The Lottery Racket

All law-abiding citizens in general, and merchants Farmers in U. PROTECTION AGAINST SKIDDING The scientific tread design gives longer nonskid mileage and stops your car up to 25% quicker.

PROTECTION AGAINST BLOWOUTS Firestone Tires run up to 28 degrees cooler be-

cause every fiber of every cord in every ply is saturated with liquid rubber by the Firestone patented Sum-Dipping process. This counteracts the internal friction and heat that ordinarily causes blowouts.

PROTECTION AGAINST PORCTURES

Two extra layers of Gam-Dipped cords under the tread add strength to the tire and give extra prolection against punctures.
