CHICAGO, Mar. 26.—William D. Shepherd, accused of giving him typhoid germs, must remain in jail while his appeal pending trial, chief justice Jacob Hopkins of the Illinois court ruled late yesterday.

CHATTANOOGA, Mar. 26.—W. H. Bennett, 58, division freight agent of the Southern railway, at Rome, Ga., went on the witness stand in Hamilton county criminal court Wednesday to deny that he knew anything of the death of his aunt, Miss Augusta Hoffman, or had anything to do with such a death.

A second panel of taleymen was selected this afternoon while the jury was attending the funeral. Five jurors were accepted yesterday. Superior Judge Newell Jennings, offered drawn an added panel of 30 men to be in court today.

WEST PALM BEACH, Mar. 26.—All Florida conference comprising more than 100 business men of this state opened this morning to consider plans for continuous national promotional publicity of Florida.

Frank Bailey, first baseman, and Ray Thompson, have been turned over to the local club on options. Bailey is released on a three day option while a season option prevails in the case of Thompson.

The immediate future calls for a government action, Federzoni must now conciliate the industrialists, promising them a favorable commercial treaty with Germany, which the latter is unwilling to conclude.

WASHINGTON, Mar. 26.—A monster air exposition, attended by prominent world aviators, will be held in the United States in 1927, if the present program of the National Aeronautic Association materializes.

BERLIN, Mar. 26.—There have been no executions in Berlin since 1921, and it is now being alleged that the number of brutal murders has increased in the German capital because of the disposition of the courts to impose sentences of life imprisonment instead of death.

Altamonte Springs Seeks Next State Press Convention... With the object of securing the next year's convention of the Florida Press Association for Altamonte Springs...

TALLAHASSEE, Mar. 26.—Florida has the most economically administered government of any state in the Union, in the opinion of J. C. Luning, state treasurer.

Orlando — Ferris — Walker Lumber Company, with valuable timber lands in this vicinity to build sawmill.

The regular fortnightly meeting of the regular council of Boy Scouts of America will be held in Sanford jointly with the weekly meeting of the Chamber of Commerce.

Arriving here aboard the "Sensadaga" a U. S. Engineer Department vessel belonging to the Charleston District, Secretary of War and several government officials were shown about Sanford and finally taken to Mt. Dora by Mrs. J. B. Calder.

PARIS, Mar. 26.—Ambassadors of the council met this morning but took up only routine affairs. The much talked list of questions which were to be put to the allied war committee concerning ways and means of obligating Germany to respect the disarmament clauses of the Treaty of Versailles is still in embryo.

RICHMOND, Va., Mar. 26.—After being assured by attorneys for the Chesapeake & Ohio Railroad that no steps will be taken toward leasing the road until it could be adjudicated by Virginia courts, Chancery Judge J. H. Taylor denied a petition of minority stockholders for an injunction to prevent the stockholders from meeting Mar. 30.

The Sanford High School baseball team will open the inter-sectional season Friday afternoon with a game that begins 7th Daytown on the Municipal Baseball Field at 4 o'clock.

PARK PROJECT RAPIDLY FINDS FAVOR IN SOUTH

Texas Takes Lead by Buying 51 Tracts Containing As Many As 31,000 Acres To Be Converted Into Parks

Florida Women Are Given Credit

Modifications of Texas Idea May Be Put Into Effect By Other Southern States

WASHINGTON, Mar. 25.—Interest in the acquisition and development of state park systems has increased greatly in the south during the past year, according to observations made in a survey of state parks throughout the country, now under way for the National Conference on State Parks by its field secretary, Raymond H. Torrey.

This survey was begun in the south because of the desire of John Barton Payne, chairman of the conference, formerly secretary of the interior, and now head of the American Red Cross, to encourage several promising movements in the direction of initiating state park systems.

The lead in state park acquisition and improvement for public recreation has been taken by Texas which, within a little over a year, has moved to a position among the leading states in this respect. A total of 51 tracts of land, containing 30,000 acres, has been donated for park purposes, and another gift of 25,000 acres in the Guadalupe Mountains is expected within the year.

The progress made in Texas interested governors of other states to whom it was explained by Mr. Torrey in the course of his survey. Governor Brandon of Alabama immediately appointed a committee of public spirited citizens to study a park plan and to report to him so that he may recommend a law at the next session of the legislature. One of the resources in Alabama that might be used for conservation or recreational development is school lands. These are very extensive and might be devoted to such purposes without prejudice to any income they bring the schools.

Governor Fuqua of Louisiana said he would be inclined to favor a bill establishing a commission to solicit gifts such as in Texas, and such a measure will be introduced at the next session by the Louisiana State Parks Association. Governor Whitfield of Mississippi is studying a conservation program, with consideration for recreation and with particular reference to transfer of school lands for the purpose. Governor Walker of Georgia was interested in Texas plans of creating a forestry board empowered to include recreational use of lands it might acquire by gift, transfer or purchase.

In Florida, where the State Federation of Women's Clubs has been chiefly responsible for the acquisition of such state parks as

now exist, there is a strong movement for a definite policy of increase in such facilities, either in connection with a forestry commission or as a separate body. Tennessee is interested in the possibility of a national park in the Great Smokies on its eastern border, but is also planning state parks, an important unit of which would be the shore of Reelfoot Lake, the water surface of which the state now owns.

North Carolina has lately added to its state parks a fine beach property of 400 acres near Beaufort, which was transferred to the state without cost by the United States war department. Opportunities for the acquisition of a large number of these surplus military reservations, in the Atlantic coast and Gulf states, which the war department desires to sell, are now open.

WCBD Zion (344.5) 8 quartet, celestian bells, piano harp, cello, vocal, reader.

Regular Tags Urge For Tourists Going Back Home In Cars

A "friendly top 40 Florida motor clubs of Chambers of Commerce" has been sent out by Ernest N. Smith, General Manager of the American Automobile Association, with headquarters in Washington, D. C.

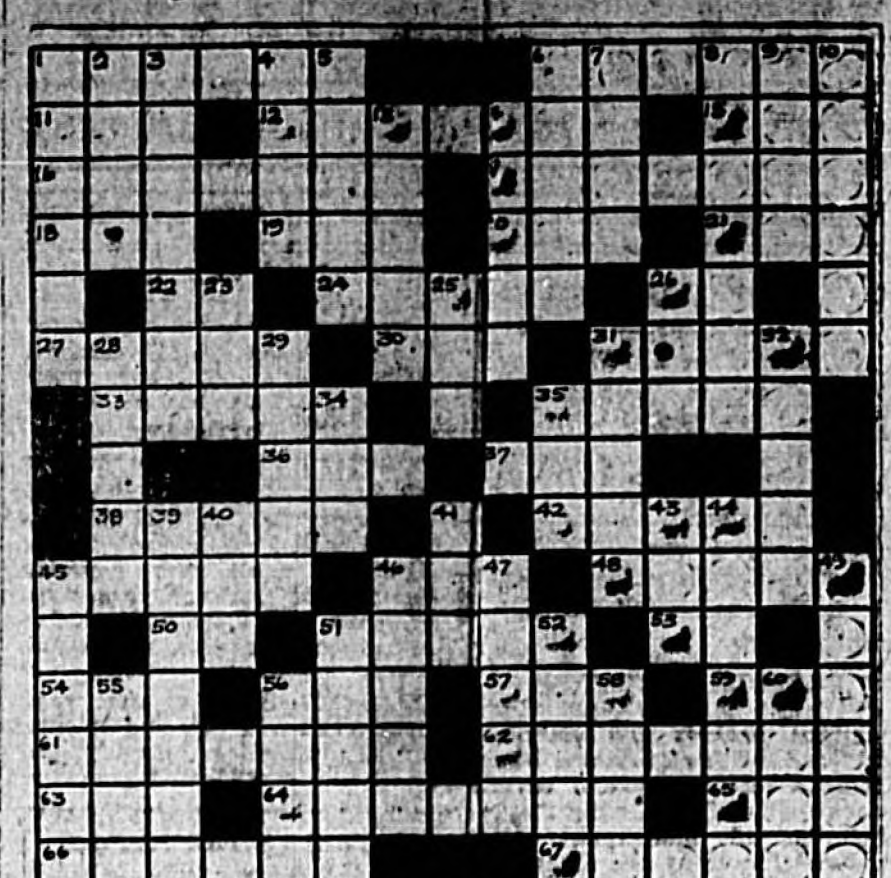

The advice is in the form of a circular letter calling attention to the action of some Florida Organization Representatives in telling north-bound tourists that their short season automobile tags issued in Florida will get the tourists considerable difficulty, and a good deal of indignation.

Mr. Smith advises that the non-resident type of license will not be accepted by some northern states, and erstwhile Florida visitors are enraged when arrested, fined, and made to secure tags from their home state while enroute.

The suggestion is advanced by Mr. Smith that real services can be performed by informing tourists that to avoid arrest and fine, regular 1925 tags from Florida must be carried, or tags from their home state, or some other state.

The American Automobile Association is anxious to assist the travelers in every way on their homeward journey, but cannot justify the use of temporary tags. The Sanford Chamber of Commerce, which has been distributing these tags, has written Ernest N. Smith for further information in the premises, so that accurate information may be given to nonresidents who have applied for tags.

Today's Cross Word Puzzle

Crossword puzzle fans, who think nothing is too hard for them, have a right to boast if they complete this correctly in a half hour. For the average fan, it may take a much longer to solve. For this is a real puzzle.

THE FLORIDA SOCIETY OF AMERICA WILL PAID \$20,000 IN CASH For the Name of a Product which Best Suited for Manufacture in Florida

SOMEWHERE there is someone who knows, or can find, what product is best suited for manufacture in the state of Florida!

Ten thousand dollars in cash will be paid that person for his idea!

Ten thousand dollars more are to be distributed to the public for other good suggestions as to what products should be manufactured in the southernmost state!

The Florida Society of America, sponsors of the Florida Industrial Contest, wants to know what these products are! The Society, through its founder and president, Joseph W. Young, has set aside the grand sum of \$20,000 as cash rewards for those who will help to find the solution to this problem.

The Florida Industrial Contest has been inaugurated by the Florida Society as a guiding beacon to the assured industrial progress of the state.

**SPEND
EASILY TO TEST
SCIENTIFIC IDEAS**

**Will Spend \$40,000 On Dam
To Test Reliability of Dam
Type; Will Be Part Of A
\$35,000,000 Flood Program**

LOS ANGELES, Mar. 28.—An experimental dam, to be built at a cost of \$40,000, only to be destroyed to test the latest engineering theories in relation to the constant angle arch type, will be constructed soon on Stevenson Creek, a tributary of the San Joaquin river, north of here. Funds for the work have been provided jointly by Los Angeles county and private interests.

The object of the experiment is to obtain data expected to prove of great value in the construction of dams in the Los Angeles county flood control program, in which approximately \$35,000,000 will be spent. On several of these projects the use of the constant angle arch type is anticipated.

It is the theory of many engineers that constant angle arch type will permit the use of thinner construction than has been tried heretofore. If true, this would reduce materially the cost of dams. The experimental dam will be 140 feet long and 60 feet high when the first tests are made. Special instruments will be inserted in the concrete to test stresses, deflections and temperature changes as the load of water is increased. After this information is obtained, the height of the arch will be run up to 100 feet. The water then will be allowed to rise to the point at which the dam may be pushed out of position, thus establishing the ultimate resistance of this type of construction.

THEY'RE TEAMMATES AGAIN

Here we have Steve O'Neill, catcher (on the left), and "Sad Sam" Jones, pitcher, back together again with the New York Yankees. Some years ago, O'Neill and Jones, were room-mates on the Cleveland club. A trade then, took Jones to Boston and thence to the Yankees. Oddly enough, O'Neill later followed a similar route. This season finds them on the same team once more. They're great pals—Steve and Sam.

**Florida Dairymen
Due More Profit In
Milk, Experts Say**

GAINESVILLE, Fla., Mar. 28.—That Florida dairymen should receive an increased profit of ten cents a gallon on milk during the winter of 1925 is the startling statement made by dairy special-Extension Service. Since increasing the price of milk to the consumer will be unpopular, the only way for the dairymen to get this extra ten cents a gallon and still retain friendly relations with his customers is to reduce the cost of producing the milk, the specialists say.

It is said that 60 per cent of the cost of producing milk in Florida goes for seeds, and during the past winter several million dollars in good Florida money have been sent into other states for feeds that should have been grown at home.

Now, it is suggested, is the time to prepare for the needed silage, hay, root crops or winter pasture and increase the profits on milk the coming winter, say the specialists.

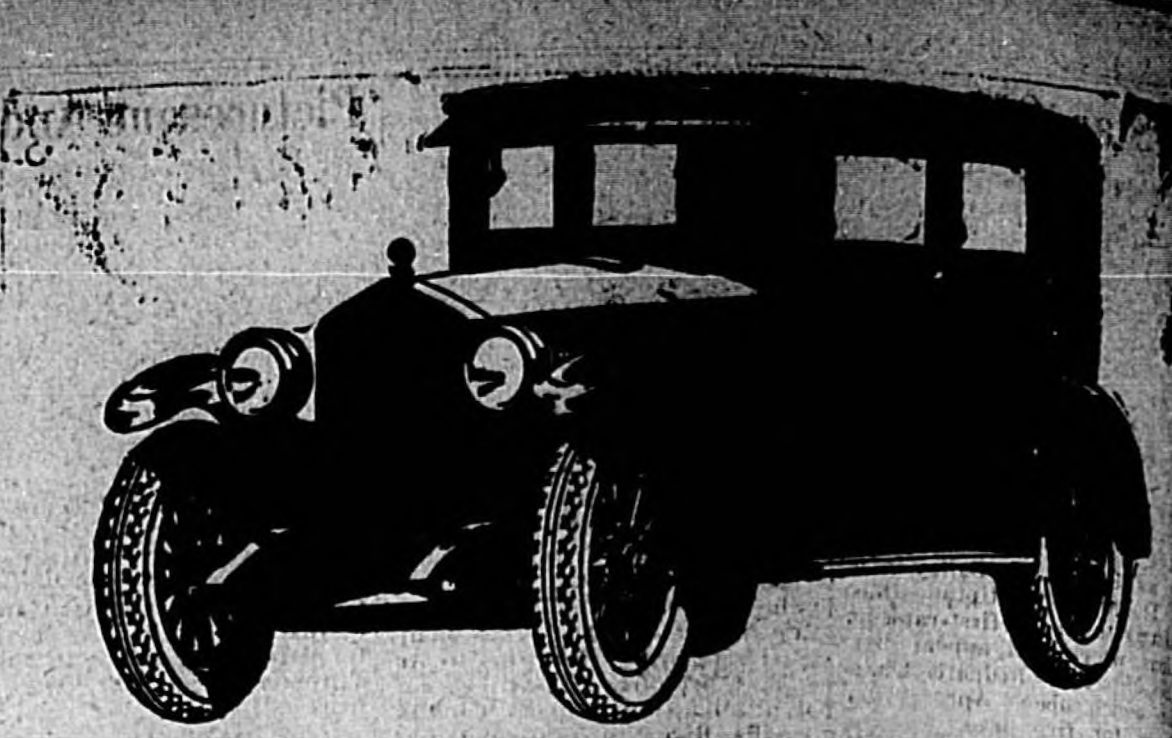

Dairymen who own silos have demonstrated their value in providing a cheap succulent feed for cows in winter in Florida, it is stated. Cowpeas, beggarweed, soybeans

**SULPHUR CLEARS
SKIN RIGHT UP**

In some parts of the state, pure grass and the canna grow throughout the winter season, providing a valuable roughage food. "Get busy now," is the word these specialists are sending to dairymen of the state.

Any breaking out of the skin, even flery, itching eczema, can be quickly overcome by applying a little Mentho-Sulphur, declares a noted skin specialist. Because of its germ destroying properties, this sulphur preparation begins at once to soothe irritated skin and heal eruptions such as rash, pimples, and ring worms. It seldom fails to remove the torment and disfigurement, and you do not have to wait for relief from embarrassment. Improvement quickly shows. Sufferers from skin trouble should obtain a small jar of Rowles Mentho-Sulphur from any good druggist and use it like cold cream.

Florida Salt Springs Corporation buys 78,000 acres of land in Marion and Lake counties for development purposes.

**THE FINEST ESSEX
EVER BUILT \$895**

You Cannot Get Equal Style, Performance and Reliability Within Hundreds of Dollars of its Price

Essex is a totally different type. Its advantages are exclusive because patented. It gives results never before attained in any car: Low price, without disappointment in looks or reliability. Economy without sacrifice of performance. Stability and highest roadability without unnecessary weight. The riding ease of large, costly cars. The handling ease of a bicycle. Utter simplicity in design. The lowest maintenance cost, we believe, of any car in the world.

Hudson-Essex, Largest Selling 6-Cylinder Closed Cars in the World

**For First Time In Years Oxford Is
Without Aid Of American Oarsman**

OXFORD, England, Mar. 28.—For the first time in several years the Oxford crew is without an American oarsman, and the cartoonists who have annually portrayed a crew in horn spectacles with the coxswain smoking a cigar and gawling "atta boy," must now seek other employment. The loss of Mellen, the Brasenose American who stroked Oxford so well in 1923, though unsuccessful last year, is very apparent in this year's boat. Campbell, the Etonian, who is stroking, is a less finished oarsman and lacks both Mellen's timing and his hard, quick drive off the stretcher. With four Etonians in the boat and a coach who captained that school, the work is much after the traditional Eton style, save that the "swing, swing together" of the boating song is still a rare achievement. Shrewsbury, Radley and Westminster, all noted rowing schools have each one representative, while Mower-White, the heavy weight of the crew, comes from Rugby. In the Cambridge crew Eton has three representatives. The Cambridge captain recently resigned because of ill health and this misfortune with the resulting uncertainty in the final choice of a crew, has slowed the Cambridge start and made Oxford the present favorites. Oxford's supposed superiority rests largely upon their neatness and style in paddling a very slow

stroke. Though the actual university race is rowed well up in the thirties, both crews have been training at a stroke below 25. Last year Mellen set the stroke too high for the heavy men behind him and they splashed and floundered through, nearly five lengths astern of a light Cambridge crew rowing a slower but long and rhythmic stroke. With this lesson large before them, the Oxford coaches have attempted to give to the lighter candidates of this year the winning Cambridge style. The result is polished rowing at 20 strokes to the minute, and ragged rowing at 32. Oxford's coaching this year has again been in charge of the aged Dr. J. C. Bourne, a Fellow of Merton College, and the Lincoln Professor of Anatomy, who rowed for Oxford in 1882-1883. With the increasing interest and participation in other sports, especially rugby football and tennis, university enthusiasm for rowing has declined. It is still a popular sport, but no longer the one popular sport. Of past races, Oxford has won 40 and Cambridge 35. In 1877 the crews rowed a dead heat. In 1912 both boats sank at the first attempt, and the race was rowed over. The date for this year's event is Mar. 28. The weights of the two crews are nearly equal, Cambridge averaging a little over 160 pounds a man, and Oxford 166 pounds.

WHY THERE ARE MORE THAN A MILLION

Buick
Four-Wheel Brakes

Of the more than a million Buicks in use today, the last 350,000 built have Buick mechanical 4-wheel brakes. On these 350,000, Buick 4-wheel brakes have proved their increased control and safety by faultless operation through nearly two years, in every extreme of weather.

Ford
Weekly Purchase Plan

Invest a little each week for this summer's vacation

Plan now for next July. You'll want a car for fishing, for trips to the country, for Sunday picnics. Small weekly payments out of earnings will soon give you practically any amount you want, and make deposits of any size you find most convenient. Almost before you realize it you will have the car paid for.

165,000 families have already purchased their Fords in this way. Ask the nearest Authorized Ford Dealer to explain how they did it and how easily you can do the same. See him today or write us direct.

Star Offerings
In Redpath
Chautauque Apr. 1

Adam and Eve Comedy, and
Marimba Band Will Be
Headlines During the Week

The sparkling comedy, "Adam and Eve," premier musical comedy, including the international, all-star National Male Quartet, lecturers by such heads as Howard T. Bailey and T. Dinmore Upton—these among the many first-rank attractions which will appear here during the big 1926 Redpath Chautauque which opens Apr. 1, and closes for five days.

The National Male Quartet will give the Chautauque on the first afternoon with a concert character, with all the rare musical entertainment qualities which made this organization famous in the Chautauque world. On the first night the National Quartet will be heard in a grand concert in which Charles Cox, non-personator, and manager of the National Male Quartet, will be featured in musical entertainment numbers. The American Entertainers, on the second afternoon, will present a varied program of musical and impersonator selections following a prelude by the American Entertainers at night.

Toward Gathers For
Edwards Death Story

BESSEMER, Mar. 26.—A great crowd gathered in the county building early today to secure police seats with the expectation of hearing Dr. George T. Edwards tell his version of the death of a wife in their home on Dec. 12 last year.

STATE ROAD
CONDITIONS

ROAD NO. 1—Nunez Ferry to
Jacksonville.

Nunez Ferry to Pensacola, 9 miles concrete, excellent. Remainder to Floridatown fair sand clay. Floridatown to Milligan, good sand clay and brick. Milligan to Mossy Head, sand clay, fair construction, rough. Argyle to Caryville, sand clay, excellent. Caryville to Quincy, unimproved but in fair shape. Quincy to Littmans, good sand clay. Littmans to Aucilla River via Tahawakee and Monticello, unimproved but fair. Aucilla River to Greenville, sand clay road, in good condition. In leaving Greenville, take old County road to within six miles of Madison, where you will come to the new highway, an excellent sand clay road, through Madison, Live Oak and on into Lake City, Lake City to Jacksonville, excellent.

ROAD NO. 2—Georgia Line to
Fort Myers.

Georgia line to White Springs, sand clay road in fair condition. In leaving White Springs cross Suwanee River over old bridge in the town of White Springs, and take old county road to Lake City. This is the old detour, while highway between White Springs and Lake City is being built. Lake City to High Springs, good. High Springs to Gainesville, 25 miles of asphalt, excellent. First 10 miles south of Gainesville, asphalt surface very good. End of asphalt to Micanopy five miles rough. Micanopy to Lowell asphalt surface, excellent. Lowell to Ocala very rough, now under construction. Through southbound travel between Gainesville and Ocala advised to follow detour signs to the east at Lowell to Spurr following road No. 31 to Ocala. North bound travel take Citra road out of Ocala to Spurr then west to Road No. 2 at Lovell, good road. Ocala to Belleview, and to Lake City, fine, excellent asphalt surface. Road in Lake County 11 miles to Leesburg under construction. Two short detours around construction. Traffic advised to drive slow. All the base and over half the asphalt surface has been completed on the entire project and is in excellent condition. Leavert to Eustis and Mount Dora, good. Mt. Dora to Ft. Myers generally in good condition.

ROAD NO. 3 — Georgia Line to
Orlando.

Wilds Landing to Yulee, sand clay road in fair condition. Yulee to six miles south, shell road in fair condition. From this point on into Jacksonville shell asphalt road, excellent. Jacksonville to Green Cove Springs, paved road, brick and treated rock base. All in good condition. Green Cove Springs to Palatka rough to end of brick at Rice's Creek, brick road to Dunn's Creek, air. Asphalt surface from Dunn's Creek to Sisco, Crescent City, Pierson and Leon Springs through Deland to Sanford and Orlando, fair.

ROAD NO. 4 — Georgia Line to
Miami.

The Waycross road from the St. Mary's River to Jacksonville is open for traffic and newly paved. Oiling work is in progress but traffic is carried through the work. Road under construction by Duval County from Jacksonville to St. Johns County Line. Duval County Line to Bunnell 62 miles nine foot brick road with rock shoulders, fair. Bunnell to end Reilly's asphalt road nine miles asphalt surface, excellent. Volusia county line to Daytona very good. Port Orange to New Smyrna 12 miles, one mile good detour. New Smyrna to Brevard county line 16 miles, eight miles excellent shelled detour. Brevard county line to Titusville, 12 miles, nine miles paved, no detours. Titusville to Cocoa 11 miles, all paved except short detours around bridges. Cocoa to Melbourne 21 miles, five miles ex-

Picturesque And Colorful Vocabulary
Is Developed By Men Of Air Service

WASHINGTON, Mar. 26.—The
army air service, upon which the
Congressional spotlight has recently
played with brilliancy, has de-
veloped a vocabulary all its own.

An air service officer who can't fly is popularly known as a "kewee," from the Arctic bird with undeveloped wings. When one becomes confused in conversation, he is referred to as being in a "kewee." Ground flying denotes conversation concerning flying. A "speaker at a banquet" is a "speaker at a banquet." An air service man to "land" is to place his matches to form a T, representative of a plane's outline.

"Ceiling" is the highest point an
aircraft can reach, depending on
its horse-power and the air den-
sity. "Washed out" is the army aviator's designation for getting killed, and "cracked up" means a wrecked plane, in which the pilot might not be dead. "Archie" is an endearing term that army fliers have for all anti-aircraft artillery.

Any particular design of aircraft is known as a "job," the profligate being termed the "prop." "Give the gun" is the air equivalent of stepping on the gas to speed up. To "set down" is to land, but when the flier tries to run parallel to the ground beyond the conventional landing field, and falls a few feet in his intentional descent to mother earth, he is said to "penckake."

A "hiss" is a training plane
equipped with a Hispano-Suiza motor. A "Jenny" is a training plane of the JN type. To "take off" is to get into the air, and a "hoor" is a short flight. A "sbrrol roll" is a complete revolution lengthwise. To "zoom" means to climb very sharply for a short period. A "hannage" is a small dirigible or balloon.

To come to the more scientific terms, an "airplane" is sustained by dynamic action, whereas a "aerostat" is an airship or balloon filled with gas lighter than air. The army air service has not developed the "ornithopter" which, bird-like, flaps its wings to aid the machines flight, considering this type not suited to service needs. It is interested in the development of the "helicopter," capable of rising vertically by the thrust of its propeller. A "glider" is an airplane without a motor, such as the Wright brothers first learned to fly in, is now being used by the army as a target.

Paint Up Plan Put
Into Operation By
Ball Hardware Co.

good paint
The plan can be used for any
kind of inside or outside painting
job, on either residential or busi-
ness property. The property own-
er may arrange with his own paint-
er to do the work if he desires.
The Devco agent, however, is will-
ing to cooperate with him in this
matter and secure estimates from
other reputable contractors, if re-
quested.

Mr. Ball also stressed the fact
that the finance charge to the own-
er is 25 per cent lower than that
required by any other similar plan
in the industry today.

Quits As Head Of
Girls' College To
Men's University

DELAND, Mar. 26.—"I have
served too long in the association
of boys to be deemed to spend the
remainder of my days in a girl's
school."

This explanation is given by
Dr. Daniel J. Blocker, president of
Shorter College, Rome, Ga., for his
decision to lay aside the adminis-
trative work of college, and return
to work to class room work. Dr.
Blocker will have charge of the
department of philosophy at Fur-
man University, at Greenville, S.
C., beginning with the next school
term.

Woman Dies In Auto
Accident At Miami

MIAMI, Mar. 26.—Florence
Haug, Brooklyn, N. Y., was killed
and her sister, Etta, was seriously
injured in an auto accident, at
Hialeah near here this morning.

Negro Exodus From
Santa Rosa County
Lowers Population

TALLAHASSEE, March 25.—
Since announcement of the total
population of Santa Rosa county
a few days ago, some more detailed
statistics have been compiled in the
census office of the state agri-
cultural department. This is the
largest county so far to complete
its enumeration for the state, cen-
sus of 1925, which began Feb.

16. The comparatively small increase
of population in the last five years,
says Dr. Harper, is evidently due
largely to the widespread negro
exodus of recent years. The number
of negroes in the county de-
creased while the white popula-
tion increased 9.6 percent or nearly
two percent a year, which is
about double the world average. One
precinct in the northwestern
part of the county, which had
1080 white and 249 negroes in 1925
the federal census of 1920 did
not separate the races in single
precincts, this year had 1885
whites and no negroes.

The proportion of negroes in
larger town than in the country, as
is the case in practically every
county where negroes are in the
minority (and vice versa).

There are more men than women
in the whole county, but in Milton
females are a little in excess in
both races as is true in many
cities throughout the United States.
The size of families in Santa
Rosa county has long been above
the United States and Florida av-
erage, and it seems to have in-
creased a little in recent years,
which is contrary to the prevail-
ing tendency, according to Dr. Har-
per. Families are a little larger in
the country than in town, as usual.

Wooden Buildings Burn

The flames leaped high; the fire gong sounded; trucks roared down busy streets; excited persons dashed hither and yon; sparks flew; a dangerous eastern wind blew burning cinders toward other buildings; telephone messages urged help from fire stations in neighboring towns; the flames continued to leap high.

From the burning of the Breakers at Palm Beach the nation has learned two lessons; first, carelessness is costly; second, it does not pay to erect buildings which are not fireproof. Without doubt the recent conflagration was started by the throwing down of a lighted match or cigarette stub, or by some other carelessness. In all probability it would never have occurred at all, or it could have stopped in its early stages, if the buildings had been constructed of fireproof materials.

The constant burning of buildings, or other property damaging fires, has come to be a disgrace to this country. The loss from the Palm Beach catastrophe alone is estimated at over four million dollars. Further, we read that fire in this country exacts a toll of more than half a billion dollars every year.

Most of these fires are caused by sheer carelessness. Mother goes away leaving the kettle boiling on the stove, or the screen away from the front of the hearth fire. Something happens. She returns to find her home in ashes. Nurse lets baby play with matches. Something happens. The house burns down. Father reads the evening paper, tossing his cigar ashes on the floor. Later he takes a stroll, returning to find nothing but the insurance left on his house, if he is lucky enough to have that.

But since carelessness is an element of human nature and as long as mortals are mortals, carelessness will be ever a potent factor for consideration, then build for durability against fire. It's pure folly to build to burn. It is costly to you and it is costly to the nation. Fireproof buildings are as easily constructed as any other kind, look one hundred per cent better, and will react to your advantage a thousand times before you are through with them.

It is indeed a pleasure to note what the directors of the Florida East Coast Hotel Company have decided, according to an announcement by Henry E. Bemis, vice president. A modern, fire proof hotel will arise almost immediately out of the ashes of the old Breakers. It will be of "the most approved design adapted to both the climate and the type of pleasure seekers who frequent Palm Beach."

And while the Florida East Coast Hotel Company is constructing a hotel worthy of the site of the former Breakers, why doesn't it raze the Poinciana and construct in its place a hotel which would be a credit to the hotel company and the city within which it is located? But more than that. Why doesn't the Florida East Coast Hotel Company replace all its old wooden shacks with safely constructed, fireproof hotels, before some fire breaks out in one at night, destroying it, as well as two or three hundred sleeping guests?

Let's Get the People Out-Doors

Here it is, one of Those Days—one of Those Spring Days—when anything in the way of toil is absolutely repulsive to the normal human being, and we have to stay indoors and work and work and work—

—Don Marquis.

And that reminds us that Thursday afternoon holidays should be in fashion pretty soon, and that they should be accompanied by the organization of some Out-Door Clubs in Sanford.

People whose occupations keep indoors most of the time are mighty careless of their health and their happiness if they do not endeavor to find some means of spending time in the open. Scarcely any day is so crowded with indoor work as to prevent the worker from spending a little time in outdoor exercise. And once the habit is formed of taking a brisk walk, or joining in outdoor play, it is easy to fight for a chance to get away from indoor tasks and pastimes.

Sanford is pitifully "short" in the matter of opportunity for out-door recreation. There should be a first class swimming pool for the people of this town. There should be plenty of tennis courts. There should be a great open-air gymnasium, and a dozen play-centers for little children.

All of these Sanford will have some day. But in the meantime when the call of Spring is here, Out-Door Clubs should come into existence, whose business it will be to DEVISe ways for getting people, young and old, out-doors for recreation and health.

MY FAVORITE STORIES

BY IRVIN S. COBB

Nick was the grizzle-headed totum of an assembly room in a certain southern town. This story which has to do with him, possesses one merit if it possesses none other—it has the merit of being true.

According to local gossip Nick was a sorely henpecked man. It was said that when displeased with him Aunt Ellie, his nastodonic wife, had a way of tying his hands behind him and then correcting him with a bed slat. Sometimes she corrected him so thoroughly that he limped for a week afterward and sat down only on cushioned chairs. If there were no cushioned chairs handy he preferred to stand.

Yet Nick bore the secret of his domestic tragedy bravely. He never swore out a warrant for Ellie; never publicly complained of the roughness of her disciplinary methods.

But as the saying goes, the worm will turn, although why it should turn, seeing that a worm is the same on both sides, no one

WHAT PROFITETH A MAN?

ST. PETERSBURG INDEPENDENT

Walter Camp was not a statesman nor a scholar but it is doubtful whether any American of today was more widely known in person and by repute. Certainly no public figure was regarded with more affection than this man who dealt expertly in humble things.

If any one word can fit Walter Camp's influence on things American it is the word "wholesome." We do not recall that a note of uncleanness ever touched any of the Camp activities—and they were manifold. He was an athlete, author, father-confessor to a thousand young sportsmen, Nestor of American intercollegiate football, disinterested advocate of every enjoyable game and missionary of good health to the nation. His name was a household word from coast to coast because he indulged himself in the luxury of doing good.

Mr. Camp died at the age of 66

As Brisbane Sees It

Some of the News.
Man, His Days are as Grass.
The French Save Earth, Big Alma Mater.
BY ARTHUR BRISBANE
(Copyright 1925)

A PROFESSOR named Fullerton has hanged himself after teaching philosophy to young ladies for a long time. There is no philosophy that will make us philosophize about our own troubles.

EDITH GOULD Wainwright, daughter of the late George J. Gould, grand-daughter of Jay Gould, who left one hundred millions to amuse lawyers hired by his heirs, is writing her interesting and important life story for the New York Evening Journal.

IT IS HER intention to prove that happiness is not in money, but in the soul of man. Epictetus said it, but could not prove it, for he never had any money.

Edith Gould knows what she is talking about. The best fun she ever had, as she will tell her young friends, was doing her own housework, after she ran away to be married and before she became reconciled to her annoyed parents.

SUCH PHILOSOPHICAL musings as this intelligent young woman will provide, enlivened by descriptions of the baby dress three yards long that she wore, just after she was born, upon her father's yacht, should help to make the poor satisfied with their lot.

RICHARD STRAUSS has written a concerto for piano and orchestra to be played with one hand only. This five-fingered tour de force is produced for a Viennese pianist, Wittgenstein, who has only one hand.

The greatest of all musicians wrote a composition using only the four notes corresponding to the letters in the name of his friend, the Countess Abeg. Musical genius is the most highly developed of any, because it proceeds directly from the subconscious mind and is independent of hindering external conditions.

MANY YOUNG Americans will try anything interesting. Boyd E. Ellfritz, private soldier, at Bolling Flying Field, convinced that flying is easy, decided to try. He started all alone for his first flight, rose and flew headed for home. As he had failed to open his radiator, his mad engine soon stopped working, so he turned back to Bolling Field and landed.

THE PARTICULAR plane will never fly again, but Ellfritz was picked out of the wreckage, uninjured.

He believes now what Edsel B. Ford's export flier told this writer at the Ford airplane factory recently: "Almost any man can learn to run a plane in about one hour. But it takes seven hours to learn how to land."

REPORTERS, traveling among ruins spread over the earth by the recent tornado, advise that many men and women are praying. They pray for strength to take care of those that are ill or ruined strength to rebuild them fanished homes.

Those that pray include probably many that had done little praying until the arrival of the tornado.

"As for man, his days are as grass; as a flower of the field, so he flourisheth.

"For the wind passeth over it, and it is gone; and the place thereof shall know it no more."

PARIS BANKERS are distressed because the French people, especially the peasants, hoard coins of gold and silver.

Laws were passed to control the gold supply, that the Bank of France might have a big gold reserve. But the French people still have two thousand million francs in gold and silver coins hidden away.

THAT DOES NOT please the bankers, and makes financing more difficult for the highly intelligent and efficient French Government.

But that hoarding of precious metals should be a warning to speculators against TRYING TO KNOCK DOWN THE PRICE OF THE FRANC.

Whoever gambles on the belief that the French people will allow their currency to become worthless doesn't know the French people or their history.

HARVARD will spend \$12,000,000 to improve the study of agriculture. That's sensible.

English-speaking nations study Latin and Greek. The Romans studied Greek. The Greek philosophers studied the Egyptian language and hieroglyphics. Millions are spent teaching many kinds of knowledge little used after the student leaves school.

It is about time to begin studying seriously old Mother Earth the original Alma Mater from which we Spring, upon which we depend absolutely during life, and to which we all return.

HIS WILL HAD LIMITATIONS

YOUTH'S COMPANION

Two men were arguing in their conceit, was boring every body else. One, a fellow of insufferable with boasting of the power of his will, maintaining, with much violence, that his will was stronger than that of anybody's present.

"You are wrong then," said one of the gentlemen, "and I will prove it. Go and stand in that corner, and I will have you out of it before I have commanded you the second time."

The smart one stood in the corner, and the quiet one said: "Come out of that corner."

The other grinned and shook his head. The quiet man sat down, and looked at him steadily. Five minutes passed, and then the smart man said with a sneer: "Don't you think you'd better give it up? I don't feel any influence at all, and I can't stand here all the evening."

"Oh, as to that," replied the quiet man, "there's no hurry. I am perfectly comfortable. You recollect that there's no time limit; you are simply to come out before I ask you twice. And as I don't intend to ask you again until a week from today, in order to give your strong will a fair and vigorous trial, we might as well take it easily."

The man with the iron resolution sneaked out of the corner, and the incident was declared closed.

LEAVE A GOOD IMPRESSION

SUCCESS MAGAZINE

Every time you fail to make a sale, remember that it needn't be all failure. The time is not lost. If you leave your prospect with a good taste in his mouth, if you leave a good impression upon him, if you will leave him with such a picture in his mind that he will say, after you have gone, "There goes a man, I have met a real genuine man today. He made an impression upon me for his manliness, his character. I shall remember him as a real man."

Leave him with a good picture in his mind so that he will say to himself, "I have met a real man today, a 100 per cent gentleman.

I like that fellow." You never know, my friend, where that will end. I have known of several instances of that kind where a salesman who lost an order was recommended by his prospect for a very much better position than he had. You never know where your good impressions will land you, any more than you know where the had impressions you make will land you.

If you can leave a man with a good taste in his mouth, make him feel that he has met a rare character, you need not feel that your time is wasted or that you have failed.

WHERE DO YOU LOOK

ST. AUGUSTINE RECORD

When you wish to buy something where do you look? In your newspaper.

When you need information regarding some event of the future where must you go for it? To your newspaper.

Where do you obtain your knowledge of current events, science, politics and the greater part of your education? From your newspaper.

When your merchants need business, through what medium do they obtain it? Your newspaper.

When the community and the churches, schools, civic and welfare organizations of the community cooperate, to what do they appeal? Your newspaper.

These are some of the reasons why the newspaper is YOUR newspaper and why communities are only as strong and progressive as their newspapers. There may have been instances where a live newspaper was unable to resuscitate a dead town, but there is no man who has been a mourner at a funeral where a live newspaper has been the undertaker to a dead town. If there is one quick cure for community somnolence it is a wide-awake newspaper.

The public anticipates its shopping by scanning the advertisements in the newspapers and the merchants anticipate their business by newspaper advertising. Advertising is a mutual proposition between all concerned.

Fashionable Footwear Inspired by Easter

Latest Footwear now steps gaily into Easter. In Fashions they meet every requirement of the smartest trend. These style leaders carry the inspiration of Paris, the atmosphere of Fifth Avenue, and the creativeness of our master designers.

All Styles, for every occasion, at prices that appeal

DATE FOR PHARMACY TESTS FOR SCHOLARSHIP

Three Year Scholarship At University of Florida In Pharmaceutical Chemistry To Be Awarded Next Year

GAINESVILLE, Mar. 26.—June 26 and 27 have been set as the date of the annual examination for awarding of the \$1,000 Grover-Stewart pharmacy scholarship. This three-year scholarship in the School of Pharmacy, University of Florida, leading to the degree of pharmaceutical chemist was established last year by this concern for the benefit of young men of this state who desire to prepare for the profession of pharmacy, and is open to members of this year's graduating classes of all accredited high schools of the state.

The examination will be in charge of members of the University faculty and will be held in the Science Hall, and will take place while the preceding season's school work is fresh in the minds of the students.

Competitors for the scholarship must be of good moral standing and will be examined in English, 3 units; history, 1 unit; mathematics, 2 units; science, 1 unit; foreign languages and science, 2 units, making a total of 9 units. In addition to examination in these subjects, each competitor will be required to present high school grades in seven subjects other than those mentioned. This will give a total of 16 units necessary for admission to any college in the University of Florida.

J. Webster Merritt of Gainesville was awarded this scholarship last year, the first time it was awarded, he being the successful contestant of a group of five. Each \$1,000 scholarship is good for three years. Dr. Thomas R. Leigh, head of the School of Pharmacy, is in charge of arrangements for the examination. In addition to this scholarship, a number of medals to pharmacy students are offered each year by friends of the school.

Aerial Route Over North Pole Arouses Japanese Interest

BERLIN, Mar. 26.—Germany and the Scandinavian countries and Japan, all are showing interest in a proposal to operate an air route over the North pole area from the coast of Russia to Alaska. The idea is not particularly new, but it has been revived recently because of the improvements, of late years, in airship construction. It is understood that Dr. Fridtjof Nansen has offered to lead such an enterprise, under international support.

An airship a little larger than the Los Angeles is contemplated for the run. May is regarded as the best month in which to start. Murmansk, on the north coast of Russia, would be the European point of departure. The route would be over Emperor Francis Joseph Land to the Pole and then over the unknown territory of North Canada to Alaska. The return trip would be over Bering Strait, Wrangel Island, DeLong Island, and the unexplored territory of Nova Zembla.

The Japanese are especially interested because success might result in quicker communication between Europe and Japan.

Well-Known National Male Quartet a Chautauqua Feature

THE NATIONAL MALE QUARTET

The National Male Quartet, directed by Charles Cox, well-known entertainer, will be a premier feature of the coming Redpath Chautauqua here.

Everybody likes a good male quartet, and here is one of the best. Both as singers and as entertainers, the Nationals enjoy a prestige second to no other quartet in the entire Chautauqua field.

Thurlow Leavine, noted composer of "By the Waters of Minnetonka," wrote of this quartet: "I can frankly say that this quartet is one of America's best quartets if not the best. They sing the best classics written for male voices. Besides being a fine singing organization, composed of the fellows, they are excellent entertainers."

The National Male Quartet will be the opening day attraction of the Chautauqua.

FUNDS GIVE AID TO STUDENTS AT STATE COLLEGE

132 Students at University of Florida Receive Aid Through Higher Scholarships or From Loan Funds

GAINESVILLE, Mar. 24.—The time has arrived when it is possible for all good men to attend the University of Florida whether they are financially able or not, it is said here. This has been made possible by the many philanthropic organizations of the state through their decisions to help students who show bright prospects of becoming leaders in the future affairs of Florida. At present there are 132 students at the university who are receiving aid either through scholarships or by loan funds.

Of these 132, 40 students represent counties from which scholarships are offered for the individual who prepares himself to be a teacher. Each county in the state offers these scholarships, but 19 have no representatives at present. These scholarships are awarded on competitive examinations.

Numerous other sources offer aid to students among which are county scholarships given students in agriculture. There are 14 receiving aid from this source. Another source is the Florida Educational Loan Association, which advances funds to students under agreement that it is to be paid back after graduation. Interest does not begin on the loans until after graduation. About fifty students are receiving aid from this fund.

Other sources from which scholarships are obtained is Loring Memorial fund, which furnishes expenses for one student; Wilson Co., of Gainesville, value \$200; Knight & Wall, Tampa, value \$200; Lake City Kiwanis club, \$200; Jacksonville Kiwanis club, \$200; Annie, Coleman, U. D. C., board and room in dormitory; State U. D. C., value, board and room for two boys; John B. Sutton Scholarship of Tampa, \$200; Bank of Plant City, Jacksonville Rotarians, \$250; Florida Times-Union \$250; Masonic Temple Lodge Jacksonville, E. F. S. Cater Scholarship loan, \$250; University Club room and board; Knights of Pythias, \$250 for 12 students; Scottish Rite Masons, \$240, each for two; J. Herrin Scholarship of Quincy, board and room.

In addition to these there is one county, Dade, now furnishing four agricultural scholarships.

Madison — Baptist congregation erecting Sunday school building.

DEBATE TO MARK

WICHITA, Kan., Mar. 26.—The sub-structure of the principal crude oil fields in the world will be visualized, dissected and discussed during the convention of the American Association of Petroleum Geologists, which meets here Mar. 26-28. Treatment of this subject occupies the most prominent place on the program, and will be handled by geologists representing all states and several foreign countries.

New light on the general stratigraphic background of the Kansas fields, the sub-surface stratigraphy of western Oklahoma, the San Angelo formation in Texas, the upper cretaceous diastrophism and sedimentation in Montana, the age and correlation of the kreyenhagen in California, carbon ratios and petroleum in Illinois and the petroleum of India, is expected to be thrown on this field in more than 80 papers to be read before the convention.

Texarkana Pays 1 Cent A Gallon Tax On Gasoline Used

LITTLE ROCK, Ark., Mar. 26.

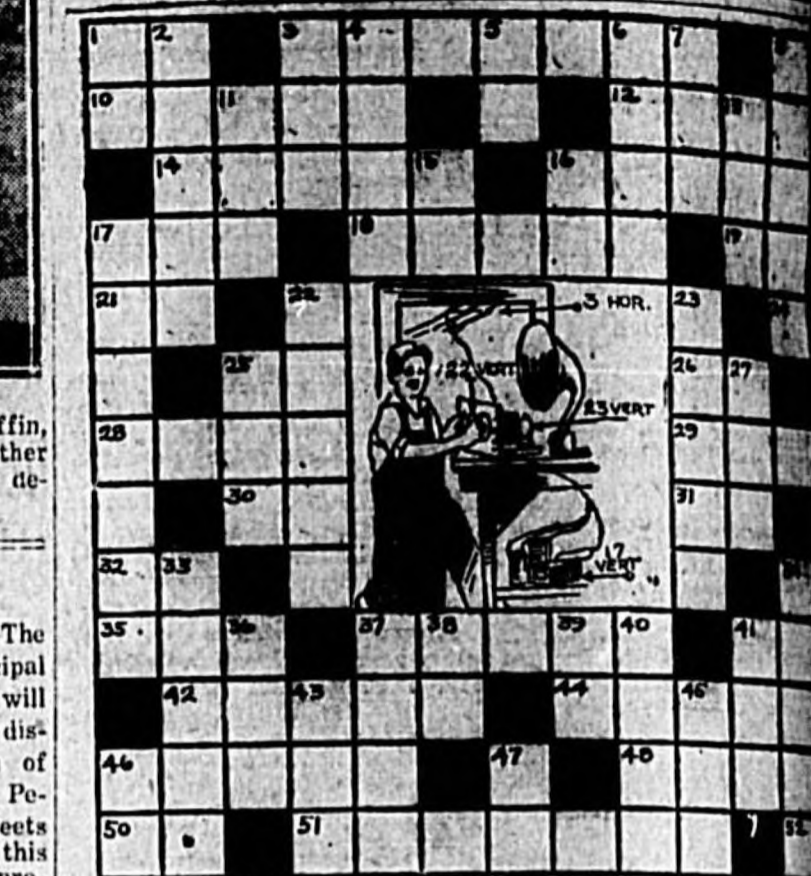

While the other people of Arkansas pay four cents tax on every package of cigarettes they smoke, four cents a gallon on every gallon of gasoline and ten cents a gallon on motor oil burned in their automobiles, the city of Texarkana is "sitting pretty."

Texarkana, over on the southwestern border of Arkansas, with part of the city in Texas and part in Arkansas, does not have to pay the cigarette and tobacco tax, and pays only one cent a gallon on gasoline. Even the remainder of Miller county, in which the Arkansas city is located, must pay the tax.

The state of Texas has a tobacco tax and levies a cent a gallon on gasoline. The result when the tobacco and gasoline tax laws were passed in Texas was exempted from the tax. It was provided that whenever the state adopted any such tax laws it should apply to Texarkana. Thus, Texarkana, in standing in the unique position of having its tax laws, including oil and tobacco, are regulated entirely by the state of Texas.

Winter Park — Work on new office building on Main street. Madison — Contract for construction of gasoline station.

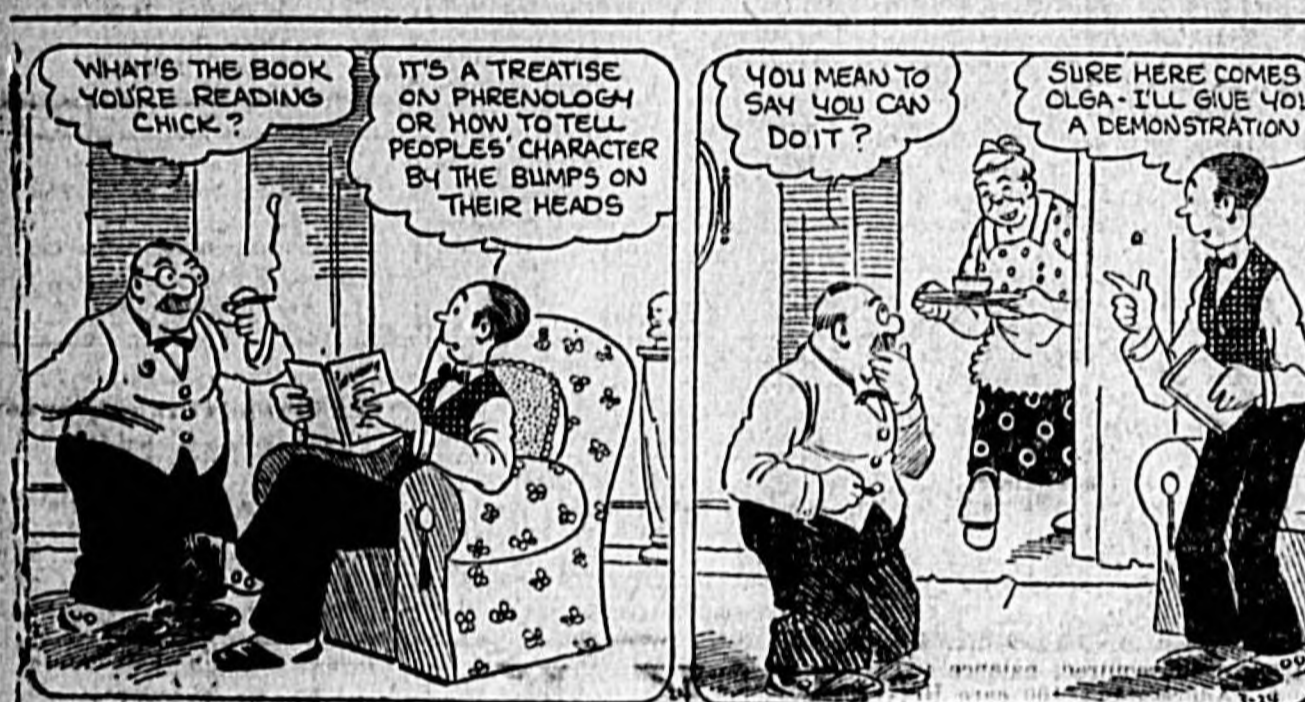

CROSSWORD PUZZLE

A crossword puzzle for radio fans! Some of the words puzzle are illustrated in the sketch in the center. There are radio terms. Its easy enough not to keep you too long from riddling in.

MOM'N POP BY TAYLOR

Seadogs Of Danzig Slow To Endorse New Rotor Vessel

DANZIG, Mar. 26.—Shipping experts are reluctant to pass judgment on the recent trip of the rotor vessel Buekau from this port to Scotland. They say the Buekau is so small and the rotor substitute for sails so new, that long experimentation with larger ships will be necessary to test the commercial value of the new invention. Nevertheless the speed of the Buekau from Danzig to Grangemouth is regarded as satisfactory, in comparison with the average speed of sailing ships of the same size over a similar distance.

The memory of old clippers which crossed the Atlantic from Boston to Liverpool in 12 or 13 days will not fade from the minds of shipping men, who will look back with favor upon the great old sailing ships which were making records in the middle of last century. It is clear that the oldtimers do not care to have it intimated that revolving steel rigging of the old clippers, even if they do bring about economy in operation and lower freight rates.

ONE IN TEN
Neglecting a little wound, cut or abrasion of the flesh may in nine cases out of ten cause no great suffering or inconvenience, but it is the one case in ten that causes blood poisoning, lockjaw, or a chronic festering sore. The cheapest, safest and best course is to disinfect the wound with Iquid Borozon and apply the Borozon Powder to complete the healing process. Price (liquid) 20c, 50c and \$1.20. Powder 30c and 50c. Sold by Lane's Drug Store.—Adv.

25 Years To Bring Extermination Of Tuberculosis, British Doctor Says

LONDON, Mar. 25.—Twenty-five years hence tuberculosis will be exterminated in the British dominions, or be as uncommon as leprosy is today, Dr. C. W. Saleeby, spokesman for the London Medical Institute, has declared. He predicts that the greatest advance in medical science will be the successful combating of tuberculosis and cancer, and the reduction of infant mortality to almost nothing.

The latest methods used to prevent tuberculosis have already provided for a gradual decline in the number of tuberculosis victims for the future and, once health officials have been able to stop the spread of the disease, Dr. Saleeby believes it will rapidly disappear.
