Air Force's Newest All-Jet 52 May Be Sent To Alaska For Tests

By ELTON C. FAY
AP Military Affairs Writer

FLMENDORF AIR FORCE BASE, Alaska—The Air Force newest strategic bomber, the all-jet B-52, may soon be brought to Alaska for tests under brutal weather conditions their pilots would expect to encounter in case of war.

There are some questions about arctic operations that cannot readily be answered back in the States, even in atmospheric test chambers or above 30,000 feet, where temperatures may go far below zero in summer.

These questions are posed by the weather. In the air they may take form in tricky, almost unpredictable arctic storms. On the ground, they are brought on by bitter, unrelenting cold.

There are reasons to believe that the all-jet B-52 may possess

distinct advantages over the present piston-jet B-36 heavy bomber.

A major problem of arctic operation, for example, is "cold soak"—the congealing of lubricants, chilling of carburetors and condensation of vapor in fuel and oil lines that result from prolonged exposure of parked aircraft to extreme temperatures.

Among other things, a jet engine needs no "warm up" period prior to taking off. The white-hot flame sets the turbine spinning almost instantly. The pilot needs only to take a quick reading of instruments.

Another hazard of arctic air operations is "ice fog," created when low temperatures and the dew-point of moisture coincide. A single piston-engine plane making a takeoff run can create a blanket of ice fog which will hang over the

runway for hours if there is no wind. This closes the runway to further takeoffs or landings.

But pilots believe that a jet engine has noticeably less tendency to create ice fog.

Along with ground operations of planes, the weather imposes trouble for airborne planes. Again, jets have an advantage because they operate best at high altitudes, above the layers of weather. But they must take off and land through the weather layer.

The mission of the 7th Weather Group, with its headquarters here and a reconnaissance squadron operating from Eielson Air Force Base, in the vicinity of Fairbanks, is to forecast the tricky storms that come rolling out of Siberia and down from the polar regions.

The group takes its reading on conditions beyond the reach of land observation stations scattered throughout Alaska. "polarimeter" flights of RB29s survey the weather northward to the pole. "Loon" flights check the weather outward

Fairlane Town Sedan, one of 3 four-door sedans to select from

Automatically your best buy!

Ford's five power assists combine to give you more added convenience and extra driving ease than you can get in any other car in Ford's field!

It's great fun to step into a Ford's rich, colorful Luxury Lounge interior... to touch your toe to the gas pedal and feel the masterful might of Trigger-Torque power responding instantly to your every wish. It's fun, too, to bask in the admiration aroused everywhere by Ford's Thunderbird-inspired styling.

But, for the ultimate in driving fun and ease, you should try a Ford with Ford's optional power assists: new Speed-Trigger Fordomatic, power steering, brakes, windows and seat. Ford brings you the power assists that combine to do the most for you automatically... so you get the most out of your daily driving!

Automatic Driving at its Best

Speed-Trigger Fordomatic Drive has a new, automatic low gear which lets you start in low, shift to intermediate and then into high—all automatically—all while the selector lever is in drive position. It's the only "automatic" in its field that combines the smoothness of a fluid torque converter with the versatility of three automatic forward gears.

Power to Steer For You

Master-Grade Power Steering does up to 75% of the steering work for you on turns... yet you retain the natural feel of the wheel on straightaways. It's a great help when parking—makes all driving easier and more relaxing.

Power to Apply Your Brakes

Swift Sure Power Brakes do up to one-third of the stopping work for you. And there's built-in safety. With power off, you stop your car as easily as though your Ford were equipped with the standard braking system.

Power to Adjust Your Seat

Ford's 4-Way Power Seat is the only one in Ford's field that adjusts "up and down" as well as "forward and back" for most comfortable driving positions. A touch of the conveniently located single seat control does it!

Power to Lift Your Windows

With Power-Lift Windows you don't need to step in order to open or close all side windows. Driver can operate all four windows from the master control. And each passenger has a separate control switch for his own window.

And there's Trigger-Torque power, to give you more "Go"

Test-drive a '55 FORD

Scientist Has Belief H-Bomb Has Put An End To Major Wars

PASADENA, Calif. — Nobel Prize scientist Linus Pauling said Monday the H-bomb has done away with major wars forever. He said atomic and hydrogen bomb tests should now be halted because all radioactive particles from such tests are dangerous.

The famed chemist predicted at a news conference that the growing consciousness that a world war would mean world-wide destruction, perhaps the end of civilization, will surely now lead to permanent peace.

He conceded the possibility of hostilities in some sectors but said, "If we can keep putting off atomic war for another year or five years, the chances are none will occur."

Of radioactive fallout from atomic tests, he said: "All radiation is deleterious in some way. There is no accurate information on how much radioactivity can be absorbed over a long period of time. For some people even a very small dosage can be too much and constitutes a real hazard."

Credits Use Many Valuable Minutes On TV Programs

NEW YORK — It's good to give credit where credit is due, but is television overdoing it?

Most viewers conceded the sponsor's right to his three minutes of commercials per half hour at night in return for paying for the show. Most like to know the names of principal actors and perhaps the producer, director and writer.

But many wonder if it's necessary to curtail the entertainment still further to give time to list credits for almost everyone.

Unanswered, he said, are such questions as: How much radiation can persons susceptible to cancer or leukemia absorb? (It wouldn't take much to push some of them "over the line" into perhaps fatal illness, he believes.)

What is the effect on germ plasma, and the long-range effect on generations yet unborn? (He is skeptical. Scientists use X-rays to influence cell life and, he says, mutations thus incurred are always bad for the race.)

It is inexcusable to state no hazard exists," he said, indirectly criticizing Atomic Energy Commission scientists who insist they have found no harmful effects to humans from tests thus far.

Some credits are given as a matter of interest to viewers, such as the cast, producer, director and author. Some are demanded by TV unions — scenic designers and technical directors, for example. Credits often are given to stores, some given by the feminine staff, which means the gowns were provided free with the credits at the payoff.

Lawmakers' Wives Expect To Produce Interesting Show

WASHINGTON — With so many big shots in Washington from the President on down — taking to paint brush an artist, wives of lawmakers expect to have some mighty interesting exhibits in their Congressional Club art show scheduled for the last of April.

While artist Ike Hasm't as yet produced a painting for the exhibit, members are hoping for a presidential contribution along with those from cabinet officials, members of Congress, their wives and even their secretaries, who have taken up the hobby.

Mrs. Frank Sundstrom, wife of the former New Jersey Republican congressman, and herself an artist, will be in charge of the forthcoming showing. Members of her committee include well known artists, Mrs. Sherman Adams, wife of the assistant to the President; Mrs. Helen Kefauver, wife of the Democratic senator from Tennessee; and Mrs. Byron Scott, wife of the Republican congressman from California. Others arranging for the exhibit include Mrs. Thomas Martin, wife of the Republican senator from Iowa, and wives of Congressmen Robert Hale (R-Maine), Leroy Johnson (R-Calif.), Clifford Davis (D-Tenn.), Alma Forend (D-N.J.) and Sterling Cole (R-N.Y.).

When decorators were done over the Congressional Club, they came upon a five-foot replica of the Winged Victory which was standing in a niche, as the original in the Louvre. After casing the headless, armless statue they approached the club president.

"We've repaired the ceiling leak, fixed the picture frames, polished the crystal chandeliers and done up the painting," the spokesman from the group said. "Now, about the statue."

"What about it?" asked the president.

"Well, we figure, if you can find the head, we can put it on again. Nobody will know the difference. With the wings, nobody will notice arms missing."

"I'm afraid," the lady said indignantly, "the head's been going for us to replace it." Since the statue has been relegated to the clubhouse attic.

Members used to advise Congressional Club members that it is a must to wear gloves to all important social occasions. This meant they had to wear white gloves of a particular brand.

Members in her effort to be the president's friend, advised that the white gloves she had bought were not the best. She said she had bought a pair of white gloves and found them to be just what she needed.

THE OLD HOME TOWN By STANLEY

California Schools Go After Teachers

SACRAMENTO, Calif. (AP) — You've got to go out and get 'em when you need 15,000 new teachers a year and that's just what California's schools are doing.

Each spring more than 100 scouts—many of them school administrators—fan out in search of class room reinforcements with all the enthusiasm of a football coach.

Usually their briefcases bulge with dignified ballyhoo keyed to the advantages of living in this sprawling state along the Pacific coast.

Long Beach, for example, equips

recruiters with a colorful brochure similar to a luxury cruise folder, showing swimmers under the palms, yachting in a lagoon and action on a movie set.

"Famed Catalina Island is a part of the school district," says the literature. "The desert paradise of Palm Springs is less than an afternoon's drive."

Fast-growing Oakland on San Francisco Bay uses its modern school system as a theme but mentions "the many cultural advantages of the bay area."

Los Angeles plays up its generally higher salaries.

Many of the school administrators do their teacher hunting after attending the national convention of their organization. Among their favorite territories are Iowa, Kansas, the Dakotas, Nebraska and Oklahoma.

Apparently, the excursions pay off. Between \$5,000 and \$8,000 of the 60,000 new teachers hired by California schools in the past five years came from out of state. Trouble is, the school enrollment keeps going up. This year, 2,440,000 pupils cram the schools. By 1958, the state figures, there will be 4,000,000.

Rotary Club's Baseball Loop To Be Formed

The Rotary club baseball league will get underway on Friday afternoon at 5 o'clock at an organizational meeting called by Chm. Roy Holler at Ninth Street and Laurel Avenue. All boys who intend to play have been asked to be on hand so the teams may be organized after their personnel has been selected.

U. S. Takes Aims At More Titles In Pan-Am Games

MEXICO CITY (AP)—The United States took dead aim at three more swimming championships in the Pan-American Games today, and in the case of diving queen Patricia McCormick, of California, the old story of attacking by the champion still held good.

The 25-year-old Pasadena artist captured the three-meter springboard crown and led the United States to a sweep of the first three places in the event yesterday. On top late this afternoon in the National University's ornate Olympic stadium were gold medal finals in the 400-meter freestyle and 100-meter freestyle for men, and the 100-meter freestyle for women.

Basketball, baseball, water polo and other sports continued today. The U.S. women's basketball team, led by Lurline Meathouse and Ruth Cannon, each with 19 points, whipped Chile 63-43 and won the Pan-American championship. The United States has only to defeat Venezuela tonight to annex the men's basketball title, thanks to an upset victory by Brazil over Mexico last night 65-59.

The U.S. over-all unofficial scoring continued to coast. The count for the top teams today stood: United States 1,081 1/2, Argentina 67 1/2, Mexico 39 1/2.

Queen Patricia of the diving ranks won the three-meter title with a total of 142.42 points. Pressing her closely all the way through the 10-dive schedule were Jeannette Stunyo, a Detroit University freshman from Gary, Ind., and Emily Houghton, from Purdue University at Lafayette, Ind.

Jeannette scored 137.41 points and Emily 133.12.

Queen Patricia of the diving ranks won the three-meter title with a total of 142.42 points. Pressing her closely all the way through the 10-dive schedule were Jeannette Stunyo, a Detroit University freshman from Gary, Ind., and Emily Houghton, from Purdue University at Lafayette, Ind.

Junior Bowling In Semi-Finals

Six Junior Bowlers have reached the semi-finals. Linda Hamilton and Carole Salter with two other girls yet to qualify. John Taylor will meet Johnny Emerson while Jimmy Halligan will take on Butch Cassabe in the boys match.

- All boys participating in the tournament had to bowl 100 or better to qualify. The girls qualifying mark was 70 or higher.
- During the tournament, the boys have bowled games of 142, 180, 118, 112 and 105. While the girls have hit for 81, 72, 74, and 70.
- Winner in each of the brackets will receive a trophy from the sponsors of the tournament, Bill Hartwick and H. R. Heckenbach.
- Judges for the tournament are, F. C. Richards, Intern at Sanford Jr. High School, Mrs. Roberta Richards, teacher at the Grammar School and Harold Heckenbach, principal Grammar School.

Sports Roundup

TAMPA (AP)—The new American League manager who probably is in the hottest seat this spring is the former great shortstop Marty Marion. He is taking over a club, the Chicago White Sox, which figures to be a contender and will be liked by some of the experts to beat out Cleveland and the New York Yankees.

Marty has had two previous shots at a managerial job, with the St. Louis Cardinals and St. Louis Browns, but this is his first good team. He will be marked for criticism if the Sox do not do at least as well as they did under Paul Richards last season.

He says he is fully aware of this. We asked him what he felt he had picked up in the skills of handling a club.

"If you mean in handling a team during a game, nothing," he said. "I'm a team all-time manager. I'm a player. That is, if you're a good one and normally intelligent. Of course, you're approaching it from a different angle as a manager."

Dressen Says Brooks Heading For Pennant

The Associated Press said yesterday. "They've got all the stuff they need. A lot depends on the pitchers, of course. They're there and you've got to get it out of them."

And with those compliments out of the way, Dressen and the Nats proceeded to judge Brooklyn 4-3 in a 10-inning exhibition game. But getting back to the Dodgers' failure last season, Dressen said, "Even with the injuries they had enough stuff on the bench to win. I knew those fellows better; could have gotten more out of them."

Johnson Sells Yank Stadium

WEST PALM BEACH, Fla. (AP)—New York's Yankee Stadium—the House that Ruth built—now is the property of John W. Cox, 51-year-old Chicago executive.

Arnold Johnson, owner of the Kansas City Athletics, sold the huge concrete and steel structure in the limits of baseball law, which dictates no owner may have interest in more than one club.

The new owner of Yankee Stadium, built in 1923, during Babe Ruth's heyday, at a cost of 2 1/2 million dollars, is president of the General Package Corp. of Chicago. Ralph F. George, treasurer of that firm, will be secretary-treasurer of the new Yankee Stadium Corp.

Directors will be Gen. L. K. Hanson of the Continental Can Corp., and John R. Kennedy, president of the Federal Paperboard Co.

No sale price was disclosed. But Johnson, a rather fabulous business success who bought Yankee Stadium and the Yanks' Kansas City park for 6 1/2 million dollars in 1953, said "I have been paid in full, either cash or real estate."

WHY WAIT?
ONLY 8 DAYS LEFT
TO FILE YOUR 1955 APPLICATION FOR HOMESTEAD EXEMPTION AND PERSONAL PROPERTY RETURNS!
MARCH 31st IS THE LAST DAY!
TAX LAWS PROVIDE SEVERE PENALTIES FOR FAILURE TO FILE RETURNS ON TANGIBLE AND INTANGIBLE PERSONAL PROPERTY.
HOMESTEAD EXEMPTION CANNOT BE GRANTED UNLESS APPLICATION IS FILED WITHIN THE PRESCRIBED TIME.
Checks have been mailed to all who filed application or made returns last year. If you failed to receive yours please call for them at the Assessor's Office.
When applying for Homestead Exemption for the first time, please bring your deed with you. Also your 1955 Automobile Tag Number. If you need help with your returns, I shall be glad to assist you.
IT IS NOT NECESSARY TO FILE APPLICATION FOR HOMESTEAD EXEMPTION AT THE CITY HALL, BUT IF YOU ARE ENTITLED TO WIDOWS EXEMPTION OR DISABILITY EXEMPTION, APPLICATION FOR THESE SHOULD BE FILED WITH THE CITY.

Soviet Union Has Story Of Engine That Just Won't

MOSCOW (AP)—There's a children's story in the United States about the little engine that COULD. Here in the Soviet Union there's a story about the locomotive that won't.

The newspaper Soviet Estonia, printed in Tallinn, tells about it: Last April the railway workshops in Tallinn took the locomotive of a concrete factory for repairs. Soon the word went out to "come and get it."

As soon as the locomotive engines got into the cab . . . it refused to move forward, and would only move backward. When they attached a load to the locomotive it stopped moving altogether—either forwards or in reverse.

STANLEY E. SELYE is on hand to greet his nine adopted children and his wife, Frances, as they arrive from Germany at Los Angeles International Airport. The children are (top to bottom): Anna, 7; Milton, 6; David, 6; Grover, 6; William, 6; twin Diane and Dorothy, 4; Lorin, 3, and Carol, 10. (International)

Quan Yin Moves To Beverly Hills

LOS ANGELES (AP)—Quan Yin is coming up in the world. She's moving to Beverly Hills.

Quan Yin, a five-foot clay statue of the Chinese goddess of mercy, has stood in Los Angeles' "Old China City" since 1937.

She was ankle deep in the Pond of Promises and in the dreams and wishes of lovers and tourists who threw pennies at her feet.

But today Quan Yin is on the way out. Old China City, with its twisting streets and curio shops, is being torn down.

Frank Martin, one of the owners of the property, said the city will be razed to make room for a parking lot. He intends to put Quan Yin in the back yard of his Beverly Hills home.

Quan Yin stood at the entrance of the tiny walled replica of old China, built then the Union Station crowded many shops out of the older Chinese quarter.

Millions of tourists have walked past the statue and into the crooked streets of the city. They have passed down alleys that snaked off streets off Hubbleling Well road in Shanghai, explored shops, taken rickshaw rides. They have eaten the great Irish dish of chop suey, served up with chopsticks at the Fong Fung house.

Today it's a different scene. Walls are coming down. Electric saws whirl through timber. Walkers as workmen pull them like teeth.

Quan Yin stands alone in the Pond of Promises. A few golfish undulate past her feet. No pennies splash about her.

Doctor Claims Stress Is Fatal

MONTREAL (AP)—Stanley Selye understands that stress itself is fatal.

For 19 of his 48 years Selye has been studying stress. And he views it as a hidden enemy which strikes under the guise of heart disease, tuberculosis, insanity, blindness and a host of other ills. Selye holds that it causes chemical imbalances by setting off a glandular alarm system squirting substances which, unless counteracted, can fatally damage vital organs.

A naturalized Canadian of Austrian birth, Selye has directed the University of Montreal's Institute of Experimental Medicine and Surgery since it was opened in 1945. The institute is a clearing house for information on stress.

He has just published his fourth annual report on stress, a yearly follow-up to his major work on the subject, put out in 1950. Doctors have said Selye's theories, defining stress and measuring its chemical effect on the body, hold out prospective help for sufferers of a high-speed age. The answers are neither complete nor universally accepted.

Long before the hormone wonder drugs such as cortisone and ACTH were announced, Selye contended that a patient suffering from chemical imbalance caused by stress—from anything from cold feet to a gun at the head—could never recover unless the balance was restored, either naturally or artificially. He theorized that the balance could be restored by injection of hormones or by operations on the pituitary and adrenal glands, main sources of the trouble. There has been progress since in both fields.

Selye showed in experiments with animals that prolonged physical stress produced such ills as heart disease, ulcers and arthritis—things which he said rarely if ever affected them in their natural state.

His continuing his experiments with animals, mostly rats. Others have widened the study in clinical research to human beings.

"You want to take it? It's all right, really. . . . But you know every sick man, after his recovery is still weak and takes his first steps with great difficulty. And this is a big locomotive—naturally it starts slowly. But it will improve. . . ."

"But the concrete factory people refused to take the locomotive and left it for a 'final treatment.' . . ."

"Then in October they received a telegram to 'come and take your locomotive. It is in wonderful shape. . . ."

"Again the people from the concrete factory decided to test the locomotive before taking it away. And again they had to buy tickets to return by passenger train. . . ."

"The next telegram was received in November. . . ."

"At first the locomotive ran very well. But then it again began to demonstrate its old caprices. I preferred its favorite backward movement. But in addition, it had a new whim. Having acquired full speed, it didn't want to stop. Only with great difficulty could they stop it because the brakes would not take hold. But when it stopped it decided to stay stopped and not move again. . . ."

"And since that time the locomotive remains under repair. . . ."

"And soon it's April again and they will celebrate the first anniversary of this operation on the capricious locomotive."

Carter Tells Reds Allies Would Grant Political Asylum

PANMUNJON, Korea (AP)—Maj. Gen. Leslie D. Carter today told Communist members of the Military Armistice Commission that the Allies would grant political asylum to anyone who wanted it, "even to anyone in this room."

Angered by Communist charges that the Allies had violated the demilitarized zone, the U.S. General rejected the accusations as "utter fabrications."

He said a witness produced by the Communists expressed a desire for asylum. But, he said, the Communists agreed to turn him over only after the Allies signed a receipt which "included a lot of trumped-up charges."

He asked the Communists to stop "your constant attempt to stop the armistice commission serve your propaganda and your aims."

Breakfast For The Minute Man

A breakfast made to order for America's minute men—and women. Here is a menu that appeals to those who must count their minutes in the morning rush hour.

Orange Juice
Cooked Egg
Enriched Toast
Honey Cinnamon Toast Beverage
Marmalade

It's all here, a breakfast for America's minute men—and women. Minute minded, they will find that this menu needs only ten minutes to prepare and ten minutes for eating.

Honey-Cinnamon Toast and Orange Juice Toast appear the minutes when the mixtures for preparing them are kept on hand.

Authorities say that a good, big breakfast should include fruit, enriched bread with butter or margarine and protein food such as an egg or milk. The breakfast, pictured, supplies it's daily share of vitamin C from the juice, B vitamins from the enriched bread which gives a protein bonus to the breakfast in addition to that from the egg. Portions may be increased in this balanced meal to meet energy needs.

Orange Sugar Toast
1 tablespoon soft butter or margarine
1/4 cup confectioners' sugar
Combine butter and sugar. Add orange juice and orange rind. Spread two teaspoons orange mixture on one side of each slice of hot toast. Serve immediately. Mixture may be stored for a few days in the refrigerator.
Yield: 4 servings — 2 slices toast per serving.

Honey Cinnamon Toast
1 tablespoon soft butter or margarine
1/4 cup honey
1/4 teaspoon cinnamon
Combine butter, honey and cinnamon. Spread two teaspoons honey mixture on one side of each slice of toast. Serve immediately. The cinnamon mixture may be prepared in advance and stored.
Yield: 4 servings — 2 slices toast per serving.

2nd Nuclear Sub May Be Launched In Couple Months

WASHINGTON (AP)—The nation's second nuclear submarine, the Sea Wolf, probably will be launched within the next two or three months.

The sister of the 3,000-ton Nautilus—but with improvements in design and an atomic engine of different type—has been building since June 1953.

On the basis of time required for building the first hull, the Sea Wolf apparently will be scheduled to go down the ways at the Electric Boat Division of General Dynamics Corp. at New London, Conn., sometime in May.

If the Nautilus pattern is followed, the Sea Wolf will have when launched the framework and some other components—although not the fuel load—of the atomic furnace.

A land-based model of the Sea Wolf's engine was started at West Milton, N.Y., in 1953 by the General Electric Co., under contract with the Atomic Energy Commission.

The nuclear power plant in the Nautilus, built by Westinghouse Electric Corp., and that for the Sea Wolf are of different types.

The AEC and Navy decided, at the outset of the nuclear submarine program, to build both types and then decide which design was the more efficient and easier operating. The Nautilus has been under trial since last month. The Sea Wolf probably will not be ready until sometime in the spring of 1954.

Tripoli Residents View U. S. Life

TRIPOLI, Libya (AP)—Since the U. S. air base at nearby Wheelus Field installed a TV transmitter for servicemen and their dependents, Tripoli residents have been getting their first view of American life.

Two TV sets have been set up in store windows on the city's main shopping street, the El-Masrah. Crowds gather around them every evening.

"This American entertainment program is so good," declared 65-year-old Mohamed Ben Ali, as he stood in front of the store window set wrapped in his barracan, a white, blanketlike outer garment.

Mohamed, a retired small farmer, said he could not afford a radio and had to think twice before he pays for a seat in an Arabic theater to see an Egyptian film. "So I come every evening to see what the new world has to offer," he said.

'BRAIN' BEHIND GUIDED MISSILES

UNIVAC-SCIENTIFIC, a newly-developed electronic "brain," is now being used to aid the guided missile program at the White Sand Proving Grounds, New Mexico. Its task is to compute and analyze the tremendous amounts of data taken from each firing and turn out the results in time for its use when the next missile is fired.

Senator Tells Of Eerie Experience

(Editor's Note: Sen. Albert Gore (D-Tenn.) was one of 12 members of the Senate Atomic Energy Committee on Monday night aboard the Nautilus, the world's first atomic-powered submarine. He describes his impressions in the following account written for The Associated Press.)

By Sen. Albert Gore WASHINGTON (AP)—How deep the Nautilus can dive is a secret. But there is no secret that I had nervous twinges as she plunged downward in excess of 300 feet. How fast she will race through the dark, briny depths is also a secret. But it was the thrill of a lifetime to break all previous records in this respect as the midnight hour approached.

The fright which I frankly admit and the exhilaration, which I shall not forget, were only aspects of an enlightening, enjoyable, and inspiring experience. The food that we ate was cooked with atomic power. The water that we drank was distilled from ocean water by atomic energy.

We boarded the submarine about 8 p.m. at New London, Conn., and almost immediately the Nautilus started down the Thames River. We wrapped ourselves in Navy jackets to stay on deck until we reached open waters.

After a late lunch of sandwiches and coffee, the committee broke up into parties of two or three to inspect the vessel. Each of us carefully placed upon the lapel of his coat instruments to test radioactivity.

Upon entering the reactor room, I noticed Sen. Easton (D-Mt.) taking a quick glance at his. Of course I am sure it was entirely out of curiosity. I looked at mine too, even though I had previously checked a gauge. The gauge ranged from zero to 300. At no time did my gauge register more than two points. Sen. Anderson's (D-Mt.) gauge registered highest after the hour, standing at 10 points. One very easily checked 20 points on a warm sunny day.

After about 24 hours of thorough and detailed inspection, we returned to the central compartment to exchange views, josh each other about our nervousness, and ask more questions of Rear Adm. Hyman G. Rickover, who is entitled to more credit than any other person for the Nautilus.

The ranking naval officers took their turns in presiding over three sittings at the dinner table where we were served delicious atomically cooked turkey.

After dinner the real shakedown maneuvers of the Nautilus began. Now that his guests had become thoroughly conditioned for it, as he thought, the captain ordered the Nautilus put through her paces. The throttle was opened. The propeller surged and we excitedly watched the dials as we went faster—down, down, down, down. Then up, then down. Straight ahead, full power.

The speedometer needle moved rapidly clockwise, receding only as the Nautilus took sharp banks and turns. Straight ahead again through the deep, and again the speedometer moved clockwise until we were told that we were racing under water at a record-breaking speed.

Then, up again; then, down again; up again; down again. The crew intensely watched all instruments, tested all valves, watched the performance of every delicate gadget. As for the members of Congress, we sat tensely watching the depth gauge with one eye and the speedometer with the other.

At the nadir of a deep dive, Sen. Anderson, chairman of the Joint Atomic Energy Committee, called a meeting. We gathered around a table large enough to accommo-

date all 12 of us plus the clerk, Corbin C. Allardice. At first, it was difficult to get committee business under way because members were still watching the gauges.

Sen. Anderson called Adm. Rickover before us to ask him about the operation, the performance, the cost and the promise of the Nautilus. The replies of Adm. Rickover soon broke the tenseness and for about two hours there was an enlightening and penetrating discussion of this man-made phenomenon.

Sen. Knowland (R-Calif.) remarked at one point that this would undoubtedly be "the deepest thinking" congressional committee meeting that had ever been held. And I suggested that this might be a good place to dump the Dixon-Yates report, along with his copy of the Yalta report.

After we had been submerged for hours, I asked Adm. Rickover how many days the Nautilus could proceed under water at full speed. "Indefinitely," he answered. "Long enough to go the distance around the world and the answer would still be 'indefinite.'"

The significance of this may be measured by the fact that an orthodox submarine can travel full speed under water for only about an hour.

The blast occurred in a mine at Morgnano di Spoleto, a hamlet near this city about 65 miles northeast of Rome. Apparently caused by accumulated coal gas, it smashed through the tunnels at 6 a.m., just as the day's second shift was starting to work.

Witchcraft Charge Placed On Woman Dismissed By Court

GUATEMALA—Olga Monzon, sister of an exiled rival of President Carlos Castillo Armas, has been cleared of charges she practiced witchcraft against the President.

A court dismissed the complaints against Miss Monzon and her maid yesterday. The two women were arrested Saturday.

Police accused Miss Monzon of placing a small rag doll—representing Castillo Armas—in a jar containing a thick liquid, pieces of garlic, onion, tomato and buckshot. After sticking pins into the doll's head, they asserted she sent her maid to bury the jar in the cem-

etry. Both women denied the accusations. The maid charged she had been beaten by police after her arrest. Miss Monzon, a school teacher, also complained against police treatment.

Miss Monzon said the charges were an attack on her brother Col. Elfigo Monzon, who was at one time a member of Castillo Armas' ruling junta. Exiled after an abortive coup early this year, Monzon reportedly is living in Miami, Fla.
