Twin Lakes Plantation Sunday afternoon and helped themselves to a goodly quantity of fresh laid eggs. The place was left alone about an hour, and whoever entered the house was probably on the watch and expected to have more time than they got. Considerable rummaging was done, but nothing of much value seems to have been taken but the eggs.

Mr. Edgar Bridge has received a government appointment which requires his immediate presence in Chattanooga, Tenn. and he and Mrs. Bridge left on Monday. These good people have been with us over a year and have greatly endeared themselves to the entire community, who deeply deplore their loss and look eagerly forward to their return at some not distant date. They have endured our summer heat and winter rain without a murmur; have always been ready to enjoy a good time and have done a great deal for the pleasure and enjoyment of all their many friends, who wish them the best of luck wherever they may be.

GREAT IS DUNEDIN

Dunedin, May 8.—Dunedin may fairly claim to be the manufacturing center of the West Coast of Florida and its citizens are calling the town "The Pittsburgh of the Pinellas Peninsula."

The L. B. Skinner Manufacturing Co. has just completed a foundry with a capacity of 2800 lbs. of castings per hour. This is one of the largest foundries in Florida and employs a considerable number of expert moulders. All of the castings used in the extensive line of packing house machinery made by his concern hereafter will be produced in its own foundry.

A few weeks ago the Skinner people built a warehouse with a floor space of approximately 10,000 square feet. This will greatly increase the capacity of the plant by rendering it possible to keep a number of packing house outfits on hand. These can be made up in the dull season for installation when there is a demand. The warehouse has a capacity of about ten complete outfits. One of its features is a monorail system for handling of the machinery between the erecting shop and the warehouse and from the latter to the loading platform.

Another innovation in the extensive factory operations of the Skinner Manufacturing Company is a department for making brushes. Here, before, the large quantity of brushes used in the packing house machinery made by this house have been procured from other manufacturers. Sometimes this led to delays in delivery, as the supply of brushes could not be obtained rapidly enough to fill all orders. The quality of the brushes now produced is better than the average it was possible to secure under the old plan.

The Skinner business has increased marvelously in the past year or two. B. C. Skinner, the general manager attributes this increase principally to two factors—the policy of guaranteeing satisfaction and liberal advertising. The Skinner machinery has been installed in by far the

PRESERVING THE WASTE

Grapefruit Brought No Price in the Market but the Juice is in Demand.

The Herald has called attention to the fact from time to time of the the wasteful methods of the farmers and growers of Florida who as soon as the shipments of fruits and vegetables cease allow the remainder of the crop to go to waste when so much of it could be canned, bottled or preserved. The canning clubs organized here are doing a great work in preserving the waste products of the fields and will continue to reduce the high cost of living. Now at the end of the season for oranges and grapefruit we wish to call attention to the fact that the orange and grapefruit can be utilized to a good advantage. Grapefruit juice is becoming a favorite drink at the fountains in all parts of the United States and this summer will make the drink more popular than ever.

A simple method of bottling the juice of grapefruit for use in making acid beverages is advocated by the United States department of agriculture as a means of gaining a useful by-product from hundreds of thousands of cases of grapefruit which are now wasted.

All that is necessary according to the government's fruit juice specialists is to bring the grapefruit juice to the boiling point, in a porcelain lined or enameled kettle, pour it while still hot into bottles, which then are hermetically sealed. The juice when so handled will keep indefinitely, and provides a base for grapefruitade or other acid beverages having the characteristic acid, somewhat bitter, flavor of the fruit. Experiments show, however, that it is highly important that the bottle be completely filled so that no layer of air be left between the top of the juice and the cork or seal. Where air in any amount comes in contact with the top of the sterilized juice it will cause the juice to change its color. In handling the juice it is particularly important that it be kept from coming in contact with iron or other metals easily acted upon by acids.

It is also possible to freeze the grapefruit juice into solid ice and then by whirling the ice in a centrifugal machine, to take out a large part of the water and leave the solids and flavoring matter of the fruit. This freezing and concentrating of the juice greatly reduces the bulk and makes a product that can be sterilized by heating and kept indefinitely. Care must be taken to keep the juice from coming in contact with iron.

While as yet, so far as known, there is no commercial market for sterilized grapefruit juice, it is believed that many persons will find this juice, with the addition of water and sugar, a pleasant variation from lemonade, or limeade. Those who like grapefruit should find the beverage inviting. The method so simple that those in regions where grapefruit are cheap and plentiful can prepare this product on a small scale with ordinary household appliances.

Those who wish to make a clear juice, may filter the grapefruit juice before it is heated by adding to it from two to three per cent (about three ounces avoirdupois to the gallon) of infusorial or Fuller's earth well washed with hot water. The mixture is then forced through a non-metallic filter press and the clear juice reheated and boiled. With the freezing process the juice is filtered after concentration, about twice the amount of infusorial or Fuller's earth being used per gallon of concentrate.

The chemists in connection with this bottling of grapefruit juice, notify the public that the same process is not suitable for bottling the juice of oranges and lemons, which will not retain their flavor if handled in this way.

NOTICE

The delinquent tax list will be published June 1st. Pay your tax now and save expense.

M. W. Lovell, Collector 74-5t-Tues & Fri

Steel vs. Iron.

For some purpose iron is to be preferred to steel and vice versa. To easily distinguish one from the other, make a bright spot on the metal with a file or sand paper and apply a single drop of nitric acid. Allow it to remain for one or two minutes and wash or wipe off. If the spot has a pale ashy appearance it is wrought iron; if it is a brownish black, it is steel; if a deep black, it is cast iron.

greater portion of the citrus packing houses equipped in the state in the past year and an even greater number of outfits could have been sold had the factory capacity permitted their production. With increased facilities made available, it is believed that every call for equipment can be met.

BETTER TIMES COMING

STATE BOARD OF HEALTH

The signs of the times—are for better things in Florida. An educated public sentiment; the result of a quarter century of earnest work by the State Board of Health to bring the people of the state to a higher appreciation of the value of clean living has been reflected in the progressive action of the legislature now in session at Tallahassee. Already the upper branch of this body has given serious heed to the suggestions for the legislative betterment of Florida's health laws, and there seems to be no doubt that the lower house will confirm the action of the senatorial law makers.

For more than twenty-five years the State Board of Health has stood between the people of the state and serious menaces. Originally the board came into existence by the act of a special session of the legislature, called together by Governor F. P. Fleming, following the yellow fever epidemic of 1888. The guiding idea was that this Board should lead and focalize the fight for the protection of the entire state against this disease—just how was not understood, and the uncertainty of the proposition was the reason for clothing it with extraordinary authority.

In those days the agency of the mosquito—as a carrier of the germ of yellow fever was not understood, but with the later discovery of this fact and the stern application of the principle involved, the problem became simple, because it had been robbed of its mystery.

With the solution of this problem others became relatively more important, for the world was advancing in its knowledge of health matters, and Florida was keeping abreast of the times and in addition it had its own problems.

There is no greater obstacle to progress than indifference. The preaching of men who are in earnest, who know what they are talking about, is listened to and treated as the vapors of fanatics, but the fanatics of today are the wisemen, the leaders of tomorrow.

As medical science has advanced in its knowledge of health and sanitation and of their intimate relation, as prevention of disease has been brought to a par with its cure, Florida's Health Board has urged these ideas on the attention of the people of Florida. It has argued, it has offered proofs in numberless instances of the truth of its position, and in the final result it has removed from Florida the unjust aspersion that a semi tropical country is necessarily unhealthy, by proving the contrary of the great Peninsular State.

Its work has been that of education, illustrated by many object lessons. It has shown that typhoid fever and malaria and smallpox and hookworm are not necessary—that they may be added and how. It has shown how the ravages of tuberculosis may be minimized. It has demonstrated the relations between clean bodies and clean surroundings and the highest physical health. Yet, more than once in the past has a bill to abolish the State Board of Health, or to make it an insignificant branch of some other department of state government received serious consideration by a state legislature.

Happily, those days are in the past and the legislature of 1915 in its wisdom and appreciation of the aims and ambitions and accomplishments of the board, is providing it with larger resources and powers to do its work. It is a matter of congratulation that a legislative body has come into power in Florida with the intelligence and the will to hasten the progress of the state through the increased efficiency of the State Board of Health.

To Clean Marble.

Use three ounces of pearl ash, one pound of whiting and three pints of water, well mixed, and boil ten minutes. Rub it well over the marble and let it remain 24 hours; then rub it off and dry with clean cloth.

WAR BECOMES HABIT

People Quickly Adapt Themselves to New Life.

Take It Carelessly Like Life on Volcano—Boys All Expect to Fight and Are Not Uneasy Over Prospect.

By GABRIEL DELAGARDE.

(Correspondent Chicago Daily News.) Amiens, France.—In the last few days I have made inquiries among many persons to find out the state of mind of the civil population as regards the war generally. I have talked with tradespeople, manufacturers, retired merchants, ordinary laborers, other employees—as many as possible of each. It is easy to enter upon a conversation; at the present time it is not necessary to rack one's brains to find a subject, and the subject is inexhaustible. People have grown wise. The fantastical reports which at the beginning of the war were invariably believed fall now on skeptical ears.

Moreover, things are now in order. The other day, at a prominent hairdresser's shop in town, a man announced to those who would listen that the Germans had just entered Albert. An officer, who was being shaved, interfered, had the man arrested, and for his imprudence he passed eight days in prison.

Who would imagine, while walking through the streets of Amiens, that the Germans were 30 kilometers (about twenty miles) from here, not more? The soldiers from the trenches do not come here, or if they do the officers and men are obliged to come clean and in good style. Automobiles only have the right to be dirty. The population, it appears, must not see the war in an unfavorable light.

So the people are gradually growing accustomed to this abnormal state of affairs, just as the inhabitants of a town near a smoking volcano go about their business without giving it a thought. As a friend of mine, a literary man of these parts, said to me: "War? It's a matter of habit, heart, soul, mind, all become daily hardened to it. We have adapted ourselves to our new life."

And the remark is just. It applies to the people, especially to the men who have remained here. All the young men are alike; that is, the great majority. They realize that, if the war lasts, their turn will come to go to the front, and it causes them no uneasiness.

There is the mental anguish which affects all without distinction, with terrible equality, from the minister to whom we are indebted for the three years' service law and who has just lost his son, to the poor little woman who chafes to make a living, whose husband is a prisoner in Germany.

This it is which makes war odious, which creates the fiercest hatreds both in the hearts of the soldiers and the civil population. One day I returned from Albert with a poor woman, who has no one at the front, but who has witnessed the rump of a town by a bombardment. She stretched out her thin arms with the suppleness of a cat as she said:

"Let the women have a hand. Deliver to me four 'boches' only, and I will undertake to put out the eyes of those highwaymen."

The refugees suffer and have suffered materially. They are virtually the only ones. One may say that, far from increasing misery, the war has diminished it. Such a wave of official and private charity has swept over the country! Nearly all of the poorer classes receive from the state either an indemnity for their enforced idleness or relief because of the war.

Am I to pity the manager of a large factory who told me he had lived on an income of 500,000 francs before the war, and now doesn't spend 10 francs a day? No, because he himself does not complain and accepts it in the proper spirit, even though, instead of having his automobile waiting for him at the station, he is obliged to walk, with an alpine sack on his back in place of a valise. He says that he has never felt better. Like others, he soon adapted himself to this new state of affairs.

BLAMES HIS RUIN ON BOOKS

London Hermit's Passion Caused Him to Abandon a Prosperous Business.

London.—"Books have been my ruin," was one of the best things said by the late Charles Augustus Ward, who in his latter days was a curious old hermit of Walthamstow in Essex. His passion for books had led him to dispose of the prosperous wine business at Mayfair he inherited from his father.

One of his hobbies was cook books; at eighty-seven he was compiling one for his own use from ancient sources when death overtook him. He had just inherited a small fortune from his sister. His collection of 3,000 volumes has gone to the London library.

He was often seen around London in a Holland smock, or a blue frock coat with brass buttons, and a Panama hat with yellow ribbon.

Wanted to Be a Hero. New York.—"I wanted to be a hero and get a medal like the boy in the movies," said Samuel Balk, twelve, charged with starting a fire in his home.

Mdch in Brief Dream. It is written of one of the most eminent of Englishmen who was dictating to his amanuensis chapters of an important work, and while so engaged was overcome by sleep. He dreamed of matters of great moment, of diplomatic conferences, exhausting many days and weeks. Becoming awake he chided his secretary for permitting him to sleep, and was astounded to be told by the scrivener that he had not finished the last sentence that had been dictated. Volumes have been written crammed with such experiences in infinite variety.

Danger in Waiting. Just because an Oregon scientist declares that old men do the best work is no reason, of course, why young fellows should put off contemplated achievements until the arrival of declining years. It may be that the man who accomplishes little in his early maturity will make up for the lack when he starts down the western slope of life. It doesn't sound reasonable, however.

Tastes Change. Funny that the very fellow who begs a girl for a lock of her hair in the courtship days when he kisses it so fondly will swear like a trooper if he finds one of them in the butter after he is married.

Finest Dates Grow There. Beyond the land of the Herbarium in the far south of Morocco, lies the great oasis of Tadlet, famous for its vast groves of date-palms. Here for hundreds of square miles, the land is covered with a thick growth of the tall, straight stems of the palm, and the product of these close-growing trees is enormous in quantity. They produce the finest dates in the world.

### SOME FREAK HURLERS

#### Few Players Who Can Use Either Hand in Pitching.

#### Keenan of Youngstown Could Work Equally Well With Either Arm—Corcoran Tried to "Come Back" With Left Hand.

Followers of baseball have often heard of the fellow who could pitch a fast ball with either hand and make it curve also, but few have seen one of these pitching freaks.

Baseball history tells of a chap named Owen Keenan, who pitched for Youngstown, O., in 1885. Keenan could pitch equally well with either arm. On the Fourth of July of that season this wonder pitched two games of ball against New Castle and beat that team in both contests. He worked his left arm in the first game and used his right wing in the second contest, with the odds in favor of the right whip.

The famous Larry Corcoran of the Chicago team, in the early 80's was one of the great hurlers of the period. Larry lost the use of his wonderful right arm during the season of 1885. This almost broke his heart, for Larry was not old in years. It dawned upon him that he might make a left-handed pitcher, for he was always clever at throwing with his left, and used to practice frequently. In the season of 1886 Corcoran signed with a Southern league team as a left-handed pitcher and reported for practice as such. He worked hard to gain control, for he developed rare speed. Larry pitched a few exhibition games, and in one of them he kinked his remaining wing so badly that he was released, so he had to quit the game, for he had run out of pitching arms.

Windham, originally a right-handed pitcher, lost the use of his pitching arm through an accident. He made a shift, and began practicing with his left arm. He was very successful and made a splendid record with the Worcester team of the Eastern league during 1913, so good, in fact, that he was signed by the St. Louis Americans for the season of 1914. However, his pitching from the left side was not natural for him, and instead of his arm getting stronger and better he weakened his whole left side and finally had to give up pitching.

So the ambidextrous hurler is more or less of a myth. The pitching game is too strenuous for any kind of an arm but the good natural wing.

### BIG ED WANTED MORE TIME

#### Pitcher Reulbach Asked Manager Chance to Call Game While He Warmed Up Behind Stand.

The famous old Cub machine had a comedian in the person of Ed Reulbach, the lanky pitcher, now with the Newark Federals. One of his favorite expressions when in a facetious mood was, "I have a scheme."

Johnny Evers writes that he will never forget one of Ed's schemes. "The Cubs were in Pittsburgh one day, and it was Reulbach's turn to work," says Johnny. "He warmed up for the customary ten minutes before the game and seemed to have a lot

Ed Reulbach of Newark Feds.

of stuff on the ball. As soon as he stepped into the box, however, he lost it all.

"He walked the first five batters that faced him. After two runs had been forced in Chance could stand it no longer. He walked over to Reulbach and said: 'What's the matter with you? Can't you lay the ball on the plate? If you can't, get out of the game.'"

"I have a scheme," replied Reulbach. "I haven't warmed up enough. Tell you what to do, Frank; ask Umpire O'Day to call the game for ten minutes while I go behind the stand and warm up some more."

Christened "Blues." The Buffalo Federals have been christened the "Blues."

### SCARCITY OF PLAYERS

#### Growth of Big Cities Shrinks Crop of Youngsters.

#### Ball Fields of Ample Size, Within Walking Distance, Decrease as Rush of Building Begins to Swallow Up Vacant Lots.

One reason for the scarcity of classy young ball players, men good enough to shine in the major league, is the growth of the great cities. Considering the fact that baseball enthusiasm grows with the expansion of the big burbs, and that the attendance has increased with the rise in population, this statement may look fantastic or impossible. Nevertheless, it is true, and unless the colleges or the farms begin to replenish the supply there will be a serious shortage in high-grade ball players within the next few years. You cannot have ball players unless you have a place to play them. And with the great cities expanding and incessantly bulging out their lines of settlement, where do the ball yards go?

Take Chicago for an example. A few years ago there were ball fields of ample size within walking distance for everybody. Huge vacant lots were abundant in every direction. On Saturdays and Sundays these lots were black with spectators, crowded so close that every foul tip copped some one in the countenance. The City league had several fine ball parks and did a prosperous business, even after the National league started Sunday games. Then the rush of building began to swallow up the lots. One by one the parks were seized; the lots passed out of existence by the dozen. A few more years and the amateurs could find room only by taking car rides of such length that they lost the whole day going and returning.

The big leagues, even if their parks are some distance out, draw the people who have leisure to go a few miles and spend an afternoon. The young amateurs cannot take the time—many of them cannot spend the car fare. In every city the story is the same—the march of population, the spread of building operations, has killed off the amateur game by removing the available spots whereon the amateurs could caper. And what does this mean for the future supply of the players?

### RUDOLPH HAS ONE WEAKNESS

#### Boston Pitcher Is Very Sensitive About Bald Head and Imagines He's Growing Hair There.

Dick Rudolph, who is one of those Boston pitching persons, is absolutely certain that he can do what John D. Rockefeller and millions of other fellows have failed to do, in fact (he says) he's already doing it.

Dick, to be more explicit, says he is growing hair on a bald dome—on his own bald dome. And if you don't believe it, Dick will let you look at his head. He permitted us a look.

When told that it didn't look any different than it did last summer, Dick got rather peevish.

"Don't, hey?" he snapped. "Well, lemme tell you that there's about eighty more hairs on my head than there was before I began using that treatment."

Dick, as very few people know, is bald-headed—very, very bald-headed. That's the main reason that you rarely see pictures of Dick that are minus a head covering. He's sensitive about that lack of hair, too.

Asked what the treatment consisted of, Dick replied:

"Well, it's a secret prescription. But it's a lulu. Friend of mine—a barber up in the Bronx—mixes it up. He told me to try it, but I was sore on trying hair restorers. I told him to go to blazes with his dope, but he kept on insisting that I use it and give it a two months' trial.

"Well, I finally took a whirl at it. I've been using the stuff for two

Dick Rudolph of Boston Braves.

months and darned if it ain't got a lot of new hair. See 'em?"

Once again Dick lifted his lid, poked his dome at his friends for inspection.

"Sorry, Dick, but—" "You're blind—that what's wrong with you. You're well qualified for an umpire's job."

And then Dick wheeled on his heel and started in pursuit of some sympathetic person who would assist him in kidding himself that he is contracting a new growth of wool.

### CAPPED THE PURSER'S STORY

#### War Correspondent's Yarn About Ponto Was Close to the Limit in Nature Faking.

One of the few American war correspondents who really saw something of the European war in its first stages was coming home on the Lusitania not many trips ago. He sat at the purser's table, and the purser one evening told a truthful nature tale of having been on a ship that once passed through a school of whales in mid-ocean.

"All of them were sound asleep," said the purser with a wink to an accomplice, "and all of them were snoring. The noise was deafening."

"It must have been," said the correspondent; "but when I was a boy out in Cincinnati, Ohio, there used to be a whistling whale that lived in the ocean just in front of my father's house. His name was Ponto and he would answer to it—answer by whistling. You see, his blow hole was clogged with barnacles and every time he spouted he made a sound like a siren on a fire-boat."

"Ponto was a great pet with all the ships that traded in and out of Cincinnati. The pilots got to know him, and when they were entering port and Ponto cruising about in the channel they would signal him and he would signal back, always giving the correct number of blasts. But he's dead now—poor old Ponto!"

"One day a freighter was coming in from Covington, Kentucky, and Ponto tried to pass her, headed out. But he

got confused and gave the whistle for going to the port side when he meant the starboard, and the freighter ran him down and stove in four of his compartments, and he sank in five minutes, whistling for help to the very last."

After which a great silence befell at the purser's table.—Saturday Evening Post.

### The Airship's Wireless.

The newer German naval and military airships of the Zeppelin and Parseval models are equipped with wireless apparatus of much greater power than ever before. The wireless impulses are diffused and received by an aerial made of a three-millimeter phosphor bronze wire that as the airship rises is unwound from a spool to its full length of 750 feet, and that when the airship is aloft floats freely in the air. The apparatus itself is very compact; with its small dynamo it weighs 270 pounds. It has a minimum range of 120 miles and can produce wireless waves from one to four thousand feet long. According to the Wireless World, every large aerodrome in Germany has its wireless station; those at important centers like Johannisthal, Cologne, Friedrichshafen, Frankfurt and Mannheim are very powerful. Taken together, they form a continuous ring round the borders of Germany, and keep German airships in constant touch with a German base. They also serve as a sort of wireless compass, for they enable the navigating officers when out of sight of land to fix their position with more than a fair degree of accuracy.—Youth's Companion.

### Not Encouraging.

Mr. Taft, ex-president of the United States, is a gifted writer, and at one time he had a high reputation as a poet, says London Tit-Bits. On one occasion, however, when he was a very young man, he received a nasty shock from an esteemed relative of his.

This was an aunt who lived in the country, and the future president went to dine with her one Sunday evening. Proudly he carried with him some cuttings from a newspaper—nothing less, in fact, than his own published verses. After the meal he took them exultantly from his pocket and gave them to his aunt to read.

Adjusting her spectacles, she went through them carefully, while her poetical nephew watched her anxiously. Presently she put down the cuttings and glanced over her spectacles at the poet.

"William," she asked, innocently, "do they print those things 'for nothing' if you send them in?"

### Love Letters in Her Coffin.

The will of Miss Mary Ashton Wade of Youkers, who died on January 11 at the age of seventy-four, was admitted to probate. Miss Louisa Bradford of 956 West End avenue, Manhattan, a friend of Miss Wade, filed an affidavit, stating she had carried out the testator's dying wish that a certain sealed package among her effects should be buried with her.

Gerrit Smith, the executor's counsel, said the mysterious package was supposed to contain love letters. The will disposed of an \$11,000 estate to relatives.—Youkers (N. Y.) Dispatch to New York Sun.

### Misplaced Admiration.

The late W. W. Rockhill, who died in Honolulu, had a deep and intelligent knowledge of the Chinese.

"We Americans," Mr. Rockhill once said in New York, "don't understand the Chinese. We misread them as a visiting Chinaman once misread an accident in Broadway."

"As the Chinaman was passing beneath a huge electric sign, on which a man was at work, the man slipped and fell on the Chinaman's head."

"Well, well," said the Chinaman to himself, admiringly, as he rose from the pavement; "well, well, how will these wonderful Americans advertise next?"—Washington Star.

### Huge Sugar Industry.

When it is stated that more than one hundred million dollars is invested in the beet sugar industry in the United States, it may be understood that the effect of the war on this industry in Germany is of considerable importance. The first beet sugar factory in America was built in Philadelphia in 1830, but it did not prove a success. The first successful factory was started in 1870 at Alvarado, Cal. It was in continuous operation until it was torn down a couple of years ago.

### FROG CULTURE

Easy, interesting and immensely profitable for the Farmer, Fancier or Country Gentleman. Now's Breeding Time.

WRITE FOR CIRCULAR The Ortega Frog Farm Jacksonville, Florida

Office in Herald Building Telephone No. 148

Plant a hotel.
Or else let George do it.
Or get out of the way and let somebody do it that will.

Sanford is assured of the yacht club and harbor if we never have a country club.

All the Sanford churches observed Mother's Day with appropriate services and mother was remembered.

With all the improvements taking place and contemplated Sanford look good to the man who wants to make an investment.

Keep cool and don't rock the boat. Sanford has no time to talk about going to war. We are too busy building hotels, etc.

Let the men of families always bear in mind that Sanford needs and must have a Y. M. C. A. building and have it this fall.

This is the season of Sunday school picnics and Sanford Sunday schools should get together and decide upon a good location and have a big Sunday school day.

Although the Chautauqua last season did not prove a financial success it is our opinion that the entertainments were the best that could be procured and the city was greatly benefited thereby. Also that we should have more of the same attractions next season.

Tosohatchie ranch, located near here, bids fair to become as famous as the 101 Ranch of Oklahoma. says the Sanford Herald. Tosohatchie ranch now has 32,000 acres under fence and upon this immense range are 5,000 cattle and 2,500 sheep. The Herald gives some other details of this big ranch and shows that the owners are working to raise the grade of stock and to make the ranch up to date in every particular. Florida beef is now a regularly recognized commodity on the market, says the Herald, and there are several fine ranches in this vicinity. Times-Union.

Bob Holly of the Sanford Herald is glad that we found some good in Forrest Lake. Glad that Bob has found something to be glad about. Next time that Forrest runs for something we won't say a word. Florida Grower.

Thanks. All we ask of you is to follow your regular policy of saying nothing.

HELP THE PRESIDENT
We have a man in the President's chair.
There has not been one like him since the time of Lincoln.

There has been no President before him, with the exception of Lincoln that had as many crosses to bear while presiding as the chief executive of the United States.

President Wilson's admittance to the American people ever since the terrible conflict started in Europe has been, "Keep cool, Don't rock the boat," and now more than ever should we heed his advice.

Last Friday one of the worst disasters of the war took place. The worst disaster because over one thousand people including helpless women and children lost their lives in order that the Germans could make effective the blockade of the British ports.

Over one thousand people with no thought of war perished in sight of land and paid the toll exacted by the so-called modern civilized warfare. As to whether the Germans exceeded their authority in killing defenseless non-combatants—as to whether those on board the vessel took chances in crossing the ocean in the very face of Providence and against the warnings of a danger—as to whether the neutrality articles will condone or blame those responsible for this deed and ask reparation—we are not prepared to say.

War is war and covers a multitude of sins and while we mourn the loss of these people, some of them our friends and countrymen, we still place our faith in Woodrow Wilson

and his cabinet and ask our readers to "Keep cool, don't rock the boat." Let the jingoes and irresponsibles cry "cowardice" and "Grapejuice diplomacy" and talk war. Now is the time for true men to come to the front and help the President by keeping still.
We have a real man in the President's chair and our faith is strong.

ROCKING THE BOAT
The Herald does not believe in rushing matters into print without due deliberation and thought. There are many matters coming up from day to day in which this paper could stir up more trouble than the city could take care of in a year and there would be nothing gained in the end. It is not so much what a good newspaper puts into print as it is what the said paper keeps out of print. The editor of The Herald having had years of experience in the business in many states has found out that good sober second thought will always keep out of print many articles that would tend to create a disturbance in local affairs and accomplish nothing. For instance, we have a question now before the people in regard to changes to be made in the high school building—changes made by the school board, which in their judgment would solve the crowded condition of the schools. The change is only temporary and therefore should not agitate the minds of the public to such a remarkable degree. The editor of The Herald has faith in the local school board, the county school board and the teachers of the schools. We know that they will cooperate in every way to make the schools the best in the land. We know that they have always done this and they will not be found wanting in this crucial period and temporary disarrangement. No one can say that The Herald has ever by word or deed cast any stones at our magnificent school system and in the future as in the past we purpose to uphold the hands of those who have our schools in charge.
Don't rock the boat.

ELBERT HUBBARD
We have lost a man.

Not in war, not in the heat of battle, nor with the lust to kill upon his face.

But in the peaceful pursuit of business and pleasure while eating luncheon on the palatial steamer that was supposed to be guarded well within by armor plated double steel and without by the strong fleet of England, mistress of the seas.

A man who with his pen and upon the lecture platform has always counseled peace. A man who has accomplished as much for the human race since his short span of scarce two score years among us than any other literary genius of the age. A man of gentleness, of high ideals, an intellectual giant. A man of strange ways forthsooth where he was past understanding and yet withal a man who was known and appreciated at his true worth by his brethren of the press.

Elbert Hubbard, Fra Elberta, went to his death last Friday on the Lusitania so the cabled message reads. We shall miss his philosophy and his gentle words of sympathy that touched the hearts of old and young alike, of the laboring man and the capitalist, of all classes and all kinds. A few weeks ago in a letter to the editor of The Herald he spoke of the war and said that in his opinion the awful struggle would be over within the next six months. If his untimely death and that of the other martyrs on the Lusitania hasten the end then the catastrophe has not been in vain.

In a late copy of the Philistine he had the following regarding the policy of President Wilson:

Nature's animals, once had terrific arrays of teeth, claws, hoofs, and carried on their backs a protection that was Zeppelin-proof. So long as these terrific animals existed, there was no peace for man.

And there will never be a really first class race of men as long as wealth and science cooperate for killing purposes. Gradually things have modified and refined themselves until we find that the unseen is more powerful than the seen. Thought is supreme. The world is ruled by sentiment. Beauty, romance, poetry, blend into a harmonious whole, and we have the world of business—and business is the science of human service.

And yet we find the strange anachronism of the best ingenuity of man being utilized to invent instruments of death and destruction. Well does President Wilson take the stand that this is no time for Americans to "mobilize." It is for us to show the world the truth. "Thrice-armed is he who knows his cause is just."

President Wilson's attitude in standing firm and not giving way to the hysteria of demagoguery, representing public and politics, is eminently wise, right, excellent, and altogether lovely. The President's

action will go down in history to the eternal credit of Woodrow Wilson. Let this be carved on his monument.
HE SET HIS FACE FIRMLY AGAINST THE TRANSPLANTATION OF KRUPPERY INTO AMERICA.
We are a peaceful people, and the way we can manifest our peaceful proclivities and prove to the world that we are what we are, is by following our regular occupations and not Wreansing our armament—especially in view of the fact that the expression, "Preparation for war spells peace," has been found to be futile and fallacious.

One of the most optimistic and thoroughly good humored newspapers is surely the Sanford Herald. "Spring crops are looking well," says the Herald, "fish are biting, new buildings are going up, the bulkhead will soon be finished, the brick roads are being completed, the legislature will soon adjourn, the new postmaster will soon be appointed, the city election will be on, the new churches will soon be ready for occupancy and why should we worry?" And it is a question indeed why there should be any worrying in or about Sanford. Times-Union.

Wrong Position for Sleep.
Sleep cannot knit up the raveled sleeve of care or do any other reparative knitting, if the head is bent sharply to an acute angle with the collar joints. Frequently men and women who have slept in this supposedly objectionable fashion for years and years suddenly lose the capacity for sleep with no new discoverable reason. It is difficult to convince them that the elasticity and resiliency of youth has heretofore made up for their lifelong awkward pose.

Invented in 1589.
The knitting frame was invented in 1589 by William Lee, a graduate of Cambridge university and a native of Woodborough, near Nottingham, England. So perfect was the invention in every detail that to this day the essential features of the machine continue in use for the class of work to which Lee applied it.

BOARD OF COUNTY COMMISSIONERS IN REGULAR SESSION

(Continued from Page One)

to county commissioners.
Motion made and seconded that the salary of J. M. Wynn, convict guard be raised from \$40.00 to \$50.00 per month.

Motion made and seconded that ceiling fan be placed in county commissioners' room by clerk before next meeting.

The following resolution was passed in reference to lateral ditches in Black Hammock Drainage District.

Whereas the main line of ditches in the Black Hammock Drainage District have now been completed, and the work of the contractor has been accepted; and

Whereas, it is essential that all lateral ditches be cut, and connecting with the main line of canals and ditches should be so cut as to enter the canals and main line ditches in said district, at the same grade and depth of said main line ditches and canals, and should be alpped back, on an easy grade a distance of not less than one hundred feet; therefore be it

Resolved that all property owners in said district, who construct any lateral ditches in said drainage district, shall construct said lateral ditches so that same shall enter the main line of ditches and canals, on a grade level with the main line ditches and canals, said lateral ditches to gradually slope back a distance of not less than one hundred feet.

Done and ordered this the 4th day of May, A. D. 1915.

Resolution of thanks passed by the board of county commissioners in and for Seminole county, Fla.:

Whereas, the good people of Seminole county have responded most generously to the request for assistance and donations in furnishing the new county home;

And Whereas, the donations received have far surpassed our expectations; therefore, be it

Resolved that we take this means to express our thanks, and appreciation for the many donations received, and therefore be it

Further Resolved, that we wish also to thank the committee of ladies from the Woman's Club for the assistance rendered in soliciting these donations; And therefore be it

Further Resolved, that the clerk of this Board shall furnish a certified copy of this resolution of thanks to the Woman's Club. And further that a copy be furnished to the press.

Adopted this the 4th day of May, A. D. 1915.

Reports of the several different county officers received, read, ap-

proved and ordered filed.
The following bills as audited by the clerk and approved by this board were ordered paid:
General Fund—C. M. Hand, sheriff, \$4.50; L. P. Stringfellow, J. of P. \$3.00; Dr. O. J. Miller, 1.00; Josephine Hunter, 1.00; Robt. Hunter, 1.00; C. C. Howard, 1.00; I. L. Andrews 1.00; J. A. Laura Jean Libbey's Talks on Heart Topics

WHEN ARE WOMEN PAST THE MARRYING AGE?

Love is not to be reason'd down or lost in high ambition or a thirst of greatness.

Bachelor girls look about them and see slips of girls of sweet sixteen carrying off matrimonial prizes...

Let us reason the subject out a bit. If all men were of the same mind and inclined to be frivolous...

When a girl has reached twenty-five she has safely passed through the silly age. She is not attracted to a man because he has a love of a curling mustache...

When she is five and thirty she is at the height of womanhood's bloom, the perfect rose, with all her beauty unfolded.

When she is five and thirty she is at the height of womanhood's bloom, the perfect rose, with all her beauty unfolded. Her charms are at their best.

DANCE, EAT, AND DANCE AGAIN.

Music arose with its voluptuous swell, soft eyes looked love to eyes which spoke again.

There's a new fad, and the girls want to know all about it. You may be sure it has something to do with dancing.

A happy thought struck some one between dances to dine. New York was first to adopt it; to see whether it would become a fashionable craze.

This is the way it is conducted: A party at the first table sits down to dine at 7:30 in the evening. While they are enjoying the first course, dancing begins promptly for the rest.

represents the number of courses to be served.

The small tables are placed at the side walls, and accommodate two at each table. Twenty tables are the required number for forty couples.

Dinner courses between the dances are a wonderful beauty preserver. The wonder is that it was not thought of before.

IS JEALOUSY LOVE'S PROOF?

All thoughts, all passions, all delights, whatever stir the mortal frame, all are but ministers of love.

There are men who do not know what to make of it when they get a sweetheart who does not object to seeing them talk and laugh with pretty girls.

By this token he is sure of her. He settles it in his mind that she is ready to accept him quite as soon as he pops the question.

When he meets a young woman who is totally different from all the rest he cannot understand her. He woos her, with ardor, but does not seem able to melt her icy reserve.

Even after she has given her consent that he may ask her father and mother and has gained their approval, he often finds himself doubting whether he will be able to win the girl's heart or not.

She is by no means a prude. The merry, dancing light in her eyes disproves that suspicion at once. She has no fear of any girl friend cutting her out.

Our Teachers.

It may be safely said that many schools in which morals are never taught from text-books, or by formal exercises, furnish a most stimulating drill in the higher and finer moralities every day.

He's a sinister figure that drops like a shadow on the lives of Ned Warner and June Dark, polished, mysterious, his polite attentions seem a constant menace.

Runaway June

By GEORGE RANDOLPH CHESTER and LILLIAN CHESTER

It is a mystifying story, a fascinating story, a story of spellbound thrill. It is illustrated with moving pictures produced by the Reliance Motion Picture Corporation by special arrangement for this paper.

Read the Story in This Paper. See the Pictures.

Runaway June has never before been published. It was written for America's greatest newspapers. In this city it will appear exclusively in this paper.

Beginning Wednesday, May 12th at Star Theatre. 5 and 10c.

THE MARIANNA FIRE WILL BE INVESTIGATED

FLORIDA LEGISLATURE EXPECTS TO PROBE HOLOCAUST

Tallahassee, May 13.—Speaker Hardee has decided upon the personnel of the committee to investigate into the Marianna Reform School holocaust...

Tallahassee, May 13. Members of the legislature and interested Tallahasseeans were guests of the Shell Fish Commissioner at the Daffin Theatre here Tuesday night...

Tallahassee, May 13. "I am not a trust, or not a professional trust-buster, but I believe in this bill and think it should be enacted to protect both the architects and the people from each other," declared Forrest Lake in the House this morning...

Mr. Dancy of Duval opposed the indefinite postponement, and wanted the bill passed, if for no other reason than that the doctors have been given a bill, the druggists a bill, the dentists a bill, and he thought the house should be consistent and either kill all the other bills or give the architects and everybody else who asked it a bill too.

Indefinite postponement failed. Mr. Bryan of Ocala wanted it amended to exempt buildings costing less than \$5,000, saying he offered this in large cities from combining and forming a trust.

Before the legislature gets through with the matter it is reasonably certain that the architects will be taken care of in some proper manner.

Mrs. Gray Dead

Orlando, May 13.—A telegram received in Orlando announced the sudden death of Mrs. Wm. Crane Gray, which occurred at her new home near Nashville, Tenn., Monday night.

FORREST LAKE'S Victory

As fine a piece of work as I have seen done in legislative halls was the job put through by Forrest Lake of Seminole county, when he engineered the Bloxham County bill, from second reading to final passage, in less than three hours...

Mr. Lake met the arguments with the one that is hard to resist that the people living on the territory comprising the proposed new county had a right to manage their own public affairs, if they made it plain that they could do so...

Mr. Crosby of Marion and Mr. Wetzel of Levy put up a good fight, but could not force the adjournment of this house which is strong for county multiplication by county division.

CITY COUNCIL MEETS

City council met in special session May 11, 1915 at 7:30 p. m. Present, B. W. Herndon, president, W. W. Albernathy, J. Adams, J. D. Davison, R. C. Maxwell, Absent H. E. Tolar and C. H. Dinger.

The president stated that the object of the meeting was to consider the report of the city engineer and city attorney regarding the location of a turn basin and boat building establishment by Mr. Sherman on the lake shore.

When this Englishman left the grounds the score stood: New York 1 0 0 0 0 0 0 Chicago 1 0 0 0 0 0 0

He was asked how the game stood by a man outside and replied: "Why ah; really I don't know; I can't say, when I left the bally thing was up in the millions."

Ice Cream Free

The Bonita has inaugurated a coupon system whereby the regular customers can receive the benefit. Each purchase will be checked and when six gallons of ice cream has been purchased you will receive a half gallon free or a pound box of Mally's candy.

Mother's Day Exercises

On account of the rain last Sunday morning Mother's Day exercises of the Presbyterian church were postponed and the Sunday school will have the program next Sunday morning at Imperial Theatre.

CHEAPER FREIGHT RATE ON SANFORD & EVERGLADES

THE GROWERS AND SHIPPERS LEAGUE HAS AT LAST SUCCEEDED IN GETTING A REDUCTION IN FREIGHT RATES

The Florida Growers & Shippers League announces that, as result of recent negotiations with the A. C. L. R. R., reduction in the rates on vegetables from stations shown below, which are embraced in the Sanford district and located on what was formerly known as the Sanford & Everglades R. R., to Jacksonville, on traffic destined to territories west of the Mississippi river will be made effective June 3rd, as follows:

Table with 5 columns: From, Under Ventilation, Under Refrigeration, New Rate Under Ventilation, New Rate Under Refrigeration. Rows include Sipes, Beardall, Beek, Hammock, Moores, Cameron City, Crippen, Palm Villa, Mecca, Brisson.

These rates should have been established a long time ago when the A. C. L. R. R. acquired ownership of the Sanford & Everglades R. R., but through oversight on the part of the A. C. L. R. R. the matter was not detected until the League called it to the attention of the Traffic Department.

THE WOODMEN MEMORIAL DAY

The Woodmen of Sanford, assisted by the Woodmen's Circle will hold their Memorial services and unveiling of a monument at the Lakeview cemetery on Sunday afternoon, June 13th.

At the Baptist Temple May 16th. 11:00 Sermon "The Church that Talks to God." 3:30 Rev. Hynan will preach to the newly organized church at Monroe.

COMMENCEMENT WEEK PROGRAM

The following is the Commencement Week Calendar for the High School entertainments and exercises May 21 inclusive. Monday Night, May 17. A vocal music recital of the pupils of Mrs. Fannie Munson, assisted by Miss Edith Louise Hubbard soprano, Mr. R. R. Deas accompanist and Mrs. Lucien Phillips, musical reader.

Wednesday Morning, May 19. Graduation exercises of Grammar School. Speaker, Judge Geo. G. Herring at the High School auditorium at 10 a. m. Wednesday Afternoon: Grammar School and Primary School exhibits from 3 to 5 p. m. at respective schools. Class Day exercises on High School campus at 5 p. m. Wednesday Night: Expression Recital by Miss Goodhue's pupils at 8:15 at High School auditorium.

COMMENCEMENT WEEK WELL FILLED PROGRAM

the fire with which they begin their farming operations. When they get ready to plow an old field, preparatory to planting, the first thing they do is to "burn it off," thus destroying much vegetable and leguminous matter that would enrich the soil if turned under with a plow.

"We have a law which is intended to protect the forests from fire, but nobody seems to pay any attention to it, and destructive forest fires are of annual occurrence throughout south Georgia.

The following are the contributions to the Sexton Fund for the Lakeview Cemetery for May. Mrs. B. F. Higgins \$1.00 Mrs. W. A. Walton, Palatka 1.00 Mrs. Sam Bell 1.00 Mrs. Betty Brotherton .50 Mrs. J. C. Higgins 2.00 Mr. H. Nickel 1.00 Mr. J. B. Wilcox 1.00 Mr. S. D. Chase 3.00 Mr. Joe Cameron 1.00 Dr. L. R. Phillips 1.00 Mr. B. W. Herndon 1.50

THE SCHOOL INVITED

The graduates of the Star Theatre on Sunday evening will be in honor of the graduates of the High and Grammar Schools of Sanford. The pastor, Rev. F. E. Steinmeyer will preach the sermon. His subject will be "The Beautiful Life."

Delivering Spring Water

H. B. Conroy has his delivery auto all fixed up now for the quick delivery of Elder Spring Water. He thought at first that he would deliver in Orlando only but there was such a demand in Sanford for the water that he was forced to make one trip a day here and started on Wednesday.

Debate Tonight

The Christian Endeavor Society of the Presbyterian church have a debate tonight on the question of the proper way to reach a man's heart. The debate will be held in the Brotherhood room at the Presbyterian church and the public is cordially invited to attend.

SCHOOLS WILL HOLD EXERCISES AT END OF YEARS' WORK

Sanford schools will hold their annual commencement exercises next week beginning Monday with the musical recital of the pupils of Mrs. Fannie Munson. The recital will begin at 8:15 at the high school auditorium.

Tuesday night at 8:15 the Irving Society presents three playlets. Wednesday morning at 10 a. m. will occur the graduation exercises of the grammar school, Judge Herring, speaker.

Wednesday afternoon grammar school and primary schools will exhibit displays of their work in their respective schools from 3 to 5 p. m. Wednesday afternoon at 5 o'clock the class day exercises on the high school campus.

Thursday night, Junior reception to graduates. Friday night, Graduation exercises. Speaker, Dr. N. M. Pratt.

The complete program will be published tomorrow and all of the patrons of the schools and the visitors to the city are cordially invited to attend and investigate the splendid school system of Sanford.

Womans Club

Lakeland, Florida, May 5, 1915. Madam President and Club Members: As the study of "Peace" is an all absorbing one at this psychological moment I am asking all clubs in the state to prepare special programs for the observance of Peace Day, May 18th.

I urge your active cooperation with the teachers of your schools, whose pupils are to be the citizens and statesmen of the next generation, as the future depends greatly upon their education at present.

The appeal of President Wilson to "act and speak in the true spirit of neutrality" comes to us each day with greater force, as we realize the breadth of our world relationship.

Peace is constructive. War is destructive. During a period of Peace, cities are built, desert lands reclaimed, disease and crime decreased, great and useful discoveries and inventions of men preserved.

Peace further civilization. War reverts it to the barbaric state. Peace is accompanied by law, order and justice. War by their opposites.

Peace is constructive. War is destructive. During a period of Peace, cities are built, desert lands reclaimed, disease and crime decreased, great and useful discoveries and inventions of men preserved.

Therefore do the gains of war compensate for sacrifices and expenditures? A careful study of the above outline is earnestly requested.

Very cordially, Mrs. George M. Wright, Chrm. Educational Dept., F. F. W. C.

The above letter was received by Mrs. J. W. Dickens, president of the Woman's Club and will be of interest. It speaks for itself!

Frank Miller Honored Again

Frank L. Miller has returned from Jacksonville, where he has been attending the State Association of Undertakers and Embalmers. He was again elected to the dual position of secretary and treasurer, a position he has held continuously for many years past.

BURNING WOODS A GREAT WASTE

The Herald has often stated that the practice of burning off the woods in a promiscuous manner every spring was bad for the stock although evidently done by the cattle men in order to get the grass going good for the stock.

"Congressman Bill is all right as to the section, but the piney woods are no more. The pines that once covered the hills of south Georgia are gone forever. Occasionally you can find small tracts of a few acres of timber that have been carefully preserved, but with few exceptions the great pine forests that were once south Georgia's greatest source of wealth have disappeared."

reason why the piney woods of south Georgia are fast becoming extinct. While the saw mills and turpentine operators have butchered our piney woods to an extent that amounts to vandalism, fire has kept the pine woods from replenishing themselves.

"Our pine forests might reproduce themselves in twenty years if not subjected to annual ravages by fire, but when the woods are swept by wild fire early every spring the young pines that have sprung up from the mast that fell during the previous fall are killed. In this way the pine forests are kept from replenishing themselves by the regular process of nature.

Burning off the woods seems to be a mania with some people—in the wire grass region, and it has cost this section millions of dollars annually. Many farmers, especially negroes, are also too careless with
