GOOD TENNIS GAME

But Rollins Students Were Too Much Sanferd Men

Winter Park, Fla., Oct. 30,-Monday afternoon, the first tennis match of the season was played on the home court against L. M. Fox and R. C. Wildeman, of Sanford. A. D. Prentiss and E. J. Holmes represented Rollins. . Both appeared for the first time in a match tournament at Roll lins, and the tennis supporters were eager to see what sort of successors had been provided for the championship team of last year. The showing made was excellent, considering the lack of practise at such an early point

of the season, and it seems assured

that tennis at Rollins will again be

in competent hands. Play began at 2:15 between Fox, of Sanford, and Prentiss, of Rollins. The match brought out the best tennis of the afternoon from the spectator's point of view. Both were evenly matched, and fought on point by point in a dead tie for sixteen close games, when Prentiss succeeded in winning two in a row, and the set at 10-8. The second set of the match was a replica of the first, with Prentiss finally coming

home the victor 7-5. Holmes, of Rollins, then faced Wildeman, of Sanford, and by brilliant work defeated him two straight sets 6-1, 6-7. This assured Rollins the match, but the outcome of the doubles was result. The Sanford team started out with a rush, and by superior team work got through the Rollins' defense and won the first set 6-2, but the younger men rallied, showing superior staying powers, and as they became accustomed to playing together, took the second set, 6-0. The third and last set of the tournament was likewise developing into an easy victory for Rollins and stood at 5-1 when darkness intervened and put an end to the playing. The match

for an extensive campaign through the state, and will try to secure matches with all the other colleges of the state. The showing of the team in this preliminary tournament has created interest and confidence. A. D. Prentiss, who has been elected captain of the team, is the brother of A. A. Prengame, but Holmes, his partner, also shown by actual tests. played a brilliant game, especially at the net. They will form a combination hard to beat.

1-2 in favor of Rollins.

An acre of ground contains 43 560 square Leet. Consequently 'a rainfall of 1 inch over 1 acre of ground would mean a total of 43 560x144 or 6 272 640 cubic inches of water. This is equivalent to 3 630 cubic feet. As a cubic foot of pure water weighs about 62.4 tombstone, you are constantly adverbounds the exact amount varying tising or being advertised.-Edmund slightly with the desity it follows, Street, that the weight of a uniform coating

or 113 X short tons. The weight of 1 United States gallon of pure water is 8.345 pounds. Consequently a rainfall of 1 inch over 1 acre of ground would mean 226 512 divided by 8 345 would equal 27.143 gallons of water on the acre. This is equivalent to 603 barrels of 45 gallons each, and would be sufficient to fill a tank or pool about 200 feet square and 9 feet deep. Should a farmer desire to build a cistern to be supplied by rainwater from a roof, he can, if he knows the annual rainfall of his locality, so const uct his cistern as to make the best possible use of the rainfall. For instance, a rainfall of 1 inch on a roof of 3,000 square feet capacity would mean a total volume of 432 000 cubic inches, or 250 cubic feet, available for the cistern : loss from splashing, etc., not considered; This is equal to 1,870 United States gallons, or about 41.5 barrels of 45 gellons each, enough to fill a cistern 8 feet'in diameter to a depth of 4.97 feet.-Florida Grower.

Fine Restaurant Service

The Depot Restaurant under the able management of G. W. Spencer is gaining fame throughout the length and breadth of the railway system and will soon rival that of Harvey in the West. The travellers who usually kick on everything are all united on the fact that the Sanford depet restaurant is the best on the line and the dinners can't be beat anywhere. We congrutulate Mr. Spencer for putting Manford on the map in the line of pats.

OUR BIG SPECIAL EDITION

WILL PLACE SEMINOLE COUNTY ON MAP.

FOR FIRST TIME

We wish to keep it constantly before the people that our main incentive

issuing our Special Edition is to place Seminole County on the map.

We promised this to our readers many months ago and we have now a

corps of competent specialists engaged in gathering the data and working it into shape for publication. It involves a deal of hard work and not a

little expense which we will cheerfully assume. We believe that it will pay

not perhaps in a direct pecuniary way to this paper for we do not expect.

any great and immediate reward but in an enlarged growth and influence

of Sanford and Seminole County and in attracting the attention of outside

investors and capitalists to our manifold resources. Many thousands of

copies will be issued and circulated throughout the North at a very moment

when its icy breezes and blustering blizzards are turning their longing

eyes to the sunny South. Very few Northerners knew that such a county

as Seminole exists, and now is the psychological moment to latorin them.

We expect to give a complete and accurate description of all the wonderful

resources of the county fully illustrated by photographic views of its most interesting and attractive spots. It will undoubtedly have a large influence

It will be issued in the regular newspaper form which we have adopted

after mature consideration as being better adapted to general circulation
