County Tightens Crossing Ordinance

An amendment to the railroad crossing ordinance was approved by the Board of County Commissioners. The railroad will have 90 days following execution of a contract to provide signals at specified crossings, provide a flagman at the crossing or restrict the speed of locomotives. W. I. Crabtree and M. E. Smith, spokesmen from the railroad, indicated it would be difficult to meet the 90-day requirement inasmuch as the equipment must be ordered by specification.

Crabtree said that with demand and crossing protection systems approved, there is no alternative but to give this job preference over all else and "other areas may have the same problems. Right now there are 21 crossings where installations are being made. There is a crash program in Orange County now. You must realize our company problems, with six states to serve."

Commissioner Al Davis asked if the holdup concerned men or materials. Crabtree said that both were part of the problem. "You just can't go out into the street and pick up a run-of-the-mill laborer. Even the Interstate Commerce Commission tests these men."

Howard Marsee, acting county attorney, said he regretted the misunderstanding on the part of some editors regarding his statement about the control of speed through mainline crossings. Marsee said he would recommend the attitude that the Board of County Commissioners can regulate speed at the crossings but that on the main line crossings, a degree of reasonableness must be established. "A degree of reasonableness must be established. 'X' might not be a reasonable speed for crossing 'X' but it might cause some conflict with interstate commerce regulations, and it is these restrictions which must be carefully chosen to avoid the conflict, but still serve the interests of Seminole County."

My exposure to the game of chess is limited to such terms as bishop, knight, pawns, kings, etc. Webster says that means a swindler, a card-sharp, to cheat or to swindle. . . . Yep, that's what happens to good ole Uncle Sam, just about every time. . . .

Where there's smoke, there's fire. . . . Edith Duerr had trouble at Friday morning's meeting between South Seminole mayors and county commission chairman, enforcing the "no smoking" rules which prevail in Casselberry council chambers. With annexation and withholding of road and bridge funds the topic of discussion, there was plenty of "fire" as well as smoke.

Another one who is making "hay" while the friendly season gets underway is State Attorney candidate Jerry Bros. . . .

As of the 30th of June, his campaign fund totaled just over \$11 thousand, coming from a group of 112 contributors. . . . He says he has another \$4,000 coming between now and the election.

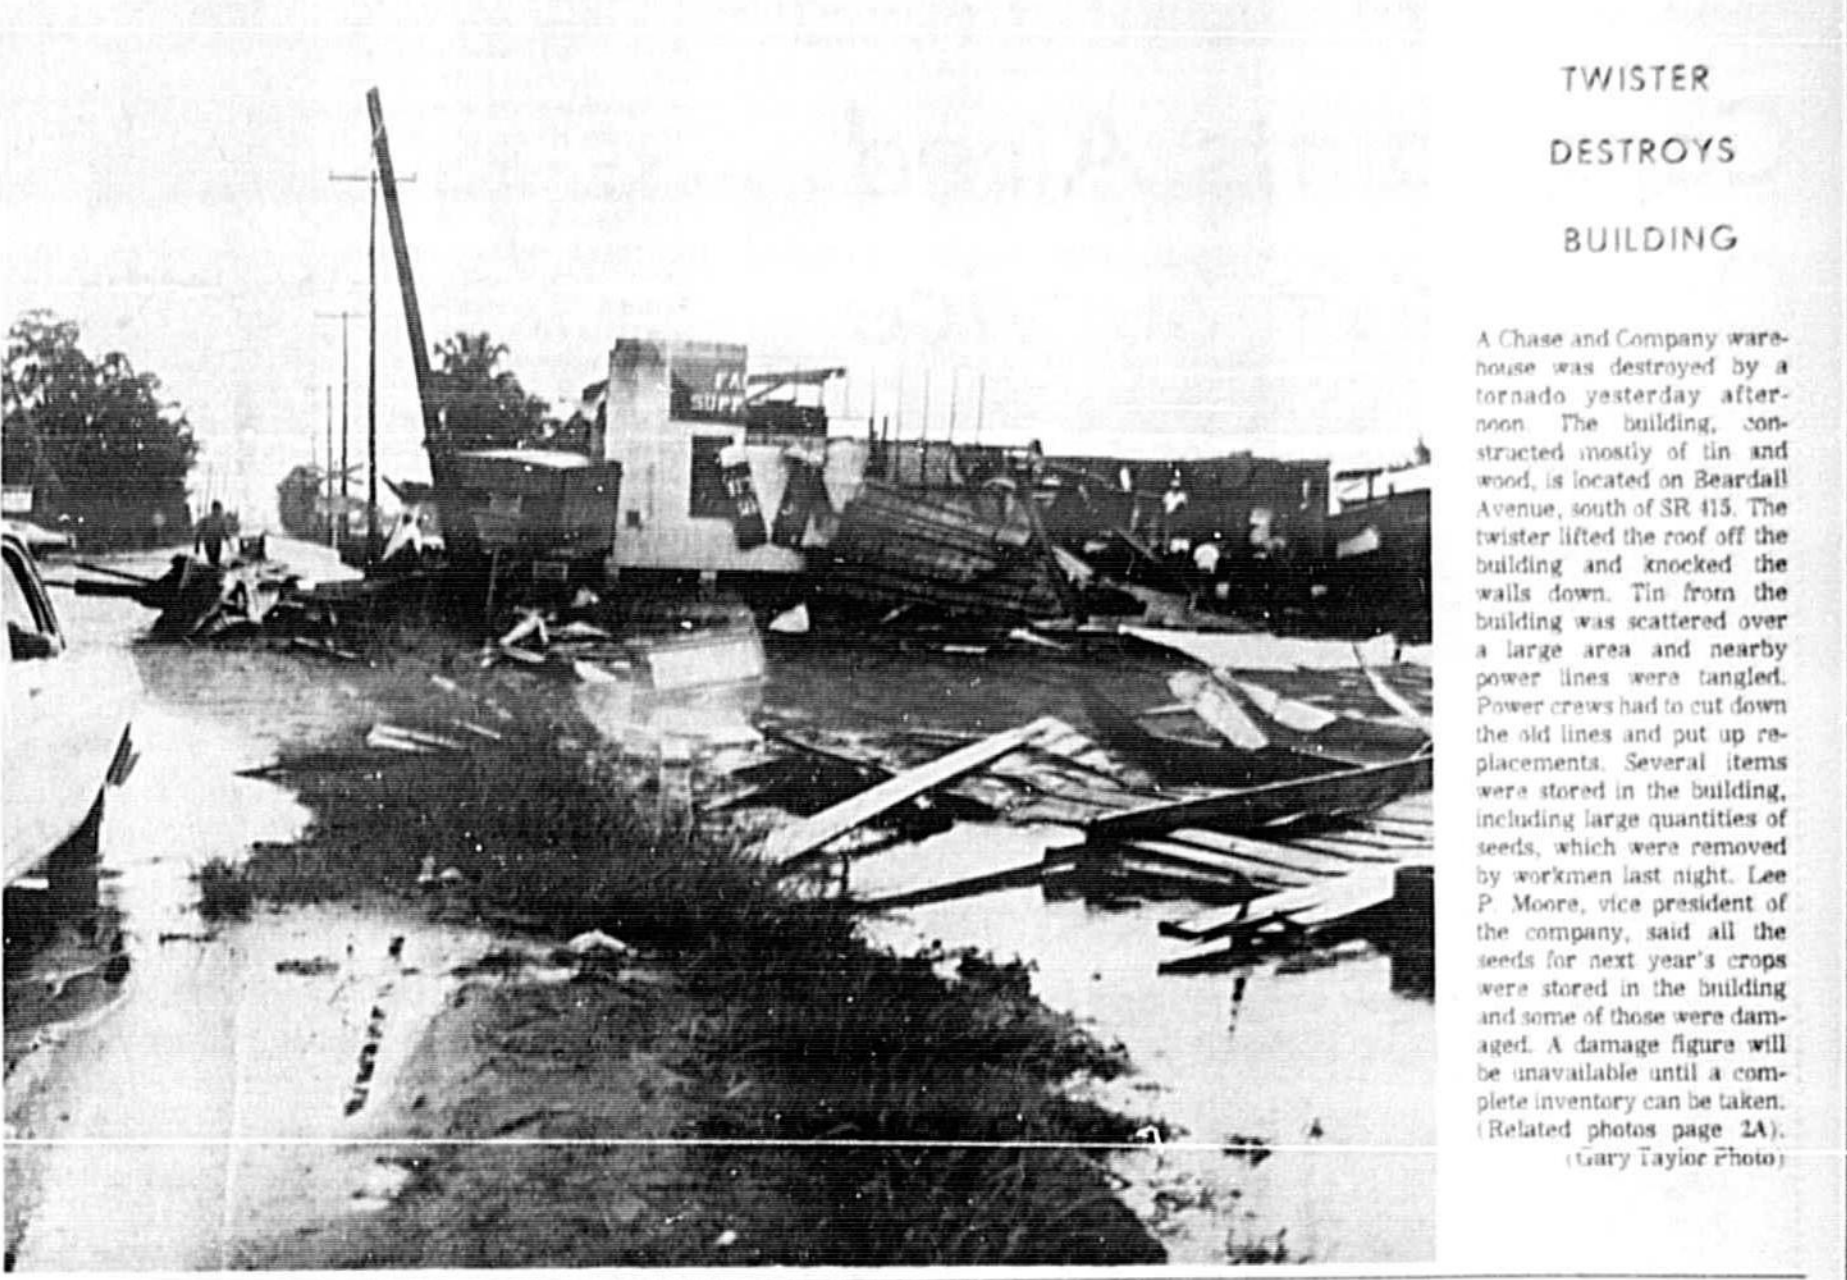

July is the month when your carefully tended lawn begins to look just as attractive as the weed preserve kept by the guy next door. . . .

We get "kookier-and-kookier" . . . That nude photo of actor Burt Reynolds was posted on a wall by an enlisted wave, since sailors have had pinups for years. The Navy's reaction was as untypical as the male undraping. . . .

The pinup, clipped from a recent issue of Cosmopolitan magazine, was ordered taken down from the office wall, and a small group of waves complained that the action was unfair.

Wekiva Acreage Sold \$6 Million Land Deal

Major Realty Corporation, an Orlando-based development company, has completed negotiations for the purchase of a 5,809-acre tract of land on State Road 46 in Lake County, just across the Wekiva River from Seminole County. Ernest Southard, president of Southward Investment and Realty Company, whose firm negotiated the sale of the property known as the "Three Rivers Tract," announced today the purchase price was nearly \$6 million or \$1,000 per acre for the property, which was originally a part of the Moses E. Levy and Peter Mirande grants. The property is located approximately six miles west of I-4 and 10 miles from downtown Sanford. Comprising nine square miles, including 16 miles of water frontage on some of Central Florida's most scenic rivers — the Wekiva, the St. Johns and Blackwater Creek — the specific development plans are expected to be announced after the completion of land use studies. Southward advised the transaction was the largest single real estate transfer ever in Lake County. He said, "Major Realty will build a new city out there," in explaining the land area is larger than the City of Sanford. The property was acquired from Florida National Bank of Orlando, as trustee for the owners, Southward added. P. P. Radtke, Major Realty chairman, said, "We are pleased to have been able to acquire this beautiful property and believe it has a great potential for development." Radtke cautioned that since one of the property's greatest attributes is its esthetic qualities, careful planning in development will insure that

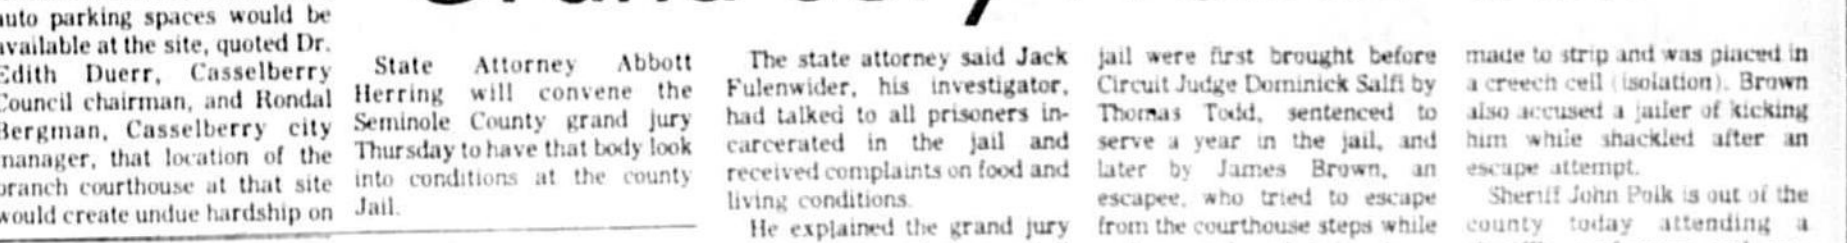

Casselberry Objects To Site New Annex Is Pondered

County commissioners in a work session next Tuesday will consider options of City of Casselberry officials relating to the proposal of placing a courthouse annex at Casselberry. Robert Oldo, representing Moose Lodge, told the Commission yesterday the City of Casselberry officials are planning to construct a meeting place, with sufficient space for county offices, near the Casselberry postoffice and motor vehicle inspection station. Rodney Loyer, county administrative assistant, who said 113 auto parking spaces would be available at the site, quoted Dr. Edith Duerr, Casselberry City chairman, and Donald Bergman, Casselberry city manager, that location of the branch courthouse at that site would create undue hardship on the city during peak traffic periods. Loyer said he asked for a place on the agenda at the Monday meeting of the Casselberry City Council but was told that it was already too crowded. Bergman was to poll the members of the Council and let Loyer know their feeling. The building, as proposed by Oldo and his lodge, has adequate building space at this time. According to Loyer, the tax collector would need 1,520 square feet, tax assessor, 200 square feet, supervisor of registrations, 200 square feet, and building and zoning officers, 200 square feet. If half of the voting machines are moved to the new location, storage alone would require only 750 square feet but with working space 1,800 square feet would be needed. Oldo said if additional space is needed, the county floor could be enlarged without loss of parking space. The county would be assigned the second floor of the building. He was of the opinion that the attitude of the two City of Casselberry administration members was analogous to stifling progress. Commission Chairman Greg Drummond said it should be understood that the opinion given concerned only two members, not the majority of the Council. "A decision must be made soon," Oldo reminded the board, "as plans and regulations must be met and construction completed before the Jan. 1 deadline." Another work session is scheduled next Tuesday, to consider the opinions of the City of Casselberry.

Grand Jury Probes Jail

The state attorney said Jack Fulenwider, his investigator, had talked to all prisoners incarcerated in the jail and received complaints on food and living conditions. He explained the grand jury might also want to look into the manner by which prisoners are being held on pre-sentencing investigation after having been adjudicated guilty by the court, but never sentenced pending the results of an investigation. Herring said the normal pre-sentencing investigation runs from five to six months and the prisoner is held in jail during the time. "I'm not saying that's an unusual time, but the grand jury might want to look into that," Herring added. Charges of mistreatment while incarcerated in the county jail were first brought before Circuit Judge Dominick Salti by Thomas Todd, sentenced to serve a year in the jail, and received complaints on food and living conditions. Todd later reduced his own statements and told the court he "made up" the charges. "Brown told Judge Salti he 'feared for his life' and was made to strip and was placed in a creech cell (isolation). Brown also accused a jailer of kicking him while shackled after an escape attempt." Sheriff John Polk is out of the county today attending a sheriff's conference and was unavailable for comment to Herring's preliminary findings. However, it was Polk who first requested the state attorney to conduct a jail investigation in view of the statements by Brown to Judge Salti.

HEAD-ON CRASH INJURES TWO ON INTERSTATE

Gwendolyn B. Fortuyn, 22, of Daytona Beach, the driver of this 1968 Chevrolet, was flown to Florida Hospital by Helicopter Ambulance after a traffic accident on Interstate-4 near the U.S. 17-92 exit. Trooper P. C. (Phil) Wright of the Florida Highway Patrol is investigating. He was assisted at the scene by Trooper Dan Lawrence. (Related Photos Page 5A.) (John A. Spolski Photo)

Work Patterns Hit By County Chairman

By ANN SIECZKOWSKI
Ed White, chairman of the Government Study Commission, reported to the Board of County Commissioners that some of his members considered asking the Commission for their thoughts on a charter government for the county.

White said his committee studied specific areas of government with emphasis on planning and zoning, roads, and administration.

Commission Chairman Greg Drummond reminded White that specific recommendations would be needed before the budget sessions are completed. "When it comes to budgets, we can't just take a wide brush and dip it into the money bucket and apply where it is wanted."

Drummond said the Commission could not effect a charter government if it wanted to do that a metro-type government appears to be a workable solution. "The charter government would be a form to use for education of the public."

"We should weigh the cost involved in the study — educate the public. I hate to see thousands of dollars wasted because we were not properly prepared. I personally feel that the charter government is premature as opposed to metro government," Drummond stated.

Drummond said he favored the metro-type government because of the zoning in the entire county. "There would be less 'mish-mash.' Also there would be one group to apply pressure to, as well as uniformity of the facility."

"The charter government is the best thing that ever happened to the City of Jacksonville — but in the treatment of the unincorporated areas. Under metro government, you would not see this inequity, but you would see streamlining."

The study group would like to see every consideration given to the sheriff's requests at budget time. Drummond said that there will be the greatest waste in the county if the government gets the passage of Article V — not due to need but according to pleasure and convenience of those involved. There is corruption in government — the corruption of convenience.

"If we are to fund constitutional officers and department heads in convenient Hollywood setting, we are gonna 'sock-it-to-the-people. Austerity in government appears to be a thing of the past," Drummond remarked.

Continuing, he suggested that not all offices are involved, in the two-hour lunches, half-hour coffee breaks, or long vacations. He encouraged the group to get into the offices and check on the work patterns and times off.

"I wonder if those other five judges are really in Broward today," he mused. "These very same judges refused to hire an administrative assistant because they don't want their time scheduled."

"It makes me ashamed more and more each year, from the State (which is worse) to the local levels — to see this corruption of convenience," Drummond opined.

Complaints Aired On Water Service

William Finch, county utilities administrator, informed the County Commission Wednesday he can not recommend special exceptions to developer Charles Adams for water service to Grove Estates.

He said he had many complaints from the existing customers of the utilities company serving the area contiguous with the proposed Grove Estates for which service is being requested.

Complaints were concerned with pressure, quality and quantity of water. Finch said the well probably is too small. It was his opinion that granting the request of Adams would further complicate the problems already existing in the area.

A representative of the Southern States Utilities Company said that his company is designing a new plant which will meet the water standards required by the county. He said that the plans will be filed by Aug. 1.

The county would require at least 500 gallons per minute to assure enough water for fire protection in the area. Finch said that he did not feel this would be available before six to nine months and that sewage service would be available only after a nine- to 12-month wait.

It was felt that the existing plant could be upgraded to acceptability standards but it would be a waste of money. Engineering and costwise, a new plant was considered to be a more feasible approach to the problem.

Adams offered to donate land for the new plant and the choice of which company gets the franchise for utilities could be made at a public hearing.

Finch finally said that he would recommend to the Board of County Commissioners that building permits be issued to Adams provided permits for a water plant also be issued and work begun on it.

Article V Change Told to Kiwanis

Seminole County municipalities that elect to place prisoners in the county jail beginning in January, when Article V becomes law, may have to pay the county for keeping their prisoners.

This was the opinion of Morgan Slaughter, Duval County Circuit Court clerk, who spoke Wednesday to Sanford Kiwanis Club on the complications of the judicial changes in the state with the implementation of Article V, which was approved by judges Jan. 1, 1972.

All cases normally tried in these courts will be shifted to the county courts, also Slaughter said the Legislature is now aiming at relieving the taxes of local communities by having the state pay judge salaries instead of the local taxpayers bearing the load.

The Duval clerk said there are many "gray areas" surrounding the judicial changes that must be worked out.

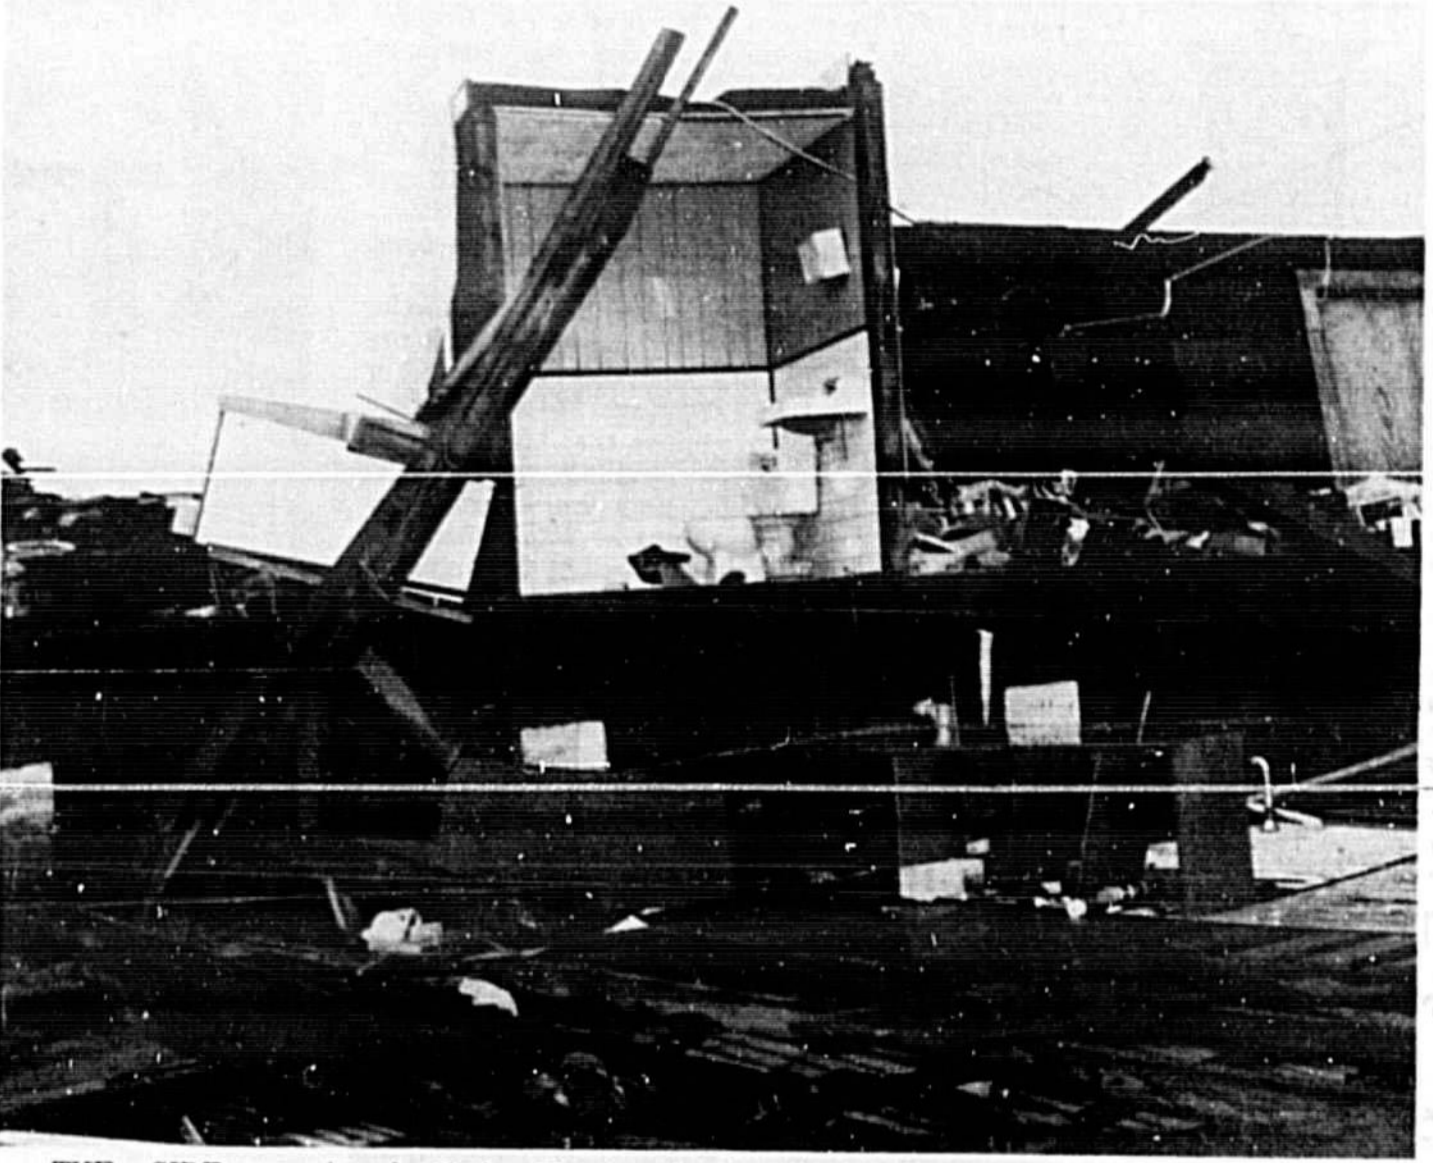

Slaughter, a guest of Arthur Beckwith, Seminole County clerk, stated that confusion will exist for a time but he believes "ultimately we will have the best judicial system in the county."

Slaughter said he believes municipalities may not need jails under the new system; but stressed there is a provision in the bill whereby counties could still have to keep city prisoners since the cities will receive back from the county the fines assessed in county courts to prisoners found guilty of violating city laws.

Under Article V, all city courts may abolish their municipal courts with the

FLORIDA POWER and Light workers untangle a mass of lines after a twister hit a building on Beardall Avenue, east of Sanford, yesterday afternoon. One pole was snapped and several wires blown or tangled by the high-winds. The building was a warehouse owned by Chase and Company and was totally destroyed. Lee Moore, vice-president of the company, said items in the building included agricultural chemicals, seeds and cabbage bags. (Gary Taylor Photo)

THE SIDE was ripped off the Chase and Company warehouse and the tin roof was scattered over a large area. The damage was basically contained to this building on the west side of Beardall Avenue, though a portable conveyor located across the street and also owned by Chase and Company, was destroyed by the high winds. (Gary Taylor Photo)

Suspect In Prison Criminal Charge Dropped

By MARION BETHA
The state has dropped charges against one of the defendants who was docketed for trial next Monday before Circuit Judge Richard Muldrew.

On June 29, the state notified information of lewd and lascivious assault upon a child and assault with intent to commit a felony against Kenneth Cheever, 17.

Cheever was accused of fondling an 11-year-old girl on Oct. 10, 1971, in the vicinity of Sand Lake. He was arrested on Nov. 6, 1971, and two weeks after he bonded out of county jail was arrested by FBI agents for a parole violation. Cheever was then incarcerated at a federal penitentiary at Tallahassee, after which he was transferred to Orange County jail to await trial in Seminole County.

Docketed for trial the week of July 10 is William Griffin, who is charged in three separate informations with buying, receiving, concealing stolen property.

Griffin, Longwood antique dealer, is alleged to have purchased a diamond ring, color TV, clock radio, wall clock, porcelain camera, vases, lamps, goblets, punch cups, stein and a Chinese bell, in transactions dating from Oct. 9, 1970.

Griffin was sentenced on June 30 by Circuit Judge Dominick Sallio to eight years in prison in two separate cases in which he was convicted by a Circuit Court jury of possession of a

Allies Advancing On Quang Tri City

By GEORGE ESPER
Associated Press Writer
SAIGON (AP) — U.S. Navy fighter-bombers pounded North Vietnamese bunkers south of Quang Tri City today, trying to blast open a path for a task force of South Vietnamese paratroopers advancing on the enemy-held provincial capital.

Associated Press correspondent Dennis Neid reported from the northern front that the carrier planes bombed a line of bunkers about 2 1/2 miles from the center of Quang Tri City. The bunkers were concealed in a row of homes shaded by trees and flanking Highway 1.

Two companies of North Vietnamese troops, perhaps 200 or more men, were reported entrenched in the bunkers and firing on the paratroopers despite the air attacks.

An American adviser with the paratroopers, Capt. Gail Furrow, 32, of Urbana, Ohio, told Neid the battalion he is with could have pushed into Quang Tri City on Wednesday but it was essential to secure the highway before advancing.

Other paratroopers penetrated the city limits Tuesday but took up defensive positions on the southern edge.

Intelligence sources said Lt. Gen. Ngo Quang Truong, commander of the 29,000-man counteroffensive, is moving cautiously in hopes of keeping his casualties to a minimum.

Field reports said 180 North Vietnamese were killed in clashes around Quang Tri City on Wednesday. South Vietnamese losses were said to be 10 killed and 90 wounded.

Thirty miles to the south of the nine-day-old drive, the North Vietnamese shelled Hue with 122mm artillery for the fifth day.

Office Space Is Sought By County

"In view of the fact that Greenhut Construction allowed only a \$20,000 deduction in the matter of keeping or demolishing the old courthouse, I talked with A. K. Shoemaker and Dr. W. Vincent Roberts about their property for use as additional space required by passage of Article V."

So reported Commissioner Sidney Vihlen to the Board of County Commissioners Tuesday.

The third and fourth floors of the Roundhill Building would be made available to the Commissioners at a rental of \$50 per square foot per year. The county would have access to the facility and could build as needed. Approximately 10,000 square feet are available on both floors. A figure not to exceed \$75,000, which would include an elevator, was discussed.

Vihlen said he had discussed the matter in terms of three to five years. Dr. Roberts said that he and Shoemaker would be amenable to renewal with the only change foreseeable to be governed by an increase in ad valorem taxes.

Administrative Assistant Rodney Layer was instructed to request a letter from Greenhut provide a formal notification as to anticipated date when the court house is to be demolished.

Another work session has been scheduled for next Tuesday on this matter.

Officers Installed By Legion And Unit

By MARILYN GORDON
CASSELBERRY — Officers of American Legion Memorial Post 256 and American Legion Auxiliary Unit 256 were installed at a dinner meeting at the Painted Horse in the Seminole Plaza shopping center.

District Commander William Paul, assisted by Herman Claudia Triola, conducted the installation.

Post officers installed were George F. Yeager, commander; James Bergman, first vice commander; Edward Izbicki, second vice commander; Harold Kryder, finance officer; Miller Evans, adjutant; Benjamin Evans, historian; Leon Lemaitre, sergeant-at-arms; John Hayson, chaplain; Kenneth Green, service officer; and Charles Wentworth and J. Lewis Ballard, executive committee.

The district commander presented a certificate of service from the Department of Florida to Commander Yeager. Mrs. Dorothy Mitchell, past district president, assisted by Mrs. Betty Hahn, conducted the installation of the unit.

Officers installed include Betty Yeager, president; Emily Green, first vice president; Della Kryder, secretary-treasurer; Alice Pringle, chaplain; Letha Ward, sergeant-at-arms; and Peggy Lemaitre, historian.

Mrs. Mitchell presented awards won at the Department of Florida convention.

Marguerite Schrader was awarded a certificate for rehabilitation. Elizabeth Evans, a certificate for program for children and youth; Peggy Lemaitre, a trophy for winning first place for the unit history, and Letha Ward, a plaque for first place for the publicity scrapbook.

Mrs. Schrader was presented a tray, bearing the Schrader coat-of-arms, and, in turn, made a presentation to her officers. Betty Yeager thanked the Auxiliary and asked for the continued co-operation of all the members.

Legion baseball team manager Otis Brown reported the team was doing well. American Legion Chairman Leon Lemaitre reported the Post again sponsored a boy to Boys State.

Cigarette Tax Receipts

Floridians are continuing to puff away on their favorite brand of cigarette, which fact is illustrated by a report from the State Department of Business Regulation indicating fiscal collections of cigarette taxes are up 18.23 per cent over previous 10 month period.

According to the department, the division of beverage will distribute \$12,654,652.22 in cigarette taxes this month. This amount reflects a total of 73,574,394 packs sold in Florida during the month of April.

Present Facility Said Overcrowded Jail Space Needs Studied By County

By ANN SIECZKOWSKI
The problem of expansion of the county jail came under discussion at the session of the Board of County Commissioners Wednesday.

Chief Deputy Duane Harrell and the chief jailer, Lt. Max Stewart, appeared before the Commission to bring information for consideration.

Stewart said the main problem area is in space for men. There are 72 spaces but they average six to eight over capacity most of the time with a maximum of 89.

He told the board there are 15 individuals serving sentences (one woman) at this time. Two cells are laid out, one for two girls and one for 11 boys.

Commission Chairman Greg Drummond wondered if there would be an interim report from the problem if the county were to approach neighboring counties for space for Seminole juveniles.

Harrell said that the state would have to approve the city jail for juveniles since it is a condemned building already presented to the commissioners.

Moving the juveniles out of the county and moving the girls to another facility would allow 25 more beds for the overcrowded male population. Stewart said that when the city closes its jail, the county will face a need of approximately 110 to 120 spaces.

Judge Roger Dykes wants a solution to the problem now. He was unable to present at this hearing due to illness. Judge Dominick Sallio was filling in for him in court and the other five circuit judges were in Broward County.

Drummond said that the bottleneck, with the parole and probation investigations reflect on the state addressing itself to other angles of criminal justice, but "no reasonable attitude toward the pre sentencing investigation."

"It would be most interesting to see how this situation is handled in the 'fat cat' counties," Drummond said. "We had better find a solution for this problem or we might get slapped with a court order." He suggested a meeting with state agencies on this problem. Layer was requested to check on possibility of using city jail facilities.

Wallace Leaving Hospital

By JANET STAIHAR
Associated Press Writer
SILVER SPRING, Md. (AP) — George C. Wallace, partially paralyzed but still seeking the presidency, ends a 53-day hospital stay Friday and flies to the Democratic National Convention where he will disclose his plans for the future.

Aides say the Alabama governor will make an important political announcement on his arrival in Miami Beach.

Wallace has been fitted with leg braces and a 33-inch-high walking bar so he can swing his legs along without the aid of another person.

He lifts 50-pound weights daily and is doing scores of pushups from his wheelchair with the aid of therapy bars. He has lost weight but does not appear gaunt.

Specialty built ramps have been installed at the Miami Beach convention hall to accommodate Wallace's walking bar and wheelchair.

The governor, who trails Sens. George McGovern and Hubert H. Humphrey in a Democratic delegate count, aims to influence the party position on such issues as busing and tax reform.

Aides have given no indication what Wallace will say on arrival at the convention.

Wekiva Acreage Is Sold

Continued From Page 1
environmental and ecological qualities of such natural features as the Wekiva River and Blackwater Creek may be preserved.

Major Realty was the original developer of Major Center, a condominium, championship golf course and commercial properties, and just recently entered into an agreement with Gulf Oil Company Real Estate Development Corporation for the further development of this center, which comprises approximately 2,500 acres in the City of Orlando.

Robert McGraff, Major executive vice president, said today no commercial development is planned for the property at this time and added the results of the land use studies will determine the ultimate property use.

"This beautiful piece of property would lend itself to a lot of things but we will wait until we see what the planner finds," he added. He stated he envisioned a return to nature with possible second home family retreats on the property.

TRACK TALK with George Crossley

24 Hours Of Daytona

The 24 Hours of Daytona in February 1973 will be for Grand Touring and Touring cars with NO prototypes participating. This will mean racing on far more equal terms...

The Firecracker 400 had more than one winner. Clifton (Coo-Coo) Marlin drove his '72 Chevrolet to a fourth place finish...

A further note about the Paul Revere 250 which was an extremely close contest. H. B. Bailey was running well in that Firebird but handling what made the difference for Vinny Gimondo...

Gimondo will be competing in the IMSA Camel GT 6 Hour race at Mid Ohio this weekend. Vince is still looking for a major sponsor.

Road Atlanta

The Road Atlanta Can-Am this weekend with some doubt as to whether Mark Donohue will be able to race because of injuries sustained in an accident while practicing in the Penske Can-Am Porsche...

During the Firecracker 400 I had a ringside seat from the Broadcast Tower along the 4,000 foot back straightaway where along with Motor Racing Network broadcaster Tracy Dent...

NASCAR's change in rules which allows reworked intake manifolds has been a boon to the Hemi and the 429 Ford. The Hemi is developing as much as 550 horsepower which is very close to what they were putting out without any carburetor base whatsoever.

A constant and disturbing rumor is that Jackie Stewart will cut his racing schedule by half for the rest of the season. Jackie has been suffering from illness for the entire year.

Look for a change in NASCAR rules for the 73 season. The change may involve Cup cars in the Grand National engines. I suspect that NASCAR may see the "folly of the plate" after this year.

Pete Hamilton was out there racing with the leaders at Daytona this past weekend and although he had some mechanical problems Hamilton clearly showed that he had the speed to run with the leaders.

Pearson At Talladega

Car owner Glen Wood, jubilant over his sixth major win of the Winston Cup season, has announced that popular David Pearson will drive his Parlatore Mercury in the August 5th Talladega 500 at Alabama International Motor Speedway.

Petty To Acting

Richard Petty, the most consistent winner in the entire history of stock car racing, plays the starring role in the nation's newest auto racing film.

It tells the full story of this year's exciting DAYTONA '500' and follows the Petty portion of the STP Racing Team across the nation and back again in a fast-paced, behind-the-scenes portrayal of the drivers and the men behind the nation's fastest racing machines.

New Smyrna Action

Orlando's Wayne Heckle showed a packed house of race fans Monday night at New Smyrna Speedway that he has the stuff to win. The fans just had to wait a while to see for themselves.

Prior to the race, vandals snipped the power connections to most of the track's lights - leaving the track in the dark while the problem was located and repaired.

Heckle wasn't bothered by the darkness, though, and when the lights came on, he was unbeatable. Especially with archival Henry Ponder's Datsun out of the race with a broken crankshaft suffered in warmups.

Defeat Club Lui, 11-3 Clark-Hirt Meets McRoberts Tonight

Clark & Hirt, probably the most improved team in the Sanford Women's Softball League, defeated Club Lui 11-3 last night in a playoff game to decide the second half winner.

The first game of the city championships in that league starts tonight with Clark & Hirt taking on first half winner McRoberts Tires at 7:30 p.m. It will be a best two out of three game series.

It's only fitting that Clark & Hirt got into the city tournament, since they're the ones that put McRoberts Tires there. McRoberts and Motor Parts were headed toward a first half tie for first place when Clark & Hirt upset Motor Parts in the last game of the season.

After a fifth place finish in the first half, the Clark & Hirt team must have been sparked by the big win over Motor Parts. From that time on they became the team to beat.

They had to beat Motor Parts again in the last game of the second half to get into the second half playoff.

Clark & Hirt opened with a three-run first night on five hits. Lynn Smith, Karen Curthens and Sheila Bogan had the hits for Clark & Hirt in the big opening frame.

Club Lui scored one run in the bottom of the first on one hit, by Kathy Belington. A single by Lynn Smith and some costly fielding errors by Club Lui gave Clark & Hirt three more runs in the second.

A lead-off home run by Clotel Lavery gave Club Lui their only run in the second, making the score 6-2. Clark & Hirt had a big third inning as four runs crossed the way station on five hits. Gena McCollem had the big hit of the inning.

Clark & Hirt out-hit Club Lui 17 to six. For Clark & Hirt, Lynn Smith had three singles; Gena McCollem had two home runs; Kathy Belington, A single by Lynn Smith and some costly fielding errors by Club Lui gave Clark & Hirt three more runs in the second.

Clotel Lavery gave Club Lui their only run in the second, making the score 6-2. Clark & Hirt had a big third inning as four runs crossed the way station on five hits. Gena McCollem had the big hit of the inning.

Clark & Hirt out-hit Club Lui 17 to six. For Clark & Hirt, Lynn Smith had three singles; Gena McCollem had two home runs; Kathy Belington, A single by Lynn Smith and some costly fielding errors by Club Lui gave Clark & Hirt three more runs in the second.

Clotel Lavery gave Club Lui their only run in the second, making the score 6-2. Clark & Hirt had a big third inning as four runs crossed the way station on five hits. Gena McCollem had the big hit of the inning.

RENOVATION OF THE Sanford Stadium is currently underway by the Seminole High Booster's Club. Here, the field is being plowed in preparation for new sod which will be put in. The school board had excluded \$50,000 for new lights at the stadium, which was promised earlier, but are studying costs of upgrading the present lights. (Joe Bush Photo)

Evonne Needed Help To Reach Tennis Final

By NOEL HUGHES Associated Press Sports Writer WIMBLEDON, England (AP) — Stan Smith, U.S. Army Corporal, and Ilie Nastase, Romanian Army lieutenant, went into separate battles today for places in the men's singles final of the Wimbledon Tennis Tournament.

Smith, seeded No. 1, was counting his powerful serve in his semifinal match against Jan Kodes of Czechoslovakia.

Nastase, with his rapier-like volleys and lightning maneuvers, opposed Spain's Manuel Orantes in the other semifinal.

The 26-year-old Smith from Pasadena, Calif., seems to have reached his peak at the right moment.

Miss Goolagong had a 17-90-minute semifinal against 17-year-old Chris Evert of Fort Lauderdale, Fla.

Lee Clark, some best victory to the Wimbledon center court, took the first set 6-4 and raced to a 3-4 lead in the second.

Nastase, the No. 2 seed, Kodes and Orantes all are clay court performers. But they were given tactical advice by Vic Edwards, her coach and legal guardian.

Edwards said, "But this time I was able to help, because I know the weaknesses of players who use a double grip for their backhand."

Edwards said, "I usually leave it to Evonne herself to decide how to play a volley and some best victory to the Wimbledon center court, took the first set 6-4 and raced to a 3-4 lead in the second."

Edwards said, "I usually leave it to Evonne herself to decide how to play a volley and some best victory to the Wimbledon center court, took the first set 6-4 and raced to a 3-4 lead in the second."

HOME, SWEET HOME? Not in the major leagues, where the catcher's job is to try to make sure you can't go home again. Dave Marshall (18) of the Mets was tagged out by Houston's Larry Howard, above, but Cleveland's Frank Duffy landed safely when Minnesota catcher Phil Roof (48) dropped the ball, below.

Firecracker Classic Set For Jet Lanes

All the "Firecracker" action didn't conclude with the running of the Daytona Firecracker 400 since local keglers will compete in the 12th Annual Firecracker Singles Classic this weekend at the Jet Lanes.

Entries are still being accepted for the Classic which is being presented by the Sanford Men's Bowling Association and sponsored by Maryland Fried Chicken.

The double elimination event starts at 7:30 p.m. Friday, July 7 with entries also being accepted until that time. The first two rounds of the tournament will be held on Friday, July 7 and round three through six will be completed on Saturday, July 8.

Only members of the Sanford Men's Bowling Association are eligible to bowl in the tournament which will be divided into two divisions. The "A" division is for those bowlers with a 170 average and above and will be determined on a scratch basis.

The original plans for the tournament was to limit it to 16 bowlers, eight in each division with entries being accepted on a first come first serve basis. But tournament manager Rod MacLeay has indicated additional entries will be accepted, even from outside the SBMA, providing eight bowlers can be signed up to fill two more divisions.

Entry fee for the tourney is \$6 and the return can be as much as \$30 for first place along with a trophy. Other winnings are a \$15 second prize and a \$5 third prize. The prize list is the same for both divisions. And additional prizes of equal worth will be awarded should any more divisions be included in the tournament.

It shall be the bowler's responsibility to verify the accuracy of his average whether originally submitted by himself or others. If submitted average is lower than actual average the bowler will be disqualified. If the submitted average is higher, prize winnings will be based on it.

Averages are to be taken from the highest ABC sanctioned average of the 1971-72 season, 21 games or more. All bowlers must be ABC sanctioned.

ROD MACLEAY has a gleam in his eye as he peers at the two trophies to be presented to the division winners in the Firecracker Singles Classic slated for the Jet Lanes tomorrow and Saturday. MacLeay is the tournament director of the event which is being held for the 12th year.

5 Complete Games In Row Red Sox Hurlers Causing Stir

By HAL BOCK Associated Press Sports Writer Lee Stange, who spent four American League seasons pitching for the Boston Red Sox in cosy Fenway Park with the friendliest left field wall in all of baseball, laughed out loud.

Stange, now the Red Sox pitching coach, was watching newsmen and club officials scurry through record books late Monday night to find that Minnesota's Steve Carlton and consecutive shutout in the string, following Lynn McGlothen's three-hitter against the Twins Tuesday. The other route-going efforts in the string belong to Ray Cupp, John Curtis and Luis Tiant.

Elsewhere in the American League Wednesday, Baltimore blanked Chicago 1-0, Kansas City trimmed Oakland 5-2, New York downed Detroit 4-1 and California nipped Milwaukee 1-0. Texas at Cleveland was postponed by rain.

With the pitching staff coming through so well, the Red Sox have won six straight games and eight of the last nine. The Sox turned around their only one-third place in the American League East, five games back of division-leading Baltimore.

The Sox nicked Jim Perry, 6-8, for a second inning run on Carlton Fisk's double, a wild pitch and Bob Burda's sacrifice fly. They got their other run in the eighth when Tommy Harper ran by a pitch, stole second and rode home on Carl Yastrzemski's third hit of the game.

Baltimore edged two games in front of Detroit at the top of the AL East as Dave McNally limited Chicago to five hits and Brooks Robinson's second in-order hit capped the Sox' only one-third place in the American League East, five games back of division-leading Baltimore.

It was the fifth shutout of the season for McNally, 3-7, who outpitched Wilbur Wood, 13-9. Kansas City jumped on Mickey Lolich for three first-inning runs and thumped the sagging Tigers, who have now lost five of their last six games to slip behind Baltimore.

The Royals bunched hits by Fred Patek, Amos Otis, Richie Scheinblum and John Mayberry plus an error by Paul Jafa to take a quick lead. Then they keyoned Lolich, 13-4, with three more runs in the sixth. The Tigers ace allowed 10 hits and was disgraced with his performance.

"This was probably the poorest game I've pitched all year," he said. "Yeah, it was the worst. I was wild inside the strike zone."

Paul Splitteroff pitched a three-hitter for the KC victory. The Yankees got a six-hitter from Steve Klitek, 7-3, to beat Oakland and Ken Holtzman for 11 hits as he dropped his sixth game in 17 decisions.

Nolan Ryan hurled his eighth complete game of the season and fourth straight, pitching California past Milwaukee. The fireballing right-hander allowed just four hits and struck out just eight.

The Angels scored the games only run in the ninth inning when Winston Llenas, pinch hitting for Ryan, delivered a two-out single that scored pinch runner Syd O'Brien. Ken McMillen had opened the inning with a single and Leo Carrasas sacrificed to bring in second, setting up the run.

Durocher bellowed, unloading a choice expletive, "and you can quote me." Oh, hey.

Casselberry Nears Purchase Utilities Documents Studied

By KATHY NIBLACK

CASSELBERRY—The seemingly endless process of the city's acquisition of the CASSUCO utilities system moved a step closer to completion this week as the City Council authorized a bond resolution in connection with this purchase. In addition to authorizing the bond resolution, council members studied two documents in connection with the purchase and suggested several changes in those documents. City Engineer R. C. Conklin and Fiscal Agent David Gunby were also present to suggest changes and to answer questions. The two documents studied were the agreement of purchase and sale for the system, and a lease agreement for the proposed water plant which the city will build and then lease back to CASSUCO. Most questions in the

discussion were concerned with property that CASSUCO has obtained since the two parties agreed on a purchase price, and how this would affect that price. City Attorney Kenneth McIntosh reported to the council that the acquisition of the new property (known as the Sutton property) would raise the purchase from the original \$2,117,000. McIntosh pointed out, however, that this additional cost would reduce the estimated cost of improvements needed on the system (another \$2 million) so the new figure did not really include an extra fee. Questions were also asked about five parcels of land which the city understood would be included in the purchase price, but which have not been. McIntosh will question CASSUCO officials about this, as well as about other final points in the contract which need to be cleared. The city

feels that these five parcels should be included in the entire package, or there will be "no deal." Mayor Curtis Blow accused the council of turning its council meetings into a "a three ring circus" after arguments broke out over a proposed amendment to the Zoning Ordinance. The amendment as it stands now would limit construction to 12 units per acre. This is an attempt to cut down on the possible number of apartments in the city. Councilman Edith Duerr proposed this be changed from a limitation of 12 units per acre to one of 14,000 square feet of construction per acre. According to Duerr, this would allow more "flexibility" for builders in the city. Councilman John Zacco vehemently opposed Duerr's suggestion, and accused the councilman of being "in cahoots" with developers who

State Solons Probing Fly-By-Night Studios

ST. PETERSBURG, Fla. (AP)—As state officials urged controls of fly-by-night dance studios that soak students for thousands of dollars, representatives of established studios pleaded for a chance at self regulation Wednesday. A state licensing board is needed to crack down on studios that prey on the elderly and lonely, Pinellas County State Atty. James Russell Wednesday told members of a House subcommittee probing complaints of questionable practices. However, William Turnbull, an Orlando attorney representing the Florida Association of Dance Studios, asked that the

J. Horner Is Honored

John C. Horner, 123 Linda Lane, was one of 10 employees from the Orlando division honored at Martin Marietta's corporate-wide Honors Night banquet held in Washington, D. C., last week. Horner was cited "For excellence in many aspects of employee and community affairs that have reflected reflectively and positively on Martin Marietta." The banquet is an annual affair at which a small number of the corporation's 30,000 employees are recognized for outstanding professional contributions. Horner is an administrator in the Orlando division's employee relations department.

Market Disqualified
ATLANTA, Ga.—An Orange County, Fla., food store—Gill Powell's Market—has been disqualified from the federal food stamp program for violations, the U.S. Department of Agriculture's Food and Nutrition Service reports. Owned by Gilbert Powell, the Tildenville, Fla., food store was disqualified for one year, starting May 27, after being charged with selling ineligible items for USDA food coupons, including cartons of cigarettes, cleansers and clothing. An FNS regional official said the owner may apply for reinstatement of the store in the food stamp program to take effect at or after the end of the disqualification period. Until the store is reinstated, however, he said it may not accept food stamps. Food stamps, by law, can be used only to buy food, he added.

Food Fair Earning Down
Food Fair Stores, Inc. reported sales for the 40 weeks ended May 6 of \$1,597,000,000 and earnings of \$7,483,000, equal to \$1.02 a share. In the comparable year-ago period, the retail food and department store chain reported sales of \$1,461,000,000 and earnings of \$8,764,000, equal to \$1.19 a share. For the recent 12-week fiscal third quarter, sales were \$471,594,000 and earnings were \$83,000, equal to one cent a share. In last year's third quarter, the company reported sales of \$448,600,000 and earnings of \$1,600,000, equal to 21 cents a share. Earnings are based on the 7,263,955 shares currently outstanding. The company operates 516 Food Fair and Planity Pride supermarkets and 79 J.M. Fields discount department stores.

New Telephone Exchange
R. P. Hulbert, president of the Winter Park Telephone Company, announced that the company has started construction of a new central office to serve the Forest City-Lake Brantley portion of the company's service area. Hulbert said the new electronic central office will be located near the intersection of Sand Lake Road and S.R. 431 located near the intersection of Sand Lake Road and S.R. 431 in Forest City and will be placed in service in December 1973. The new office and associated central office equipment will cost over \$2 million and, initially, will be equipped with 6,000 central office lines. Ultimately, the new exchange will have 20,000 lines and be capable of handling up to 40,000 directory numbers. Hulbert said the \$23,000 building will be constructed by Sorenson & Fletcher, Winter Park, in approximately 180 days after which the central office equipment will be installed and tested prior to being placed in service.

Asst. Controller Named
John R. Cove has been appointed assistant controller of United Bancshares of Florida, Inc., announced Thomas E. Bartlett, vice president and controller of the registered bank holding company. Cove formerly was assistant controller of National Newark-Essex Bank, N.J. He earned his BS degree in accounting at Fairleigh Dickinson University and completed two years of study at the School Bank of Administration, University of Wisconsin.

Business Mirror Service Industries Set To Climb

By JOHN CUNIFF AP Business Analyst
NEW YORK (AP)—There is a widespread belief that increases in productivity are more difficult to obtain in the service industries, such as health, recreation, insurance and education, than in the manufacture of goods. And when it is noted that the United States economy is steadily becoming more service oriented—for the first time, more money was spent last year on services than on goods—the notion becomes mixed with concern.

It even leads to dire forecasts that the American quest for the good life, which is represented by the growth of services, may lead to a deterioration of the nation's competitive position. A look at the figures would tend to confirm the fears. During the decade of the 1960s, productivity in the services rose by an annual rate of about 2 1/2 per cent, compared with 3 per cent in manufacturing. But that was past, and according to an acknowledged authority on service industries, John R. Beckett, it need not be the future. The efficiencies of volume, he maintains, are not limited to the production of goods alone. Any time you have a one-on-one effort, such as in the barber shop, you have limitations, Beckett concedes. But he also claims that many service jobs need not require one worker for each client, although that is often the way they have been practiced in the past. In the teaching of surgery, he states, there is no reason why students should be huddled around an operating table when vastly greater numbers could be just as effectively taught through the use of video tapes. Beckett believes that the future of productivity increases in services is highly dependent upon a marriage with manufacturing. Without machines, services would remain dependent upon human energy. How do you improve the productivity of the barber, the automobile mechanic and the bus driver by improvizing machines, he asked? Beckett passed on the barber, although it isn't inconceivable that future barbers might be relying more productively by using chemical treatments where machinery fails them. The automobile mechanic's productivity could be raised quickly, Beckett believes, by the use of sophisticated diagnostic equipment. And the bus driver's output might be improved by cartoning him as a bus driver but as a people mover operating more efficient mass transportation vehicles. True, there will remain the need for one-on-one services, Beckett concedes, but he adds that when the limitations are in our conception of the job. In most instances, the economies of scale are available, he says.

WINNERS in the Miss Maitland Pageant are left to right, Paula Forrest of Orlando, first runner-up; Marian Sandry, Winter Park, Miss Maitland, and Carol Anne Barfield of Winter Park, second runner-up. Miss Forrest is a graduate of Valenciana Community College and plans to continue her education at Fisk University. Miss Sandry attended University of Kansas and Art Institute in Kansas City. Miss Bauder plans to attend Bauder Fashion College. (Marilyn Gordon Photo)

Schools' Upkeep Cost \$700,000

By DONNA ESTES (Second in a series)
Any repairs that need to be done at Milwee Middle School before classes begin in the fall will be done under normal and routine maintenance, Hugh Carlton, director of auxiliary services for the school system, told The Herald. Paint crews will be at the facility within the next few days to paint the inside and outside of the school plant, carpenters, electricians and plumbers will also be doing necessary repair work, spots on the roof will be repaired, windows replaced and rotten wood replaced. All these things will be done at Milwee in the same manner as all the other schools in the system. Carlton said, "Milwee will be treated no differently than any other school," he declared. Carlton also said a statement made by Longwood Councilman William Klosky at a meeting of his city's council last week that \$13,000 is to be spent at the facility was incorrect. "He could not have gotten that information anywhere. It is not available," the director insisted. "No specific amount has been budgeted for the repair work," Carlton said. "Any amount to be spent will be under the new budget." Woodlands subdivision mothers in a story published in yesterday's Sanford Herald said Andrew Bracken, assistant to School Supt. John Angel, had told them that some \$15,000 has been budgeted to repair Milwee and \$3,000 of this amount is to be used to renovate the administrative offices. Associate Supt. Walter Teague said, however, that the amount he drew up specifies some \$700,000 for complete maintenance and upkeep of all the schools in the system for the entire 1972-73 fiscal year. Milwee "will not be air conditioned in the near future. It will not receive primary consideration over other schools," Carlton continued. Air conditioning needs of the schools are currently being surveyed by School Architect Eoghan Kelley, who two weeks ago estimated the cost of the complete project at \$3 million for "first class air conditioning" or somewhat less under an "el cheapo" method. The group of Woodlands subdivision mothers yesterday insisted Milwee School needs a complete renovation and told stories of students this past year playing cockroach races on their desks. The mothers also decided the fact their children will be going to Milwee School rather than the new Teague Middle School. Andrew Bracken, assistant to Supt. of Schools John Angel, said the tiered wire mesh was being drawn for the purpose of creating boundaries for Milwee, South Seminole and Teague Middle Schools it had been believed 14 west and U.S. 17-22 east could be natural boundaries for Teague and South Seminole respectively. But it was found that by taking all former fifth grade Forest City elementary school students, including those living in the Woodlands, to Teague, it would have been above its 900-capacity while maintaining the 1972 boundary for South Seminole would have put that school below its 1,200 maximum. It was then decided, Bracken said, to channel all children leaving Spring Lake Elementary to Teague and those leaving English Estates to Teague and South Seminole. Milwee student enrollment is to be 1,050. Bracken said every time a new school is built or a change is made necessary because of growth, parents get upset and naturally so. But since the system has to change with growth, there is little that can be done about it. "There is no way to prevent having to move the children. We have to make adjustments based on growth," he concluded.

Keep Eye Open To Skin Cancer

By JEANNE VAP Copy News Service
The trouble is, with most people, the tan doesn't protect the dermis enough. The elastic tissues degenerate — and leathery, wrinkled skin results. "The darker the skin is to start with, the less likely a person is to have degenerative changes because of exposure to the sun," reported the dermatologist. "Studies show that there is always a prevalence of skin cancer where fair-skinned people have migrated to more tropical climates — like Australia, the southwestern United States and California. Of course, some people are so sensitive to light they would have to spend their lives in a tunnel to avoid any degenerating skin effects," said Vanna. Others simply have to make the choice between wrinkles in your 40s and 50s and the outdoor life. "Unless you are diligent enough to keep putting sunscreen on, it is hard to keep from being overexposed to the sun," he said. "Every day I see patients who say, 'I never go out in the sun.' But the skin on their neck and face and lower arms is very different to that on the rest of their bodies."

Buying Appliance? Shop Through Ads

By JOYCE ROARK Copy News Service
Large appliances are major investments for a family. Very often they are bought on time. A great deal of care and examination should be used in selecting an appliance so that you won't go broke paying finance charges, interest, and repair bills. Very few families nowadays use a scrubboard to do their laundry. They use either a conventional or an automatic washing machine, with the vast majority using the automatic. If you are planning to purchase a washing machine in the near future, start looking now. When you find the one that best fits your family's needs, keep an eye on sales and ads. You may be lucky and find it on sale — a savings for you. Never buy an appliance solely on price. The most expensive is not always the best and the cheapest is not always a bargain. Automatic washers are available in two styles — top-loading and front-loading. As to which is best, the choice is yours. Either type, if properly made, will adequately clean your laundry. There are various sizes of washers. Each is measured in pounds, but this is not representative of the amount of laundry that can be washed at one time. For example, a pair of sneakers will weigh more than a towel. But the towel will take up more room than the sneakers. Therefore the bulk of the clothes is more important than the weight. Always load the clothes loosely. A packed tub may cause undue wear on the machine and on the clothes. Too many clothes in the washer cuts down the amount of agitation and thereby reduces the cleaning. A washer should be able to provide a hot, warm, or cold wash; a warm or cold rinse; normal or slow wash and spin speeds; and a control that can be set for long or short wash periods. The explanation for this delightful, novel way of shedding fat wasn't complete enough for me. I had to send away for further facts. I read an article in a fashion magazine called "Wine, Dine and Diet." It told how the American Medical Association had done extensive research as to why some people who consistently ate heavy and rich foods were thinner than others with the same eating habits. Examples used were the people of France and Germany. Why weren't there more fat people in France? The scientific conclusion was the French drank wine with the meal. The article then proceeded to furnish a diet which, if followed faithfully for 10 days, would guarantee to the normally healthy person a weight loss of a pound a day, but there would be a greater amount of pounds lost when it was time to eat breakfast (optional), four-five ounces of a dry wine was drunk. Now, how many of us are aware that wine can be an answer to a dieter's prayer? This bit of happy news first stirred my interest for further facts. I read an article in a fashion magazine called "Wine, Dine and Diet." It told how the American Medical Association had done extensive research as to why some people who consistently ate heavy and rich foods were thinner than others with the same eating habits. Examples used were the people of France and Germany. Why weren't there more fat people in France? The scientific conclusion was the French drank wine with the meal. How about meals for American men?

By SUSAN DELIGHT
Copley News Service

A poll of foods favored by American men would surely place beef roast, fried chicken and chocolate cake high on the list.

If beef is the choice splurge and feature a Beef Rib Eye Roast, cut from the center and most tender part of the rib section.

Chicken Imperial is fried chicken with a new face — Chicken pieces coated with bread crumbs and baked to a golden crispness in the oven.

Apple Chocolate Walnut Cake is spicy, crunchy, tender, fine-grained and easy to slice without crumbling. It uses applesauce as the "liquid," and the applesauce helps keep it moist. It can be frosted with vanilla, chocolate or caramel frosting.

Combine bread crumbs, cheese, parsley, garlic, salt and pepper in shallow dish. Brush chicken pieces with melted butter, then roll in crumb mixture. Place pieces in single layer on foil-lined shallow baking pan. Bake in 375 degree F. oven 1 hour or until tender.

YIELD: 8 servings.

APPLE CHOCOLATE WALNUT CAKE
1 cup butter or margarine
1 cup sugar
1 egg
1/2 cup chopped walnuts
1/2 cup teapsoon salt
1 teapsoon baking soda
1 teapsoon cinnamon
1 teapsoon allspice
2 teapsoons breakfast cocoa (not instant)
1 cup applesauce, heated
1 teapsoon vanilla

Cream butter to consistency of mayonnaise; add sugar slowly; cream until fluffy. Add egg, beat well. Add a little of the flour to walnuts, mix and sift remaining flour, salt, baking soda, spices and cocoa. Add flour mixture alternately with heated applesauce to creamed mixture. Stir in vanilla. Spoon into greased and floured 8-inch tube pan. Bake at 350 degrees for about 40 minutes or until cake tester comes out clean. Cool in pan 10 minutes. Remove to rack to finish cooling. Frost and decorate as desired.

CHICKEN IMPERIAL
2 cups fine dry
1/2 cup butter
1/2 cup chopped walnuts
1/2 cup teapsoon salt
1 teapsoon baking soda
1 teapsoon cinnamon
1 teapsoon allspice
2 teapsoons breakfast cocoa (not instant)
1 cup applesauce, heated
1 teapsoon vanilla

Place the roast, fat side up, on rack in an open roasting pan. Insert meat thermometer so the bulb reaches the center of the thickest part, being sure it does not touch fat. Do not add water. Do not cover. Roast in a moderate oven (350 degree F.) to the desired degree of doneness. The meat thermometer will register 140 degree F. for rare, 160 degree F. for well done. For roast weighing 4 to 6 pounds, allow 18 to 20 minutes per pound for rare, 20 minutes per pound for well done.

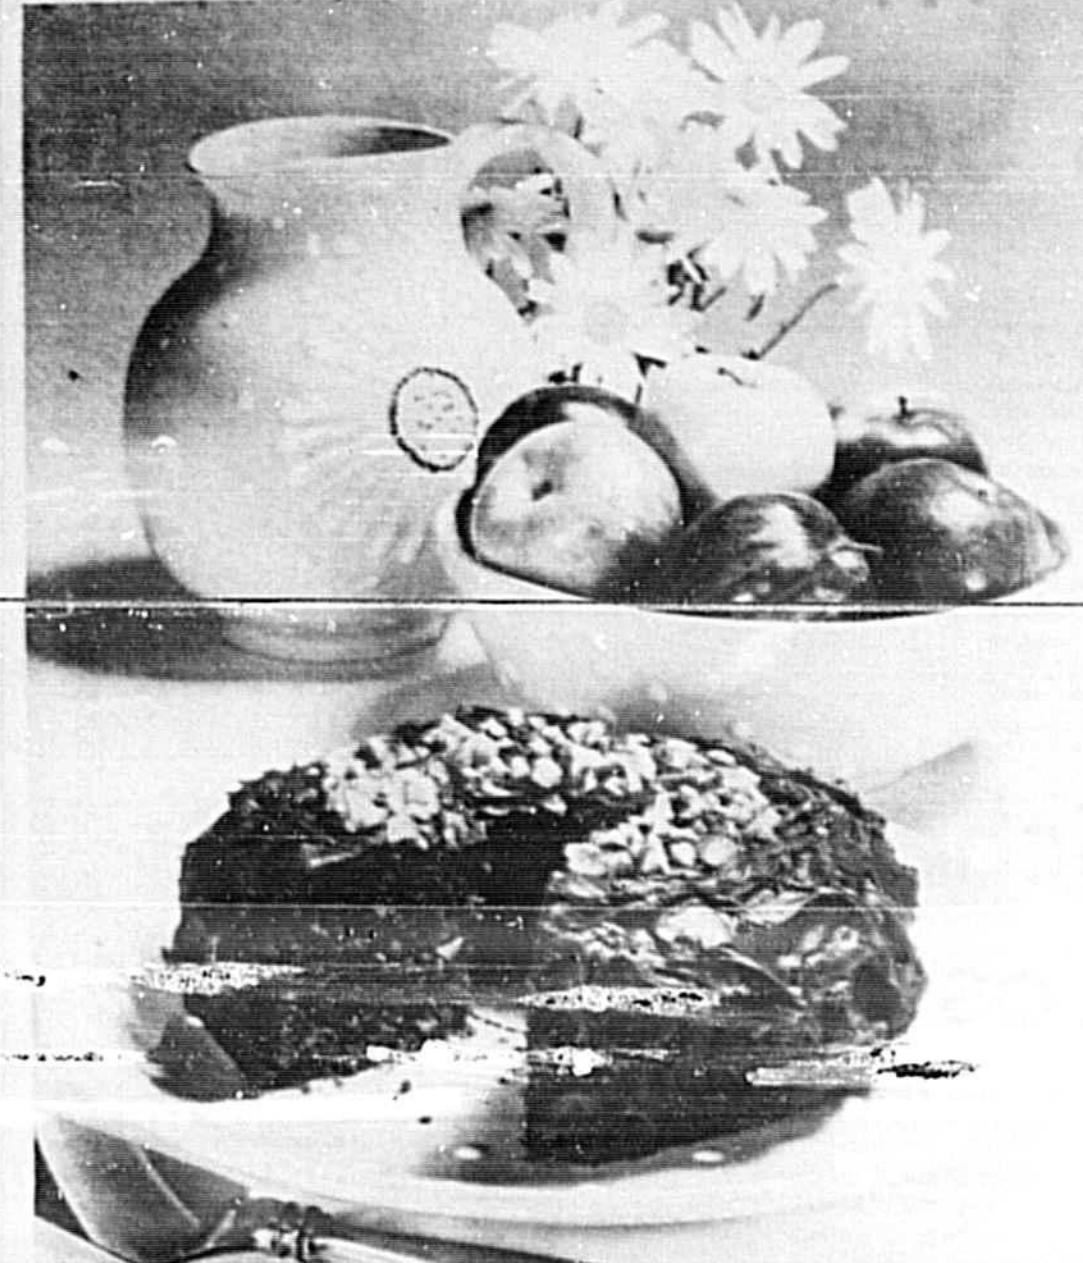

NOTE: To roast a beef rib eye on a rotisserie, insert rod lengthwise through center of the roast. Balance roast and tighten split forks. Roast meat turn with rod. Insert a meat thermometer so the bulb is centered in thickest part but not touching rotisserie rod. Cook at moderate temperature over ash-covered coals to desired degree of doneness. Allow 1 1/2 to 2 1/2 hours for roasting a 4 to 6-pound roast, depending on size and degree of doneness desired, 2 1/2 to 3 hours for a 7 to 10-pound roast.

FUNNY BUSINESS
By Roger Bollen

WORLD ALMANAC FACTS

Through carelessness or inconsideration, man is blamed for the largest portion of U.S. forest fires. During 1970, some 103,619 fires, or 86 per cent of those reported on protected lands, were caused by people. The World Almanac notes: Many millions of acres of federal, state and private lands are protected under the Federal-State Co-operative Forest Fire Control Program.

CRUNCHY TREAT—Apple chocolate walnut cake is spicy, crunchy with nuts, moist and tender-crumbed. Apple sauce, which furnishes the "liquid," lends excellent keeping quality.

Ken Berry Tapes Five Musicals

By JERRY BUCK
Associated Press Writer
HOLLYWOOD (AP) — The way a television musical comedy acquires that carefree and spontaneous look is for everyone to work themselves to a frazzle day and night.

So says Ken Berry, who just wound up four weeks—with no time off—taping five summer shows for ABC.

"I was up until 3 a.m. one night to record just one line," he said. "Of course, I was interested in watching the show's progress. I'd never watched them do a show before."

Berry said co-producer Allan Blye worked for hours on one 25-second gag to get it right. He said, "Cass Elliott stands up in the audience and says, 'Let's hear it for Lockheed Aircraft,' and the audience throws paper airplanes. One camera didn't have a good enough angle and Blye worked for hours cutting the tape back and forth between cameras to make the gag pay off."

"The Ken Berry 'Wow Show' premieres on ABC Saturday, July 15. Oddly enough, the pilot special for the series was seen on NBC last March 21.

"Wow" is a "Hellschoppin'" kind of show, with fast jokes,

"The Sonny & Cher Comedy Hour," for instance, had the running gag of a bear begging a rookie every week. Or "Wow," Berry goes through a chase every week to present an album of the best movie chase sequence. The chase is filmed, and at the end Berry steps through a slit in the screen onto the stage.

Like all the other summer shows, "Wow" is being audiotaped for a possible regular season spot. Berry said, "Hopefully, if it goes, the other people in the cast will be able to do more. It kind of wears you out. I had so much to do."

The shows were taped over a four-week period, with three taping sessions of three days each. Each taping lasted 12 to 13 hours. In between time the performers rehearsed and the producers worked on the editing.

Although Berry has been a guest on many variety shows, this is the first in which he has started. His previous series were situation comedies, "F Troop" and "Mayberry RFD." In the early 1960s he was on "Dr. Kildare" for several years as the comedy relief.

HOMES FOR AMERICANS

VACATION all year is insured in this versatile A-frame plan. The main section offers a two-story living room at the front with dining and kitchen areas, and there are two bedrooms and bath. On the gallery level, there can be a third bedroom with its own lavatory. The lower level will provide family room, utility and garage facilities. Plan HAT34V has 1,375 square feet on living level and is designed by Frank's Vogel, Room 204, 48 W. 48th St., New York, N. Y. 10026. The architect may be contacted about obtaining the plan.

Planned-over Holiday Casserole

CLIP 'N' COOK
Copley News Service

3 cups cooked turkey
1/2 cup milk
1/2 cup butter
1/2 cup flour
2 eggs, slightly beaten
3 cups cooked turkey
1/2 cup butter
1/2 cup flour

PREHEAT OVEN TO 400°. Heat turkey, stock and milk. Add butter, flour and milk and cook until thick. Add small amount of sauce to slightly beaten eggs. Before this mixture is whisked and cook 4 minutes. Place half the dressing in a 2 1/2 quart casserole. Cover with turkey. Pour half of the sauce over turkey. Add remaining dressing and rest of sauce. Top with grated cheese or almonds. Bake at 400° for 40 minutes. Makes 8 servings.

Superman Making A Comeback

LOS ANGELES (AP) — When Kirk Alyn hung up his Superman suit it was like a dose of Kryptonite for his acting career.

A studio head told Alyn, "Everybody thinks you're Superman, Kirk. They wouldn't believe you in any other part."

Alyn, who played Superman in movie serials from 1948 to 1951, went to New York and searched unsuccessfully for stage roles.

"I couldn't walk two blocks without people recognizing me," he says. "They'd hank their horns and yell 'Hi ya, Superman.'"

Alyn was so upset over what playing Superman had done to his career that he turned down the television role of Superman in 1952. That role was taken by the late George Reeves.

During the 1950s and '60s Alyn lived in California and settled for doing television commercials.

But now with the nostalgia craze, Superman is once again in demand.

"I still can't believe it, but suddenly I'm in big demand as a speaker," says Alyn, 61. "Nostalgia groups and colleges all over the country want me to them when they were growing up."

"I went to a nostalgia convention not long ago and all these prominent men came up to me and told me what an inspiration Superman had been to them when they were growing up."

He says he first tried to joke about Superman, but found his audiences didn't like anyone making fun of their hero.

"So I cut out the kidding," he says.

Education Fund Created

The League of Women Voters of Florida has announced plans to increase and expand its citizen education activities through the creation of an education fund. Incorporated as a nonpartisan, nonprofit organization, the League of Women Voters of Florida Education Fund will be supported by tax-deductible contributions from its members, the business community and interested individuals.

In addition, much attention will be given in the coming months to securing sizable grants and contributions to finance specific educational projects which the League has planned in an effort to better serve the needs of Florida citizens. These projects will include:

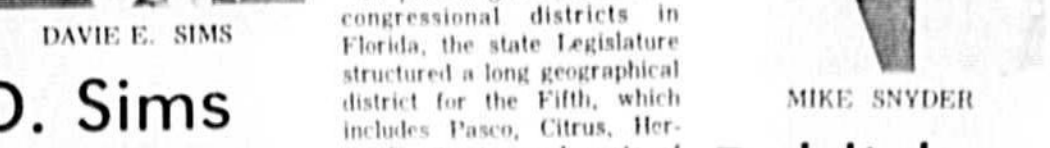

- Seminars on topics of current interest which will bring together laymen, professionals and governmental officials; Conference to promote better communication and coordination among groups with similar interests and goals with regard to governmental activity;
- Publications designed to inform citizens on subjects of immediate concern;
- Informational material on issues requiring voters' decisions at the polls;
- Expanded efforts to encourage registration and voting.

An educational film describing the legislative process and the creation of laws, which has already entered the first stages of production. Mrs. Grant Staton, of Orlando, president of both the Florida League and the education fund, expressed confidence that the necessary financial support for these projects will be obtained.

Educator Runs For Congress

Miller Newton, administrator at the University of South Florida, today announced his candidacy for U.S. Congressional District 5, following court approval of the redistricting plan for Florida.

In providing for three new congressional districts in Florida, the state Legislature structured a long geographical district for the Fifth, which includes Pasco, Citrus, Hernando, Sumter and parts of Lake, Orange, Seminole and Pinellas Counties.

D. Sims Seeking Office

Davie E. Sims, 39, of 1000 Druid Drive, Druid Hills, has announced his candidacy for the Seminole County Board of Public Instruction. A Republican, he is president and owner of Sims Office Supply, with stores in Winter Park and Maitland.

He feels the School Board should be run on a businesslike basis with priorities established for the school system.

For the conventional nine-month school year over the proposed 45-15 all-year plan and thinks Seminole County is not ready to implement it in the Fall of '73 as more study is needed. Double sessions are the least acceptable plan to Sims.

Sims' educational philosophy is to provide each student in Seminole County with a complete education that will either prepare him for higher education or for skills to enable him to be a more useful citizen of the future.

He feels this education should be accomplished through a well planned curriculum providing a wide range of programs to interest every segment of the population.

"These programs should, to the best of our ability, be accomplished at a minimum cost. These costs, however, should never detract from the curriculum, nor should they ever be so restricted we jeopardize the quality of education due to poorly prepared instructional staff," Sims pointed out.

Born in Winter Park, he is a graduate of Winter Park High School, University of Florida, and Temple University in Philadelphia where he majored in business administration and marketing.

William Ward Enters Race For House Seat

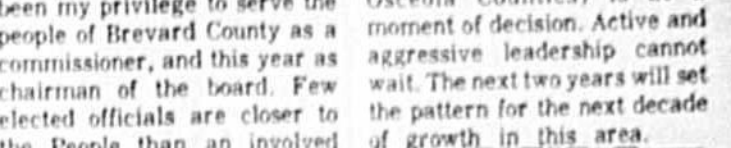

William D. (Bill) Ward, of Eustis, today announced his candidacy for the Florida House of Representatives, District 34, and Temple University in Philadelphia where he majored in business administration and marketing.

Born in Winter Park, he is a graduate of Winter Park High School, University of Florida, and Temple University in Philadelphia where he majored in business administration and marketing.

Brevard Woman In Senate Race

Lori Wilson, of Merritt Island, today announced her candidacy for the Republican nomination for the new state Senate seat (district 15 — Seminole, Brevard and Osceola Counties). Following is her statement:

"For nearly four years, I have been privileged to serve the people of Brevard County as a commissioner, and this year as chairman of the board. For elected officials are closer to the people than an involved responsive county commissioner. I have certainly

Publisher Runs For Congress

DADE CITY — The revenue-sharing bill approved by the U.S. House ways and means committee was "termed a tax without representation" by Mike Snyder, Republican candidate for Congress from the newly created Fifth District today.

"When people are forced to pay taxes, they are not then told that they are not to be included in the co-partnership of the use of that money they are being deprived by their elected officials."

Seventy-five million Americans are committed to pay over \$100 billion into the federal treasury for national income tax this year, and Floridians are being told that they must impose a state income tax upon themselves in order to get \$22 million back from the government as a means of supplementing property taxes," said Snyder.

"I supported President Nixon's original revenue-sharing proposal," said Snyder, "which would have provided \$3 billion to local government and \$1.8 billion to the state governments without any string attached."

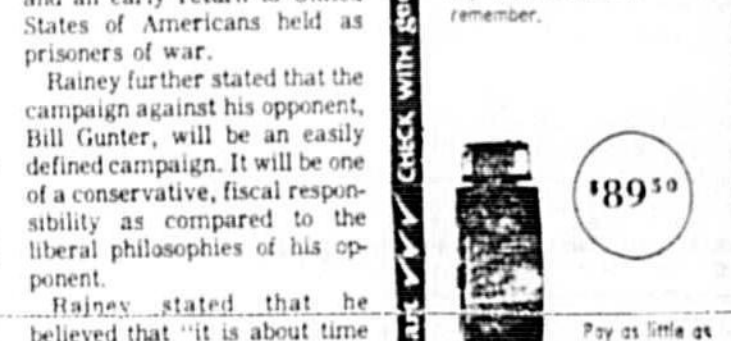

C. Rainey Tosses In His Hat

County Commission Chairman Charles E. Rainey today made it official that he will run for the Congressional District covering Pinellas, Pasco, Lake, Citrus, Hernando, Seminole, Orange, and Sumter Counties.

Rainey stated that he supports President Nixon in his policy on Vietnam. Rainey stated that he believes that President is doing everything possible to end a useless and meaningless war; never has been a President so dedicated to ending his sincere promise to the American people and that is to end the war in Vietnam and an early return to United States of Americans held as prisoners of war.

Rainey further stated that the campaign against his opponent, Bill Gunter, will be an easily defined campaign. It will be one of a conservative, fiscal responsibility as compared to the liberal philosophies of his opponent.

Rainey stated that he believed that "it is about time that we started providing for the needs of our American people, our first responsibility, rather than the countless millions spent on foreign aid. We have needs here; we have people here. For instance, countless Americans are growing while we are sending other countries; we have senior citizens who need medical care and who should not be deprived of hospital care; these senior citizens, who have paid endless taxes during their working years are now entitled to assistance from the government."

Backyard Pools

Joyous Spas Or Cash Drain?

By FRANK MACOMBER Copley News Service

The backyard swimming pool can be a joy, a delight. Or it can be a constant midday nightmare and a financial albatross.

A check of law enforcement officials, reliable pool construction and maintenance firms and pool owners or operators all filters down to this conclusion: Tread carefully if you decide to join the pool-side set. If you acquire a reliable contractor...

Residential pools have such a wide range, depending on the region of the country, the contractor, the size, shape and materials, that cost estimates usually are confusing. However, pool builders say it is less expensive to build a pool while the house is under construction...

Some contractors will build you a pool for \$2,500 to \$3,000. If the site is not too rocky, the project can run from \$5,000 to \$7,500, depending on what the homeowner wants in the way of tile or brick work, whether the pool is to be heated or unheated.

The average-size home pool holds 17,000 gallons of water, is 8 1/2 feet deep at one end and about 3 1/2 feet at the shallow end, about 30 by 18 feet and can be shaped like anything from a saucer to a renaissance zodiac-tantrizer had one built in the shape of a giant grand piano.

Of course, you could turn the contractor loose and get a luxury pool for up to \$20,000, with all the trimmings, tiled decks, diving boards, etc. The water is no wetter in those pools, however, than in the \$2,500 to \$5,000 pool.

A heated pool, of course, is desirable, for it gives swimmers a year-round activity in the back yard. But a heating system costs up to \$400 or more extra and can run from \$20 to \$30 a month to operate if used constantly.

A black plastic pool cover is the next best way to reduce water loss in the pool. But this is cumbersome and can be costly, too.

Many owners say they get enough pleasure from their pools without a heater or cover. More important than a heating system is the filter system and the owner's chemical treatment of the water once the pool is ready. In the summer, when the pool is used the most, the filter should operate at least for two eight-hour periods during every 24 hours. Constant movement of the water through a filter keeps it clean, cuts down algae probability and sustains an air-water eight-hour daily filter run usually is sufficient.

The filter, however, is only as efficient as the action of two chemicals on the water — chlorine and muriatic acid. They purify the water and combat algae, which shows up on the pool bottom and sides in black patches if it is not chased away by the chemicals.

Some pool owners fall into the trap of overloading with chemicals. This can give the water strange hues, and deposit a blue-green powder on the bottom and sides.

Too much acid in the water over long periods corrodes the seals on the filter. That means either an overhaul job or a new filter.

An improper chemical dosage eventually leads to what pool maintenance men call an "acid bath." This requires draining the pool and cleaning the bottom and sides with an acid solution.

Some firms claim their own crews build the pools, then subcontract most of the job out to others, leaving the owner virtually unprotected as to workmanship, the length of the construction period, etc.

Beauty Care For Hair

By CIMA STAR NEW YORK — Is your hair too fat, thin, dry, oily, wavy or lustreless?

With the end of the era of teased, bouffant hairdos, more women are signing into their mirrors over locks that, just aren't right for the shiny, swingy, natural look they want.

What they need, according to a young French-Moroccan named Pierre Quakine, is a process known in France as ebraologie, or a very special kind of hair treatment, which until recently was available only in Europe.

Now, however, Pierre has brought the treatment to America and Rene Furterer Hair Clinics are springing up in major cities around the country. The Furterer method, which Pierre studied for 18 months in Paris, is a combination of precise technique and the Furterer products, which are all completely organic.

These are blends of plant oils, herbs, flowers, fruit and vegetable extracts and animal proteins. Formulated in Paris by Furterer, they are prescribed to revitalize the hair.

"I won't let just anyone handle these products," says Pierre, to whom a woman's crowning glory is a serious matter. "Until I know they understand what they are doing."

Technicians from salons which want to become "clinics" receive a week of intensive instruction and practical workshop at Pierre's New York salon, "Pierre Michel." They learn every phase of the method, from massage to hair analysis to treatment. For if there is any "magic" in the Furterer method, it lies strictly in the proper analysis of hair problems and the selection of correct remedies.

The salon is divided in half. One section looks like a typical beauty salon, where cutting and styling are done.

The other section is the "clinic" where hair problems are treated all day long under Pierre's personal supervision.

Students Named On Dean's List

Herald reporters Marilyn Gordon and Kathy Nilback, south of Casselberry, were among area students named to the Dean's List by their respective colleges for the spring quarter at Florida Technological University which ended June 5.

In order to be eligible for the academic recognition, a student must finish a quarter with a 3.4 of a possible 4.0 grade point average in all subjects. The minimum represents a high "B" average. Area students who are listed by their colleges for the spring quarter include:

ALAMONTE SPRINGS: Joanne Balmer, Joseph Barnes, James Butcher, Cheryl Clark, Susan Dercole, Lynn Frishton, Gail Frazier, Jane Gaur, Keith Gilbert, Mary Kinsey, Leo Larente, James Lucas, Charles Michaels, Marietta Monson, Connie Pommeroy, Richard Reidenbach, Garrett Roney, Kenneth Sukhia, and Patsy Tanz.

WINTER SPRINGS: Patricia Smith.

OVIEDO: Russel Brandes, Wilametta Maunonen, Cheryl Kainville, Andrew Hoho, Michael Ghent, Donna Speert, Joan Speer, Lewson Thompson, and Rand Wetherington.

SANFORD: Henry Astby, George Bryant, Kathryn Campbell, Carlson Cohen, Delta Decker, Donald Fann, Hamilton Fiat, Mary Gernant, Michael Ghent, Ralph Govecek, Betty Kuxendall, Yvonne McCoy, Regina Murray, Dennis Noil, Thomas Owen, Terry Ray, Bruce Robinson, Louis Rotundo, Robert Smith, Steven Stein, Louis Temple, Margaret Tomp, and Donald Whitmore.

DELTONA: John Brown.

FERN FARE: Richard Aldinger, Sherry Bendure, Candis Bury, Joan Harrell, Joanne Huntley, Linda Favelchak, Rondall Rector, Kratin Roush, and Shirley Simpson.

GENEVA: Robert McMillan.

GOLDENROD: William Catogni.

LAKE MARY: Carlitos Callender, Craig Keogh, and Florence Monney.

LAKE MONROE: Alberta Bradwell.

LONGWOOD: Debby Davis, Robert Geary, John Haynes, Delta Kilgore, Patricia Kline, Rosamne Maguire, Patricia Martin, George Milwet, Thomas Pittman, David Pollock, Paris Thermonos, and Linda Zartman.

MAITLAND: Carolyn Aldrich, John Aragona, Stephen Armstrong,

Power Shortage No Problem Here

By JANE CASSELLBERRY

Although the electric power situation statewide is critical due to the extreme hot weather and low power surplus, there is no serious problem at present in this area, officials of Florida Power and Light Company and Florida Power Corporation told The Herald today.

Ernest Upmeyer, division marketing manager, in Florida Power's Winter Park office, stated, "This is a critical time and we are walking a thin edge doing everything we can to not interrupt our power customers. We have asked some of our customers on an interruptible rate to shut down use of electricity during late afternoon hours of 3-7 p.m."

Plants with a surplus may be called upon by companies with a power shortage in other more populated and industrialized areas to fill the gap.

AROUND THE CLOCK. Let's make this "FBI Day" across the country, and also, may their guns always shoot straight!

County Budget Up

By ANN SIECKOWSKI Budget requests totaling \$4,567,560 were placed before the Board of County Commissioners for study. This amount is a net increase of \$1,391,418 over last year's budget.

Don't they wish it were true! In yesterday's story dealing with the county's leasing still another downtown Sanford building to accommodate the government's growth, it was stated that "reasonable" charges of \$20 a foot could be negotiated.

Well, instead of a \$ it should have been a cent... fifty cents! (Sorry about that fellas, I know you'd much rather get the \$'s.)

Thanks to a newspaper and another source was spared. Read the touching story on page 6A.

FROM MY CRYSTAL BALL. There'll be a letter mailed to Sheriff Polk, announcing the intended resignation of one of his employees.

Further, that this same employee wants Polk's job as Sheriff and plans on officially running against him in the coming election.

My crystal ball says the initials of the deputy are F. K., like in Fred.

My sentiments, exactly. Barbara Castle, member of the British Parliament, charging the U. S. women's liberation movement with wasting its time on trivialities. "The challenges facing our society today are so big and exciting that this is the moment for women to be widening their horizons, not narrowing them. Let us get ourselves obsessed with something bigger than sexual politics."

Wholesale Food Prices Climb

Livestock And Meat Lead New Surge; Industrial Products Also Increase During June; Unemployment Rate Dropped During The Month.

WASHINGTON (AP) — A renewed surge in livestock and meat prices led an overall rise of five-fifths of one per cent in wholesale prices of food and industrial products in June, the government said today. The unemployment rate dropped during the month.

It was the second straight substantial monthly price increase, following a three-fifths of one per cent hike in May for the largest two-month increase since January and February.

The Labor Department also reported that the nation's unemployment rate dropped from 5.9 to 5.3 per cent in June. The work force last month for the lowest figure in more than a year and a half. The improvement was entirely due to seasonal factors.

But the actual total of jobs available in June rose 1.6 per cent, the report on wholesale prices said.

Because the rise in the work force was not as large as expected, the department's Bureau of Labor Statistics figured it as a decline in the jobless rate.

Livestock prices climbed 4.7 per cent, poultry rose 6.9 per cent, and fish rose 1.6 per cent, the report on wholesale prices said.

Industrial raw materials rose three-tenths of one per cent and consumer-finished goods 1.1 per cent, the report on wholesale prices said.

The report on unemployment, issued by Nixon last August, showed a larger increase than the 5.2 per cent rate of increase in the eight months prior to the Phase I wage-price freeze imposed by Nixon last August. The rate for women dropped from 5.9 to 5.3 per cent with a total of 1.3 million. The rate for men declined from 5.3 to 4.9 per cent with a total of 1.4 million.

The report said wholesale prices had climbed at an annual rate of 5.3 per cent in the seven months so far of President Nixon's Phase 2 wage-price controls, a larger increase than the 5.2 per cent rate of increase in the eight months prior to the Phase I wage-price freeze imposed by Nixon last August.

The report on unemployment, issued by Nixon last August, showed a larger increase than the 5.2 per cent rate of increase in the eight months prior to the Phase I wage-price freeze imposed by Nixon last August. The rate for women dropped from 5.9 to 5.3 per cent with a total of 1.3 million. The rate for men declined from 5.3 to 4.9 per cent with a total of 1.4 million.
