SANFORD, TWENTY YEARS AGO

Seminole County has scored again. The freewing with which this scoring process is taking place naturally gives into a feeling of great pride in a great county among those who call this section home. A recent report from the State Marketing Bureau on fruit and vegetable shipments for the year 1931-22 shows Seminole County well out in front in a surprising number of instances.

In a chart showing carlot shipments for all kinds of fruits and vegetables, our county takes first place with four products, second place with three products, third place with two products, second place with two products, and sixth place with two products, fifth place with two products, and sixth place with two products.
