## No Harm Is Caused By Using Vinegar

DEAR DR. LAMB— Please tell me if vinegar is harmful to a person. I like to use a lot of it on my food and my husband has been told it isn't good for a person to use very much of it. DEAR READER— If you listened long enough, you could hear everything. Some people write and tell me that vinegar is great for their health. The truth is, it's neither helpful nor harmful. The main ingredient in vinegar is acetic acid. This basic organic chemical is connected to an enzyme to form one of the major chemical compounds used in metabolism within the cell, so I wouldn't worry about vinegar.

Of course, vinegar is acid. If you happen to have an acid stomach or acidity problems, it might not be so good for you. The truth is, the amount of acid in vinegar is insignificant compared to the amount of acid produced by the normal stomach. Your stomach produces hydrochloric acid, which is a strong acid. Whereas acetic acid in vinegar is a very weak acid.

Then people seem to forget that there is such a thing as a digestive. When we swallow something, it doesn't necessarily go into the bloodstream. If so, we'd have some mighty peculiar looking blood, filled with hamburger, mustard, vinegar, etc.

Regardless of the wide variety of the foods you eat, it is all broken down into a few basic compounds that pass through the intestinal wall and into the bloodstream. Foods don't get through the intestinal wall unless they have been digested down to the basic building blocks. Vinegar is digested. Its acidity is neutralized by the alkaline juices from the pancreas and the intestinal wall itself. So, let your taste tell you

ROGER NEISWENDER ...cost much more' SEN. JOHN VOGT ...paid extra'

## Guard Pay: Panel Nixes Law Change

By DONNA ESTES Herald Staff Writer

The hopes of the Seminole County Commission that the local legislative delegation would solve the question of whether it must pay county employees who are members of the national guard or the military reserve full pay while they are away from their county jobs on training sessions died Monday.

The legislators — Reps. Bobby Hattaway, Bobby Bramley, Sen. John Vogt and Clark Maxwell Jr. — voted 3 to 1 to refuse local legislation to clarify the law on the issue.

State law directs counties, cities and the state to pay reserve or national guardmen full salary for up to 17 days while they train with their units, regardless of how much the military pays them.

Specifically, the county commission wanted a local law to mandate the deduction of pay received by military reserve or national guard from employees' salaries from state, county or city government up to a maximum of 17 days annually.

"I have a philosophical problem as far as the national guard is concerned," said Sen. Vogt, D-Coos. He said the members of the guard serve a state purpose and are called out in times of disaster and need. "I feel they should be paid extra," he said.

Vogt added the matter, in his opinion, should be addressed statewide as a policy.

In answer to questions from the delegation, County Administrator Roger Neiswender said the county doesn't have more than 10 employees who would be affected and currently it costs the county about \$2,000 in salaries to guardmen and military reserve on training sessions.

"If we cannot continue the current policy (salaries) minus deduction of state or federal compensation) it would cost much more," he said. Only the employee who had demanded his full salary had been cited previously. Neiswender also assured there would be no problem for the county to pro-rate the deductions, as Maxwell had suggested.

While the state law says that persons in that category See GUARD PAY, Page 2A

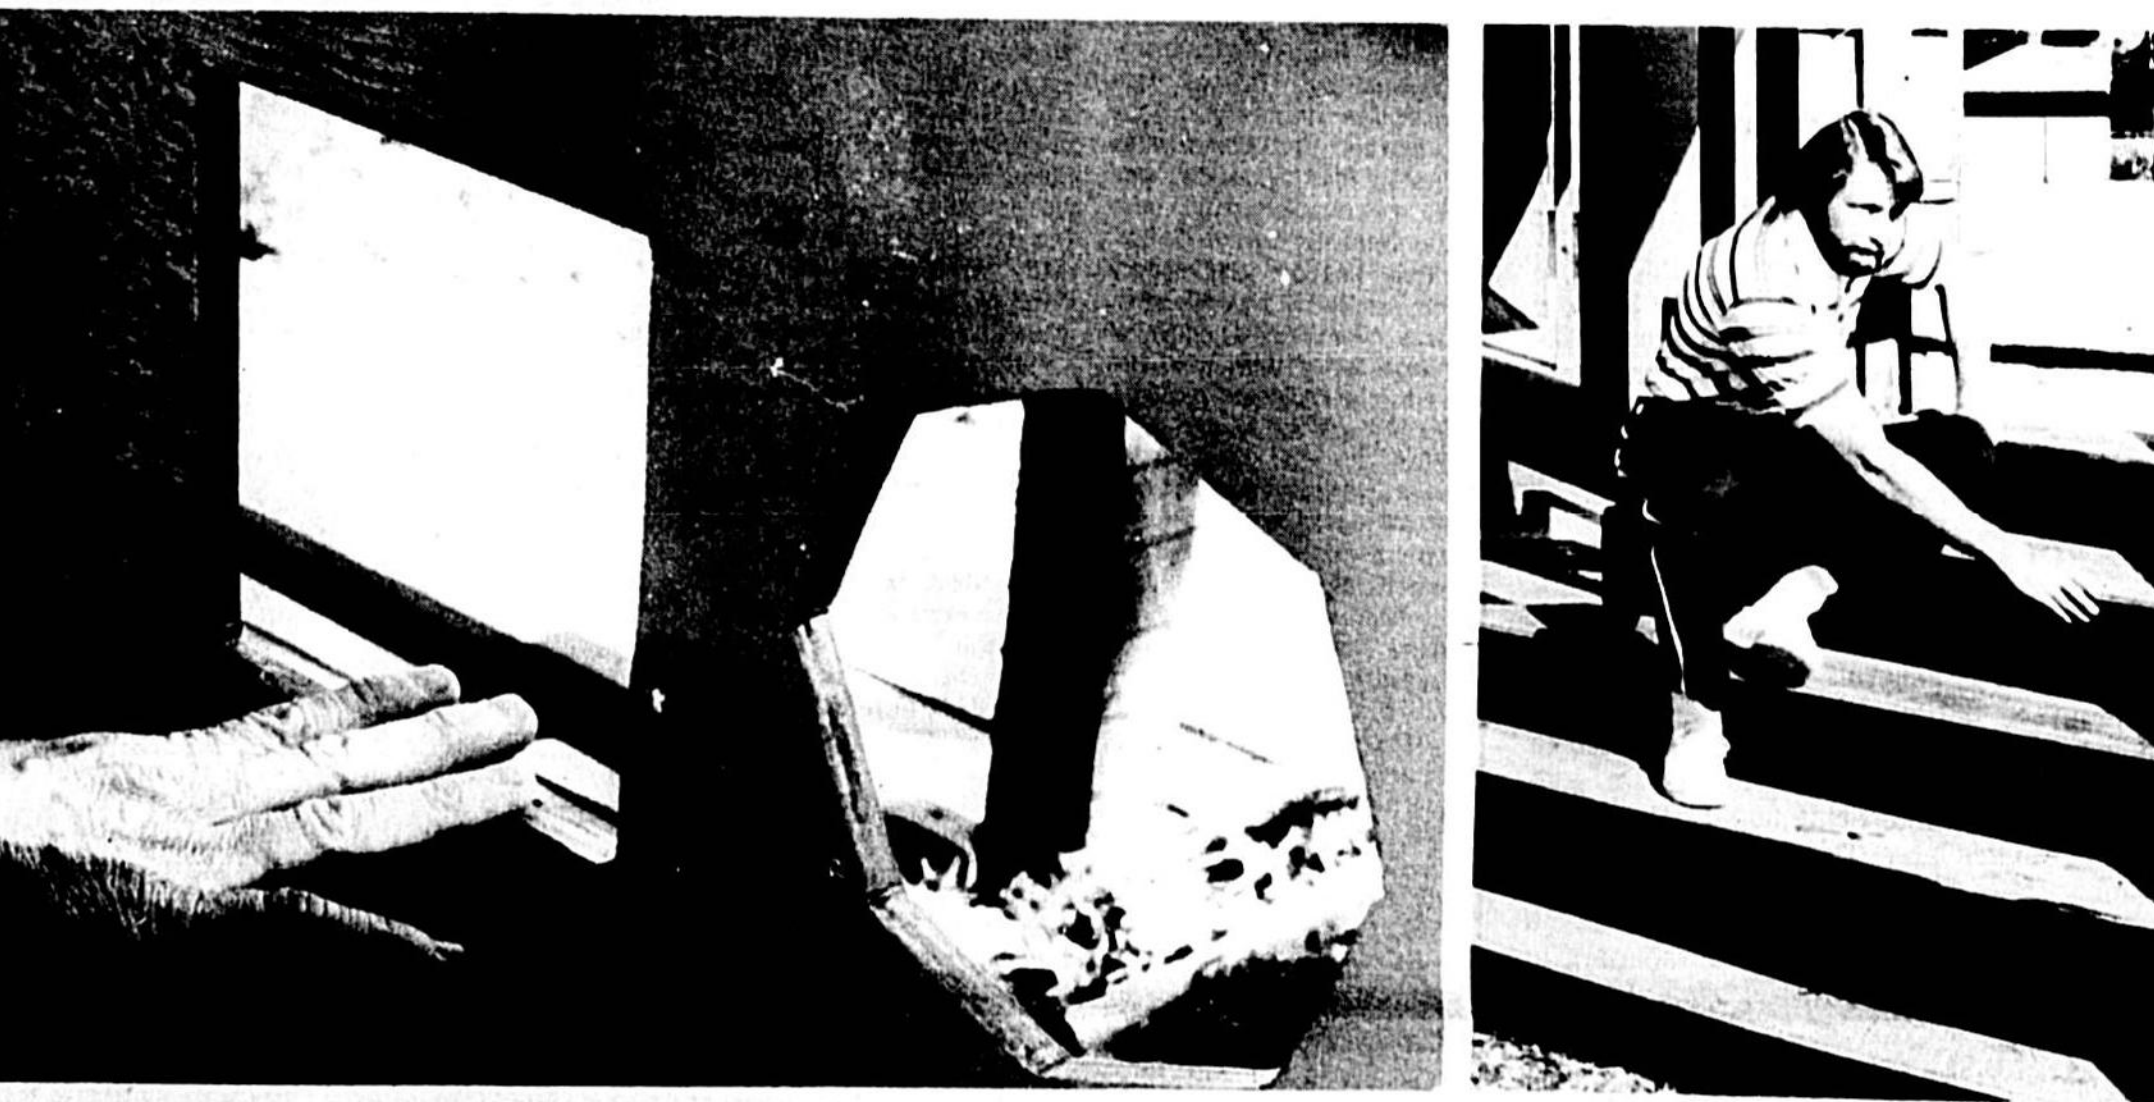

## Architect Irked, Forces Delay In Playground; Changes Coming

By LEONARD KRANSORF Herald Staff Writer

A \$22,000 playground designed and built for exceptional education students at Rosenwald Exceptional Student Center in Altamonte Springs may open in three weeks — about three months behind schedule because of a conflict between the architect and school district officials.

Some of those changes included using one texture of rug, cutting more pepsites in a tunnel used to develop crawling skills and the stacking of old railroad ties to help the students develop crawling skills. She has refused to approve the project until her recommended changes are made, she said.

The students could learn to understand texture, but then they end up placing only one texture rug in there," the architect said.

ROSENWALD TEACHER MANFRED MCRORY SHOWS WOOD PLACED ON RAILROAD TIES AND ADDED PEEPHOLES

## SMH Wins Round On 'Private' Conversion

The Seminole Memorial Hospital Board of Trustees passed the first big hurdle in its move to convert the operation of the hospital from a tax-supported institution to a private non-profit corporation with approval by the Seminole Legislative delegation permitting the change.

Longwood, questioned closely the method of financing the hospital trustees plan to modernize and expand the hospital if its operation is converted to a non-profit corporation to be founded by current hospital trustees.

Commission and no mortgage on the hospital facilities as they exist now and as they will be expanded and improved with the bond issue funds.

Despite the unanimous approval, however, Sen. Clark Maxwell Jr., R-Melbourne, and Rep. Bobby Bramley, R-

operation by a non-profit corporation, he was told the bonds there "would have been virtually useless without the backing of the county."

He said physicians are concerned on a daily basis about the services provided by the hospital and the need for a better physical plant, better operating rooms, the quality of food and emergency room backlogs that can be as long as three hours.

While the state law says that persons in that category See GUARD PAY, Page 2A

Dr. Robert Gay, chief of the hospital staff, said no member of the medical staff is opposed to the plan and all doctors are behind it.

He said a referendum to pledge the county to back the bonds with other revenue," Colbert said, pointing out the county would have to have the approval of the voters a referendum to pledge the county money.

Sanford terminal. "All of our trains ran yesterday and so far they're all running today," said Crews.

When you make one long train into two shorter trains, that makes more traffic, slowing down and then too when conditions are bad, the trains have to move slower," said Maxwell.

County Commission Chairman Bob French told the legislators the law would permit the conversion to the different method of operation only with county commission approval. He said all the questions the legislators posed will be included among those the county commission would answer before the move goes forward to final approval.

The train service was not the only mode of transportation interrupted locally by the storm.

Major provisions of the pact. It will: —Require the Soviets to reduce their overall number of strategic arms. "Over 250 Soviet missiles or bombers — 10 percent of their strategic forces will have to be destroyed or dismantled. At the same time, because we are now well below the agreed ceiling, we could substantially increase our own operational strategic forces.

—Provide negotiated limits on building new types of weapons and limits on the improvement of existing ones.

For the first time, he publicly unveiled a broad blueprint of the major provisions of the pact.

—Permit independent verification and means of guaranteeing Soviet compliance with the terms of the agreement.

—Specify a specific number of weapons that would be destroyed or dismantled to verify compliance with the treaty.

—After more than six years of negotiations, conducted by three major countries, agreement has been reached on most of the major elements of a new and verifiable SALT II treaty.

—Permit the United States and its allies to pursue also the defense programs it may eventually need, including the M-X missile and the Trident submarine and its missiles; air, ground and sea-based cruise missiles; cruise missile carrier aircraft and

—The president of the United States has no greater responsibility than to assure the defense of the nation, and the Congress of the United States has no greater responsibility than to give him the means to do that," Carter told the Legislators.

## HOROSCOPE

By BERNICE BEDE OSOL

For Tuesday, February 20, 1979

### YOUR BIRTHDAY

February 20, 1979

Several things that you've been wanting for a long time could finally come your way this coming year. Your persistence and patience will turn the trick.

**PISCES (Feb. 19-March 20)**  
Your interests might have to take a back seat to those of others today. It could seem like everyone has a better reason than you for demanding the attention. Find out more of what lies ahead for you in 1979 by sending for your copy of the all-new Astro-Graph Letter. Mail \$1 for each and a long, self-addressed, stamped envelope to Astro-Graph, P.O. Box 480, Radio City Station, N.Y. 10019. Be sure to specify birth sign.

**ARIES (March 21-April 19)**  
It would be best to avoid friends with tools or machinery today. You are exceptionally careful and won't have your mind on your work.

**TAURUS (April 20-May 20)**  
Don't be influenced by friends or associates who would talk you into gambling or speculating today. Chances are you'll end up feeling victimized.

**GEMINI (May 21-June 20)**  
Bring others into the picture concerning an important goal. Not having all the facts, they'll create opposition for you.

**CANCER (June 21-July 21)**  
Organization and planning will be necessary to get your work done today. Otherwise, you'll find yourself skidding around corners.

**LEO (July 22-Aug. 22)**  
You could find yourself brooding because you just can't seem to make ends meet today. A frivolous purchase to ease your feelings won't help matters.

**VIRGO (Aug. 23-Sept. 23)**  
Don't take things out on your family if you feel overpowered or out-manuevered today. They're on your side and want to help.

**LIBRA (Sept. 23-Oct. 23)**  
Today is a bad day to attempt difficult chores. There are too many unforeseen complications that could arise to mean up the project.

**SCORPIO (Oct. 24-Nov. 22)**  
Others might not have the necessary funds to go along with the social events of the day and your plans could get rained out. Smile and reschedule.

**SAGITTARIUS (Nov. 23-Dec. 21)**  
Something or someone could stand in the way of a long-sought goal today. Blowing up may make you feel better, but it will hurt your image.

**CAPRICORN (Dec. 22-Jan. 19)**  
There is a lot going on behind the scenes today. You aren't getting all the facts. It would be a big mistake to make commitments or put things in writing.

Oswald: "After reading Peter Steiner's book 'Play Bridge in Four Hours' it seems a good idea to devote some articles to really simple hands."

Alan: "Here is a really easy one. It illustrates Peter's basic rule of play which is to lead toward your high cards, not away from them."

Oswald: "South knows from the bidding that at worst his slam contract will depend on a finesse so he

## The Storm: Trains, Produce Delayed

By MAX ERKLETTIAN Herald Staff Writer

The latest winter storm that paralyzed portions of the north caused the cancellation of Auto Train service Monday and delayed Amtrak service up to 10 hours.

In addition to the problems with train service, the massive winter storm that raged through portions of the deep south closed airports from Atlanta to New York and served grounds travel to a crawl many areas.

The storm's impact was not the only mode of transportation interrupted locally by the storm.

Amtrak's Pete Maxwell. "That makes it hard for people to get to work and it's harder for the trains to move."

Unlike Auto Train, Amtrak was able to make all its scheduled runs, according to Clark Glen Crews, in the Sanford terminal.

Sanford terminal. "All of our trains ran yesterday and so far they're all running today," said Crews.

The first train out of New York Monday was Amtrak's Silver Star. Normally that train arrives in Sanford at 8:14 a.m., according to Crews. Monday it

ran seven hours late, arriving in Sanford at 2:58 p.m. Amtrak's Champion, which usually arrives at 2:12 p.m. was 10 hours late Monday, noted Crews.

The Champion began a north-bound run on schedule Monday night and was five hours late arriving in Washington, D.C., according to Crews.

Atlanta, Ga. (UPI) — President Carter today said a new nuclear arms pact with the Soviet Union will establish for the first time equal numbers of strategic weapons for both superpowers, reversing the Russian numerical advantage temporarily established in SALT I.

Carter announced agreement has been reached with the Soviet Union on the major components of a "sound and verifiable" strategic arms pact. He warned that his rejection by the Senate would lead to a dangerous escalation of the weapons race.

Carter said he personally consulted with Brushner, Chinese Vice Premier Teng Hsiao-ping and other world leaders on the turmoil in Iran and the despoiling war in Indochina. He said the United States respected the integrity of the new government in Iran.

major provisions of the pact. It will: —Require the Soviets to reduce their overall number of strategic arms. HOROSCOPE

By BERNICE BEDE OSOL

For Wednesday, February 21, 1979

YOUR BIRTHDAY February 21, 1979 Secret ambitions you've been harboring for some time stand an excellent chance of becoming a reality this coming year. Aim high. Keep your powder dry. PISCES (Feb. 20-March 20) There is no in-between with you. You're either a dynamo or you are a dud. You'll fare better if you strike a happy medium. How to get along with other signs is one of the sections you'll enjoy in your all-new 1979 Astro-Graph Letter. Get yours by mailing \$1 for each and a long self-addressed, stamped envelope to Astro-Graph, P.O. Box 480, Radio City Station, N.Y. 10019. Be sure to specify birth sign. ARIES (March 21-April 19) In trying to be nice to everybody you could forget to be kind to yourself, and yield too easily to someone's ways that benefit only him. TAURUS (April 20-May 20) Just because you've got the determination today to follow through doesn't mean others do. Trust only yourself to complete necessary tasks. GEMINI (May 21-June 20) You may feel it takes to get your points across today. Unfortunately, you may waste your pitch on the wrong person. CANCER (June 21-July 23) It's nice to help out people in need. However, don't do so at the expense of breaking promise to those at home who were depending on you. LEO (July 24-Aug. 22) You can't be all things to all people, so don't get upset today when a co-worker doesn't see the same virtues in you as your friends do. VIRGO (Aug. 23-Sept. 22) In your urgency to accomplish your purposes today you could get carried away and handle your possessions in a wasteful or foolish manner. LIBRA (Sept. 23-Oct. 23) Normally it's more important what you say or how you behave than how you are attired. Unfortunately, today's appearances are most significant. SCORPIO (Oct. 24-Nov. 22) A misunderstanding could put a damper on what otherwise would be a good day. Be extra-careful what you say and to whom you say it. SAGITTARIUS (Nov. 23-Dec. 21) You'd be wise today to concentrate on areas you can play solo, or pain may draw you into activities that overtax your capacities. CAPRICORN (Dec. 22-Jan. 19) You have the ability today to turn little into much. Be extremely careful, however, that you don't attempt to do so by being too demanding. AQUARIUS (Jan. 20-Feb. 18) It's an excellent day for projects that pique your imagination. Inviting another aboard, however, will mess things up.

WIN AT BRIDGE

By Oswald Jacoby and Alan Kostag

Bridge game analysis with a hand diagram and text explaining the play.

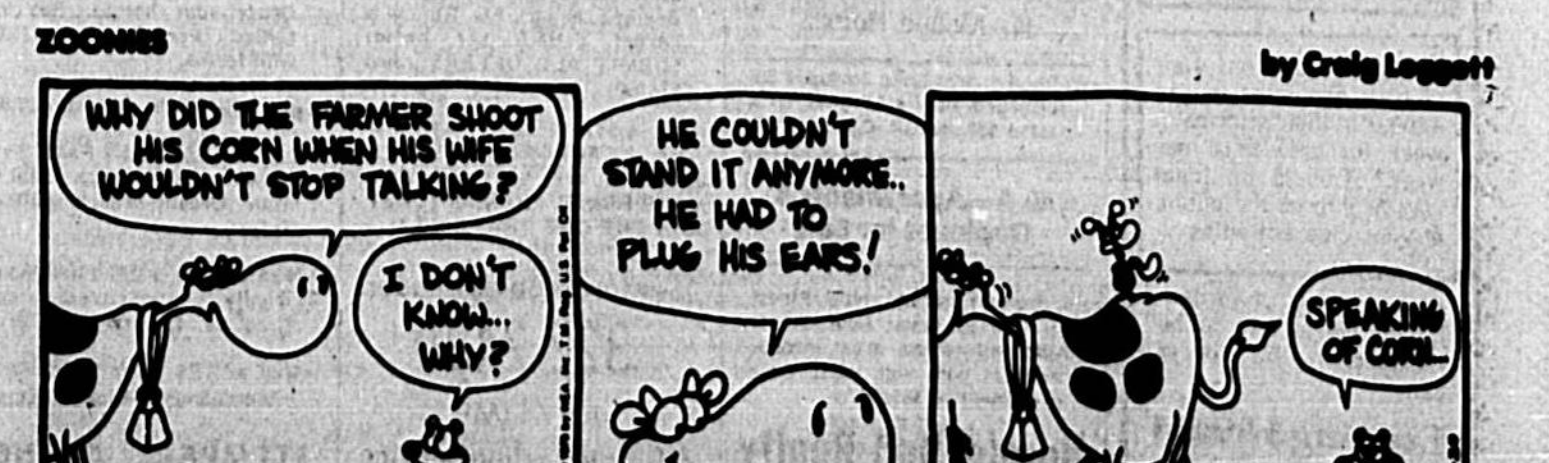

Ask the Experts

With a mere 21 high-card points, South might well have let the bidding die at five hearts, but like most players South hated to stop in no-man's land between game and slam. Things started out well for him with a diamond lead up to his ace-king. There were still plenty of problems. He was going to have to try a heart finesse.

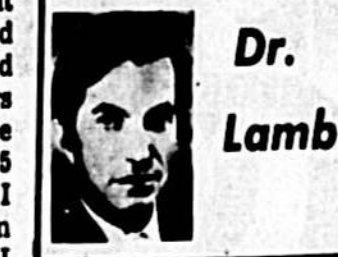

SPIDER-MAN

ZOONIES

In Coping With 'Middle-Aged Pot'

DEAR DR. LAMB - Is it necessary for middle-aged women to get big stomachs and all out of shape? I am 50 years old and have begun to gain weight. I am 5 foot 3 and weigh 130 pounds. I am small-boned and think I'm about 15 pounds overweight. I have been trying but it seems impossible to lose these pounds. I had a gall bladder operation five months ago. I walk about two miles a day, but I'm afraid to try any other exercise. I have heard women gain weight during and after the menopause. Is this true? DEAR READER - I'm afraid it's true that women do tend to gain at the time of the menopause and thereafter, but that doesn't mean that you have to. Of course, having recently had abdominal surgery and not having been able to do any abdominal exercises since then would cause you difficulty in keeping your waist measurements down. I'm pleased to see that you realize that whether a person has excess fat depends upon both how many calories he eats and how many he uses. That's why I like to see a sensible diet combined with a sensible exercise program to lose fat. Walking two miles a day, for a woman of your weight, uses less than 120 calories, but if you multiply those times 365 days a year, that's equivalent to the calories in 12 pounds of fat a year. I'm reluctant to tell you you should start doing abdominal exercises to tighten up your abdominal muscles, because I don't know about the status of your recovery. However, I am sending you The Health Letter number 37, Girth Control: Avoiding the Big Middle. Other readers who want this issue can send 50 cents with a long, stamped, self-addressed envelope for it. Send

China-Vietnam War: The Key Battle Looms

BANGKOK, Thailand (UPI) - China and Vietnam moved troops toward the border between the two nations, a key battle in their 5-day-old war. Intelligence sources in Bangkok said China sent another division of troops across the border toward Lang Son, 12 miles into Vietnamese territory. A French reporter said he saw thousands of regular and provincial Vietnamese troops, accompanied by 100mm howitzers, also heading for Lang Son. The intelligence sources said the troop movements by both sides indicated a major battle for control of Lang Son, a key northeast border junction of rail, river and road communications, was shaping up. Soviet reconnaissance planes flew near the area for the second time since the Chinese invasion began Saturday, the Japanese Defense Agency reported, underlining intense Soviet interest in the conflict. Intelligence sources said fighting continued along much of the 450-mile border but without major movement of the front lines. The French reporter quoted the Vietnamese commander of forces at Lang Son as saying, "We think they (the Chinese) have regrouped. They will try to surround us." Intelligence sources in Bangkok said there were large troop buildups on both sides but could not confirm the infusion of the Vietnamese regulars. "So far as we know, the regular army divisions have been kept in reserve, well south of the fighting," one source said. The latest reports from the battle area indicated the Chinese forces were overpowering, one source said. "There are lots and lots of Chinese on the border," he said. "They have plenty of capability."

Iran: U.S. Marine Held, Trial Possible

TEHRAN, Iran (UPI) - A U.S. Marine wounded in the assault on the American Embassy a week ago is being "investigated" for an unspecified crime, Ayatollah Ruhollah Khomeini's deputy prime minister said today. Khomeini meanwhile won a major test of strength with the Marxist Fedayeen guerrillas of Iran by forcing them to cancel a planned march through the city Friday to protest their non-representation in the government. Khomeini's information minister Amir Entezam told reporters that "certain action will be taken" regarding Sgt. Kenneth Kraus, 23, of Lansdale, Pa., who was abducted from his hospital room where he was recovering from wounds suffered in last Wednesday's attack on the U.S. Embassy by urban guerrillas. Entezam told reporters at Prime Minister Mehdi Basargan's office that Kraus was now "in the hands of Ayatollah Ruhollah Khomeini's revolutionary committee."

FIREFIGHTERS BATTLE FLAMES AFTER SANFORD 'PLANE CRASH'

TECHNICIANS TEND TO INJURED

When they came roaring onto the grounds at the Sanford Airport Tuesday afternoon, Sanford Police had no way of knowing the tower of smoke rising from a burning wreckage and the "blood-soaked" people strewn about the ground were not part of a real disaster. The rank-and-file police officers were the last to know they were taking part in a drill. However, firefighters and sheriff's deputies were alerted the situation was an exercise when they were dispatched to the scene. The news media was notified of the staged event before it happened, but could not publicize it. Such publicity would have ruined the element of surprise officials felt was needed to get an accurate gauge of low emergency forces would handle a real disaster, according to J. S. (Red) Cleveland, Sanford Airport Manager. "To make it an effective drill not everyone knew it was going to happen," said Cleveland. Only supervisory personnel knew in advance the event was going to take place, according to Cleveland. "I was working traffic at the hospital and this officer comes up to me, and he was just as sincere as he could be, and he says, 'I wonder how bad it is out there,'" related Sanford Police Sgt. William Bernosky. Bernosky said many of the officers who worked crowd control around the crash site and the hospital did not know the disaster was a drill until after it was over.

Polk \$ Bid Delay

Seminole County Commissioners have delayed for one week a decision on whether to permit Sheriff John Polk to seek a U.S. Law Enforcement Assistance Administration (LEAA) grant of \$100,454 to purchase a mini-computer. The mini-computer would provide Polk's office and other Seminole County law enforcement agencies with immediate retrieval of information within the criminal justice system. The grant application being considered is the second-year funding of phase two, Criminal Justice Information System (CJIS) Equipment Implementation to continue the orderly acquisition of computer hardware as part of a master plan. The commissioners delayed the decision until further information is available after Fred Griffith, Office of Management Analysis and Evaluation (OMAE) analyst, submitted a report to the board noting the local spending the grant would require. The report told commissioners the grant requires a county "hard cash" match of \$5,747 and the addition of two positions to the sheriff's office payroll in the fiscal year to begin Oct. 1. Griffith's report said a data processing manager would be required at county cost of \$24,000 annually and a computer programmer at an annual cost of \$12,800, bringing total costs to the county of \$43,547. LEAA to provide \$100,454 in grant funds. The county grants review board, which includes OMAE director Jeff Eichberger as chairman, Griffith and two members of the county purchasing department has approved the grant application. Bob Lowe, grant administrator with Polk's office, said today Polk, chairman of the Crime Incidence Council, and the council composed of the chiefs of police in the county have agreed to finance the development of criminal justice information systems. Lowe said the sheriff's department has been successful in obtaining 18 federal grants in the past six to seven years.

Layer Says 'No' Did Board Order Paving Halted?

By LEONARD KRANSORF Herald Staff Writer Work continuing on a bus turn-around area at Lyman High School may be unnecessary, but whether the paving should continue is in doubt today among school board members and the school district superintendent. The matter may be resolved tonight when, one member says, if further clarification is needed he will move to have Superintendent William Layer discontinue the paving near the new vocational wing at the high school. Two school board members contend Layer was given direction last week to stop the paving, two others say no such indication was given, a fifth says she's really not sure what happened, and superintendent Layer agrees no order was given to stop paving. The dilemma stems from last week's meeting at which the members voted 4-1 to have Layer hire an engineer to conduct a cost study of putting in a road, drainage and parking spaces on property adjoining Lyman High School recently purchased for \$9,000. However, during last week's meeting board members also discussed the stopping of paving at the school. The paving is being done on an area which would be used as an area for buses coming from County Road 427. The buses would pick up or drop off students and then turn around and go back onto the road. However, if a road is installed through the property, buses or students would enter from Dog Track Road and then exit onto 427. "There was a lot of talking about stopping the paving," Layer said, "but there was no clear-cut decision." He noted the only instructions he received was to hire the engineer. However, Board member Roland Williams said, "We told him to definitely stop the paving while the engineer checks the property." "I believe it is apparent that the bus turn-around will not be needed because the traffic will be able to enter or exit from Dog Track Road," said Williams. "I'm really not sure, but I thought the motion was to have the engineer develop a cost study of using that land," noted clear-cut member Pat Tolson. "However," she added, "I can't imagine why the board would have Mr. Layer hire an engineer if they planned to use that bus turn-around area." Mrs. Tolson was the only one of the members who voted against the hiring of the engineer. At the meeting Layer had said the paving should continue because the area could still be used for parking.

THE PAVING GOES ON AT LYMAN
