plus the safety of a front axle and comfort of Cantilever Springs

front axle.

GREAT deal of thought is being given unequalled comfort plus the proved safety of 1 today to springs. Various experiments are being tried in an effort to get independent action for an automobile's front wheels. All of which is simply another tribute to the soundness of Ford engineering and the Ford V-8 for 1934. When you drive this car you get free action not only for the front wheelsbut for all & wheels.

Ford springs provide individual transverse cantilever suspension for both front and rear axles. In the new Ford these applies have been made more flexible. This type of construction is not experimental and has the advantage

This reserve power means acceleration to-equalled by practically any other make American automobile, regardless of cost. Before you buy ANY car at ANY price, drive the Ford V-8 for 1934.

SEMINOLE DRY CLEANERS

MORE THAN 50% LONGER NON-SKID MILEAGE

IN THE NEW FIPESTONE HIGH SPEED TIRE FOR 1934

IHE new Firestone High Speed Tire for 1984 is the greatest tire Firestone has ever built. With its wider, flatter tread, greater thiskness, deeper non-skid, more and tougher rubber, and greater non-skid contact with the road, you get more than 50% longer mon-skid mileage.

This new development is made possible by the Firestone patented process of Sum-Dipping, whereby the cotton fibers inside the high-stretch cords are soaked and coated with pure liquid rubber. This provides greater strength, safety and blowout protection.

Firestone engineers ploneered and developed the first successful balloon tire in 1923, and it is only natural that Firestone would lead in the further development of tire construction to meet the demands of the high-powered high-speed cars of today.

The new Firestone High Speed Tires for 1934, have already proved their worth by constant testing on the Firestone fleet of test cars gyer all kinds of roads and highways throughout the United States.

Firestone High Speed Tires are further subjected to the most severe tests known on the greatest proving ground in the world—the Indianapolis Speedway. In fact, Firestone Tires have been on the winning cars in the annual -Mile Indianapolis Rach for fourt consecutive years—conclusive evidence of Firestone's outstanding leadership in tire development and construction.
