Sanford police put on display Quaaludes, a gun, bullets and about \$30,000 cash confiscated in a drug deal Tuesday that resulted in the arrest of two men on charges of trafficking in cocaine. The men were being held in the Seminole County jail today on \$100,000 bond each.

More Arrests Due In Narcotics Bust

More arrests are expected within the next few days of three men suspected of involvement in an illegal narcotics operation in Seminole County.

Two men suspected of illegal trafficking in Quaaludes were arrested Tuesday by area law-enforcement officers in Sanford. Both men, William R. Allmond, 47, of Hillsboro Beach, and Paul S. Mann, 52, of Oklahoma City, were being held today on \$100,000 bond each at the Seminole County jail.

"We're seeking three more people — one is local and the other two are from Georgia and Tennessee," Sanford Det. Tony Brooks said. "However, all three men are currently in the area."

Brooks said Tuesday's arrests were the result of a six-week investigation by the Sanford police, Longwood police and the Federal Department of Law Enforcement into an alleged drug-trafficking ring operating out of Sanford Airport.

Allmond, owner of three Florida restaurants, and Mann, a Las Vegas casino operator, were arrested Tuesday in a Sanford hotel parking lot and a Sanford department store parking lot along U.S. Highway 17-92 respectively, on charges of trafficking in Quaaludes.

Brooks said, "We confiscated about \$30,000 in the drug deal between the two suspects and our agents, and we confiscated a revolver found on Allmond."

"The men were attempting to smuggle \$1 million worth of Quaaludes into Sanford Airport from Colombia," he said. "We infiltrated the group and managed to hamper the operation."

Brooks said his department also is seeking forfeiture action on Allmond's assets.

"There were a couple of privately owned aircraft used in the illegal drug operation, and we'll be trying to put a freeze on them," he added. —TONI YARBOROUGH

Arraignment Scheduled Friday For Higginbotham

By TENI YARBOROUGH
Herald Staff Writer

Former Lake Mary Police Lt. David Higginbotham is expected to turn himself in to police Friday to face charges of selling guns he allegedly stole from the Police Department.

"David Higginbotham and his attorney, Donald Lykkebak, are scheduled to be at the county jail at 1:30 p.m. Friday, when he will be booked and arraigned," said Chris Ray, Seminole-Brevard chief assistant state attorney. "He'll probably plead not guilty and secure a pre-trial release."

According to Lykkebak's secretary at his Orlando office, Lykkebak is scheduled to appear with Higginbotham at the county jail Friday.

However, when contacted at his home at 205 Hays Drive, Sanford, Higginbotham, 34, denied any knowledge of the pre-arranged jail and court ap-

pearance.

"I don't know anything about it," he said. "You'll have to get in touch with my attorney in Orlando if you want to find that out."

The exact charges expected to be made against Higginbotham will not be known until the arraignment Friday because the grand jury handed down a sealed indictment in October, Ray said.

The ex-police officer was indicted on charges of stealing weapons from a Lake Mary police evidence locker and selling them at a Sanford auction house.

Ray said the arrest warrant was not issued earlier because of Higginbotham's poor health following an incident Aug. 28 in which Higginbotham reportedly was shot in the leg with his own gun. Higginbotham reported he was involved in a scuffle with suspects he encountered while on routine patrol at the Southward Orange Groves off

County Road 46A. During the scuffle, his gun discharged, wounding him in the leg.

The shooting occurred a few days prior to Higginbotham's resignation from the Police Department.

"David is not a well man," Ray said. "He got out of the hospital in November after several operations on his leg and we thought it best — his attorney and I — to wait until he was able to be put into the (court) system. All parties concerned feel he is well enough to be in the system now."

"I'm a ruined man and I'm ill," Higginbotham said today. "My children have been beaten up in school because of articles in the paper and you keep crucifying me in the papers just because I'm a police officer. I believe it's a personal attack on me."

Question For Lake Mary

What About Sewage Treatment?

By DONNA ESTES
Herald Staff Writer

Lake Mary is stymied about what it can do to provide sewage treatment, a requirement if the city is to continue growing and developing.

The latest news from the U.S. Environmental Protection Agency (EPA) and other federal agencies at a meeting called by U.S. Rep. Bill McCollum, R-Altamonte Springs, and State Sen. Clark Maxwell, R-Melbourne, in Orlando on Wednesday was not good.

The federal officials invited by McCollum and Maxwell to explain what federal funds, if any, could be guaranteed to city and county governments for sewer plant construction responded that there are no guarantees.

And Lake Mary, a community of 3,000 has no funds to go it alone with sewer plant construction. The answer previously had been for Lake Mary to connect with the city of Sanford's sewer system which was to be ex-

panded with federal funding into a regional facility.

Sanford's plan approved by state and federal officials previously, had been to expand the plant with federal funds and dump the highly treated effluent into Lake Monroe as it currently does. But DER recently told the city that not only will the state department not allow additional effluent into Lake Monroe, it also is challenging the city's right to continue dumping effluent from its current plant into the lake.

The Sanford City Commission's response was to abandon the seven-year-old plan for a regional facility serving Sanford, Lake Mary and unincorporated areas and to fight to keep its own plant, expanding as needed to meet only Sanford's present and future needs.

The city has filed an appeal with the DER seeking to have its waste load allocation — the amount of effluent it may pour into the lake — continued and increased. DER officials, who

took samplings in the lake during its lowest ebb this past summer, insist that Sanford is further polluting the body of water with its effluent. City Manager W.E. "Pete" Knowles and the City Commission says the timing of the tests was unfair. They also have said that Orlando's regional plant at Iron Bridge near Oviedo will be dumping far more pollutants into bodies of water that ultimately will end up in Lake Monroe than Sanford does — or has planned to do.

Knowles said the DER approval of the Orlando plant effluent disposal was given because of political pressure from powerful Orange County politicians.

Lake Mary Mayor Walter Sorenson said the previous plan with Sanford for the regional plant was the "only good answer."

"The only answer now for Lake Mary would be if we could be sure if we spent money now for a plant that it would be returned," Sorenson said. "The only other possibility would be if

we could purchase a nearby sewer plant, such as the one in Greenwood Lakes, but that possibility is remote."

Lake Mary can't even have industrial development, where the city's major emphasis is at this point, by permitting the use of small self-contained package sewer plants. "We don't have the authority to issue permits for package plants," Sorenson said.

"We will find a way out. We just don't know what it is. We're resourceful, however. The regional concept was the best plan," he said.

Sorenson said both the EPA's and DER's current position that sewer effluent must be disposed of through land-spreading forbids solution. He said the two agencies' approach is too stringent. Requiring a city to purchase enough land for effluent land-spreading is much too expensive, he said.

Sorenson suggested that both agencies will have to compromise on at least one of their policies. He noted that the EPA in other parts of the country is permitting land spraying of effluent on farmlands. He questioned why that technique isn't being permitted in Florida.

"Spray-irrigation of farm land could do a lot of things of benefit to many," Sorenson said. He said that among the benefits would be that property could be leased for spray-irrigation of effluent, rather than purchased, and the water now shipped out to sea could be retained and thus conserved.

"I don't understand why it is forbidden," Sorenson said. Officials of the DER and EPA have said there is a possibility of crop pollution where effluent spray irrigation is used.

Library

Sanford Branch To Stay Open, Using City Hall Temporarily

By LEE DANCY
Herald Staff Writer

Regular customers of the Sanford Public Library will not be deprived of a literary resource while the 74-year-old facility is being renovated.

"I think we ought to make a special effort to keep it (the Sanford branch County Public Library) open," said City Commissioner William Kirchhoff.

Sanford building officials recently offered the empty first floor of City Hall as a temporary site for the library. The brick building where the library is currently housed, at First Street and Palmetto Avenue, originally was constructed as a post office in 1917.

Sanford's library currently is in the design phases of its interior remodeling. Tom Montero, an architect for the firm of Greenleaf-Telesca in Altamonte Springs, said the changes planned for the old building include more interior space, bathroom facilities and accessibility to the handicapped.

Sanford will let the county house its library on the first floor of City Hall for approximately \$5,200. That price would cover the cost of utilities used in the temporary location, said Jean Rhein, county librarian.

Ms. Rhein said the commission made it clear that it wanted to see library services remain available to northern Seminole County residents. This meant moving the majority of the facility's collection to the new location, she said.

"The commission indicated it did not want to see (library operation) hours cut, and it wanted the majority of the collection available," Ms. Rhein said.

The cost of the move depends on how much of the packing work library staff members might do themselves. Prices for moving the library approximately one-quarter mile range from \$1,500 to \$3,000, Ms. Rhein said.

The move probably would take place early in March. Montero said he hopes to have all plans completed and the work out for bid by Feb. 1, with construction underway by March 1.

"Hopefully, the library would be back in business (at its old location) by July," he said.

To improve the space utilization of the old building, between 5,000 and 10,000 volumes will need to be omitted from its current collection, Ms. Rhein said.

Most students currently using the Sanford Library must check out the resource materials they need. There is no space available under its current design for tables where junior and senior high school students could work, Ms. Rhein said.

With the new design, there will be men's and women's restroom facilities, as opposed to one restroom for everyone. A children's area will be developed from backroom space once used for storage, and more table space will be available.

Ms. Rhein said the volumes removed to make room for these improvements will be either second copies of books, dated material, or older, more valuable books that should be kept in storage.

Without the Sanford branch of the library system open, anyone who wanted to check out a book would have had to drive to the county's Casselberry branch, Ms. Rhein said.

Zoners To Ponder Office Building

Site plans for the proposed 8,700-square-foot, two-story cedar office building to be located at 902 Lake Mary Blvd. will be considered by the Sanford Planning and Zoning Commission at a 7:30 p.m. meeting today at City Hall.

Dr. Ingrid Peterson, an optometrist whose current office is in Zayre Plaza off U.S. 17-92 near Airport Boulevard, plans to build the structure. She said today the estimated value of the building is \$229,000.

If the commission approves the site plans at tonight's meeting, construction is slated to begin Feb. 15 and be completed for occupancy by the first week in August.

Dr. Peterson said the building will include 10 offices, one of which she will be using and a second to be leased by a travel agency. The other eight, with a total of 7,000 square feet, will be available for lease, she said.

Dr. Peterson has been practicing optometry in Sanford for three years. The board also will consider a site plan for a new building at 1111 French Ave., near the corner of 11th Street. Roy Sweat wants to build a 750-square-foot fish market on the property.

Public hearings will be held on the requests of Flagship Bank for permission to locate an automated teller at 1401 Seminole Blvd. in the parking lot of the

new Central Florida Regional Hospital. A site plan for the automated teller also will be considered.

As a final item on the agenda for tonight's meeting, the commission will discuss a recommendation from city Building Official Gary Winn that the board require, at buildings where three or more businesses are located, that only one ground sign advertising all the businesses be permitted.

A spokesman at the city building office said the purpose of the recommendation is to avoid "bumper to bumper" advertising signs on various business properties. —DONNA ESTES

WHERE'S THE FIRE?

Coordinating efforts between the Sanford Fire Department and mutual aid units supplied by Seminole County Wednesday afternoon at a mock fire at the County Courthouse are (from left) Steve Harriett, assistant city manager; Fire Lt. Tom Hickson; Fire Chief W.C. Galley, and Gary Kaiser, county director of public safety. The courthouse was evacuated in three minutes as part of the drill. It took a total of 11 minutes for 10 city and county units to get set up at the scene and extinguish the fire, which was supposed to have been in the north wing on the fourth floor. Galley said results were "excellent for the first time," and more combined drills are planned in the future.

FLORIDA IN BRIEF

TV Station Mishap Keeps Sen. Hawkins Hospitalized

ORLANDO (UPI) — Sen. Paula Hawkins (R-Fla.) apparently is suffering a recurrence of 20-year-old back problems as a result of being hit on the head and back by a falling television studio backdrop panel Tuesday night.

Dr. Edward Farrar, her orthopedic physician of 12 years, said Mrs. Hawkins would remain in the hospital at least until Friday. She was listed in fair condition at Orlando Regional Medical Center, where she was rushed by ambulance after the accident at the Winter Park studios of WESH-TV.

'Bagman' Antone To Die

TAMPA (UPI) — Anthony Antone, the oldest man on Florida's death row, who now faces a Feb. 2 date with the electric chair, is one of four men charged in the 1975 murder of a former Tampa police vice squad officer.

Antone, 64, was convicted and sentenced to death after being identified as the "bagman" who arranged to have Sgt. Richard Cloud killed Oct. 23, 1975, for mobster Victor Acosta, a convicted cocaine dealer.

Refugee Medical Care OK

MIAMI (UPI) — Immigration Service officials have denied charges by activist Rev. Jesse Jackson that some 600 Haitians being held at Miami's Krome Avenue detention center are receiving inadequate medical care.

Jackson, head of the Chicago-based Operation PUSH, made the charges Wednesday following his third visit within a week to the camp on the edge of the Everglades, 18 miles west of Miami.

WORLD IN BRIEF

Searchers Find No Trace Of Kidnaped Gen. Dozier

ROME (UPI) — Police completed an all-night search in the mountains east of Rome today but found no trace of kidnaped U.S. Army Brig. Gen. James L. Dozier, and concluded that anonymous telephone calls announcing his death were hoaxes.

The search by hundreds of police in the Abruzzi region 70 miles east of the capital was triggered by three telephone calls to Italian newspapers Wednesday saying the Red Brigades terrorist gang, which kidnaped Dozier, had killed their hostage.

Soviets Bail Out Poland

MOSCOW (UPI) — The Soviet Union has rescheduled Poland's massive \$4 billion debt in a bailout program and agreed to provide almost all of its oil and gas in the coming year.

A Communist source said the Kremlin bail-out Wednesday was tied to assurances by Poland's martial-law government that: "there would be no return to the chaos of the last year."

Warsaw Launches Purge

United Press International
Poland's martial-law rulers, bolstered by a \$4 billion Kremlin loan and promises of oil and gas to prop up the nation's battered economy, began a purge of Communist Party members who led a democratic reform movement and hard-liners blamed for industrial unrest.

The martial-law regime of Gen. Wojciech Jaruzelski indicated Wednesday it would allow a tame Solidarity union that had no political goals, but two union members who have escaped arrest called for setting up of "secret strike committees" for an eventual general strike.

AREA DEATHS

MRS. BERTHA M. OLSON
Mrs. Bertha M. Olson, 73, of 980 Montgomery Road, Altamonte Springs, died Wednesday at Florida Hospital-Altamonte. Born Feb. 8, 1908, in Sweden, she moved to Altamonte Springs from Palatine, Ill., in 1971. She was a homemaker.

ROBERT LOWE
Robert "Ed" Lowe, 64, of 730 Seminola Boulevard, Casselberry, died Tuesday at Florida Hospital-Altamonte. Born Oct. 8, 1917, in Williamson, W. Va., he moved to Casselberry from Sunnyvale, Calif., in 1962. He was an aerospace mechanic and a Protestant.

Survivors include two sons, Bruce, Altamonte Springs, Vance, Bartlett, Ill.; a brother, Paul, Newark, New York City; two sisters, Vera Olsen, Keyport, N.J., Manny Erickson, Orlando; and four grandchildren.

Semoran Funeral Home, Altamonte Springs, is in charge of arrangements.

MRS. HELEN L. LETEKER
Mrs. Helen L. Leteker, 86, of 1850 Timocan Way, Longwood, died Tuesday in Winter Park. Born Aug. 7, 1895, in Lowell, Mich., she moved to Longwood from there in 1970. She was a homemaker and a Catholic.

Survivors include her wife, Josephine; two daughters, Mrs. Brenda J. Chambers, Winter Park, Mrs. Patricia R. Margeson, Orlando; two sisters, Mrs. Authella L. Rarden, Orlando, Mrs. Mary Evelyn Holiday, Rome, Ga.; a brother, William, Casselberry; his stepmother, Mrs. Eukah Ward Lowe, Rome; and three grandchildren.

Semoran Funeral Home, Altamonte Springs, is in charge of arrangements.

In Atlanta Child Murder Case

Prosecution Presents Testimony On Stakeout

ATLANTA (UPI) — The state hauled an eight-foot model of a bridge into court today and launched into testimony about a police stakeout that found accused killer Wayne Williams on the bridge.

Williams, charged with murdering two of the 28 young blacks slain in Atlanta over a 22-month period, first came to police attention on the Jackson Parkway Bridge the night of May 22.

A stakeout made up of police recruits was watching the bridge. One heard a loud splash in the Chattahoochee river, and another saw Williams drive off the bridge, but apparently no one was certain whether he had even stopped on the bridge.

Two days later the body of the last of the 28 victims, Nathaniel Cater, 27, was found floating downstream. Williams is charged with killing Cater and Jimmy Ray Payne, 21.

Assistant medical examiner Dr. Saleh Zaki testified Wednesday that he did not rule Payne was murdered until after Williams was indicted for the crime — and even then he could not prove that Payne did not drown accidentally.

Zaki's testimony did little to bolster the state's case against the chubby 23-year-old black photographer, charged with two of the 28 killings but suspected in at least 10 more.

District Attorney Lewis Slaton set about Wednesday establishing his circumstantial "jigsaw puzzle" case against Williams in a low-key manner, but defense attorney Al Binder cross-examined each witness dramatically and at length.

Binder, 52, a gray-haired Mississippian who stands with a stoop as though he is about to pounce and moves as if he was walking on ice, initially adopted a countrified, almost slow-witted appearance with each witness. But the guise dropped away swiftly if a witness appeared to be hedging.

Binder showed little mercy with Zaki, a product of the University of Cairo medical school who had a tendency to lecture to the jury with rhetorical gestures in heavily accented English.

Zaki performed the autopsy on Payne, 21, after his body was found in the Chattahoochee River April 27. He noted on the death certificate issued June 16 that the cause of death was asphyxiation and the reason undetermined.

But then, Binder thundered, Zaki amended the certificate, "this solemn instrument with your solemn signature on it," to show it as a homicide "on Aug. 6, 1981, after Wayne Williams was indicted for the murder of Jimmy Ray Payne, and you knew that, didn't you, sir?"

"I did," Zaki replied. Binder did not ask him why he waited so long to change the certificate.

Williams was originally charged only with the murder of Cater, the last in the string of killings. The grand jury added the charge of killing Payne.

"Doctor Zaki, do you know how Jimmy Ray Payne died?" Binder asked.

"He died as a result of asphyxia," Zaki answered. "I have not been able to establish the mechanism."

Asked by Slaton to explain how he concluded it was murder, Zaki launched into a long account of his methods, but ended up saying the condition of the lungs led him to decide Payne had been asphyxiated, but "the question is what type? Can I exclude drowning? No, I cannot. It is unlikely (though) because of the absence of evidence in the lungs."

He said he sent out investigators to go into Payne's habits, because "for a body to be found in a river it has to go to the river. If a person frequents the river, I have to consider this as evidence of drowning."

He discovered Payne was not a frequenter of rivers ... Thus, he said, he decided Payne was thrown, lead, into the Chattahoochee.

ERA Appears Dead In Florida

TALLAHASSEE (UPI) — If the Equal Rights Amendment needs Florida's vote to win ratification, it is probably dead.

Despite brave predictions of feminists, that is the assessment of the people who make things happen in the Legislature.

Every year since 1972, the lawmakers have refused to take up or failed to ratify the proposed 27th Amendment which says, "equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex."

Opponents and some supporters say support is no better this year and may even be eroding.

One of those is former Senate President Dempsey Barron, an ERA opponent and leader of a powerful bipartisan majority coalition.

Asked for his assessment of its chances in the final regular session of the Legislature before the June 30, 1982, ratification deadline, the Panama City Democrat said:

"If ERA could not pass in former years when the speaker, president and governor were for it, who would expect it to pass when Senate President W.D. Childers is against it, Speaker Haben has adamantly said he is not going to take it up, Gov. Graham is not pushing it very hard and you throw in President Reagan who is opposed to it?"

But Gloria Sackman-Reed, Florida coordinator of a last ditch campaign to build grass roots support for a movement to threaten legislators who oppose ERA with punishment at the polls later this year, said Reagan's attitude is a plus.

Under Reagan, she said, women are beginning to lose some of the little equality they have won without ERA, she said, sending new converts into the battle daily.

Thirty-five states have ratified the amendment and three more are needed to put it into the constitution. No state has voted for it since January 1977, and a number have voted to rescind prior ratification.

Barron said the issue always has been at least two votes shy of the required majority for Senate passage, and some members who voted for it in the past have told him they would not do it again.

"They said they voted for it one time and fulfilled their obligation and are not going to vote for it again," he said.

Barron said he couldn't remember which senators told him that.

Sen. Jack Gordon, D-Miami Beach, the leading proponent, said the vote count — which has slipped from 19 to 17 or 18 of the 40 senators since 1979 — has not changed. But he sees signs of a "softening" of opposition.

Neither Gordon nor Barron think a recent federal court decision in Idaho will change any votes. The judge ruled that states could rescind their earlier decisions to ratify ERA and that Congress had no power to extend the original ratification deadline of March 29, 1979.

"As far as changing votes in the Senate, I don't think it will have any real effect except maybe to shore up some of those who have changed their votes," he said.

Gordon said the Idaho decision is being appealed and he expects a decision by the end of March. But it won't affect his decision to bring up ERA which will hinge on whether votes are in sight to pass it, he said.

"The count is against it now, but the Dolphins almost came back after being down 24 points," he said, referring to the Dolphins-San Diego Chargers football playoff in which Miami overcame a 24-0 deficit to tie the game but lost in overtime.

Though some claim House support has slipped, Rep. Elaine Gordon, D-Miami, said there are enough votes to ratify it. Speaker Haben, while an opponent, would not keep it from coming to a House vote if it cleared the Senate. But he does not want it considered if it has no chance in the Senate.

Gov. Bob Graham supports ERA, but it is not among his half dozen top priorities. He recently agreed its chances of ratification are dimmer than at any time in his tumultuous 10-year history.

County Cutting Costs For Health Building

By LEE DANCY
Herald Staff Writer

A new building for the Seminole County Health Department should cost no more than \$55 per square foot and the architect who designs it should receive no more than a \$110,000 commission, the Seminole County Commission has decided.

A review of the most recent proposal from the architectural firm of Helman, Hurley, Charvat and Peacock of Winter Park precipitated displeasure among commissioners Tuesday. The board thought the architectural firm's proposal of approximately \$65 per square foot and a commission of \$144,000 was too expensive.

When Helman, Hurley, Charvat and Peacock made its initial proposal a month ago, it estimated the cost of the new health facility to be between \$70 and \$80 per square foot, which could have brought the cost of the building alone to nearly \$2.2 million.

Additional landscaping, parking lot paving and other exterior work would have brought the total cost to \$2.8 million when the project was completed. Now the firm's proposal puts the price tag for the project at approximately \$2.2 million, according to a letter sent to JoAnn Blackmon, county purchasing director.

But the county wants a building which will cost no more than \$1.9 million, including parking lots and other exterior work. Board members directed Blackmon to make their proposal to Helman, Hurley, Charvat and Peacock and see if the firm would accept it.

If the firm refuses the offer, Blackmon would have to put the design contract on the new facility out to bid again, board members said.

James M. Dorsey, director of health facilities planning for the architectural firm, Thursday said he had only received the county's counter offer Wednesday afternoon. Dorsey said he had not been able to evaluate the proposal and consequently was unwilling to comment on it.

The commission came to its conclusion that the new health facility can be constructed more cheaply than its architect suggested based on information from county building inspector Don Flippen.

CALENDAR

FRIDAY, JAN. 8

Salle Harrison Chapter DAR, 2:30 p.m., home of Mrs. Paul Mikler, 117 Hillcrest Drive, Oviedo. Speaker, Mrs. Huel Wright on "Faith, Hope and Love around the World."

HOROSCOPE

By BERNICE BEDE OSOL

For Friday, January 8, 1982

YOUR BIRTHDAY January 8, 1982
This coming year you are likely to form a very beneficial alliance with someone who has considerable influence over others. This person will become your friend, as well as counselor.

GEMINI (May-June 21)
Your potential to add to your resources is good today, but there is also a chance you could be extravagant or take gambles and negate your gains.

CAPRICORN (Dec. 22-Jan. 19)
The assistance of an important ally should not be taken for granted today. Even though he or she may want to be supportive, conditions might not permit it. Find out more of what lies ahead for you in each of the seasons following your birthday by sending for your copy of Astro-Graph, Mail #1 for each to Astro-Graph, Box 489, Radio City Station, N.Y. 10019. Be sure to specify birth date.

AQUARIUS (Jan. 20-Feb. 19)
You should be rather lucky today in achieving an important goal. Your success could be partially due to coworkers, but you may fail to give them adequate praise or credit.

PISCES (Feb. 20-March 20)
In your competitive activities today, keep everything on a friendly, fun level. If you win, do so graciously; if you lose, do so without alibi.

ARIES (March 21-April 19)
There's a possibility that something materially beneficial could happen for you today. If so, keep mum. An unutilized associate may want a share.

TAURUS (April 20-May 20)
Your ideas are likely to be better than those of your coworkers today, but unless you present them tactfully, they're apt to be rejected. Use a friendly approach.

CANCER (June 21-July 21)
You are apt to treat those not really important in your life with consideration today, while being a trifle too hard on persons who matter to you.

LEO (July 22-Aug. 22)
If you let events run their course today, happy endings are likely. However, the opposite could occur if you make impulsive or rash changes.

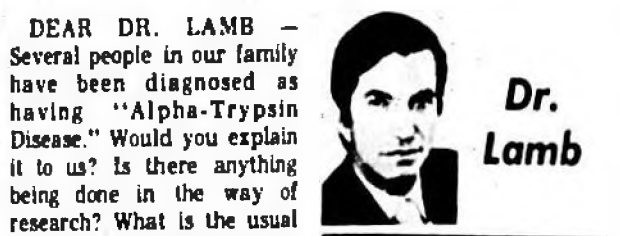

VIRGO (Aug. 23-Sept. 22)
Continue to be enthusiastic about your outside interests, but be careful at this time that you don't let expenses get out of hand. Be budget-minded.

LIBRA (Sept. 23-Oct. 23)
Lady Luck will be backing you today in situations meaningful financially and reputationwise. Unfortunately, you might not recognize her helpful gestures.

SCORPIO (Oct. 24-Nov. 22)
As long as you treat things philosophically today, you'll be able to deal well with any contingency that may arise. Don't let anger enter the picture.

SAGITTARIUS (Nov. 23-Dec. 22)
Things will turn out luckier for you today if you do what needs doing quietly and keep confidential matters to yourself. Broadcasting your moves could invite unwelcome intruders.

Emphysema: A Loss Of Lung Elasticity

DEAR DR. LAMB — Several people in our family have been diagnosed as having "Alpha-Trypsin Disease." Would you explain it to us? Is there anything being done in the way of research? What is the usual treatment? Cortisone has been prescribed and bronchometers to open lung passages.

DEAR READER — I'm sure you are talking about one of the causes of emphysema, the lung disease associated with expanded lungs. Terminology has changed through the years but today emphysema is used to mean a loss of the normal elastic characteristics of the lung. Normally as you breathe in your lungs stretch, and as you exhale there is an elastic recoil from elastic fibers within the lung sacs.

As we get older all of us lose some of the elasticity. But when too much is lost the air sacs collapse during expiration and obstruct the air flow out of the lungs.

Those elastic fibers are made of protein. Our bodies naturally produce substances called proteinase. These are enzymes that attack protein and break it down. That is an important function in some instances. But there can be too much of a good thing and some protein, such as the elastic fibers in your lungs, need to be maintained.

To protect against proteinase, our body produces another enzyme called alpha-1-antitrypsin globulin. When you have enough of this your elastic fibers are protected and your lung elasticity is maintained.

In about 15 percent of adults with emphysema they have an inherited defect in not producing enough alpha-1-antitrypsin globulin. In these people the elastic fibers will degenerate, leading to emphysema. Incidentally, these people can develop emphysema without smoking.

I am sending you The Health Letter number 17-8.

DEAR DR. LAMB — Our newspaper cut off your objection to the use of vitamin E in the treatment of fibrocystic disease of the breast. I have been taking 800 units per day as I understood was recommended by a doctor on the Today Show. I would like to know what your objections to taking it are.

DEAR READER — There has been a preliminary report that vitamin E helps resolve breast lumps from fibrocystic disease. Because of the small series I must consider it preliminary. And my main objection is not about the vitamin E but the real danger that some woman with a lump will start treating herself and not have a qualified examination.

No lump in the breast should be ignored or treated at home without an examination. That is very dangerous. If the lump turns out to be cancer and valuable time is lost in having an examination and proper treatment, it could cost a woman her life. That is reason enough to object.

WIN AT BRIDGE

player, did not double the spade slam and with no heart to lead got his thumb on the deuce of diamonds. The Rabbit ruffed the Hog's ace, led a club to dummy's ace, ruffed another diamond, cashed his K-Q of clubs to get a heart discard from dummy and paused to count. The best he could come to was 10 or maybe 11 tricks. The Rabbit didn't count very well.

Then he remembered something about giving away a trick to develop a squeeze and led his deuce of hearts. West discarded a diamond and the Hog was on lead. He played another heart.

The rabbit ruffed in dummy, ruffed a diamond in his hand and was down to a five-card ending. He held ♠K-Q-8 and ♥A-4. West held ♠J-9-3-2 and ♥K. Dummy held ♠A-10, ♠Q-10-8. The Hog held his head in his hands.

The Rabbit led his ace of hearts and was sure of the last five tricks, whether or not West ruffed.

There was no play for the hand with a diamond lead and West could have beaten the contract if he had ruffed the Rabbit's low heart and played a trump, but the Rabbit had won the tournament by making the hand.
