ENGLAND OFFERS NEW RANKING OF TENNIS PLAYERS

Frederick Burrow Comes Forward With Selection Based Upon General Play In 1927 On Grass And Hard Courts

LONDON, Jan. 27.—(INS)—Frederick R. Burrow, who presides over the Wimbledon championships, and in regard to the chief of referees and handicappers in England, has been compiling a ranking list of British players. He bases it on the general play of 1927, on grass, hard and covered courts; and both tournament and match play are taken into account.

Until the British Lawn Tennis Association chooses to compile a ranking list of its own, that of Burrow can be taken as authoritative and practically official.

He gives the list of the first ten men as:

Edward Biggs,
D. M. Greig,
J. C. Gregory,
H. W. Austin,
G. R. O. Croft-Rees,
C. H. Kingsley,
O. G. N. Turnbull,
H. K. Lester,
N. Sharpe,
Ralph Lycott,
Many are Young

Others—Higgs, W. G. Gregory, Austin, Kingsley, Lester and Sharpe are all very young; Austin and Lester are barely twenty, and Gregory and Kingsley are scarcely older.

The extraordinary fact about Biggs being placed at the head of the list is that, last year, he was ranked by Mr. Burrow as seventeenth! But there is no doubt, he justifies his present position. At Wimbledon last year, he only went down to Bustos of France in a set match. He beat Francis T. Hunter, Colonel H. G. Mayes of Canada and H. George of France, and in Davis Cup matches he beat Garrell and Worm of Sweden, and Mathiassen of Denmark. After the first month of the season, he was not beaten by any home player.

Hope For Good Showing
Greg reappears as last year's rightly second on the list. Bustos' business prevented him from playing a great deal, and Gregory, the third man, was almost entirely absorbed by medical studies. Kingsley, who drops from third to fifth place, was handicapped also by sickness. Austin will never be strong enough for high-class competitive play, although he is probably. One tennis player younger than any player England has thrown up in the past dozen years,

Consequently, in the main, future England must look to Higgs, Greig, Gregory, Kingsley, or a Sharpe. To me, however, the quantity will make a better showing for England in 1928 than has been made since the war.

Three Scholastic Athletic Events To Be At University

GAINESVILLE, Fla., Jan. 27.—(INS)—The University of Florida will again be the scene of the three outstanding scholastic athletic events in the state, according to announcement today by Director of Athletics Everett M. Youell.

The annual state high school basketball tournament will be staged in Florida's handsome new gymnasium on March 12th and 13th. Eight sectional tournaments will be held the week previous, the first and second teams in each district event will come to Gainesville composing a field of sixteen entries in the titular class.

The track and field meet which had its inception some thirteen years ago, will occupy the spot light at the University of Florida on April 6 and 7, at which time hundreds of high school athletes from every nook and corner of the state are expected to come here. The event is open and not restricted to sectional winners and runners-up, as in the case of the basketball tournament.

One week following the track meet, the annual state high school tennis championship in singles and doubles will be decided. This event is also open to all, and a big field is anticipated. The dates are April 13 and 14.

The University of Florida takes delight in playing host to the various high school teams who compete to the campus "and a bigger and better" time for all is the goal of athletic officials for 1928.

LIGHTWEIGHTS FIGHT

NEW YORK, Jan. 27.—(INS)—Lope Tenorio, Filipino lightweight, makes his New York ring debut tonight in a ten round bout with Bruce Flowers, colored boxer of New Rochelle, N. Y. Flowers is a 6 to 5 favorite.

Three-Letter Man At Florida Trying Out In 4th Sport

GAINESVILLE, Fla., Jan. 27.—(INS)—Frances S. Appleby, defending champion, today is the undisputed leader in the national amateur 18.1 billiards billiard tournament. He is the only undefeated player. Appleby defeated Jacob Klinger, 250 to 788. Other scores:

Herbert Hammer 250, Edgar Appleby 199, Elvin Edwards 250,

Maurice Parker 218, Klinger 250,

Parker 246.

LEADS TOURNEY

NEW YORK, Jan. 27.—(INS)—Frances S. Appleby, defending champion, today is the undisputed leader in the national amateur 18.1 billiards billiard tournament. He is the only undefeated player. Appleby defeated Jacob Klinger, 250 to 788. Other scores:

Herbert Hammer 250, Edgar Appleby 199, Elvin Edwards 250,

Maurice Parker 218, Klinger 250,

Parker 246.

WOODS VICTOR

SCHENECTADY, N. Y., Jan. 27.—By defeating Arthur Woods of Pawtucket, R. I., in the final block; Frank Talarico of this city today regained the world's pocket billiard championship. Talarico made a high run of 43 and won the final block 127 to 81, giving him an advantage of 450 to 263 for the entire match.

BOTT SCHEDULED

CHICAGO, Jan. 27.—(INS)—Joe Clinton, the Battling Jimmie lightweight who meets Frankie Schaefer of Chicago in the tournament main event of Mike Malley's white city, now Monday night, in Chicago today to finish training. Clinton hopes to make an impressive showing against Schaefer, after which, he says, he will end long, soggy Mandell to a light weight championship match.

OTT SIGNS

NEW YORK, Jan. 27.—(INS)—Medwin Ott, nineteen year old outfielder of the New York Giants, has signed a \$125 contract.

Ott produces 51 per cent of the oranges grown in Italy, the province of Calabria 27 per cent and the remains of Campania 15 per cent.

Operetta "My Maryland" Praised Highly By Tampa Critic In Morning Tribune

Huge 'Bomb Trust' Seen As Instigator Of Recent Outrage

DAWES SUMMONED

WASHINGTON, Jan. 27.—(INS)—A huge "bomb trust," organized to do the bidding of disgruntled "stockholders," was blamed today for outrages against the premises of City Comptroller Charles C. Fitzmorris and Dr. William H. Reid, both powers in the Mayor William Hale Thompson political organization.

The bombs were exploded early yesterday while the two families slept. No one was injured, but the homes were badly damaged. For the past 24 hours an intensive police drive has been under way to round up the terrorists. The bombers were viewed as a direct assault against the administration of Mayor Thompson.

Deputy Police Commissioner William E. O'Connor declared today his investigators had gathered evidence indicating that more than 100 persons were involved in the outrages. They are members, he charged, of a gigantic bombing syndicate. "Arrests will follow at the proper time," said O'Connor.

SENTECE SUSPENDED

ALEXANDER, La., Jan. 27.—(INS)—James A. Christian, former bank president and former superintendent of the Georgia State Anti-Saloon League, today was under suspended sentence in federal court here for embezzlement of National Bank funds.

Daredevil Billy West And Companion To Perform Stunts Tomorrow, Sunday

Bill Will Provide European Trip For Gold Star Mothers

WASHINGTON, Jan. 27.—(INS)—Representatives of the nation's largest patriotic societies went before the House Military Affairs Committee today to plead for the proposed gold star mothers pilgrimage to Europe.

Strong endorsement was given the bill which provides that the government shall bear the expense of a trip to Europe of all mothers and unmarried widows of World War soldiers who are buried abroad.

"This would be the finest tribute that the country could pay to those who sacrificed their husbands sons in the World War," said Rep. Thomas S. Butler (R) of Pennsylvania, author of the bill. The proposed pilgrimage would be made between July 1, 1928, and June 20, 1931, all to make the trip at the same time or in groups of not less than 500. The Red Cross would superintend the pilgrimage. The four women members of the House joined in a plea for the bill.

Sea Battle Reported Between 2 Steamers

HOANG KONG, Jan. 27.—(INS)—The story of a fierce three-hour battle at sea between Czechlovakian steamer Utara and the Nationalist Gunboat Feihs 600 miles off the Shanghai Coast was told today in a dispatch from Tsingtao. The Utara, carrying 90,000 rifles, millions of rounds of ammunition and an armed crew from Japan, was captured by the Chinese gunboat Feihs.

The warrant for \$55,500 was served November 16, 1926, before the Seafire County Court. The warrant, issued by General Chang Tsui Chang, met the gun boat Wednesday.

After the battle, the casualties of which are still unknown, the Utara escaped due to her superior speed. She arrived on Thursday. A court of inquiry, the Nationalist authorities ordered the Utara to be towed to a port, attended a meeting of naval officers and sealed the ship off.

Having spent his life in repairing the cigar shops worn by miners near a coal mine, Thomas J. Spence Bassett, 61, collector of tobacco of Northampton, Mass., died this afternoon four days before his 62nd birthday. An accident occurred at a street car garage when he was in Washington attending a meeting of employees of the company. He was hit by a car and suffered a fractured skull.

Spence Bassett was born in 1864 and had been living near Northampton, Mass., for nearly 40 years.

He had been a collector of tobacco for 40 years and recently had been buying tobacco for a local cigarette manufacturer.

BIBLE VERSE FOR TODAY

CHASTENING—My son, despise not the chastening of the Lord; neither be weary of his correction! For whom the Lord loveth he correcteth; even as a father the son in whom he delighteth. Pro. 3:11-12.

PRAYER—May our chastening, Lord, ever work out for us the precious fruits of righteousness.

PHILOSOPHY

When things come along that bother you some,

Hard words, slander, falsehood, or doubt,

Or maybe it seems you are wounded clear through

And scarcely know what you're about;

If the thing can't be helped, don't ever give in,

Nor let the revengeful fires smoulder,

But just pick it up, with a smile if you can,

And throw it right over your shoulder.

Then having once thrown it don't ever look back.

(A common but very grave fault For looking back sometimes will cause you to turn

Into worse than a pillar of salt.

Don't ever give up! Do the best that you can,

There's power that will aid you.

Be bolder,

And when a thing hurts but you cannot be helped,

Just throw it right over your shoulder!

—Fannie Herron Wingate

HARRY THAW says Hickman isn't inside. He probably just red him a Harry Thaw.

The State Board of Control is facing a difficult task in naming a permanent successor to Dr. Murphy.

As the Times Union suggests, a man should first be able to govern himself before he attempts to govern others.

The trouble with so many leaders of success which begin in the gutter is, that their tops are no higher than the curb.

A despatch says a Michigan man of eighty-nine has eloped with a woman of sixty-nine. It does not tell how these young tykes will get up.

It doesn't follow that because the new servant is very tall she'll stay long. —St. Augustine Record.

Not that because she's new she'll sweep clean.

Dempsey wants a three hundred thousand dollar guarantee before meeting Tunney again. He needn't worry; he's going to get all that's coming to him next time.

The Gainesville Chamber of Commerce will soon launch its annual membership campaign. There is no reason why it cannot more than double the membership of last year. Gainesville Sun.

With Congress in session, one naturally has time to keep up with the Chinese situation, but we noticed recently that Gen. Chen Shu-chiang, and four followers, have been put to death. Being a general in China is almost as bad as running for president in Mexico.

The development of America, our leading industrialists has said, has been due to roads. We do not attribute all of Florida's wonderful growth to its roads but that they had something to do with it there can be little doubt. Constitution of the State Road Department can well be thanked for spending the money, which the people contributed for roads, in an economical and systematic manner.

A Hero Revealed

People are being continually bored by the person who is always on the verge of doing something. Maybe he is going to start an oil company and make a million dollars or perhaps he is just going to catch that bird out who said something to be proud of, we'll say. But the only trouble he is going into a huge mass of unrecognizable pulp. In any event he is going to do something.

Then there is that other kind of person who "sets" could when —. You should see me at his age. Why, I could dance a jig on my hands, and turn a double flip in the air." Or the fabled story teller who used to catch mountain lions with his bare hands and hitch them to his ox cart to drag it over the Rocky mountains. Proverbial liars, you know, who are comparatively harmless.

Such a one drifted into Mexico City the other day with a thrilling, heart-rending, soul-splitting drama all ready to unreel. He had been captured by bandits who planned to hold him for an enormous ransom. They were going to kill him if his rich American employees did not promptly meet their terms. One night they all slept except four who had been left to guard him.

Our hero, a Lyman Barber, waited until all was quiet. Then with a short rod in one hand and a sashparilla bottle in the other, he began to work upon his captors. He beamed the first with the rod, and drowned the second with the sashparilla, cut the throat of the third with the broken bottle, and throttled the fourth with his bare hands. There were other gory details worthy of a Hickman or Hotelling.

For a while, you remember, it was in the newspapers with a rather heroic flourish. This quadruple murderer was something to be proud of. Had he not dispatched four villainous Mexican brigands and saved his life and family? Something to be proud of, we'll say. But the only trouble is that the Mexican Chief of Military Operations conducted an investigation, with the following result:

"I always believed that only in Hollywood were such interesting stories evolved as that of Lyman Barber. All that Barber actually did was to offer his guards money, which they accepted with pleasure, and then guided him to safety. Such people as Barber always talk too much."

Beware Of The Mule

Some time ago The Herald noted with interest the vindictiveness with which a stray mule set upon a particularly offensive automobile, completely demolishing it. At that time we agreed that the mule undoubtedly had been sufficiently provoked many times by the sudden blare of klaxons, the dust which had been raised to settle in his eyes, the ditches into which he had been crowded, and other indignities to no end.

The mule, all self-respecting red-blooded men, we believe, will agree, that first time had a perfect right to register his disapprobation in no uncertain terms as he very promptly proceeded to do, but we do not feel that he is warranted in continuing his onslaught until all machines which run on four wheels have been destroyed. A lesson is all that is needed not complete annihilation.

Yet we find him not so satisfied. No longer less than Thursday he met near the road near Dublin, Georgia in an automobile which contested the right of way, and won by a knockout in the tenth of a fifteen round, no decision bout. The automobile was carried out of the ring with wreathed tendons and broken headlight.

Next he encountered in a caterpillar-catched wrestling match an automobile which was crowding him for room. He climbed on the running board, stuck his head through the windshield and got a half Nelson on the steering wheel, throwing the driver out and breaking two of his ribs. The referee awarded the decision to the mule.

Then in a free for all, half a mile further down the road, another car came into contact with the mule, who clung to his hind legs and was hurled bodily into a map by ditch. The windshield was broken, inflicting painful cuts to the occupants who were glad enough to escape with their lives.

Literature Group Of Woman's Club Presents Historic Entertainment

"Under Five Flags", a most
unique historic as well as interest-
ing entertainment was presented
Thursday afternoon by the Litera-
ture Department of the Woman's Club
from four to eight o'clock.

Mrs. Margaret Young was general
chairman of this affair.

The spacious club auditorium
had been divided into five sections
representing the country and flag
of that respective group. They were
Indian or Primitive, Spanish,
French, Confederate and Modern
America. As one entered the build-
ing they were ushered into a
drawing room of a modern home,
beautifully furnished with reproduc-
tions of Colonial furniture.

Here the hostesses, Mrs. Francis E.
Bolz, Mrs. W. L. Henley, and Mrs.
E. T. Tolar greeted their guests.

Tea and coffee were poured
throughout the evening at a
beautifully appointed table, over
laid with an exquisite cloth of cut
work, and centered with a silver
basket filled with red sweet peas
and baby breath, with four red cer-
tains burning in silver holders at
either side. Presiding at the till
service were Mrs. R. E. Tolar and
Mrs. W. Theodore Langley, while
coffee was poured by Mrs. Francis
E. Bolz and Mrs. J. C. Bennett.

Three very modern young society
buds, Misses Lucille Bolz, Dorothy
Lawson and Marion Waldron, gave
a program of the popular songs of
the day on a victrola.

The Spanish setting was most
complete. Against a background of
palms and moss, stood the famous
"Fountain of Youth" so eagerly
sought by Ponza de Leon.

The walls were hung with quaint
Spanish relief maps dated 1631, and
other Indian relics were displayed.

They later gave the Indian
war dance.

From 6 to 8 o'clock a supper con-
sisting of popular dishes of the
various countries, each course rep-
resenting a different country, was
served at small tables. From Spain
was "Spanish Rice or Tortilla".

Roast beef, creamed potatoes,
gravy and hot rolls, came from the
Colonial or British, while the French
served salad and "Champagne".

"Sillibub" the popular dish of the
South was served as dessert, while
Modern America served tea and
coffee. During the supper hours
an orchestra composed of pianist,
Mrs. C. H. Cook, first violin, Miss
Pauline Cook, second violin, R. Bert
Frazier and cello, Joe Reedes, ren-
dered a beautiful program of auto-
mata of all countries.

Longwood

Mr. and Mrs. McFarland have
arrived in their car from Girard,
Kansas, to spend their third winter
here. They are registered at the
Orange and Black Hotel.

Friends of Mrs. Francis Tucker,
who recently underwent an opera-
tion at the Florida Sanitarium
at Formosa, will be glad to know
that she is reported to be improv-
ing slowly.

George Hickle, prominent busi-
ness man of Lancaster, O., accom-
panied by Mrs. Hickle are here to
spend their second winter in Long-
wood as guests of the Orange and
Black Hotel.

Robert Entzminger and J. E.
McFarland have returned from an
extended hunting and fishing trip
to Camp Taylor.

Mr. and Mrs. E. V. Larue of
Plymouth, Vt., who have been
spending the past few days as the
guests of Mr. and Mrs. E. J. Patton,
have started a tour of the state before
returning home. Mr. Larue lived
in Longwood 38 years ago and
this was his first visit since he
moved to Vermont.

Harry Beckham and Harry Cram-
er have returned from a motor trip
to Sylvester, Ga., where the former
owns a large plantation.

Recent arrivals include Miss Ella
Holt and Mr. and Mrs. Curtis, all
of Forestville, Conn.

At the recent Southern Poultry
Show in Orlando a Wyandotte cock-
rel owned by Mrs. Niemeyer won
first prize in its class and J. A.
Bistline exhibited a bird that was
designated the finest in Florida.

At a recent exhibit in Chicago of
the Silver Wyandotte Club of
America, Mr. Bistline's entry was
judged the best bird ever shown
at the Chicago Cattlemen.

Men of the Five Hundred Club
were guests Wednesday evening of
the ladies at the Library, Mrs. J. A.
Cettingham and Mrs. R. G. Fraser
being the hostesses. Six tables of
players enjoyed the occasion. Sandwiches,
coffee, and cake were served.

Mrs. J. P. Hearst, Mrs. R. S.
Entzminger and Bobbie Entzminger
were the guests of Mr. and Mrs.
McFarland last Sunday at dinner
at the Orange and Black Hotel.

One of the most delightful social
contests given here this season
was the birthday party tendered
Tuesday by Madames Allen Hud-
son and Mrs. Allen Stewart in
honor of Mrs. A. R. McKinstry.

The guest of honor was presented
a prettily decorated basket of beau-
tiful gifts. Refreshments of fruit
cake, pineapple cream and coffee
were served by the hostesses.

Mr. and Mrs. Charles T. Fuller,
formerly of this city but now of
Atlanta, Ga., arrived here Friday
evening to spend the weekend at
the guests of Dr. and Mrs. E. D.
Mobley.

Flora and George Buddlestone,
students of University of Florida
are spending the week end here
with their parents Mr. and Mrs.
John Buddlestone at their home on
Laurel Avenue.

The many friends of Mrs. Otto
Schmid will regret to learn of her
serious illness at her home on Jew-
ell Avenue.

John Schirard, who is attending
the University of Florida at
Gainesville, is spending the week-
end here with his parents Mr. and
Mrs. John Schirard on Tenth Street.

Mrs. Margaret Peters left Fri-
day afternoon for Lexington, Va.,
where she will attend the dances
at the Washington-Lee University.

She will be joined there Sunday by
Miss Olive Newman, who is attend-
ing Martha Washington Seminary
at Washington, D. C., and they will
be the guests of Mrs. M. H. Mahry.

Mrs. Charles G. Gray and
daughter Miss Anna Jean Gause-
way of Anderson, S. C., will arrive
here Saturday to visit as the guests
of Mrs. Gauseway's daughter Mrs.
J. Maurice Allen at her home in
Rose Court Apartments. On Sun-
day Mrs. Allen and guests will mot-
or to Ocilla and Silver Springs
for the day.

Mr. and Mrs. Glenn E. McCoy,
and Mrs. E. Kasyk Wight and
Mrs. O. J. Pope motored to
Daytona Beach, Wednesday evening
in the meeting where they attended the
meeting of Chapter No. one of the O. E.
S. of Daytona Beach which time the
Grand Matron of the Grand
Chapter, Mrs. Angie Jamison
of Miami, made her official
visit.

Mrs. T. C. Banks of Lakeland,
who spent a short time in Sanford
conducting a class in "Woman's
Work" at the Methodist Church,
left Friday afternoon for Jack-
sonville where she will hold sim-
ilar classes.

Mrs. J. N. Robison and guests
Mrs. J. E. Bass and Mrs. E. R.
Campbell of Atlanta, Ga., and Mrs.
Howard Overlin motored to Win-
ter Garden, Thursday for the day.

America Spends Huge Sum Trying To Regain Health Impaired By Carelessness

LONDON, Jan. 28—(INS)—New figures show that—Aeroplane pay out on account of sickness a mountain of gold equal to half the entire earnings of British industry. And Sir W. Arthur Lane, editor of the "New Health" magazine in an exclusive International News Service interview says that practically the whole of this expenditure is because the people fail to follow primary health habits.

America's huge sick-expense, a sum of over two billion dollars, is many times the amount England spends for illness. Yet with ten million Americans being treated annually in "free clinics," the large expenditure indicates only a portion of the actual sickness from which the nation suffers.

Actually, there is sick person on one out of ten American homes every day in the year—a person sick enough to require medical attention.

These facts come from the statistician's figures of the Metropolitan Life Insurance Company.

Expert Comment

In comment on them, Sir Arthur Lane said:

"The tragedy of these facts is that the sickness and expenditure is almost entirely unnecessary. The expenditure in Britain of course is nothing like it is in America, but as for actual sick, the British toll in proportion to population is just as large as the American."

"We have our sick because we do not take the simple health precautions to prevent sickness. Malady's strongest barrier is a healthy body. We destroy the health of our bodies by our unsound habits; eating habits, sleeping habits, exercise habits, and elimination habits. We eat improper food and take improper exercise and we become constipated. Constipation is the directed source of more physical degeneration than any other one disease. It is at the root of most of present-day sickness. Elimination should occur after each meal as was the practice with the primitive peoples. When this has become the popular habit, the amount of sickness and the sick-bills of both Britain and America will see sharp decline."

Doctors' Fees

Sir Arthur Lane then commented on the present doctor fees in England and America. They were far lower in England than they were in America. He thought, however, that high charges were entirely justified where the patient could afford to pay. In England, he said, the doctor graded his fee according to the income of the patient.

This method of fee graduation is being abandoned in America, he said. All American doctors fix a minimum fee for his services, and the only time he goes below this is in his "free clinic" work. This in a precarious condition," he said, "method of feeing has been found impractical; people have falsified incomes in order to receive small doctor-bills."

This leaves the middle-class man in a precarious condition," he said. "The fixed minimum charge of good physicians are often too high for him to pay. And he does not like to use the 'free clinics'."

A movement has been recently announced at the Cornell Medical School Clinic in New York where there is organized a special clinic for the "middle class." Here the best medical treatment is available at a "reduced rate." And it is said that this movement is pointing the way towards the ultimate solution of the "doctor-fee" problem.

Parisian Folk Ride Subways To Avoid Bad Winter Weather

PARIS Jan. 28.—The recent cold weather which has hit Paris—the coldest it has been for ten years or more—brought out some subways on how Parisians keep warm.

Many of them took the subway and rode as long as they could, making changes whenever necessary in order not to pay more than a thousand francs. Tramps were so numerous that the police had a busy time keeping them moving but they could not succeed in getting them out of the warm, stuffy underground passages as long as they had a green ticket in their possession.

The National Library was probably never more crowded in the history of its existence. Every person who could get into the large reading room asked for any kind of book he could get his hands on and those who were not accustomed to reading chose those of large size, behind which they barricaded themselves and had a comfortable snooze.

The cafes of course did a thriving business, hot drinks being much cheaper than fuel, but clients were not invited to tarry long at the tables, now that the days of composing romances and poems while sipping one's coffee are long past.

When approaching London from Cologne, recently, Captain W. Armstrong, an Imperial Airways pilot, ran into daytime fog so thick, he said, that he seemed as though a huge black curtain had been drawn across the sky, shutting London out completely.

RADIO MESSAGES TO BE PRESERVED FOR LONG PERIOD

Fans In The Future May Hear
Voices Of The Dead Coming
Over Ether According To
Report Of Marconi Official

LONDON, Jan. 28—(INS)—Radio messages sent around the world today by the "beam" system may be picked up fifty or one hundred years hence.

Radio messages sent out from the Marconi beam stations at present circumvent the world in just a quarter of a minute, and the suggestion is made that these messages, distributed at enormous power as they are, must travel round and round the earth—possibly billions of times before they become exhausted.

Thus it is that some radio fan of the future, "listening in" on his sensitive multi-wave set, may hear the voice of person long since dead coming over the ether.

Messages Never Lost

"Beam messages are never lost," an official of the Marconi Company said in discussing this theory. "So far as we can say at the moment there is no limit to the number of persons who, once having sent a message, can receive it again."

Imagine what that means. Real voices from the grave of many famous men who in the ordinary course of Nature cannot expect to be alive 100 or even fifty years from now.

Their voices are still wandering in the ether waiting to be picked up by a sufficiently sensitive instrument.

There is virtually no limit to the powerful beam wave. Sometimes it travels round the world three times—75,000 miles—in three-sevenths of a second, according to the Marconi experts.

There is no wastage in the system, the same masts serving for distribution to North and South America, India, South Africa, or Australia. Radio beams follow certain defined tracks round the earth, and New York, and Cairo are on the same circle, for instance.

Many Words Sold

The extraordinary advance in radio telegraphy which the new beam stations illustrate has hardly yet been realized by the layman in the opinion of Marconi. The short beam wave requires less capital and much less power than the long wave transmission. Farside transmission is possible over any distance, while telephony has been proved to be feasible in tests.

Nearly thirty-nine million words a year are now being sent over the various systems at speeds of anything up to 200 words per minute. The introduction of the system had greatly increased staffs, who have to be specially trained.

A side light on the success of the system is that at recent shareholders' meetings, the various cable companies have reported revenues owing to the severe competition now being offered. Proposals are abroad that some system of coordination be adopted, but at the moment they are little more than suggestions.

Unemployment Is Causing Worry To Boston Labor Union

BOSTON, Jan. 28—With more than four thousand persons idle in this city, the Boston Central Labor Union has designated Sunday, March 1, as the day on which it will discuss the unemployment situation here.

With unemployment at its peak the union, after much discussion at a recent meeting, decided to hold the conference under the supervision of the executive board and board of control of the Boston Trade Union College, which group had been considering the question and suggested the conference.

The conference will be open to the public, it was announced, and representatives of labor and capital, social-welfare societies and other groups will be invited to offer their aid.

Among those invited are President William Green of the American Federation of Labor and representative of the Boston Chamber of Commerce.

Carrying a large cargo of American apples, a ship recently arrived in Buenos Aires, Argentina, with the fruit in good condition and demonstrated that fruit can be shipped from this country to South America.

Uncle Sam's Battleships Will Face Aerial Bombs During Spring Maneuvers

SAN DIEGO, Jan. 28—(INS)—Uncle Sam's battleships will be in a new sort of "enemy" during the spring battle practice off Hawaii in April. Besides looking out for deadly submarines, the torpedo of dashing destroyers and the big guns of super dreadnaughts, the fleets will face a new foe—a foe against which no real defense has been provided.

This new striking power of the navy is the lightweight aerial bomb—a bomb dropped with deadly accuracy and dropped not from the huge, slow moving airplanes which carry tons of explosives but are easy targets for anti-aircraft guns and opposing combat planes, but instead dropped by fighting planes of extreme speed, and so maneuvered as to be almost uncontrollable by guns stationed at sea level.

Under direction of Rear Admiral J. M. Reeves, commanding the aircraft divisions of the battle fleet, bombing practice under entirely new conditions are being carried out off San Diego, and today news leaked out that the experiment proved that the new method was amazingly effective in point of accuracy, damage to the target and safety to the bombing planes.

Speedy Planes

Hitherto the efforts of the military, both army and navy, have largely concentrated upon increasing lifting power and flying range, and the production of planes that can carry tons of explosives over long distances.

These planes were successfully developed, but it was found that in so far as their use against an

CLEVELAND WILL START OFF WITH SEASONED TEAM

Bradley And Evans Pin Their
Hopes Upon George Uhle To
Lift Team To 1st Division;
Hurlbut Staff Looks Good

CLEVELAND, Jan. 28—(INS)—The enemy fleet was concerned there were many drawbacks. They were unnecessary and cumbersome to evade fighting planes, and to slow down to the low level necessary to attain accuracy in bomb placements, and regain a safety lift before the shipboard gunners got their range.

A really effective method of equipping the speedy combat planes for dropping lightweight bombs has now been worked out.

In actual practice, the planes, floating some 5000 feet above a target being towed by a racing destroyer, suddenly swooped down at a speed estimated at 200 miles per hour, sighting as they came dropped their bombs at an altitude of 2000 feet and zoomed upward out of the range of anti-aircraft guns, the entire action taking not more than four minutes, and performed at a speed which practically eliminated all chance of sea-level guns scoring a hit.

Use Small Bombs

Bombs weighing less than 25 pounds were used in the tests, and an average accuracy of something more than 50 per cent was recorded by the moving pictures taken of the exploding bombs, despite the fact that the target was dragged at 26 knots and a strong breeze was blowing, it was said.

These bombs are of sufficient power to play havoc with the deck of a battleship, and might possibly decommission a destroyer. But the same planes are capable of carrying 100 pound bomb each, sufficient to render helpless the fleet's dreadnaught if rightly placed.

MRS. COOLIDGE'S FAVORITE SALAD

HAWAIIAN pineapple, the lusty youngster of the large and growing family of canned foods, is being used more and more in salads. Among those who recommend this delicate fruit for this purpose is Mrs. Calvin Coolidge, who proclaims a pineapple and cheese salad her favorite.

It is conceded that Cleveland Indians' stars rest largely with the hurling staff. If Uhle, Emil Levensen, Willis Hudlin, Miller, and Joe Shantz come up to expectations, it is believed that Indians' will keep out of the second division. With the exception of Uhle and Levensen, each of the fore-going performed in creditable style last season. Levensen, like Uhle could not start.

Unknown Quantities

Heading the list of "unknown quantity" in the pitching department are Walter Brown, purchased from New Orleans; George Grant, who last season showed excellent form during his short period of service, after joining the team in mid-season; Underhill, from the East Texas League; John White and Wes Farrel, two newcomers; Harder and McKain, two youths from the Mississippi Valley, and Billy Bayne, southpaw drafted from Greenville, via Forton.

Joe Sewell again will assume the burden in the catching department, with Autry, Myatt and Huddleston to rescue. Grover Hartnett will sit in the capacity of adviser to the battery work. One of the first four mentioned will probably be released after the team is set under way and in this connection it can only be predicted that it will not be Sewell.

Martie Rogers Peckinpah expected to consider himself an extra fielder, will present the following: Boles, Hill, and one-half extra fielder; Hardin and one-half extra fielder; and one-half extra fielder. These ingredients are mixed, and arranged in lettuce cups. About a cup of mayonnaise is poured over the salad.

Other Salads

Another salad named Yum Yum is a recipe like this: heat two cups of crushed Hawaiian pineapples; add the juice of one lemon and a cup of sugar. Stir until sugar is dissolved. Sack two tablespoons of gelatin in one-half cup cold water ten minutes. Add to mixture. When cool and beginning to set, add one cup grated American cheese and one-half cup dried cranberries, one cup very thick mayonnaise, two cups whipped cream, and the dissolved gelatin. When well mixed, pour into a cold, earthenware dish, and pack in equal parts of ice and salt for four hours. Serve on lettuce with additional mayonnaise if desired.

Pineapple tid-bits come all ready to use in just the sizes that one would cut sliced pineapple into for salads, so there is a real saving of time in their use. A pineapple and chicken combination uses one cup drained pineapple tid-bits, two cups dried cooked chicken, three-fourths cup dried celery, one-third cup mayonnaise dressing. These ingredients are mixed, and arranged in lettuce cups. About a cup of mayonnaise is poured over the salads.

Salads Again

For a sweet salad glazed pineapple, which is so much used as

sauce, and serve on lettuce leaves with dressing.

Pineapple Salad Espanol: Remove seeds from green papaya and put in boiling water for one minute, drain and dry. Mix three tablespoons cream or cottage cheese with three tablespoons of drained crushed Hawaiian pineapple, one-fourth teaspoon salt, five grain cayenne, one sliced olive finely chopped, and one-half pimento chopped. Pack in green peppers, chill, and serve.

A New Salad

To surprise the family, some new salad and one which like, there is this pleasant surprise: combine one and one-half cups cream cheese, two spoons cream, one-quarter teaspoon salt, dash paprika and three drops onion juice. Beat until stiff and creamy. Cut the cavity of each end of the cream cheese and fill the cavity with the mixture. Then dip a few at a time in the beaten egg, and coat with a cup of crushed nuts. Serve on lettuce with additional mayonnaise if desired.

Pineapple tid-bits come all ready to use in just the sizes that one would cut sliced pineapple into for salads, so there is a real saving of time in their use. A pineapple and chicken combination uses one cup drained pineapple tid-bits, two cups dried cooked chicken, three-fourths cup dried celery, one-third cup mayonnaise dressing. These ingredients are mixed, and arranged in lettuce cups. About a cup of mayonnaise is poured over the salads.

EQUAL RIGHTS WOMEN'S PLEA TO STATESMEN

Public Demonstration Staged
By Latin-American Women
Before President Machado

HAVANA, Jan. 28—(INS)—The first public demonstration for women's rights before the statesmen of the Americas was staged today in connection with the international celebration of the birthday of Jose Marti, the hero of Cuban independence.

If one of the newly acquired players can fit into the middle pasture, and hold his own with the "stick," Summa and Jamieson can be depended upon to hold up their end.

The outfit which consists of Homer Summa, Charley Jamieson, Elton Langford, from Des Moines; John Gill, from Shreveport; Ernie Speer from Rock Island; Frank Wilson, drafted from Milwaukee; and Ed Morgan, from the Southwest Association; Langford, Morgan and Wilson appear to be the clowns of the newsmen. Summa and Jamieson are veterans, playing right field and left field respectively. As in 1927, the big out-field problem for the Indians is center.

Conditt, World War veteran, has indicated in his infrequent and guardedly discussions of his plans that his motoring will be furthered by a direct propellant, the action of a highly explosive material working directly against the air instead of the usual propellant. He says that he has spent fifteen years investigating his theory of interplanetary flight.

Conditt said that he will utilize a slow burning but highly explosive fuel to propel him through the first thirty-five miles of his flight. He announced flight and that he will depend upon planetary and magnetic attraction after he speeds out of the zone of the earth's attraction.

He will carry with him an oxygen tank capable of maintaining life for forty hours, and attempt the trip alone.

The outfit which consists of Homer Summa, Charley Jamieson, Elton Langford, from Des Moines; John Gill, from Shreveport; Ernie Speer from Rock Island; Frank Wilson, drafted from Milwaukee; and Ed Morgan, from the Southwest Association; Langford, Morgan and Wilson appear to be the clowns of the newsmen.

Summa and Jamieson can be depended upon to hold up their end.

The conference itself suspended practically all business in homage to the Cuban patriot. Due to the pressure of its work, only the International Law Commission met.

The delegates of all the republics assembled in the imposing Aula Magna or grand hall of the University of Havana for special services in memory of Marti.

By the end of next week it is hoped there will be sufficient reports in hand from the various commissions for the conference to meet in a second plenary session to record its first concrete achievements. Thereafter, it is expected, the full conference will be able to meet regularly to discuss and approve the recommendations of the various commissions.

The Laflamme has extended its lines outside of Germany to Scandinavia, Morocco, Austria, Switzerland, Czechoslovakia, and Poland.

The German government has realized the full advantages of commercial aviation, and has demonstrated its faith in the potentialities of the airplane by ready com-

As in the case of England, the United States, the Luftwaffe occupied itself more with the transportation of passengers and merchandise than demands speed, economy, and has been successful.

The policy of the French government in regard to civil aviation is not dissimilar to that of the United States.

The appropriation was approximately \$60,000,000, and during this time the French airplanes flew well over 100,000 miles on routes.

But no country has proved deficient in this respect.

There are four main French routes.

Paris to London, Paris to Constantine, Paris to Casablanca, by way of Prague and Bucharest with a branch from Prague to Warsaw, and Toulouse to Casablanca.

At present it is possible to travel from Paris to Constantinople by air in 36 hours.

An approximate saving of two one-quarter days over the methods of transportation.

By means of these routes, France is connected with her North African Empire and the Equatorial Africa.

Brought within a few hours of the British Isles and the interior cities of Europe, for the air routes of Europe, the air routes of France are timed so that possible for passengers to do at terminal cities to planes of other nations.

But France, England and many are not the only countries which have taken active steps to foster development of civil aviation.

Soviet Russia, despite its scattered population and immense area, has established a network of air routes which
