Movie Titles Not Considered Very Important During Picture Filming

HOLLYWOOD, Calif., Feb. 10, ((P))—Motion picture productions and the title under which they are shown occupy positions with relation to each other during the progress of development very similar to the proverbial cart and horse.

Sometimes a picture is produced with a definite "showing" title to start with, but very often—perhaps in a majority of cases—the picture is produced before the ultimate name of it is chosen. Thus the horse, in this case the title, is found to be in the rear of its own vehicle.

found to be in the rear of its own vehicle.

Most of the studios in this city of pictures take the view that the title of a picture is the important part of it. If the name of a play does not capture the public interest when it blazes out in electric signs, the play itself enters the race for popularity under a big handicap. Of course, say the wise ones, there is a large percentage of movie fans who follow their particular artist heroes or heroines, but they admit that the great bulk of the public does not spectialize in artists. Therefore the title ascends to the important position of drawing or failing to draw this unknown percentage.

Deception Learned

In the first ten years of active motion picture production, studio authorities say, titles were seldom written to fit the actual story, but solely with a view to lengthening.

Sanford's First Industrial Development

Created and planned for the sole purpose of caring for the industry that is most certain to locate in Sanford. Already progress has been made, and as we have premised, a plant will be completed within the next ninety days. This is the first, others will soon follow and before many years Sanford's manufacturing industry will be equally as important as the agricultural. These things are assured because of Sanford's location -its cheap freight rate-its water transportation and its easy access to any point in Florida.

How Long Will Tilden Hold Tennis Title?

BY ART CARLSON

HOW long will Bill Tilden wear the purple toga emblematic of the national tennis championship? How much longer will he be able o shake off the thrusts of the challenging hordes with the same reckless abandon he's exhibited

since winning the honors? Those are questions that have been popping up annually for the last few campaigns. And, as anther year rolls around, they come p for collective debate once

Tilden has now squatted atop the tennis throne six straight seasons. He reached the dizzy heights back in 1920 by whipping Bil Johnston. Truck Production Greatest In 1925

NEW YORK, Feb. 11.—The motor industry had in 1925 its most successful year in the United states. A production of 492,000 units exceeded the previous high producton record by more than 100,000 trucks. 100,000 trucks.

Production in the early months of the year was lower than in 1924 but began to pick up in the spring and has kept up to high levels during the summer, culminating a record production in September of 60 270 min. tember of 60,370 units. Part of the year's record may be ascribed to the rapid development in the foreign market. Exports during the past year have reached a total estimated at 64,871 trucks

SUPERIORITY too Great to be Overtaken

Today Chrysler is talked about and desired with even greater eagerness than two years ago, when it brought the first new note to motoring efficiency in years.

Chrysler was first to sweep old traditions aside. The new kind of performance, comfort and beauty which Chrysler created, captivated the public and exerted a tre-mendous influence on all motor car developments since that time.

But even the past two years have not brought any other car abreast of Chrysler.

Chrysler, meanwhile, has developed its own new measures of manufacturing fineness, now features of extraordinary equipment, new superiorities of performance and new standards of riding and driving ease—in the Chrysler "70" and the Chrysler "58" as well as in the new and superfine Chrysler Imperial "80".

The world has given recognition to outstanding Chrysler superi-orities with a volume of popularity that sweeps beyond any previous height

The purchase by the public of more than 280 million dollars' worth of cars of Chrysler manufacture during the first two years of Chrysler history takes premier rank among the industry's most brilliant achievements.

The Chrysler Corporation promises that the emphatic superiority which is the foundation of this overwhelming success, will be kept as far in advance as it is today.

IMPORTANT NOTICE OF PRICE ADVANCE TO ALL PROPERTY HOLDERS IN

To establish a uniform resale price on all properties in Section 1 (Crystal Lakes Club Division), we are, on February 20th, arbitrarily advancing the price in this sec-

WE ARE DOING THIS

That the property holder may have some idea as to the present standard of values in this first section. This advance represents our estimation of the property's worth as of today.

UNDERSTAND CLEARLY

That this is not a fixed price advance at which you must sell your property—you will of course fix your own price if unsatisfied with the present suggested advance.

This advance has been suggested only for the reason that it paves the way for a resale campaign which we are about to put in force—a campaign full of unique features which will, we believe, be entirely successful in giving speculative purchasers a satisfactory profit.

WE SOLICIT YOUR LISTINGS

If you want to dispose of your holdings in Loch Arbor, come to our office and let us be of service to you. We suggest, however, that you not list your property for resale until after our next announcement is published for it will, no doubt, somewhat influence your decision to resell at this time.
