EDITORIAL COMMENT

At long last, it appears that action is to be taken to control dogs running loose in Seminole County. The County Commission and Justice of the Peace Elmer Ashley last Monday requested of the legislative delegation that a bill be put through the Legislature allowing the County to

set up a dog pound, with a full-time employe. JP Ashley summed the matter for the delegation thusly: "Many ownerless dogs . . . some vicious . . . run loose through the county, especially in the southern part. These animals are not only a nuisance but a health menace." The Judge reported it is necessary for him

to hose down his yard almost daily because of the packs of dogs ranging in his neighborhood. There are reports, too, of dog owners from surrounding counties, especially to the south, dumping their unwanted pooches in Seminole County. Usually, these are female canines about

to bear litters. These unwanted dogs are dropped in this county because the owners' own countles have strict laws regulating control of the animals. To abandon these animals in their own balliwicks could bring the law down & them. So, Seminole County . . . without controls at the moment . . .

inherits these animals. The Commission members informed the legislative delegation the County Attorney has been instructed to draft a bill using the strong Orange County dog law as a pattern. .

Cuba: Issue, Evidence

After Defense Secretary McNa-mara's unprecedented two-hour television analysis of the Soviet build-up in Cuba, the ground occupied by the administration's most responsible critics on this issue is more sharply

The leading critic, Republican Ben. Kenneth Keating of New York, alleges that the hard bases of the medium - range offensive missile

sites in Cuba are "still in place."

McNamara says there were originally six major MRBM complexes implanted by the Russians last fall, each with four individual missile emplacements. He offers photographic evidence purporting to show that all 24 of these hard bases were buildozed to pieces. He offers other pictures to suggest that no new activity has been found at these sites or the three intermediate - range missile sites (each with four pads), with the latest check just days ago.

Keating thus far has not chosen to present publicly any proofs to the contrary which he may believe he

Keating says Russia "may" have removed MRBM and IRBM weapons and its IL-28 bombers as the administration contends, but says there can be no final proof.

He gets a slight assist here from CIA Director John McCone, who says that only on-site inspection can provide the absolutely clinching evidence. McNamara argues, however, that the photographic evidence tracing the dismantling of the weapons and the planes and their shipment all the way back to Russian waters is convincing "beyond a reasonable

Keating wonders aloud how we can be sure "what is carried in the holds of Soviet vessels, unloaded in crates and hidden in caves?"

McNamara insists we follow closely every Soviet ship docking in Cuba, observe the size and configuration of the crates in its cargo, watch what happens to it. He thinks the picture evidence does not support

the argument that new "offensive" weapons have been introduced into Cuba since the crisis of Oct. 19.

He is also emphatic in contending that none of the offensive missiles known to have been in Cuba at that time was over hidden in caves or other secret cover.. U. S. intelligence sources insist all of them - and all supporting equipment — were carefully counted from dismantling to out-shipment.

Here an important point needs to be made. Some skeptics question whether objects under protective fabric photographed on the decks of outbound Soviet ships are "prov-able" as missiles. But every single one of these missiles was under some protective cover when photographed on Cuba soil. Why is such evidence acceptable as proving missile presence in Cuba, but not as demonstrating their out-shipment?

Keating says even if you grant the removal of bombers and MRBM and IRBM weapons, the Soviet buildup in Cuba continues to be dangerous. At root this is a contention that what the administration calls defensive wenpons are really offensive.

McNamara deals with this largely by asserting that tanks, tactical rocket launchers, assault guns and the like are defensive unless it can be shown that Russia or Cuba has the capability of delivering these weapons to either our or Latin American shores. He says they lack this capacity totally.

Keating says Russian MiGs now in Cuba, presumed capable of carrying nuclear weapons loads, have "nearly 1,000-mile range." McNamara says no MIG in Cuba is presently fit to carry such weapons and even if so adapted could not reach the southern tip of Florida against our known defenses.

There is the ground for the dispute. Clearly it will continue to be a battle area for many months to

Attention **DUCK and DOVE HUNTERS**

For you hunters who missed the legal notice published in the Samford Herald Monday, Feb. 18, the Florida Game and Fresh Water Fish Commission is planning on designating the above outlined area a bird sanctuary. The commission is holding a public hearing in Orlando Feb. 28 at 9:00 A. M. at the Angebilt Hotel on this matter. All property owners within this area who desire that their property be excluded from this sanctuary are urged to submit a legal description of their property to Mr. A. D. Aldridge, Director, Game and Fresh Water Fish Commission, Tallahassee, Florida. It is imperative that each one of you write to the game commission immediately as well as attend the Orlando meeting.

You will note the Southern boundary extends to the low water mark of Lake Jessup, which will close our finest duck hunting as well as the best dove hunting in Seminole County.

MIDWAY BETWEEN SANFORD & ORLANDO

Dear

DEAR ABBY: Why do people hang on to letters and pictures of a dead romance? I had a friend who was recently killed in an accident. When her employer came to her wake he brought a box of her personal things that had been locked in her file at work. He gave them to her husband. When the husband opened the box, he found letters and pictures from a fellow he had suspected his wife was in love with during the early years of their marriage. I knew about this affair and knew it had been over for years. The husband didn't know this. He went to pieces and did not attend her funeral. He was located months later. a broken man, in Skid Row. Even in death it's the innocent ones who are hurt the most. Write something about this in your column, Abby. It could spare others that kind of mis-

A FRIEND

DEAR FRIEND: You expressed it very well. Let this be a warning to all who have such souvenirs locked in files, vaults and drawers. Dig them out - for the sake of the living who love you - and give them a private burial.

DEAR ABBY: What do you do when a girl writes your initials all over her notebooks, school books and even on her arms in red and black ink? I am the boy and I don't like it one bit. She never was my girl and never will be. The whole school thinks I am her boyfriend. Please

print this so the kids at school will get it straight.

DEAR S.O.S.: The girl is childish and there is nothing you can do about it. If you make a fuss, she'll have attracted your attention, which is what she is trying to do. Ignore her and she'll go away.

DEAR ABBY: My father died a few months ago leaving my mother alone. In order to supplement her income she decided to rent her downstairs. She asked me to help fix it up, so I agreed. My wife screamed bloody murder. She said I never painted or repaired our house and had no business doing it for my mother. She said, "Let the old bag rot up there!" Abby, my wife's attitude has torn me to shreds inside. I am the only son and my mother could not afford a professional decorator. Was I wrong in helping my mother? What's wrong with my wife? Captain Joseph M. Tully, Commander of Heavy Attack Wing One since June 1961, Thursday received orders for instruction at the National War College, Washington, D. C. He will be detached from his command at NAS Sanford in

July.

Tully has served more than four of the past eight years in Heavy Attack aviation. In August 1955 he reported to Heavy Attack Squadron Five as Executive Officer, later taking command of that unit. This was followed by duty at the Bureau of Naval Personnel in Washington, D. C. Prior to assuming his present command, he was

Sounds unbelievable for a Chrysler. But it's true. And we're ready to prove it to you.

Considering the full-size value you get in a Newport 4-door sedan, we can appreciate why so many ask us to prove that a Chrysler can be priced so low.

We're always happy to.

Because we can talk about full-size comfort; hig, booming V-8 power (fed by economical regular gas); rich fabrics; lush carpeting. Plus America's best and longest new-car warranty†-5 years or 50,000 miles

So why not compare the facts, the figures, the features, with any car anywhere. We think you'll find the \$2964 Chrysler sizing up as the finest value in town.

Your Chrysler dealer's ready with the proof.

Thus authorized Chrysler Daaler's Warranty against defects in material and workmanship on 1963 cars and to include parts replacement or repair, without charge for required parts or labor, for 8 years or 80,000 miles, whichever comes first, on the engine block, head and internal parts; transmission case and internal parts (eschuding manual clutch); forque converter, drive shart, universal aints (excluding dust covers), rear axie and differential, and rear wheal bear ked at reasonable intervals according to the Chrysler Cartifles Car Care achecules.
