

Various Industries Play Large Part In City Business Life

IS REPORTED

Besides Its Farming Operations Sanford Presents A Decided Commercial Aspect

Especially an agricultural community, Sanford is not without other industries which play a big part in the business makeup of the city. A railroad, crate mills, public utility companies, an awning shop, a boat works, and a tannery are some of the industries that are helping to make Sanford a commercial center as well as a farming community.

Inclusive of the passenger station, freight station and other railroad properties, the Atlantic Coast Line Railroad Company owns property here composed of car shops and round houses, valued at approximately \$100,000. Close to 200 men are employed in these shops. The 200 employees receive around \$30,000 per month in wages and in addition between \$75,000 and \$100,000 is paid to engineers and other train employees who live in this city.

The inspection records show that about 30 percent of this crop is of marketable size and quality. Florida bulbs are finding a welcome in northern markets, and are rapidly replacing those formerly imported.

Federal regulations require that bulbs be inspected for nematodes and bulb flies. For the first time this year nematodes were found on Florida-grown narcissus. Ten nurseries were affected, but these bulbs have been treated, so far as possible.

The state has approximately 40 miles of industrial tracks which supply railroad facilities for the shipping section near this city. Shippers bring on the main line between Tampa and Jacksonville.

Sanford has been connected by several branch roads with Trilby, Oviedo, South Mount Dora, Leesburg, Astor, and Apopka.

The cattle manufacturing plant of E. B. Zachary which can be seen immediately west of Sanford, influences the Zachary Veneer Company and consumers over ten thousand dollars worth of material each year, having a daily output of over 1,000 crates. This company employs 150 men and women, and purchases shipments of timber from surrounding areas of approximately 100 miles.

Besides the local crate manufacturing plant, Mr. Zachary also has under his management a similar plant, with modern electrical equipment, near Palatka. He is the president of the Southern Po-

Problems Of Farm Will Be Discussed At October Meet

GAINESVILLE, Sept. 23.—Sanford's county and home demonstration agents will hold their annual extension workers conference at the University here Oct. 3-8, according to an announcement from A. P. Spencer, extension director. They will discuss the farm problems of their counties among themselves and with federal and state extension specialists.

Principal among the speakers, whom they will consider, is Dr. A. F. Lever, co-author of the Lever-Lever Act which makes federal funds available for cooperative extension work. Mr. Lever is a representative of the Farm Board. He will tell them about the southern cotton region to the business of the south.

Other workers from the Federal Extension Service will be at the conference. They will be C. L. Chambers, southern field agent; G. W. Washburn, senior economist; R. P. Parker, senior dairy家; Mrs. G. P. McLean, extension economist; and W. F. Smith, agent in animal husbandry, Georgia.

Others who will attend the conference are Dr. John J. Tigert, president of the University; Dr. Howell, State extension director, and other state extension agents.

The conference will be concerned with topics affecting the general agricultural situation, especially concerning a living wage and economy of

farm life. There are 27 county demonstration agents in the state.

There are 27 county demonstration agents in the state.

PLANT CITY—Harrison & Bond Co. will open fertilizer, insecticide and crate material plants here soon.

SCHOOL FARM WORK IN YEAR IS REPORTED

Agricultural Department Of Seminole High Has Done Much To Help Husbandry

KODAK'S NOTE: The following is a report issued by the Agricultural Department of the State of Florida concerning the work accomplished during the year ending June 30, 1931.

Agricultural Course Content:

The agricultural curriculum adopted and placed into operation in 1929-30 was continued in full content during this year and with all agricultural class work based on the pupil's project program and the type of vocational farm training selected by the pupil. During this year this system of individual training and study has given clear indication of its value and efficiency by (a) Giving the boy definite training in a selected field. (b) Developing high individual interest. (c) Developing self thinking. (d) Enabling the instructor to give closer supervision. All agricultural problems studied during the year have been based on actual farm needs and conditions as determined by proven experimental data and local farm surveys.

Agricultural Classes Taught:

Three types of classes for boys were conducted in this county by the department this year. (1) All Day Classes; Two such classes were offered at Seminole High School, Sanford, with a total registration of twenty boys. (2) Day Unit Classes; Two such classes were offered this past year, one at Oviedo High School, Oviedo, with six boys registered and one at Lyman High School, Longwood, with nine boys registered for the work.

(3) Part Time Classes; One such class composed of boys who had dropped out of regular school work was organized at Sanford with five boys registered.

Project Work:

Each pupil registered in this department was required to plan in detail a long time project program which would provide actual practice in the type of farm vocation selected by the pupil. This project program was required to be of such size and scope that the pupil might reasonably expect \$150.00 net income the first and second years, \$200.00 the third year and \$300.00 net income the fourth year. No subject credit was allowed for the agricultural course unless the project requirements were met. The instructor has personally met the parent or guardian of each boy taking regular work in this department. A total of 260 inspections and conferences were made by the instructor with an accumulative list of projects the boys home project work.

As an accumulation of projects planned by pupils for the past year is as follows:

Cattle, 4½ acres.

Tomatoes, ½ acre.

Poultry (Egg production) 200 hens.

Poultry (Pullet production) 2-550 chicks.

Cabbage, ½ acre.

English Peas, 2½ acres.

Ornamental Nursery, 1000 plants.

Hogs (For meat), 9 head.

Escarole, 4½ acres.

Bunched Vegetables, ½ acre.

Field Corn, 15 acres.

Citrus (Renovation), 1 acre.

Bees, 30 colonies.

Peppers, 2 acres.

Watermelons, 2½ acres.

Supervised labor on school farm, 4 boys.

Total net labor income for 21 boys completing work—\$3930.90.

Average net profit per pupil completing work—\$187.18.

Shop Mechanics:

Regular shop instruction and practice was given to all first year pupils in tool selection, sharpening and general care.

In addition to wood-working and farm machinery repair problems,

the advanced students were also given some instruction in concrete work.

A model farm shop consisting of work bench fully equipped with wood vice, iron vice, and shop tools was installed on the school farm as a working demonstration of the need and efficiency of such a shop on a farm.

Through the Future Farmer Chapter a contest has also been inaugurated with the idea of promoting the home farm shop idea.

THE "BIG TREE" AT LONGWOOD

ADVICE GIVEN TO HUNTERS IN GAME REPORT

T. L. DUMAS

Red Ants Are Called Bad Enemy Of Quail; Duck Season Is Cut To Period Of 30 Days

With the approach of the hunting season in Florida, suggestions contained in the bulletin issued by the State Fresh Water Fish and Game Department upon various topics about game will be of interest to local hunters. Extracts from the report are as follows:

"Baby-killing gangsters may be found elsewhere than on the sidewalks of New York. Many infants of the quail world become victims of the blood-thirsty gangsters of the flocks—the red ants, according to Mr. H. L. Stoddard, a recognized authority on matters pertaining to quail. Their deadly work is done just as the infant quail are emerging from the shell; the ants swarm into the shell through the opening made by the chick and devour the newborn in tank."

This destructive work of the ants has been very noticeable in the Tallahassee, Florida-Tampa, Georgia region during the present hatching season, according to Mr. Stoddard.

"Under the recently amended federal regulations the open season for doves in Florida is from Nov. 20 to Jan. 31, except in Monroe, Broward and Dade Counties. The season in these three counties is from Sept. 16 to Nov. 15.

"This season conforms to the season provided by the Florida law. However, it will be necessary that the county commissioners of three counties mentioned request the State Game Commissioner to prescribe an open season in those counties before doves can legally be shot.

"There is a provision in the Florida law that requires the State Game Commissioner to prescribe an open season in any county on ducks and doves consistent with the federal law at the request of the board of county commissioners.

"Last year a number of counties requested an open date on ducks and doves prior to Nov. 20, the opening date of the general hunting season under the state law. Since the federal law now conforms to the state law this particular provision of the state law will be ineffective except as it applies to the dove season in Monroe, Broward and Dade Counties.

"Another change in the federal regulations is that the shooting of doves over baited areas is prohibited. The Florida law has prohibited this since 1927.

"The Biological Survey announced that the open season on ducks, geese, brant and coots has been reduced to 30 days for 1931. This rather severe reduction is due to the serious shortage of ducks caused by extreme unfavorable conditions in the breeding areas in the United States and Canada, according to the Biological Survey and others more or less connected with conditions.

"No doubt lack of water on the breeding grounds is a contributing factor to the present shortage in the supply of ducks. However, we do not believe that this is the principal factor. Furthermore, we believe that this factor has been obscured or minimized.

"We believe that the real cause of the present depleted condition of the duck supply is that too many ducks have been killed in recent years. This is due to the increased number of shooters, more destructive firearms and ammunition, use of live decoys, but the most destructive of all is the practice of duck clubs slaughtering over baited areas. We expect to see a still further reduced supply in 1932—whether the breeding grounds are dry or not. In fact, we expect a continuous decrease each year until some provision is made to reduce the annual kill.

"It seems that nothing very greatly worthwhile will be done toward this end until Congress does it or the supply is reduced to the danger point toward extermination and the conservationists demand the necessary corrective measures.

"If you expect to continue to have any game to shoot or any fish to catch you have got to wake up and do something. Most of you think that when you pay for a license that you have done your part. For a few dollars you expect the state to furnish you protection.

(Continued On Page Two)

MARKET GROUP PLAYS PART IN AIDING FARMER

Sanford-Oviedo Truck Growers Is Co-Operative Association Of Celery Raisers

Almost 14 years ago, on July 3, 1918 to be exact, at a time when war clouds were casting their gloomy shadows over the greater part of the world and when it seemed as though the cause of the Allies might be lost, a group of prominent Sanford farmers, having the foresight to realize that the great war could not last forever, organized a co-operative association of growers, which has grown constantly from that date, known as the Sanford-Oviedo Truck Growers, Inc.

During the first year of the new concern's existence approximately 800 cars of celery were handled through its channels of marketing. The number of cars per year has increased steadily and during a recent season over 1900 cars of celery, lettuce and other varieties of produce were handled by this organization.

The policy of the Sanford-Oviedo Truck Growers, Inc. has been to co-operate with Seminole County growers as much as possible and to handle their products at low costs.

Handling charges to growers on all produce sold F. O. B. have averaged less than 10 per cent per package during the past few years. The surplus funds have been used to build up the corporation's credit, pay cash for materials furnished growers, and to buy warehouses, celery washing plants, and other equipment.

The association has always done its own marketing, mostly of F. O. B. sales and an average of better than 75 per cent F. O. B. sales has been established during the past few years.

All applications for membership must be passed on by the Board of Directors, and only those farmers who have made moderate success of their farms are admitted. They have long known that mature was one of their best fertilizers. Only recently have they started to grow it in large quantities from vetch and Austrian winter peas. Last fall over 150,000 pounds of vetch and pea seed were planted, and so far this year over 100,000 pounds have already been sold to the farmers of 11 west Florida counties.

In nearly every case where farmers have conducted demonstrations, in cooperation with county agents, the yield of corn following the cover crop was from two to three times that on neighboring plots. Similar results have been obtained with other crops.

Mr. Smith believes that the seed should be planted during October, preferably just after a good shower. He recommends 20 to 30 pounds of hairy vetch per acre, and 30 to 40 pounds of peas. The land need not be especially prepared, but should be given about 40 pounds of basic slag or superphosphate per acre before planting, unless it was fertilized heavily last year. The seed should be inoculated and immediately sown. The land should then be disked or flat broken covering the seed three to five inches deep.

The seed may be inoculated simply by spreading them out, pouring on a mixture of two parts sirup and one part water, stirring, pouring on the culture, again stirring, and then adding enough soil to take up the stickiness. Soil from a field on which one of the same crops was grown last year is to be preferred, as it will contain the nitrogen forming bacteria.

Robert Cobb also joined the organization in 1919 and was made secretary and treasurer in 1921. Other officers besides Mr. Hutchinson and Mr. Cobb are: T. F. Adams, president; and J. J. Bally, vice-president; and the directors are: W. S. Hand, George Herbst, R. R. Pippin, Henry Witte, S. B. Clair White, V. M. Green, George E. Balmer, C. F. Branen. Among well known employees of the organization are included Mrs. B. F. Smith, Miss Mell Whitner, and Ira Thompson, while the field men are Collier Brown and Ruby Laine.

Among prominent farmers who were largely responsible for the organization in 1919 were: Rex Packard, G. Chamberlain, H. B. Lewis, J. D. Hood, H. G. Dietrich, Joe Conner, R. L. Grier, J. F. Hickson, C. L. Flowers, and G. F. Smith.

About three hundred negroes are employed in the fields during the season and about 75 are engaged in the three wash houses which are operated by the company.

Jefferson Eulogized In John Davis Speech

RICHMOND, Va., Sept. 23.—(A.P.)—Harry C. Wimbley and John M. Crowley were held for grand jury action yesterday in connection with the drowning last Thursday of Mrs. Wimbley and her daughter in a canal alongside the Potomac river.

Police announced this step after a coroner's jury ruled the woman and 3-year-old child, Wilma Tracy, met their death on a fishing trip in the company of Wimbley and Crowley. Both were booked on murder charges. Wimbley declined to testify.

A 14-page statement by Crowley, accusing Wimbley of plotting his wife's death for \$10,000 insurance money and planning to burn her father and mother, Mr. and Mrs. Patrick Tench, as well as the child at their Dendron, Va., home, was read to Wimbley before the inquest.

STUART—U. S. Government opened bids for dredging approximately 175,000 cubic yards of the St. Lucie River between No. 2 locks and Palm City bridge, in this area.

FORT MYERS—W. N. Brock took over local agency for Shell Oil Co.

IMPORTANT CEDAR CREEK GAMES CONTESTS WILL DEFEND CHAMPS IN PLATINUM AT THE TROLL.

William Cuthbertson
Preparations For
Defending Title

NEW YORK, Sept. 22.—

One of the most important boxing contests of the coming season will be contested over WABC, the Studio City Broadcast Station, Saturday, Sept. 25 and Oct. 2, at 8:30 p.m., between the North Park, California, and the South Park, Columbia, teams. The North Park, according to information available from Broadcasters' News Service of California, is represented by a team which is known familiarly as the "Wichita Indians." The South Park team which has 18 to 20

young men, will be from between the towns of the Bronx and the University of Southern California, to be played at West Point on Saturday, Sept. 25. It will conclude its initial round, according to the present schedule, with a confrontation of the Georgia Tech—University of Oklahoma game at Atlanta, Ga., on Oct. 2.

Both will travel using their roads of miles during the football season, to come to action with

opponents with a total combined record of 16 wins. He will come west to Los Angeles, Chicago, Houston, Oklahoma, and Atlanta, south to Atlanta, and north to New Haven.

While the other two sides of the football tournament, it is not yet known definitely what games will be broadcast outside of the state, although it is apparent that Atlanta will receive one of three outstanding contests held for the title.

While the members of the ultimate champion, Atlanta, are members of professional and semi-professional football teams, it is not known if the team will be from a combination of two or more teams.

The schedule follows:

Sept. 25—New York, Bronx, Bronx Park.

Oct. 25—Northwestern U. vs. University of Illinois.

Oct. 27—New York, Bronx, Bronx Park.

Oct. 29—Troll vs. Indians, New Haven.

Oct. 31—Broncos vs. New Haven, Sherman, Ill.

Nov. 2—Broncos vs. Illinois, Chicago, Ill.

Nov. 4—University of Oklahoma vs. Atlanta, Georgia.

Nov. 6—Broncos vs. Atlanta, Georgia.

Nov. 8—Broncos vs. Atlanta, Georgia.

Nov. 10—Broncos vs. Atlanta, Georgia.

DOCTOR SPENCER DELIVERS SPEECH ON CONSTITUTION

Address Part Of Program In Observance Of National Week

REPORTER'S NOTE: The address of Doctor Spencer, the speaker at the observance of Constitution High school as part of the program in observance of Constitution Week.

"It is well in this day, the sixteenth of September, to meditate on our Constitution, for 141 years ago today the Constitution of the United States was given to the people."

"One hundred and 41 years ago, hardly a century and a half! How short a time in the life of a nation! We are a young, young nation, the present problems left us to go back in memory to the beginning of our national life. There were 13 states trying to find their place in the new statehood, and proposed union. The distance from Boston to Philadelphia measured in units of transportation was greater than today. Communication was slow, scarce, common interests lacking. Dissension and turmoil were everywhere. It was indeed a grave situation; there was much concern about the fate of the young nation."

"Finally the Continental Congress was convened to call for a convention to draft a new constitution. The call was never forth, in May, the convention was assembled and he labored at its gigantic task.

"There were 55 delegates, half of the members were leaders of that time. Three members had sat in the Congress on the Stamp Act. All 55 members had signed the Declaration of Independence. All 55 members had been officers in the Revolutionary Army; all but 12 members had sat in the Continental Congress. Sixty-four of the members were members of the present Congress; seven members had had experience as governors. This was an illustrious group both in knowledge and practical experience in government. One member said, 'Experience must be our only guide.' Reason made up the majority of the work of the convention. The work of the convention was to draft a new constitution for the present situation. To George Washington was given war and administration; to Benjamin Franklin, diplomacy; to Thomas Jefferson, finance; to James Madison, law; to James Madison, philosophy of government.

"From the master minds of the men who framed the first document of the United States, the welfare of the people, not the glory of the nation; the spirit of union through cooperation. It is this spirit which is the secret of its operation. It is the spirit of the Constitution that has been the constant inspiration to our growing nation.

"Modern life has grown complicated and confused; great and serious issues have arisen. The special interests of business contend for their rights, and often overshadow the welfare of the public until it seems as if the Constitution of the people of the United States may no longer function. But if we as a nation hold the spirit of the constitution as an active force into modern conditions, the way of securing the welfare of the public will be smooth because that spirit is a eternal principle of human association."

"Not many years ago a man presented a petition for a resolution to prohibit the importation of cattle from South America. Let there enter a number mind in this automobile country who made use of the principle of quick combustion. Damage suit was brought against him, and our legislature decided that it was prudent the eternal principle of nature. Not many groups can with safety divert to themselves special interests to the detriment of the whole. It is therefore important that the spirit of our Constitution is an eternal principle of human association and it is sufficient to solve any national issue."

"Whittier in his poem, 'Launching a Ship,' expressed beautifully the importance for the success of Democracy, which, as true for the present situation, as it was when he wrote his poem."

"They sail on, O! Ship of Democracy, with all its fears, With all its hopes of future years, Is launching breathless on thy fate."

WILL PLANT COVER CROP

LAKE BUTLER, Sept. 22.— Last year only four 4-ft corn clubs were in Union and Bradford counties planted winter cover crops to prevent erosion. This year, however, their results were so gratifying that 40 boys will plant a cover crop this fall, reports County Agent J. T. Dyer.

FRANK EVANS

EFFICIENCY SEEN IN OFFICE OPENED BY RUTH B. OWEN

Business-Like Activity Characterizes Her Working Hours

MILAMI, Sept. 22.— Business-like efficiency characterized the office hours of Congressman Ruth Bryan Owen, who opened her temporary headquarters in the Everglades Hotel Tuesday. The Florida congressional representative was received by 100 constituents yesterday. A. M. and action an hour and a half had intervened approximately, to person.

Volunteer assistants took charge of the preparation, and answered the congresswoman's numerous telephone calls. The quickness and dispatch with which Mrs. Owen conducted the interview was remarked by those who visited the office over two hours.

A desk had been arranged for Mrs. Owen, who was given a large basket of gladioli. The congresswoman was seated with several buttons. Her only accessories were a small umbrella and a pair of sunglasses.

She greeted her callers with a smile and handclasp, offered such information as she could, referred advice and agreed to act in matters which came under her jurisdiction. On the business of the morning, she practically the whole afternoon, she was engaged in the task of introducing the congresswoman's visit, ranging from requests for information about West Point and Annapolis appointments to the presentation of a protest against a proposal of the federal farm board.

None of her secretaries was available, but she was assisted by Mrs. Owen's maid who remained with her. Even those who advanced kindly to present a gift or to introduce themselves were also received with an expression of pleasure.

After concluding the interview, she again took up her work in the office, which will speak in Bayfront Park at 8 P. M. today under the auspices of the Woman's Democratic Club.

BUICK CAR IS USED IN SYRIAN DESERT WORK

DETROIT, Sept. 22.— A Buick car with truck attachment accommodates passengers, small baggage has recently been added to the famous Beirut-Bagdad transportation line across the Syrian desert, according to officials of the line.

The car, which cost \$1,000, was built by the Buck Motor Co. This line, known as "The Desert Mail,"

now operates five Buick cars, as well as trucks, and the cars are also operated over an extension of the line that has been made to Teheran, the Persian capital.

He gave \$300 bond for his appearance in federal court.

The buyer was in sacks wet with sea water.

GOOD COVER CROP

THE SANFORD HERALD

ONE OF THE most successful cover crops ever sown in the state is being raised in Marion and Putnam counties, and plastic mulch is being used.

VISITORS and many others

are invited to see the

exhibit at the State Fair

in Lakeland, Fla., Aug. 28-Sept. 3.

RECENTLY the Marion County Soil Conservation Board held a meeting at the Marion County Agricultural Experiment Station in Ocala.

MEMPHIS will host the 1932

National Soil Conservation Conference in October.

American Legion Auxiliary WOMEN'S QUOTA OF MEMBERSHIPS

Sanford Chairman Of Organization Tells About Expenditures

The American Legion Auxiliary has exceeded its national membership goal for 1931 and has set a new all-time membership record. Mrs. James Huff, membership chairman of Sanford unit of the Auxiliary, has announced. The Department of Florida has exceeded its 1930 membership by over 900 members. The total enrollment for the organization is now 406,464, more than 8,000 members above the figure set as this year's goal and 33,357 members above the highest previous membership record. The department membership for Florida is \$618. The gain over last year's national membership is 42,062.

"A total of \$422,929.00 has been expended by the American Legion Auxiliary this year in its work for the disabled World War veterans, according to Mrs. Daisy Lewis, chairman of the Rehabilitation Committee of the local auxiliary unit. This figure, based on reports to the auxiliary's national rehabilitation committee, includes only cash expenditures and does not take into consideration large amounts of material contributions. Mrs. Lewis explained.

The expenditures have included \$26,000 to the American Legion's rehabilitation work, \$69,525.12 for Christmas gifts to veterans in government hospitals, \$260,095.62 for necessities and comforts for hospitalized veterans, \$28,128.01 for family relief, and \$17,270.00 for occupational therapy activities among the disabled.

It is almost impossible to place an accurate estimate on the value of the rehabilitation work done by the women of the auxiliary for the disabled veterans. Mrs. Lewis

ALEX R. JOHNSON

Mr. Johnson is head of the vocational training department of the Seminole High School and has achieved a nation-wide reputation for his work in connection with agricultural studies.

Detroit, Sept. 21 to 24 will find an elaborate program of educational and social events awaiting them, according to Mrs. J. H. Hintermeyer, president of the local auxiliary unit. In addition to the American Legion convention events, many special features have been arranged by Detroit for the women convention guests. The social affairs of the auxiliary convention will begin Sunday noon Sept. 20, when the annual Fidac Breakfast will be held at the Gross Point Yacht Club, with many high officials of both the Legion and auxiliary in attendance. The Past Presidents' Party Dinner, another big social event will be held at the Detroit-Leland Hotel Sunday night.

Monday morning the auxiliary women will have places at the spectacular opening of the Legion's national convention in Olympia Arena, and Monday afternoon the auxiliary convention will open with beautiful ceremonies in the Masonic Temple. Monday afternoon speed boat races on the Detroit River will entertain the convention guests, and Monday night there will be a yacht parade on the river followed by fireworks and dancing. The national music contests of the auxiliary will be held at the Masonic Temple Monday night.

Information Is Given Easter Lily Planting

GAINESVILLE, Sept. 23.—Easter lily bulbs planted in late September should be in bloom for the Easter season, according to Harold Mowry, associate horticulturist with the Florida Experiment Station. They do best on a sandy loam soil, and should be planted 3 to 4 inches deep. He recommends two applications of a general bulb fertilizer; possibly a 5-5-5 or a 5-7-5 analysis.

Protection from cold may be necessary in the northern part of the state, he says. A frame covered with canvas will usually suffice, but in severe colds some source of heat under the canvas may be necessary.

Doctor Jull believes the immedia-

J. C. HUTCHISON

Mr. Hutchison is sales manager of the Sanford Oviedo Truck Growers and takes an active interest in civic affairs.

Outlook Said Bright In Poultry Industry

GAINESVILLE, Sept. 23.—With the price of corn and wheat lower than it has been for several years and the price of eggs on the increase, the outlook for the poultry industry appears bright, in the opinion of Dr. W. E. Jull, poultry specialist of the U. S. D. A.

Another point in favor of the poultryman is that heavy culling of farm flocks during the past spring has reduced the number of laying hens by about 20,000,000.

At the same time, fewer chicks were hatched last spring than usual.

Doctor Jull believes the imme-

COLLEGE OF THE WILL OPEN THIS NEXT SATURDAY

Oldest Institution Of Higher Learning In State Making Plans

WINTER PARK, Fla., Sept. 23.—According to the announcement of President Hamilton Holt, dormitories of Rollins College will be open for new students on Saturday, Sept. 26. "Orientation Week" will officially begin Monday the 28th, on which day there will be a meeting of the faculty at 4 P. M. Opening exercises, entrance examinations and Lower Division registration will last until the 30th. Thursday, Oct. 1, will see registration of upper-classmen and holding of first classes in the 47th session of Florida's oldest institution of higher education.

Saturday, Oct. 3, at 8 P. M., the Y. M. C. A. will tender a reception to the new students and new faculty members at Recreation Hall. A week later, at the Woman's Club, there will be an evening of entertainment for the students.

Continuing the announcement of fixed College calendar dates for the year, President Holt announced the Thanksgiving vacation Nov. 26, and Christmas holiday from Dec. 18 to Jan. 4, when the mid-winter term begins.

The future of the poultry industry is to fairly good, particularly for those who produce eggs and high-quality poultry for market, for hatcherymen who produce high-quality chicks, and for farmers and commercial poultrymen who give their flocks the best management and who practice efficient culling.

HOLLYWOOD—Ebsary Foundation Co. built 150 feet of reviewing platform on this side of slip at Port Everglades.

JOHN T. COOK

Mr. Cook is attorney of Sanford who gives a good deal of his time to civic movements. He is a prominent Kiwanian and worker in the Baptist Church.

Founders' Week, the gala time of the entire year at Rollins, gets under way with a meeting of the Trustees on Feb. 17. On the 19th, the Bachelor Essay Contest, Sandspur Luncheon, Class and Fraternity reunions, and the Phi Beta Kappa meeting, are held. On Feb. 20 comes Alumni and Winter Park Civics Day, with dance and civic celebration. Sunday, the 21st, is a day of prayer for colleges. Literary vespers are held and President Holt "publishes" his famous "animated magazine", Feb. 22nd, Washington's birthday, is Founders' Day, on which is held a great convocation and the President's reception.

March is the mid-year semester ends and the spring recess begins, lasting until Mar. 28. On May 7 is the State Intercollegiate Athletic Meet; May 31, meeting of the College Trustees. June 3 will be Baccalaureate Sunday, and Monday, June 4, 1932, Commencement.

Citrus Of Delray Attend Meet For Ruth Bryan Owen

Citrus From Cuba Will Be Admitted To U. S. Via Stake

DELRAY BEACH, Fla., Sept. 23.—An enthusiastic audience gathered at the Delray Theater Saturday to hear Mrs. Ruth Bryan Owen, congresswoman from the fourth Florida district. The meeting was under the auspices of the Kiwanis club, with Lauren C. Hand, chairman of the club's publicity committee, in charge.

On the platform with Mrs. Owen were Mr. Hand, J. Alwyn Bell, president of the Kiwanis club; Fred Aiken, mayor of Boca Raton; H. T. Holloway, mayor of Boynton, and Dr. John H. Cason, Sr.

Dr. Cason in introducing Mrs. Owen paid tribute to her father, William Jennings Bryan.

Mrs. Owen gave a review of her work as a representative and showed where she had kept her promises when she was a candidate for office. The three words that Mrs. Owen wishes were out of the Florida vocabulary are "boom, hurricane and fruit fly." In addition the statement was made that the fruit as now shipped is ungraded and packed as to practically eliminate the possibility of contamination with leaves or other portions of the plant which might be the means of introducing the citrus blackfly.

Foreign citrus imported to the United States must pass inspection and the permanency of the provision is contingent upon continued freedom of the fruit from any infestation or leakage which might introduce the blackfly. In 1923 provision was made in the fruit and vegetable quarantine for the importation of Cuban citrus fruit at New York or other northern ports. As a result of five surveys by entomologists of the department of agriculture in Cuba and the Isle of Pines during the fruit seasons of 1923 and 1924, provision was made Sept. 23, 1924, for the entry under permit at Key West of citrus from Cuba, including the Isle of Pines, when shipped in sealed refrigerated truck cars for immediate transportation, entry, and inspection at St. Louis and Chicago.

BUTTER DECREASES

Butter production decreased only slightly during the calendar year 1930 as compared with 1929, but more marked decreases are reported for ice cream, condensed and evaporated milk by the Bureau of Agricultural Economics, U. S. Department of Agriculture.

BUTTER ANGUS BULLS

CRAWFORDVILLE, Fla., Sept. 23.—Four purchased young Angus bulls have just been brought to Wakulla County by as many farmers and County Agent Henry Hudson. They were purchased from J. B. Simpson, Micahay, who is one of the state's leading Angus breeders.

Consider This ONE Fact

Concerning the difference between co-operative and independent marketing . . .

As a grower you naturally are interested entirely in the profit you get out of the fruit you raise.

The Florida Citrus Exchange, owned and controlled by the growers, is operated on a non-profit basis. All of the profits accruing from the sale of your fruit beyond the actual cost of operations, comes back directly to you.

The independent shipper, simply because of the nature of his business, is naturally interested only in the profit he can make for himself from the fruit of the growers aligned with him.

The independent shipper is in direct competition with you, as a grower, in the race for the profit from your crop.

As a member of the Exchange you are cooperating with growers whose output represents 45% of the total citrus output of the state, in getting the fullest possible measure of returns for your crop.

Propaganda, illusion, hokum or anything else notwithstanding—this one fact should be sufficient to enlist your membership in the Exchange for your own protection.

THE NOMY-GNOMES

By JEANNE SACK

Dog clasped and unclashed his hands. "Can I give you something to make them happy?" he said, repeating the woman's question. Then looking at him he said, "Guess I'll sit here and think it over."

The woman who kept house for the king at the pearl castle stretched out her arms and said something that sounded like "Hohs pokus" to the two little Nomy-Gnomes who were resting under a fruit bowl on the center of a large table—but of course, they weren't sure.

Instantly a restful, green, easy-chair arose from nowhere. And because the woman had stretched out her hands when she had uttered those magic words, they were now resting on the back of the chair.

"Be seated," she suggested to the king. And she pushed the chair nearer to him so he wouldn't have to exert himself.

King Ogg sat down thoughtfully. "Let me see," he said, as he stretched out his legs. "Let me see," he repeated softly, as he clasped his hands and rested his chin on the arms of the chair. "Let me see, he started to say for the third time, but, before he finished, his eyes were shut, and in another minute, he was sound asleep.

Tinkie and Lucky sprang to their feet. If they had been taller, they would have upset the fruit bowl against which they had been resting. But only a single orange in that bowl was disturbed, and it rolled across the table, off and into the king's lap.

"Where are you going?" the woman called, as the Nomy-Gnomes ran about and about excitedly.

"We want to make a lot of noise," the Nomy-Gnomes told the woman. "We want to wake him up." They pointed to King Ogg, who by this time was puffing loudly and regularly, as sign that he was fast asleep.

The woman walked to the edge of the table. "Come here," she said firmly.

The Nomy-Gnomes sat down close by, their legs dangling over the edge. "The king is sure to think of a way to make you grow. Please be patient."

Lucky shook his head. "I'm sure he's already forgotten all about us. He's fast asleep."

"A good sleep always clears his head," the little woman explained. When he wakes up he will be able to think more clearly."

But then the king awakened with a start. "What's this?" he asked as he picked up the orange which had rolled into his lap.

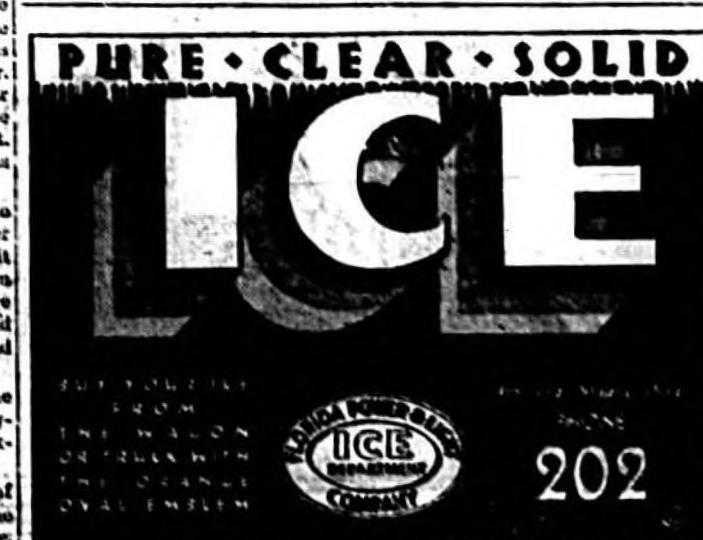

Looking up at the woman, he noticed the two tiny chaps, "Look-ho," he shouted excitedly. "He had suddenly remembered the matter in hand. "I have been thinking that orange juice," and looked at the piece of fruit in his hand, "will help them grow. At any rate, we will feed it to them until it does."

Construction on Road No. 23 connecting Pensacola and Camp Blanding by way of Pensacola Beach, will be completed about October 15.

GENE SARAZEN AT THE GOLF COURSE

Among the many prominent professionals who have enjoyed the hazards of Sanford's golf course, are Gene Sarazen, one time U. S. professional champion. He pronounced it as one of the best on which he had ever played.
