Why are the American people so far ahead?

Wherever world-travelers come together, the amazing comforts of Americans are sure to come in for discussion. Why is it that the average American lives like a king?

To be sure, he has more money to spend than any other person in the world, but then he insists on spending it to bring better living to himself and family. Who knows what a subtle, but influential, part advertising plays in putting the American people ahead?

Advertising, by showing us new and better things, keeps us from being satisfied with "well enough."

Advertising, by making us want more, wakens the springs of action within us to get more. American advertising is a pretty substantial explanation of American advancement.

Read the Advertisements. They call you to better things
