This is an in-stance where "astellite" is a term that we can accept with full understanding that it is defini-tive of the proper manner in which our city and our people can cooperate for the good of all.

In this respect, however, it is obligatory for all concerned — within and without the ranks of the Woman's Club — to understand that the drive for this mental health clinic may be ramwhiled by the club but will need substantial mblie support.

How this is being mustered and how immediate this Adams announced move is in fact are developments which will be watched with the knemest of interest. We believe this is too im-portant and too necessary a health service to wither on the vine.
