"That's a good way to begin your experiment with religion," we suggested. "It would hardly be 'scientific' to judge Christianity, or your need for it, on the basis of one visit to Church. But a few months of faithful attendance, and many thoughtful evenings with the Bible will give you a clear understanding of what others have found in Christianity. You'll discover spiritual truths which centuries of experience have proven, and gain a faith that can bridge the Unknown." At last report, our chemist was making fine progress in his experiment. In fact, he no longer thinks of his religion as experimental!
