Cawthon Makes Plans To Supply Free Textbooks To State School Children

TALLAHASSEE, Fla., Jan. 12. (AP)—Letters have been written by Superintendent of Public Instruction W. S. Cawthon to the 16 publishing houses with whom Florida has contracts, regarding the cost and method of distribution of the first supply of free text books, authorized for the public schools under the new law.

Mr. Cawthon has asked the publishers particularly for the charge they will make on the text books. He explained that the state is not willing to shoulder the burden now placed upon the books in the shape of an additional 20 per cent charge before the studies finally reach the student.

The method of distribution is also an important item, Mr. Cawthon said, in order to avoid possible complications before the books are turned over to the child. He has asked the publishers to forward the department a copy of the in-

voices, in event the books are shipped with the freight charges at this end, in order to expedite and facilitate payment of the carrier fees. It may be, the superintendent said, that the firms will pay the freight charge themselves, and be reimbursed by the department.

Action on distribution of the free text books, which will be made to students of the prime to the sixth grade, inclusive, was taken at a recent meeting of the text book commission. The board, it was stated, has until July, 1926, to distribute the books, but the members are not content to wait until the last moment, Mr. Cawthon said.

A plan has already been worked out for the teachers of the counties to furnish the county superintendents with a list of their actual needs. The latter will make distribution.

Modern Rock Digging Dipper Dredge Being Built For Everglades District

TALLAHASSEE, Fla., Jan. 12. (AP)—A new and up-to-date rock digging dipper dredge is being built by the Everglades Drainage District for work in the canals of the district, it was announced by Fred C. Elliott, chief drainage engineer.

The dredge, it was stated, will be of modern design and construction, and will form an important unit of the fleet of dredges operating in the Everglades.

The dredge hull, according to a description given by Mr. Elliott, will be of all steel construction, 65 feet long, 24 feet wide and 6 feet deep. It will be of combination plate girder and truss type carrying steel bottom, side, end and deck plates. Special attention has been given in its design and construction to staunchness and strength for withstanding the

shock and strain of digging rock with unusually powerful machinery for a dredge of its size, Mr. Elliott said.

The new dredge will be equipped with powerful engines to drive a generator for affording electrical energy, which will be utilized by electric motors for driving hoisting engines, winding drums, spud engines and other parts of the machinery. It will be electrically lighted with illumination almost equal to daylight for night operating. The hull will contain fuel oil tanks of sufficient capacity for two months operation without replenishing.

The fabricated material for the hull is now being received at St. Lucie Canal, near Lake Okechobee, and erection will get under way by January 15.

Escambia County To Make War On Ticks At Early Date

TALLAHASSEE, Fla., Jan. 12. (AP)—Dr. F. A. Hathaway, chairman of the State Road Department, has requested the chairman of the Escambia county board of examiners to call a special meeting for Tuesday, Jan. 12, to go fully into all matters pertaining to the proposed routing of the so-called Bay Shore Route, of State Road Number One, between Pensacola and Escambia Bay.

The chairman of the department, Harvey Bayless, one of the members; J. E. Cronan, state highway engineer; L. A. Meginnis, attorney; and R. L. Bannerman, division engineer, will appear before the

board in an effort, it was stated to straighten out all differences arising in connection with the routing.

The department, Dr. Hathaway said, at the solicitation of many civic and other organizations, adopted a resolution to approve a bay shore touring of the road, if the county would furnish an 80-foot right-of-way. Subsequently, it was stated, an election was held authorizing the expenditure of Escambia's bond funds on such a route, and the department has been engaged in making a survey of it. Difficulties encountered in making the survey have made it advisable, the chairman said, for the county commissioners to take definite action to facilitate the taking of the survey, if it is still who desire the Escambia county that Road Number One be located along that routing.

STATE NEWS BRIEFS

CLEARWATER—The first annual New Year invitation golf tournament opens with some of the most prominent tears of the country in attendance. The county clerk is authorized to advertise for bids for the new court house. The new city commissioners have reappointed all city officials for 1926.

FEDERAL ROADS IN FLORIDA GET NEARLY MILLION

Huge Sum With Which Government Highways Will Be Constructed To Be Ready By July 1, Says Secretary

TALLAHASSEE, Fla., Jan. 12. (AP)—Florida will be given \$897,185 by the United States government for use in the construction of federal-aid highways, according to an announcement made by Secretary of Agriculture Jardine, at Washington.

The funds, it was stated, will be for the fiscal year beginning July 1, 1926, and were authorized by the postoffice appropriation act of Feb. 12, 1925.

The funds will be spent entirely on the federal aid highway system under the same plan of co-operation for 10 years, the Washington announcement states. The roads

included in the system are the most important in the country, and reach directly or indirectly every city of over 5,000 population, it was stated.

The total allowance for the states and Hawaii is \$71,135,000. Texas gets the largest apportionment, \$1,426,317, with New Hampshire, Rhode Island, Vermont and Hawaii coming in for the smallest, \$365,025 each.

TALLAHASSEE, Fla., Jan. 12. (AP)—Miss Eloise D. Berry, state supervisor of home economics, will go to Pensacola during the week of January 15-23 to organize evening classes in home economics work, it was announced here.

KING AT WORK BY 9

EX-SANFORD MAN IS FOUND GUILTY OF KILLING NEGRO

Haywood Register Faces Life Imprisonment For Murder Of "Peaches" Peoples In Orange County Last July

ORLANDO, Jan. 12.—A verdict of guilty in the first degree with recommendation for mercy was returned late Monday by a jury in the Seventeenth Judicial Court hearing the case of Haywood Register, charged with the murder of "Peaches" Peoples, negro taxi driver of Orlando, in a swamp on the Fort Christmas road during July last. The verdict carries a sentence of life imprisonment.

The jury deliberated 48 minutes, the case being given to them at 12:28 and the foreman rapping on the door for the sheriff at 2:15. Before the verdict was announced, Judge Frank Smith had the court room cleared and everyone searched who re-entered. He explained his reason as being due to the fact that numerous notorious characters were connected in various ways with the case and the defendant. The court room was filled to capacity but there was no commotion.

Alexander Akerman, counsel for the defense, gave notice that he would reserve the right to appeal within the prescribed time, and requested that his attorney be held for that length of time.

Joe Tracy, of St. Cloud, was indicted jointly with Register for the murder of Peoples and will be tried at a later date. He was one of the witnesses and testified that Register had given him a bullet, which was presented as evidence, and told him it was the bullet with which he killed the negro. Tracy, according to his attorney, had been under indictment for murder in both Orange and Osceola counties and has been in jail for highway robbery. During the investigation leading to the arrest of Tracy and Register, Tracy took officers to his home and gave them \$21,000 in bonds, which he said he had stolen.

Practically all the witnesses told similar stories of an argument relating to each of them at separate times when he killed the negro while kneeling at prayer in a swamp on the Fort Christmas road. Testimony of the state's witness said that he did not even know "Peaches" Peoples.

Efforts of Mr. Akerman, counsel for the defense, in his argument on the tearing down of the testimony of some of the witnesses of the state on the grounds of their character and connection with the murder of Peoples, failed. The state's witness testified to the state's witness that he had seen Peoples and several pieces of clothing.

Raymond F. Maguire, state's attorney, made a brief argument confining his talk to an outline of the evidence given by the witnesses and to identification by doctors of the skull with gold teeth, presented as evidence in the Peoples case.

Other pieces of evidence introduced by the state to identify the skeleton were a pair of cuff buttons, one in which was a picture said to be that of Peoples, and a watch of Peoples and several pieces of clothing.

Auto Magnate Hurt In Wreck Will Take Rest Of Ten Days

NEW YORK, Jan. 12.—(AP)—A week or 10 days of absolute rest is necessary for W. C. Durant, president of the Durant Motor Company, who was injured when the Overseas Express in Florida rained his private car, killing two negro stevedores and a trainman.

Dr. John Erdman, who examined him last night immediately after his arrival here in a special train, announced the automobile manufacturer had a long scalp wound, several bruises on the body and a black eye. A possible concussion will be watched for, the doctor said, and the patient will be kept to his bed.

Mr. Durant was able to walk to a taxicab unaided.

It was learned that Mr. Durant was not idle during his trip north after the accident. Soon after he had been hurt, he sent a message to his associates here reading: "We had a bad mishap. Escaped by a miracle. Some bruised but still in the ring. Will see you tomorrow morning." The stock market also held his interest despite his injuries.

When he read that certain of his favorite stocks had fallen off because of exaggerated reports of his hurt, he telegraphed a string of buying orders. As a result he was able to stay the market and to buy some of his choice stocks more cheaply. When he reached Washington, he took another look at the quotations and ordered more buying.

First Pictures in Osage Murder Mystery

Here are the principals in the mysterious train of murder cases that have terrorized the Osage Indian tribe in Oklahoma. At the left is Mrs. John Kenny, white wife of a full-blooded Indian, whose shooting of Fred Tillman, Indian attorney, two months ago started the investigation. She was freed when she claimed he had hypnotized her—a proceeding, she said, that the murder ring adopted on all of its victims. In the center is her husband, John Kenny, whom she is seeking to divorce on the charge that the ring is turning him against her, and right is Harry Donaldson, foreman of the federal grand jury that is investigating.

Flyer En Route Here

"Big Jack" Ashcraft, a husky six-footer who learned his flying tricks in Texas, is one of the aviators who will perform at the Sanford Aviation field at 2:30 o'clock Wednesday, Thursday and Friday during the exhibitions of The Gates Flying Circus.

Inebriated Car p Bring Fancy Prices In German Store

BERLIN, Jan. 12.—(AP)—Liquor soaked, inebriated carp commanded fancy prices here today. Thieves last night entered Klingner's Delicatessen store in the suburb of Charlottenburg. They found a large supply of liquor and a plentiful layout of eatables, and they regaled themselves without stint.

When thirst and appetite had been satiated, the idea struck one of the party that a large number of carp swimming about in a glass tank possibly might have grown tired of drinking plain water. Thereupon, the remainder of the liquor was poured into the tank. The fish survived the infiltration.

FLORIDA MAY GET EX-GREEK RULER AS NEW RESIDENT

George II Seriously Thinking Of Leaving Balkans With Their Petty Politics And Coming To Ft. Lauderdale

NEW YORK, Jan. 12.—(AP)—George II, once king of Greece, who has been the center of political intrigues in the Balkans, may see a haven of refuge in the United States.

For some time he has been considering buying land and building a residence at the Floranada Club, north of Fort Lauderdale, on the east coast of Florida. Friends here say he will use the home, which is already designed as a winter residence.

Last night, his brother who is also in Chicago, confirmed news of George's plans and intimated that the royal exile is tired of petty Balkan politics and would be glad to find escape from them in America.

King George is now at Florence, Italy, to take part in a service to commemorate the anniversary of the birth of his father, King King George I, who died at Palermo, Jan. 11, 1923.

CHIEF EXECUTIVE OF NEW ORLEANS CALLED BY DEATH

Martin Behrman, Who Served As Mayor Of The Crescent City For 17 Years, Succumbs To Heart Trouble

NEW ORLEANS, Jan. 12.—(AP)—Martin Behrman, mayor of New Orleans, for his fifth term, died this morning at his home at 7200 o'clock after an extended illness. Early funeral arrangements were for a public funeral.

The cause of his death was heart trouble. This grew out of complications that had their beginning when the mayor, attending the convention of the Intra-coastal Canal Association at Orange, Texas, contracted a severe cold. This developed into grippe in a persistent form.

Mr. Behrman was born in New York City on Oct. 14, 1864 and was the son of Henry and Frederica Behrman. He was elected mayor of New Orleans in December, 1904, and held the office for 16 successive years, being defeated in 1920 by Andrew McShann. On April 7, 1924 he was again elected to the office, after an absence of four years from the helm of the city.

His parents moved to New Orleans in 1867 when Mr. Behrman was a year old and he had resided there since that time. He was left an orphan at the age of 12 years and after his parents' death he had a little opportunity to attend school, his attendance at the public schools of the city being under trying conditions.

At the age of 19, he became a traveling salesman and it was in this position that he formed a wide acquaintance and a strong personal feeling due to his magnetic personality. At the end of his career as a salesman, he was appointed deputy assessor for the fifth district of New Orleans, holding that position for four years when he was appointed assessor for the district and four years later was elected president of the board of assessors.

DARING DIAVALO FEATURE FLYER OF GATES CIRCUS

Wing-Walking, I'm m e l m n Turns And New Stunts Are Promised By Flyers Coming Here Wednesday

Former military pilots and dare-devils will join in an "aerial thrill" in Sanford Wednesday, Thursday and Friday at noon, when the Gates Flying Circus presents three free exhibitions of stunt flying and wing-walking at the aviation field on the Orlando road.

Pilots Jack Ashcraft, Eddie Bond and Freddy Lund will handle the big planes, whipping them through series of intricate aerial stunts. Diavalo, chief of the dare-devils, will perform most of the neck-risking feats.

The aviators will fly here from Daytona Beach, where they have just completed a series of exhibitions. From here they will go to Cocoa Beach to be the feature of the program of the American Legion circus.

The daily exhibitions in Sanford, which will start at 2:30 o'clock, will include new stunts by Diavalo and demonstrations of famous military flights by the pilots.

Diavalo, according to the advance notices of the program, will perform such stunts as swinging by his teeth below a speeding airplane, standing on top of an airplane while it loops the loop, swinging by his toes from the landing gear, running across and standing on his head on the top wing of a plane.

Probably the most sensational stunt is his fall from a wing. Diavalo will fasten a slender rope to an end strut, and the other end to his ankle. Then he will run on the wing toward the center of the airplane until the rope snaps, leaving him suspended in mid-air, head downward beneath the plane. After dangling for a moment in this precarious position, Diavalo climbs hand over hand up to the comparatively safe side of the plane.

The airplanes, which are of the standard type and equipped with Hispano-Suiza motors, are fitted with additional bracing and wiring to withstand the shock and strain of the stunts.

Glasgow—Clearwater Steam Laundry receives two carloads every week.

MARKETS

NEW YORK, Jan. 12.—(AP)—With speculative sentiment considerably confirmed, stock prices pursued an irregular course at the opening of today's market. General Electric was the only outstanding strong feature at the start, mounting more than three points in response to reports of a stock split. Most of the oil shares were fractionally lower but others displayed a firmer tone.

Metals stocks quickly extended their initial gains and with a number of high priced specialties joining in the upward movement of offerings of other issues began to dwindle. Several new high records were established in the railroad group including Lackawanna at 163 1/2 and Wabash at 48.

Equipment and public utilities stocks also gained a larger footing. U. S. Cast Iron Pipe which broke sharply yesterday on false rumors of W. C. Durant's death, rebounded six points and gains of one to two points were recorded by Sears Roebuck, Co. and General American Car, Pressed Steel Car, Savage Arms, Willys Overland, Postum Cereal and Tobacco Products in the first half hour.

Strength of sterling, for which a demand rate of 4.55-1.18 was quoted, featured the foreign exchanges. French francs fell five points to 23.77 cents.

Selling of railroads included Ashland and some of the eastern carriers which went down one to two points was supplemented by pressure against the motors, chemicals and oil stocks, the market showing a receding tendency after the rally had been carried considerably further in a number of specialties.

Black Truck went down to 145 1/2, but rebounded to 148 on the announcement of the new \$10,000,000 stock issue at par. Prices were receding briskly again around noon, Wash. going to 48 1/2 and General Electric to 47, both new high records.

Nash Motors advanced 15 points and Texas Pacific Land Trust continued its recent advance, touching 735 on odd lot purchases. The renewal rate on call loans was advanced to 4 1/2 per cent.

NEW YORK, Jan. 12.—(AP)—Bond prices worked substantially higher in today's trading, while January reinvestment funds were being altered from the stock market to the advantage of high grade railroad and industrial issues.

The demand for the carrier obligations included Delaware and Hudson 5s, Denver and Rio Grande first 4 1/2s, Valley 4 1/2s, and the New York West Chester and Boston 4 1/2s, which reached a new top price above 71. Trading in the industrial division was enlivened by reports of more than five points in the American Writing Papers 6s and a brisk inquiry for oil, rubber and sugar issues.

Gains averaged about a point were registered by Skelly oil 6 1/2s, Sinclair Oil 6s, Goodrich 6 1/2s, Wagon Sugar refunding 7s and Sugar Estates of the Orient 7s. Liberty bonds were irregular.

CHICAGO, Jan. 12.—(AP)—Fresh declines in wheat prices began today as soon as business opened. A sharp decline in the market was led as the chief bearish factor. In addition, much notice was taken of an opinion from a trade authority that figures had upset theories of U. S. breadstuffs supplies being only sufficient for home needs, it being asserted that the U. S. is on a democratic basis solely because of present not scarcity, present or potential.

Opening quotations, % to 1% lower, new style, May 1.73 1/2 to 1.74 1/2 and July 1.50 to 1.50 1/2 was followed by moderate upturns. Corn and oats came down with wheat. Corn started 1/4 to 1/2 off, May .87 1/2 to .88 1/2 and later continued to sag.

Oats started at a shade to 1/4c and 1/2c lower, May 45 1/2 to 45 1/2 and displayed but slight power to rally.

Provisions were firmer, paralleling the action of hog values.

NEW YORK, Jan. 12.—(AP)—Cotton futures opened steady; Mar. 19.85; May 19.25; July 18.77; Oct. 18.12; Dec. 17.90.

CHICAGO, Jan. 12.—(AP)—Potatoes were light account cold weather; receipts 109 cars. Total U. S. shipments 850 cars; Wisconsin bulk 4.30@4.40.

JACKSONVILLE, Jan. 12.—(AP)—Conditions and quotations prevailing on the Jacksonville market today as reported by the Florida State Marketing Board:

Supplies of miscellaneous vegetables limited; demand good; movement very light; market firm for good stock.

Beans, green, hampers 4.00@5.00.

Cabbage 1-1 1/2 bushel hampers 2.00@2.50.

Carrots, Bu. hampers 4.50@5.50.

Eggplant, standard crates, medium, fancy 2.00@3.00.

Peas, English 7-8 bushel hampers 4.00@4.50.

Peppers, standard crates, green, bell, fancy 3.50@4.50.

Squash, hampers and bushel crates, green, 2.50@3.50.

Health Official Is Pleased For Giving Out Smallpox News

TAMPA, Jan. 12.—(AP)—Leading health authorities in all sections of the country have written letters of commendation to Dr. E. C. Levy, health officer of Tampa, lauding him for refusing to suppress news of the number of smallpox cases here, the health department announced today.

Many telegrams were received yesterday, it was said, following the announcement that James McCants, had expressed displeasure with Dr. Levy's policy of frankness. The total number of cases today is 45, two suspected cases being reported late yesterday.

The public is entitled to the truth for its own protection," Dr. Levy is quoted as having said in commenting on the statement of commissioner McCants.

The health department today was faced with another serious problem, that of drafting every physician in town for service in vaccinating 20,000 school children. It was understood that volunteers were asked for by Dr. Levy to carry out the work, but received few responses. He has taken the matter up with the secretary of the county medical society, who promised to give whatever aid he could. In the meantime the health department is taking one section at a time. The department has issued a statement that unless vaccination is immediate and complete the disease will spread rapidly. Only 25 per cent of the population had been vaccinated when the disease appeared here.

NEW YORK, Jan. 12.—(AP)—Cotton futures noon bids steady; Jan. 19.85; Mar. 19.25; May 18.80; July 18.49; Oct. 17.60.

BIBLE VERSE FOR TODAY

THE RIGHTEOUS JUDGE:—'Shall not the Judge of all the earth do right?' Gen. 18:25. PRAYER:—O God, there are many things in life we cannot understand, but we would live by faith and not by sight.

THE TWO UNTAMED

You may conquer the plain with plow and drain. And the forest with axe and saw. You may pierce the hills with powder drills. And shatter the mountain's awe. But there are two you will not subdue. Though you curb however you can. They will brave the test of your worst and best. The sea and the heart of man. The desert may yield as a watered field. And the wind may grind your ear. The river might may be yoked in light. Or tug a factory chain. But you may not mind these two. By cunningest plot or plan. They shall have free play to the Judgment Day. The sea and the heart of man. You may note their deeds and goods at the ereb. That ever they rise and flow. These are tales to tell why their passions swell. But the secret you never will know. And, willing or loath, you must love them both. Though heaven alone may span And tathom the breast of their deep mystery. The sea and the heart of man. Charles Wharton Stork in Forum

Times change: Wild-life used to be found only in the country.

Some people by nature are natures, while others play the saxophone.

A girl may give several fellows the cold shoulder, but she has a warm heart for someone.

Short pants may be all right but we hope it doesn't become the style to wear short pajamas in the winter.

Just because some of us like most anything to eat, is no reason why we want it altogether in the form of hash.

The movies now recognize the "sex" man as being of some use in the industry. Perhaps there is some hope for the paragrapher.

Headline says, "Italy Experienced 'Marty' Shocks Recently." Smarter, are the ladies' dresses getting shorter over there too?

A prominent Miami man says that cattle in the roads are a menace to traffic. We supposed they were put there to safeguard traffic.

Florida has overlooked one bet at least. News dispatches come from Ferlie, Iowa—wouldn't it be well to send some from Prosperous, Florida?

The Shenandoah investigation commission says the victims were married to the cause. The time may come when the traffic victims will also be so considered.

Wednesday was a pretty day. We saw a butterfly, yellow jackets, honey bees and a grasshopper. Dah-lonesga, Ga., Nugget. It may have been Georgia moonshine that caused it, but it sounds more like furniture polish.

The Cleveland Plain Dealer carries the following classified advertisement: "Wanted—Stenographer, experienced in first instance office. Must understand office detail and be familiar with bookkeeping. Box 7500, Watson, let's have the smiling smile."

The St. Joseph News-Press is convinced that any schoolboy would tell you the two greatest Americans are Uncle Sam and Santa Claus. A little later in the season Babe Ruth will of course displace Uncle Sam—Miami Herald. And "Red" Orange has already displaced Santa Claus.

Let's Chew It

There has appeared in Herbert Felkel's column of paragraphs in the Sunshine Magazine a verse which contains an unusual amount of good common sense and one which is especially applicable to Sanford and its present condition. Mr. Felkel writes:

Bite off more than you can chew— Then chew it! Plan for more than you can do— Then do it! Hitch your wagon to a star; Shuck your coat right where you are— Go to it!

In looking back over the many achievements of the past year, Sanford citizens may get the feeling that they have done pretty well and that they are now entitled to a nice long rest. They may see how their business has doubled, how their bank deposits have increased, and say, "Well, that is pretty good. All I have got to do now is to maintain that level."

There may be an inclination on the part of city officials in retrospecting upon the growth of Sanford in the past year, to let well enough alone. They will see how our population has increased. They will note the great increase in the number of miles of paved streets and sidewalks. They will see a vast improvement in utility service, in fire and police protection, and many other things which come under the city administration. They may say, "Well, we have done pretty well. No one can kick if we do nothing else as long as we are in office. We will now give the city a chance to catch up with public improvements."

But this is no time for anyone to rest on his oars. If there ever was a time in Sanford's history that called for the united efforts of all its citizenry, that time is just arriving. There is no doubt about much having been accomplished during the past year. But more must be accomplished during the coming year. One new hotel was secured for Sanford last year. This year we must find two or three more.

We must continue to pave roads. We must continue our fight for deeper water. We must give Sanford a better lighting system. We must widen the streets in the downtown section. We must continue beautification work on the lake front. We must better our school system. We must all put our shoulders to the wheel and work harder than ever for a bigger and better Sanford.

Let us bite off more than we can chew—then chew it!

A Guarantee Should Be Unnecessary

Dan Michalove, manager of the Atlanta "Crackers" has definitely promised to bring his ball club here for spring training if reasonable board can be obtained in this city. This announcement coming from the office of the Chamber of Commerce has revived the old controversy between those who believe that a ball club's presence is salutary, and those who do not.

The primary requisite of every Florida community that would enjoy the limelight and the full benefits of the tourist migration is advertising, and it is an admitted fact that the presence of a team of Atlanta's importance together with six newspaper men, camera men and magazine writers is one of the most effective mediums of disseminating Sanford publicity throughout the southland and many sections of the North and East.

Those who have hitherto objected to gentlemen of the hat as "rough characters," should realize that the hallplayer of Ring Lardner fame is a specie of the past, and that very few Jack Keefe's are found in the ranks of a modern ball club, many of whose members are recruited from college teams. Dan Michalove is known throughout the South as a quiet, refined gentleman of high ideals, and the presence of his organization here would surely be anything but an objectionable addition to Sanford circles.

Atlanta's paid admissions last season totaled more than 190,000 which is indicative of the tremendous following the team has. If the club is brought to Sanford, exhibition with several major league teams will doubtless be scheduled and news matter will be flashed to practically every section of the country, with Sanford on the dateline.

Differing from last season's very unsatisfactory arrangement with the Milwaukee club, Mr. Michalove requests no cash bond or guaranty of any description, we are told. This fact should appeal to those who realize that the policy of paying a ball club to get them to train here is a bad one.

While The Herald believes the presence of a big league baseball club will result in a large amount of valuable publicity for our city, this paper would rather see no club come for training if it is necessary for Sanford to appropriate funds with which to attract it. It would rather see the money devoted to providing a good team in the Florida State League next summer.

MEN POSSESSING GREAT wealth, wide experience, clear vision, sound judgment and courage, weary from the struggles and responsibilities of business, went to Florida for rest and pleasure. They were benefitted by the unsurpassed climate, they reveled in the joys and pleasures everywhere abounding. Its long-neglected opportunities were pointed out to and investigated by them. They told their friends. Thus was begun the endless chain which has linked to Florida, in one way or another, the industrial, manufacturing, commercial and social life of the United States east of the Rocky Mountains. Today a new Florida is building. The most marvelous transformation ever known is taking place with an unbelievable rapidity and upon a scale so gigantic, and so solid a foundation, so varied in character, and in many instances of such beauty and enchantment that they go far beyond the conceptions of the most imaginative.

—J. D. Burke in Lawyer and Banker.

MY FAVORITE STORIES

By IRVIN S. COBB

Almost invariably, when men fall to discussing examples of business sagacity, someone present is reminded of the illustrative incident of the white tramp and the colored saloon-keeper. For the benefit of those who have not heard the story—if any such there be—it is here and now set forth: The colored man sat behind his bar in a moment when trade was slack. Through the swinging doors entered the ragged Caucasian. "Give me a good five cent cigar," he ordered. The proprietor produced a box containing a number of malignant-looking dark-brown rolls. The patron made a discriminating choice and, then in the act of putting the cigar between his lips checked himself as though struck with a new idea. "Say, I've changed my mind," he said. "Believe I'll take a glass of beer instead." The negro returned the cigar to his box and drew a glass of beer.

THE WEATHER

Miami Herald

It is not at all strange at this time of year that in certain sections of the country there should be considerable interest in the subject of climate and weather. It comes pretty close home to the people. It involves inconvenience, expense, and, in many cases, actual suffering. If anything could be done about it, undoubtedly something would be done. Unfortunately nothing can be done, but everyone who has personal relationship with the type of weather which prevails in the Northern and Western states is always ready to grasp at any straw which brings climatic comfort, such, for example, as the idea recently advanced, that the climate of the United States is changing.

The Detroit Free Press comments at length on this rumor. It quotes statements made by Henry H. Clayton, a weather expert in the Smithsonian Institution, to the effect that the climate of North America is gradually but steadily growing warmer in its northern habits and cooler in the south. The Free Press is entitled to such cold comfort as it can derive from such statements, while the chilly-blasts whirl around its handsome building. But it is safe to predict by a comparison of warm and cold will not proceed so rapidly and so noticeably as to interfere with the steady migration of people from Michigan and points north to Florida. A suggestion as to the undesirability of the Detroit winter climate is given in the concluding paragraph of the editorial. This says: "Certainly if wishes have any effect on the determination of events, Mr. Clayton has all the odds on his side." Apparently the North has not yet grown warm enough to prevent people from wishing for something else.

A somewhat more practicable suggestion is made by The Cleveland Times, which seems to think that hot and cold are largely states of mind, and that people would suffer less from extremes of climate if they did not think about it so much. The Times protests against the habit of Northern newspapermen of forecasting forecasts of coming cold spells, with warnings, which follow with graphic accounts of the spell when it comes; and then after it is over explain at length the damage wrought by the spell. The Times says half the predicted storms never arrive, but it can hardly deny that it is a good thing to know about them if they are actually coming. It also says a cold snap is not an unmitigated evil. It even makes use of the exploded theory that cold weather is necessary to health, a theory which has been cast into any limbo of superstition by scientific study.

There may be something however in the idea that protection from extreme weather is provided by actually coming to it. One who expects the worst usually finds the worst. It is the fussy individual who is always complaining of the heat who suffers most from the heat. One who assumes that hot weather is not likely to find hot weather so oppressive. The same psychology will not explain as well with a ramblous blizzard, where even does cold weather a person can help himself somewhat by keeping his mind serene. This thing cannot be carried to an extreme. A pair of ears, where the hair is bald, and frost-bite that is a state of mind. One cannot, by thinking, mitigate the severity of below-zero wind to any great extent. It is a good idea, where the hair is bald, to keep a good supply of coal in the cellar, and to see that the moths have not eaten up the fur coat. Better still, it is to come to Florida, where there are no moths to put such a strain on the mind to convince himself that he is perfectly comfortable.

WORK, NOT LUCK

TAMPA TRIBUNE

There is an adage that "There is luck in leisure" but there is no truth in that adage and there is a little truth in the preachment of many failures that "work" and "merit" enter into anything. Anybody who works hard and works smart, the lucky man will win anyway. Of course there have been battles won by luck in which the better man lost, but they are the proverbial exceptions which prove the rule and are so outnumbered by incidents the reverse as to be unworthy of notice. Luck-won successes are accidents. Accidents always attract more attention than incidents for the same reason which are incidents, pay money to see freaks of nature, which are accidents. The mathematician can tell you how many chances you have in throwing a particular number at dice. The chances of repeating that same throw two or three times in succession are almost beyond calculation. The same ratio holds good in any enterprise where human dependences reposes on luck. To depend on luck is to play blind man's bluff among the laws of nature and of man. These laws, when studied carefully, seem to prove that in the long run the best man wins the best place, and personal merit does succeed. Evidences to the contrary are merely the slips of chance. Luck smiles on those who take off their coats, put their shoulders to the wheel, and dig away at the task. Fortune favors men who are not afraid of dreary, irksome drudgery. Luck climbs no Everest. Luck is never a ladder from the earth of mediocrity to the heaven of achievement.

THE POLITICAL BEE TREE

THE HANDICAP CITY

FORT MYERS NEWS

One good result of our present transportation dilemma will probably be that at last the railroads which pretend to serve this state and everybody else concerned will realize the necessity for more gateways into Florida. For a long time, Jacksonville has enjoyed the distinction of being the "gateway to Florida." To a large part of the great and growing state of Florida, Jacksonville's distinction has been a constant handicap. Forcing all passengers and freight for the peninsula to come to Jacksonville has no doubt been responsible in the past for Jacksonville's lead among Florida cities, while at the same time it has prevented the growth and development of other splendid and promising Florida towns. It is time to study the map of Florida and to plan the map of Florida. A title you will wonder that so long this matter of other gateways into Florida has been neglected. Florida is a large state, whose boundaries are quite extensive. It costs as much to travel from one end of Florida to the other by rail, as it does to go from Pensacola or Jacksonville to Chicago, and existing freight, passengers, mail and express have crowded the tracks, warehouses and terminals there to such an extent as probably has been unprecedented in the history of American railroad transportation, and unless early relief can come from somewhere, perhaps from the skies, mail service into and from Florida, which for some time has been greatly demoralized, will virtually cease.

THE SMALL STUFF ERA

ASHEVILLE CITIZEN

This is the era of Small Stuff. Men and women run about in circles filling their own and other eyes with gestures that mean nothing and produce nothing. In the large cities the police clutter up the court docks with misdemeanors cases while the burglar, the hold-up man and the murderer roam free as the play of fancy. Prohibition enforcement agents, how loudly they brag, who have laid by the heels, while the man who deals in the contraband stuff on a big scale, rides in his limousine and laughs at the law. Mr. Coolidge, while the League of Nations asks for his attention, makes the battered welkin ring with his remarks on the importance of how government clerks, working at \$1,000 a year, may save Uncle Sam a few dollars. Postmaster General New adorns the daily press with pleas for early mailing so that mail carriers may have a day off for Christmas, while it takes eight days or more to send a registered letter from Asheville to Miami. Mothers go to club meetings and deliver long talks on how women may control men politicians, while the daughters of the speakers are out spending the evening with nobody knows whom and then return home at nobody can guess what time. So it goes in this era of Small Stuff. People prefer not to be serious. They like the trivial, the superficial and the little because such things call for little exertion and no loftiness of thought. What we need is to get back to fundamentals and essential. We shall do that when every man is more concerned with behaving himself than with reforming his neighbor.

A WORD OF CAUTION

THE NEW YORK SUN

As was to be expected the swindling fraternity is taking advantage of the Florida boom, just as it tries to get unlawful advantage out of every land or mining fever. The Post Office Department has just barred from the mails two Chicago concerns which had prospective victims to believe their inaccessible Florida development—on which they had nothing but an option—was a fully improved tract on a main highway. Fakers like these find only too many victims among the unophthalmated. "Florida" is such a magic word at the moment that the swindler uses it to open the purses of the uninformed. Yet there is no reason why any person who can read and think should be misled. The Sun, among other publications, has tried to make the truth about Florida familiar. The land of opportunity, now enjoys the center of the real estate stage. But it is a big state, varied in climate and attractive in scene. Florida is larger than New York—almost as large as New England. Just as it was not in other times the fearsome stretch of swamp and sand that some would say, so it is now.

394,401,752 Tons Of Fertilizer Is Used In Past 15 Years

TALLAHASSEE, Fla., Jan. 12.—(AP)—Florida, in 15 years, consumed 394,401,752 tons of commercial fertilizer, according to figures supplied at the Immigration Bureau of the Department of Agriculture. In 1917 there were 18,349,784 tons sold, and from that year on, with the exception of from 1914 to 1919, when a sharp drop was shown, the trade gradually tapered upwards, with the peak reported last year, a sale of 35,669,320 tons.

CONFESSIONS OBTAINED

OKLAHOMA CITY, Okla., Jan. 12.—(AP)—The Daily Oklahoman today said that confessions have been obtained from Ernest Burkhardt and John Ramsey in connection with killings of nearly 17 persons in the Chicago country in 1922 and 1923. Details of the alleged confessions were not made public.

New Re-Classification Of Telephone Toll Lines Will Give Florida Best Service

TALLAHASSEE, Jan. 12.—Florida has taken rank with a majority of the states of the Union by establishment of a re-classification of the toll-line telephone rates, according to A. B. Greene, telephone engineer for the Railroad Commission. Only a minor few commonwealths are now operating under the old system, Mr. Greene said.

The telephone public of the state, the engineer said, should acquire the habit of using the "station to station" feature of the new rates, instead of the old-time "person to person" for which an additional charge is made now. The "station to station" call, Mr. Greene asserted, will be more economical, will allow the telephone companies to take advantage of greater facilities.

Mr. Greene explained the "station to station" call. Suppose, he said, John Smith, of Jacksonville, desires to get in touch with Jim Jones, at a Tampa hotel. Smith will take down the receiver and tell "long distance" he desires to be connected with the hotel. When the connection is put through, Smith will tell the hotel operator to connect him with Jones' room. Then the conversation takes place, with the charge going on as soon as it begins. The old system, Mr. Greene reminded, was that Smith would tell the hotel operator to connect him with Jones' room. Then the conversation takes place, with the charge going on as soon as it begins.

Following is the classification of toll telephone service with a list of rates applicable thereto, granted by the commission:

1. Classification of toll telephone service.
2. Station-to-station messages. This service shall be defined by the following conditions:
 - (a) Orders for Station-to-Station service shall specify the telephone station called, either by telephone number, or by the name of the subscribers of the call station.
 - (b) Under this classification, orders will not be accepted to establish communication between particular persons.

(1) When the designated person called refuses to talk.

(2) When the report is returned that the designated person called is "out" or "not in" and will be busy at specified time, or is absent from the city, and similar reports advising the calling subscriber of the facts ascertained when failure to complete the order is due solely to the circumstances of the called person or fault in describing the location of the called person, and when all of the work preliminary to establishing communication with the called person is done.

(3) Appointment calls. Appointment calls are Person-to-Person calls, the order for which provides that communication is to be arranged for to take place at a specified time.

(4) Messenger Calls. Messenger calls are Person-to-Person calls requiring the use of a messenger to secure attendance of a designated person at one of the public pay stations at the distant point.

(5) Collect Calls. Collect calls are Person-to-Person calls, the charges for which are "reversed," i. e., to be collected from the subscriber of the distant station at which the call is completed.

Six Women Members Desert
"Free Love" Colony Formed
By Millionaire Socialist

ALLEN TOWN, Pa., Jan. 12.—(P)—April Farm, the colony sponsored by Charles Garland, millionaire Socialist, was deserted by its women members today and Garland was at liberty on \$1,000 bail on a charge investigating the percentage of a child born to one of the women members.

The flight of the women was revealed Monday when Sheriff Sennebach of Lehigh county, went to arrest Garland and subpoena Bettina Hovey, mother of the infant. The baby was born last July 4, and died of suffocation due to a throat affliction on Oct. 17. The death certificate named Garland as father and Miss Hovey as the mother. The charge against Garland is adultery.

At the farm officers found six men, including Garland, but only one woman, Doris Benson. None of the colonists would reveal where the other women had gone. Garland readily accompanied the sheriff and after a hearing before a magistrate furnished bond.

"Doesn't Practice Free Love"...

COMPLAINTS AND
REQUESTS SWAMP
CHIEF EXECUTIVE

Governor Martin's Office Is
Veritable Clearing House
For All Kinds Of Matters;
Many Examples Offered

TALLAHASSEE, Fla., Jan. 12.—(P)—The office of the governor of Florida is a veritable "clearing house" for complaints and requests. Any of the half dozen or more workers in John W. Martin's suite will qualify such an assertion.

A glance over a few letters reaching the executive sanatorium recently left the impression that the governor of Florida is one of the most popular individuals in the world. There was one communication from a woman in a county in the southwestern section of the state. She requested the governor to order the sheriff to take into custody a group of men whom she knew "positive" were moonshiners.

A second letter came from another source. It asked "protection" from a "Cuban and Spanish dance hall." A third was from a convicted youth who told the governor that he was a "minder" and should not be sent to prison.

There was still another letter on top of the heap of mail deposited upon the desk of the governor's secretary, Mrs. Besse Gibbs Porter. It was from the southern section of the state. The writer was seeking an appointment as notary public. The letter follows:

"My letter of the 6th to you, please ask you kindly send me another blank of a notary public. You send me one but it caught a flight with fire in Miami, Fla. I will like to get those blank from you soon as you can for I was called for them. But I did not have them so I thank you very much and I wish you a happy New Year and the people of the state of Tallahassee. I am fighting hard to fill out my word as I say to become a notary public in the state of Florida for I take up a curse of law from University. I has been resident of... also resident of... also a respectable citizen of the United States. Can a student of law hold office as a legal adviser to my people?"

Letters pour in almost daily for information which keep the workers of the executive suite busy delving into forgotten records. Others are in a congratulatory vein over the creation of some office or body which has never been

WILD LIFE TO BE
ON EXHIBITION AT
BIG DELAND FAIR

Famous Collection Of Animals
Gathered By M. L. Patterson
Expected To Be Popular
With Lovers Of Nature

DELAND, Jan. 12.—A very famous collection of wild life is to be exhibited at the Volusia County Fair. The specimens are part of the trophies secured by M. L. Patterson, of DeLand, and were secured in hunts in which he took an active part several years ago.

This gentleman lived in India for a number of years and while there had opportunities to come in contact with the various types of animals and other wild life that frequent the remote jungles. Among other things in the collection which will make a very wonderful exhibit are a number of finely-mounted leopard skins, panthers, tigers and other animals. Also, the antlers and tusks of bison and wild boar which he killed himself.

Another very interesting part consists of articles commonly used by the natives of India in the homes and in the hunting expeditions.

Mr. Patterson has had the honor of being made an honorary member of the National Geographic Society of Washington, D. C., and articles written and illustrated by photographs made by him in that country were printed in the National Geographic Magazine, the official publication of that society. This adds greatly to the interest of the collection and the public-attendance will be pleased to know that Mr. Patterson has been prevailed upon to show the collection at the Volusia County Fair, now but a few short weeks away. There are some really odd and curious things in the exhibit— notably skins of the black panther and leopard cat—neither ever seen before in this country.

WANTS TO RUSH SENTENCE
LOUISVILLE, Jan. 12.—(P)—Because Edward Lake, who was sentenced to electrocution for killing Mrs. Mary Smith, is growing fat in prison, his brother is going to ask the governor to rush the execution.

Israel Horowitz at 14 is the youngest student ever enrolled at Washington University, St. Louis, Mo. He plans to be a lawyer, but will have to wait three years after he graduates before he can take the state bar examination.

A large number of communications are sent to the governor which should go to officials scattered here and there over the state. Regardless of the burden the swamp of mail entails, it is always treated with courteous reading, and with equally courteous replies. While there is a possible set form for many of the acknowledgements, such as Mrs. Porter sends when she advises "the governor's immediate attention will be called to your favor of," and so forth, no mimeographed or multigraphed, or otherwise, letters are allowed to go out, which would make the original sender feel that he or she was being slighted.

MARTIN LEAVES CAPITOL
TALLAHASSEE, Jan. 12.—(P)—Governor Martin will leave Tallahassee tomorrow for St. Augustine where he will welcome delegates to the annual convention of adjutants general of the U. S., after which he will go to Fort Myers on the first lap of an inspection of the Tamiami trail.

Hardest thing about getting married is learning to play bridge.

10,541 Prisoners Have Been
Kept By State Since 1918;
955 Escapes Are Recorded

TALLAHASSEE, Fla., Jan. 12.—(P)—Out of a total of 10,541 state prisoners in Florida between 1918 and 1925, inclusive, there were only 955 escapes, according to information given out by T. E. Andrews, chief prison clerk.

The escapes recorded were those of the State Road Department, state farm and "lessee companies," the latter classification being made in 1918 and 1919 only.

More escapes were effected in 1924 than any of the eight years, the figures show, when 147 fled their confinement. The year of 1918 was second, with 145, although during that time there were more prisoners on hand, a total of 1,828 being shown.

In 1921 the least number of state charges made their escape, only 87 being recorded. During the same year, however, there were only 1,125 on hand, or the least number of the 8-year period. Following is a list of the num-

ber on hand and escapes:
On hand January 1, 1918, 1,828; escapes, for 1918, State Road Department, 22; state farm, 18; from lessee companies, 108; total 148.
On hand, January 1, 1919, 1,819; escapes, road department, 57; state farm, 11; lessee companies, 54; total, 92.
January 1, 1920, 1,128; escapes, road department, 79; state farm, 8; total, 95.
January 1, 1921, 1,125; escapes, road department, 79; state farm, 8; total, 87.
January 1, 1922, 1,366; escapes, road department, 106; state farm, 19; total, 124.
January 1, 1923, total on hand, 1,411; escapes, road department, 120; state farm, 13; total, 133.
January 1, 1924, 1,386; escapes, road department, 116; state farm, 31; total, 147.
January 1, 1925, 1,381; escapes, road department, 103; state farm, 29; total, 132.

Land Schemes To Be
Probed In Louisiana
SHREVEPORT, La., Jan. 12.—(P)—A special session of a grand jury today began an investigation into land frauds schemes alleged to have been carried out in Caddo Parish. Hugh Fisher, former federal district attorney, and two negroes, J. D. Wiley and J. J. Collins, were arrested in connection with the investigation. Fisher is at liberty under a \$4,000 bond and the negroes are still in jail. Fifty-four witnesses have been subpoenaed to appear before the inquisitorial body. J. W. Neal, special investigator for the government was in charge of the gathering of evidence to be used against the defendants.

This country is so poor we ate only about \$300,000,000 worth of ice cream last year.

Take a girl in knee dresses and silk stockings. She may be chilly, but she's considered a warm sister.

FORESEES GIANT AIR PLANES SPEEDING ACROSS SEAS WITH VARIED FREIGHT

Schedules Will Be Matter Of Minutes Instead Of Days

PARIS, Jan. 12.—Huge, three-bodied birds, soaring across the Atlantic—

Carrying passengers, their baggage and freight, with as great ease, comfort and security as the finest ocean liner.

Costing only one-third as much as trans-Atlantic travel costs at present.

This is the prospect outlined by one of the foremost aviation authorities in the world, Louis Breguet, president of the French Chamber of Industrial Aeronautics and himself a leader in airplane invention.

The huge metal albatross that he depicts for the future is an invention of his own imaginative mind, but he asserts that it is merely an idea of what the large airplane manufacturers and inventors are actually contemplating. It may be years before this revolution in world touring will arrive, but Breguet asserts it is actually within the vision of the far-sighted men of today.

Present Planes "Crude" In comparison with the airplane of the "day after tomorrow," the plane of today is a crude, plodding instrument, unsafe, untrustworthy, merely experimental.

Even the airplanes of "tomorrow," according to Breguet's prophecy, will be slow and insecure in comparison with that to come. But it will be a marvelous improvement over present-day flying.

While airplanes now take jumps that average only about 100 miles, the bird of tomorrow will, only a few years hence, take hops of almost 1000 miles, at an average speed of 110 miles an hour.

That's the commercial, heavier type of plane, designed for comfortable passenger travel.

"The characteristic of the airplane of the day after tomorrow will be their lengthened hop from 1000 miles to an average of 2500 miles," says Breguet.

Here is his description of this huge bird:

The airplane of the day after tomorrow, according to the predictions of M. Louis Breguet.

"The machine will appear like a vast bird containing many motors, tanks, equipment, passengers and freight. That is to say that this bird will be sufficiently spacious to permit the liberal circulation of passengers and their baggage within it.

"This huge bird will have three bodies—the central body containing navigation equipment and room for pilot and commander, and the lateral bodies containing lobbies, dining halls, salons and first-class cabins.

"The freight compartments could be set at the rear of the machine and the propellers would be found back of the single plane. The lower-class cabins would be within the forward part of this plane."

Weight 55 Tons "The total weight would be about 55 tons, the dead weight of the apparatus being about 20 tons, the additional weight of essential equipment and gasoline leaving some 14 tons for the passengers

and their baggage. "The commercial speed of this machine would be about 140 miles an hour and its radius of action would be about 2500 miles."

Thus the dream of some modern thinkers for a sort of floating island in the middle of the Atlantic, as a refueling station for future airplane transports, is surpassed by the nonstop ocean flyer of Louis Breguet.

Transportation Problems Will Be Of New Nature

"It is difficult to assign a date for the arrival of the airplane of tomorrow and a day after tomorrow, or to indicate the intermediate stages, it can be affirmed, nevertheless that there is nothing in the conception of each that is beyond actual human vision, and nothing in their construction that can be considered as impossible of realization."

That is the parting assurance of Louis Breguet.

Professor Jaszi

While Count and Countess Karolyi are seeking to force the State Department to allow them to enter the United States, Oscar Jaszi, who was a minister in the Karolyi cabinet when it controlled Hungary, is teaching political science at Oberlin College, Oberlin, O. His father wants to become an American citizen.

STEWART'S WASHINGTON LETTER

By CHARLES F. STEWART

WASHINGTON, Jan. 12.—Congress doesn't think about the early bird. Or maybe it doesn't care for worms.

At all events, very few congressmen quit the hay until well on in the forenoon.

There are exceptions, like Senator Borah, who always is up before most of his fellow legislators have finished with their breakfast.

The houses seldom meet, however, before noon and a big majority of the lawmakers set their alarm clocks accordingly.

Yet there's one thing the nation's statesmen do have to get up good and galloped early for, and that's to keep a date with President Coolidge, to eat breakfast with him at the White House.

Whenever the president has something in mind that he particularly wants Congress to do, he invariably begins asking batches of senators and representatives—about half a dozen at a time—to drop in on him for breakfast, during which he talks the matter over with them and tries to convert them, if they need converting.

Well, the president breakfasts at 8, which may not seem very early to folk who are accustomed to being at work by that hour, but seems mighty early to a congressman, who has hard work to report for duty at the capitol by noon.

Sarasota—Plans approved for erection of \$1,500,000 high school building.

Daytona—Daytona Beach pier and casino to be greatly enlarged.

TOM SEBRING TO REMAIN HEAD OF FLORIDA GATORS

Youngful Mentor Reappointed
To Direct Athletic Destiny
Of University Of Florida
For Next Year, Says White

UNIVERSITY of Fla., Jan. 12.
(P)—H. L. (Tom) Sebring, the
youthful mentor of the Florida
"Fightin' Gators" will remain at
the University of Florida next
year, according to Athletic Direc-
tor James L. White, Jr. A con-
tract has not been signed neither
has an agreement as to salary been
reached, but it is the wishes of
the authorities that Coach Sebring
be retained next year, it was stat-
ed.

Sebring, probably the youngest
coach in the country had a suc-
cessful season, despite the fact
that he had to build up a new ma-
chine from raw material, after the
loss of thirteen letter men. The
Gators met defeat at the hands of
Georgia Tech and Alabama, win-
ning the six other conflicts.

The young coach was three years
star and on Kansas Aggies. Dur-
ing the World War he saw service
with the Second Division, and was
a member of various Army ath-
letic teams. While performing
brilliantly for the Kansas Aggies
he had as his teammate Brady
Cowell, now Freshman football
coach and Varsity basketball coach
of the University of Florida. At
the recent session of the Southern
Conference, which met at the Uni-
versity of Georgia, Sebring was
elected treasurer of that body.

Florida suffers the loss of eight
letter men this year, with no real
flashy material on the Freshman
squad. The Gators will not meet
Georgia Tech next year as their
three year contract expired this
year. They will play one inter-
sectional game with the University
of Chicago next year.

Senators To Play Many Games While Training In South

WASHINGTON, Jan. 12.—(P)—
An extensive pre-season exhibi-
tion schedule has been arranged
by the Washington Americans, in-
cluding 18 contests with their 1924
world series rivals, the New York
Giants. In addition to these con-
tests, the Washington team will
meet the Brooklyn, Boston, Phila-
delphia and Cincinnati clubs of
the National League, and several
minor league teams.

The schedule:
Mar. 6, Boston Braves at St.
Peterburg; Mar. 13, Braves at
Tampa (Washington training
camp); Mar. 14, New York Giants
at Miami; Mar. 16, Cincinnati at
West Palm Beach; Mar. 18, Phila-
delphia Nationals at Tampa; Mar.
19, Philadelphia at Bradenton;
Mar. 20, New York at Sarasota;
Mar. 22, Cincinnati Reds at Tam-
pa; Mar. 24, Brooklyn Dodgers at
Tampa; Mar. 25 Brooklyn at Clear-
water; Mar. 27, New York Giants,
at Tampa; Mar. 29 and 30, New
York Giants at Tampa.

Homeward trip:
Apr. 3, Rochester Internationals
at Waycross, Ga.; Apr. 4, Ft. Ben-
ning army camp at Ft. Benning;
Apr. 5, Giants at Birmingham;
Apr. 6 and 7, Giants at Augusta,
Ga.; Apr. 8, Giants at Atlanta;
Apr. 9, Giants at Norfolk, Va.;
Apr. 10 and 11, Giants at Wash-
ington.

Los Angeles Men Make Huge Offer To Dempsey, Wills

LOS ANGELES, Jan. 12.—(P)—
A group of Los Angeles business
men Monday announced their will-
ingness to underwrite the Demp-
sey-Wills heavyweight champion-
ship bout to the extent of \$2,000,-
000, and hold the affair in the Los
Angeles Coliseum.

The members of the group pro-
moting the proposed fight today
laid their plans before Jack Doyle,
veteran fight sponsor of Vernon
and asked him to undertake man-
agement of the affair. Doyle said
that he is willing.

Backers of the plan would like
to pull the bout off next spring,
but this is believed impossible ow-
ing to Dempsey's disinclination to
enter the ring with Wills before
September.

Under present tentative arrange-
ments the bout would be a day-
light affair, going 10 rounds, the
limit to a decision under the state
law.

Georgia Boy And Carpentier May Be Matched For Bout

NEW YORK, Jan. 11.—(P)—
Promoters of the National
Sportsmen's Club of Newark, N.
J., conferred with Jack Curley,
George Carpentier's American
representative today, concerning
match between Carpentier and
Young Stribling, Macon, Ga., light
heavyweight.

Primarily, Carpentier is coming
here as the advance agent of Pa-
olino, the Spanish heavyweight,
Francis Deschamps, who manages
the business affairs of both Car-
pentier and Paolino will arrive lat-
er with Paolino.

Tex Rickard said Monday he ex-
pected to have Carpentier appear
at Madison Square Garden but he
refused to say against whom he
would pit him. Rickard is more
interested in the American inva-
sion of Paolino and he already has
said he will offer the Spanish
heavyweight a match with either
Harry Wills or Gene Tunney.

"Furnishers to Men Who Know"

The Sanford Building and Loan Association, established 1908, has now under construction or financed ready for construction, one hundred fifty homes in Sanford, amounting to a total cost of

\$151,000.00

The Sanford Building and Loan Association was organized in 1908 and its growth, with the growth of Sanford has been steady until the above record of construction at one time has been reached. This constitutes more than thirty five homes under immediate construction.

Our growth for the past six months has been so very rapid that more money has been taken in than within any two years previous.

We have only three applications for loans on hand that have not been reached.

The affairs of the Sanford Building and Loan Association are managed by the following citizens of this city, acting as officers and directors:

- T. J. Miller, President.
- H. R. Stevens, Vice-President.
- A. P. Connelly, Sec'y and Treas.
- S. O. Shinholser.
- D. L. Thrasher.
- B. F. Whitner.
- Forrest Lake.
- John Meisch.
- R. B. Chapman.
- George A. DeCottes, Attorney.

The future success of the Sanford Building and Loan Association and its ability to contribute to a very much larger degree to the building of our City is a matter of great gratification to the Officers and Directors. The public is cordially invited to visit our office.

Financial statement of the Association will be published tomorrow.

ORIGIN OF FLORIDA COUNTIES

(By Associated Press)

DE SOTO COUNTY
De Soto county was named for the great Spanish navigator, Ponce de Soto. The county was established in 1827, as the result of a division of Manatee county. When first formed, De Soto county had an area of 3,800 square miles. It was in Latitude 26, 45 to 27, 30 North and Longitude 80, 50 to 82, 30 West. The population in 1880 was 4,940 and the assessed valuation, \$1,982,640. The county has always been fertile.

C. L. Norton, in his Handbook of Florida, written in 1892, had this to say about De Soto county at that time:
"It is still in the main a wilderness, some 60 miles wide, extending from the Kissimmee river and Lake Okechobee on the east to the Gulf of Mexico on the west. A narrow chain of settlements skirts the navigable waters and the line of the Florida Southern Railway, but a few miles on either side of these the pine forests are unbroken until they disappear in the prairies and saw-grass bordering the great inland lakes. And yet this region represents large wealth, for here begins the great cattle range of Southwestern Florida, extending from Peace river on the northwestern side of the county to the borders of the Everglades. This region is flat or gently rolling pine land, interspersed with hammock, and often opening into prairies and savannas. Excepting in the dense hammock, the whole is carpeted with grass affording nutritious food for cattle the year round, while no shelter whatever is required for the animals."
"The county is bisected by the twenty seventh parallel of north latitude, about two-thirds of its area lying to the northward of that line. With the contiguous county of Leon it contains by far the largest tract of naturally valuable land in South Florida. Owing to its low latitude, tropical fruit culture and truck farming for early vegetables are among its chief industries."
"The Florida Southern Railway crosses the county from north to southwest, having its terminus at Punta Gorda, near the head of Charlotte Harbor, where it connects with the Morgan Line of steamers for New Orleans and with coastwise craft plying to the southward. Charlotte Harbor and its adjacent waters afford the best tarpon fishing on the Gulf coast and all the game fish of this region abound in the rivers and bays. Deer and turkeys are frequently killed within 5 miles of the railroad, but for the certainty of good sport the hunter must go farther afield, as the large game is generally hunted off in the vicinity of the permanent settlements."

Duval:
In 1880, or a little over 45 years ago, Duval county had a population of 19,431, according to available records. Today, Jacksonville alone lays claim to about seven times that number.

Duval county possesses the distinction, according to C. L. Norton, in his Handbook of Florida, of being one of the original counties into which the territory of Florida was divided in accordance with an act of Congress, in June, 1822, nearly a year after the United States formally acquired possession.

Duval county was named for William P. Duval, the first territorial governor. In 1892 the county had an area of 900 square miles. Its assessed valuation in 1888 was \$9,640,619.

Norton, in his observation on Duval county, written in 1892, had the following to say:
"A glance at a map will show the peculiar commercial advantages that it has always held. Ever since the ships of the French Huguenot, Jean Ribaut, anchored inside the bar at the mouth of the St. Johns, and named it the river of May, this noble stream has been the natural avenue of travel and trade to and from the interior of the peninsula."
Along its banks the first settlements were formed and railroads followed the settlements. All traffic between the Atlantic states lying to the northward and the Floridian peninsula passes almost of necessity either through the St. John's river or near the point where the course of the stream changes from north to east.

"The county lies on both sides of the river to a point about twenty five miles from the seacoast."
"The first white settlement was made by the French in 1564, at St. John's Bluff, a high promontory on the south bank of the river about three miles from its mouth. This was merely a military post. The first civil settlement is believed to have been made in 1812, at the head of the old King's road from St. Augustine, on the south bank of the river, opposite the present site of Jacksonville. The settler, Lewis Z. Hogan, moved across the river in 1816, and thus was formed the nucleus of the leading commercial city of Florida. Long before this, however, the banks of the river were inhabited by Indian tribes, as is evident from the countless shell mounds that exist on both sides of the stream, often containing rude pottery, stone implements and the like, mingled with bones of men and animals in perplexing and suggestive confusion."

Raffia Again

Here is a novel use of raffia, which is being worked more and more into the ensemble this year. Here it is used as an insert of bright color on a white kid sandal. Very chic for the South.

Madison—1069 bales cotton ginned here this season.

Alexander McAdie, author of "Making the Weather" and "Wind and Weather," professor of meteorology at Harvard, director of the Blue Hill Observatory and formerly professor at the United States weather Bureau, now appears with a volume on "War Weather Vignettes" (Macmillan). It gives many instances in the world war when the fortunes of battle were greatly influenced and sometimes determined by the elements.

Sarasota—Bids to be received for construction of more than 10,000 square yards sidewalk.

Clermont—Contract let for construction of new city hall.

TO BUILD BIG HOTEL.
TALLAHASSEE, Jan. 12.—W. A. Edwards, architect employed by W. B. Harrison to prepare plans for a new hotel to take the place of the historic Leon, destroyed by fire several months ago, announces that work on the new structure will begin in February. The new hotel will be fourteen stories in height and the tallest structure in Florida west of Jacksonville. The work of clearing the debris of the old Leon from the site is already under way.

Lakeland—Lakeland Cold Storage Co., planning to construct \$125,000 warehouse, on Rose Street.

MARVANIA

The last of the Eastern Lake Section in the city limits.

A "Close-up" of Prosperity!

You don't have to be real farsighted to see the great investment advantages of Marvania. The development has arrived, is an actuality, gathers momentum every day.

You have only to see the attractive surroundings, the location in the path of development; the list of homesite owners in this section and the character of improvements that will be installed to realize that Marvania is to be in the very near future one the real communities of the city.

We'd like the opportunity to show you these things and also explain to you on what very convenient terms you can participate in the profitable returns offered to investors here.

Slayer Declared Sane By Board Of Mental Hygiene

Jan. 12.—(AP)—A youth declared sane by the board of mental hygiene for the murder of Henry Grady Carter, restaurant owner, whom he shot to death in his restaurant during the moon-mad dash across town in an automobile after fatally wounding Mrs. Vivian Tomlin Peers, pretty clothing model, and Detective J. Harvey Burke and seriously wounding William Britt, automobile salesman. The youth declared he killed the girl and Carter because he "couldn't keep her and wasn't going to let any one else get her." He killed Britt and shot Britt, he declared, because they stood in the way of his reaching Carter, after he had shot the girl.

Motorcycle Published Seymour

Fla., Jan. 12.—(AP)—A motorcycle accident on Monday when a man was killed and his wife seriously injured. The man was riding a motorcycle on a road near the famous beach resort of 131 miles. The accident occurred at 1:14 p.m. when the motorcycle struck a tree.

Established Seymour

When Seymour was established in 1882, it was a small town with a few stores and a church. It has since grown into a city of 110,000 people. The town is known for its beautiful beaches and its excellent schools.

Announced Store

A new store has been announced for the city. The store will be located on Main Street and will offer a wide variety of goods at low prices. The store is expected to open in the near future.

A country club property of lakes and hills

Location determines possibilities

In this respect Loch Arbor is extremely fortunate. Not near but an actual part of one of the fastest growing cities in Central Florida. Its easy accessibility and proximity to everything makes it most desirable either as an investment or from standpoint of a home.

To those who investigate Loch Arbor and then back their judgment with substantial investments. Loch Arbor offers much. To such as these will come a reward in the shape of handsome returns.

Avail yourself of the opportunity to secure homesites in this development. The Country Club Entrance Section will be placed on the market at an early date. Determine for yourself as to its investment possibilities by immediate investigation. Representatives at the property and at the office will furnish you with detail information concerning Loch Arbor.

Real Estate Values Are Increasing

One hundred years ago, Fifth Avenue New York City was a cow path, today it is the greatest and most valuable street in the world. There is no one telling the average American how real estate values grow. Mothers bringing children into the world, give real estate its value.

Some property in Denver, Col., which is now worth many millions of dollars, was traded with \$25.00 in return for a horse, saddle and bridle.

The territory which comprises the State of Pennsylvania was granted to Wm. Penn in payment of a personal debt of \$10,000.

Real Estate values are increasing and will always increase. Buy real estate now from one of the Realtors listed on this page.

By Taylor

Highland Park

THE IDEAL LOCATION for a High Class Home Development. High up, Close in, Convenient to Schools, Churches, Stores and their Delivery Routes, Doctors, Amusements—Everything, but yet with its own community and social life, set apart by itself, exclusive and distinctive. HIGHLAND PARK will have its own social center in beautiful Revonah Park, occupying a full square in the south east corner of the property, with a handsome club house of Spanish design, a concrete swimming pool, courts for tennis, roque, croquet, bowling on the green, etc., and a children's wading pool and play ground; but it will also be only six or eight minutes drive from the municipal golf course, when Hughey St., which runs along its north side and which is already Sanford's main east and west thoroughfare south of First Street, is cut through and paved as provided for in the road bond issue recently voted for.

THE NEW HIGH SCHOOL, on which work will begin very shortly, is only about a hundred yards away—just near enough and not too near. Highland Park is as near as the post office to the railroad station, and yet no nearer than that to the noise and unsightliness of the railroad and its moving or stationery trains.

IT IS ONLY EIGHT OR TEN MINUTES WALK, and yet all of that, to the domestic help and labor supply of Goldsboro.

IT IS APPROACHED from the heart of town via Park Ave., running just one block to the east, or via Oak Ave., which it faces on the east and which has been ordered cut through to the north; or via Elm Avenue, from which the asphalt plant down town has been ordered removed, and which leads right through to the main entrance at Coronado Concourse, or via French Avenue, which runs along its western side. All these approaches to Highland Park are good.

WITH A LOCATION which every one agrees is in itself the most sightly in Sanford, without any objectionable feature adjacent to it or its avenues of approach, so close in that it is convenient to everything, and yet far enough out that it can be restricted exclusively to residential purposes and single family dwellings, with this superb location and all these advantages, with not a house in all its confines and before a single street was laid out, I began this development with a clean slate, am working it out along lines that are carefully designed, and that eventually will result in one of the most beautiful residential sections in the country.

I HAVE NO INTENTION of making a clean up and a quick profit of "kissing it good by" and leaving the lot owners, scattered all over the country, to shift for themselves, but I propose to stay right on the job and see it through, reserving enough of the property until then to get my profit in full measure when my work is finished.

I AM NOT CATERING TO SPECULATORS, although there can be no better speculative buy in Florida than these lots at the initial prices I will put on them. I want to attract the right kind of people who will put up the right kind of houses and get the right kind of home development in full swing.

SEE MY ADVERTISEMENTS in coming issues of the Herald for information regarding: MY PLANS FOR BEAUTIFICATION of the parkways along all the drives and the many distinctive features of this most distinctive residential center.

REVONAH PARK, the Highland Park community and social rendezvous, with illustrations from architect Moughton's drawings of the club house and swimming pool; on which work will begin as soon as the city gives me the grades on the surrounding streets.

SWAN OVAL, the beautiful park I have designed, lying just south of the great main entrance, with a picture of the striking fountain I am erecting there, and Mr. Moughton's drawing of the Spanish pavilion to occupy the center of this park.

THE BUILDING AND OTHER RESTRICTIONS for your protection and the TITLE INSURANCE POLICIES which I furnish with all deeds, THERE WILL BE SOMETHING NEW AND INTERESTING IN THESE ADVERTISEMENTS EVERY DAY, BECAUSE I HAVE MANY NEW AND INTERESTING THINGS TO TELL.

REAL ESTATE BARGAINS

29 acres on Onoro Avenue between Mellonville and Ohio Avenues. (In city limits.)
 15 acres on Ohio Avenue and Marquette Avenue.
 4 1-2 acres homestead on Silver Lake, fronting Ohio Ave.

Florida Electric Chair Will Claim Its Third Victim When Alachua Negro Meets Death

TALLAHASSEE, Jan. 12.—(AP)—When Fortune Ferguson, Alachua county negro, whose death sentence was pronounced by the Supreme Court, was electrocuted at the Raiford "chair" at the Raiford will have claimed its third victim.

An appeal was taken in Ferguson's case, after Governor Hardee had signed the death warrant. A stay of execution came a day or two prior to the date of electrocution. The appeal was based upon several alleged irregularities.

Two negroes have already been electrocuted in Florida, according to the records of the State Prison Bureau. They were FRANK JOHNSON, sent up from Duval county, who was electrocuted Oct. 7, 1924, and J. C. Coachman, sentenced from Manatee county, May 8, 1925, for criminal attack.

Governor Hardee signed Johnson's death warrant. Governor Martin sent Coachman to his doom.

Several other cases progressed uneventfully near the electric chair, when the victims were suddenly saved, temporarily, at least, with the raising of some legal technicality. Notably among them was Aubrey Lee Nickels, young white man, sentenced to die for an attack upon a woman at DeLand, but for whom a new trial was recently ordered after a second appeal to the Supreme Court.

Another who narrowly escaped the chair, and whose life was temporarily saved, was Charles W. Browne, sentenced by Judge J. P. Dickinson, of the seventh judicial circuit, the same day the electrocution law went into effect, Jan.

1, 1924. Judge Dickinson pronounced the sentence "by the lawful method of execution in the state of Florida." Browne had been convicted by a jury a few days previously for the murder of Howard "Red" Usher, a Daytona taxi driver, on Oct. 21, 1923, a crime for which George Burns, an accomplice, is now serving a life term.

An appeal was taken in Browne's case and a new trial was granted by the Supreme Court. Judge Dickinson again sentenced Browne to death on Apr. 30, 1925, "by electricity." Browne is now in the Volusia county jail awaiting the signing of his death warrant by the governor.

Florida's establishment of the electric chair, made possible through passage of a bill by Representative Fred H. Davis, of Leon county, at the 1924 session of the legislature, was marked by anything but pacidity. It was not until nearly one year later that the "chair" was finally placed in the new hospital building at Raiford. Prior to that time it had been planned by the board of commissioners to install it in the Duval county jail. Following an organized protest from Jacksonville, however, the idea was abandoned. Meantime, it developed that no appropriation for the "chair's" installation had been made. Representative Davis declared that he had left it out on purpose, because he did not desire a "fight" with the lawmakers, who were then pronounced by the "economical" group. The expenditure was eventually taken care of out of the governor's contingent fund.

Escambia Board Is To Map Route For State Road No. 1

PENSACOLA, Fla., Jan. 12.—(Special to the Herald)—Determined effort which will brook no interference was begun to rid Escambia county of the rattlesnake when B. N. Lauderdale, veterinary inspector of the United States Bureau of Animal Husbandry opened offices in Pensacola, and it is believed that the heartiest support will be given him in a work already too long delayed and preventing one of the foremost needs of the county and section today according to W. B. Ferris, president of the Pensacola Chamber of Commerce.

Dr. Lauderdale, it is claimed, will employ local men for the work that will be necessary in the fight against the insect which infest the cattle farms, and prevents the location of dairymen in this one of the best sections of the state for such industries.

Vets, the use of which had been abandoned in different sections of the county, will be repaired and new ones built for the dippings which will systematically and religiously be carried out until the county is declared "tick free."

St. Petersburg—Tentative plans under way for constructing Tampa-St. Petersburg electric line.

SARASOTA CLAIMS 15,000

SARASOTA, Jan. 12.—Sarasota's population now is approximately 15,000, according to an estimate made by the Chamber of Commerce based on the number of names in the new City Directory. This figure does not include the people residing in such outlying districts as Myakkae, Bee Ridge, Osprey and Woodmere.

DeSoto City—One of largest brick plants in Florida will soon begin production here.

Eustis—Contract awarded for construction of Alice McClellan open air theater.

Ocala—Marion county votes \$4,550,000 bond issue for constructing good roads.

Dangerous Cough—How to End it

To quickly end a dangerous cough there is a very simple treatment which gives almost instant relief and often breaks the cough entirely in 24 hours. This treatment is based on the famous Dr. King's New Discovery for Coughs. You take just one teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing it. The prescription has a double action. It not only soothes and heals soreness and irritation, but also loosens and removes the phlegm and congestion which are the real cause of the coughing. So the worst cough usually disappears quickly.

Dr. King's New Discovery is for coughs, chest-colds, bronchitis, spasmodic croup, etc. Fine for children, too—no harmful drugs. Very economical as the dose is only one teaspoonful. At all good druggists. Ask for

Preaches

The town of Promises City, La., has the country's only bobbed-haired pastor. Miss Pattie Horn, 19, of Des Moines, occupies the pulpit of the Christian church there. She is a student at Drake University.

Jacksonville—158 acres in Dunn's Crook section purchased by Jacksonville Investment Company.

Silk Culture Now Flourishes In The State of California

ESCONDIDO, Cal., Jan. 12.—(AP)—Twenty-four hours after a new model of silk has made its appearance in Paris, Los Angeles femininity can purchase the same design woven from a fabric grown and manufactured in California.

The pattern of the Parisian cloth that Missy can obtain locally over the counter of her favorite department store will have been transmitted by cable. The mulberry tree-to-fabric operation, of course, takes weeks, but after the raw silk has been manufactured, it is ready here to be woven into the latest Parisian design on short notice.

Since 1915 when the first mulberry tree was planted in Southern California and a silk worm placed on its branches, a total of 320,000 trees have been put out and millions of silk worms set to work building cocoons.

Many discouragements attended the establishment of the industry in the United States but these were surmounted and the output has increased until this year it was found necessary to construct a new \$300,000 raw silk manufacturing plant to care for the Escondido Valley's output the coming season.

With a growing period for mulberry leaves two months longer here than in the Far East, a greater amount of silk per tree is gotten. In China and Japan 400 and 600 yards of recoverable filament

THREE REPORTED KILLED

RICHMOND, Va., Jan. 12.—Three persons are reported to have been killed and others injured in a collision Monday afternoon between an automobile and a C. & O. railroad train at Heaven Dam, about 60 miles from here.

are obtained from a single cocoon, while in California from 1,000 to 1,500 yards are unwound.

How to stop BOILS!

There's only one way to stop boils. Stop the cause of boils. That's common sense— isn't it? All right. Boils thrive because the blood gets so weak in healthy, red cells that it can't throw off the impurities that get into the body. There's not enough rich, red blood to purify the system.

Now—S. S. S. builds back the blood to fighting strength. S. S. S. builds red-blood-cells—builds them by the millions! Boils dry up!

S. S. S. is the thing. Impurities that cause boils and other skin eruptions can't stand up against the rich, healthy, red blood that S. S. S. builds. That's all there is to it.

Stop boils with S. S. S. It's the way. Get it at any druggist. The larger bottle is more economical.

Ford

NATIONAL SHOW WEEK

JANUARY 9-16

Exhibiting the Improved Ford Cars

Featuring the Latest Ford Equipment

All Ford Dealers are now holding a Ford National Show, exhibiting the improved Ford cars, and featuring the latest Ford equipment.

This is the finest exhibition of Ford passenger cars the public has ever seen. The display that the nearest Authorized Ford Dealer has arranged will give you an entirely new conception of Ford values.

The display will be continued until Saturday night, January 16. Resolve right now that you are going to see it. Even though you have already carefully inspected the improved Ford cars—see this display! It is something entirely new.

Remember—you can go any time this week. But be sure to go!

Sponsored by
Ford Motor Company

When you entertain at home—and the sumptuous feast has been greeted with royal praise by the laughing, pledging friends—have a Camel!

WHEN invited guests come in for dinner. And the festive board resounds with joyous words of friendship. When the primest feast ever served is finished—then, how welcome are those words of hospitality—"Have a Camel!"

For no other cigarette was ever so fully smoked and served to others as Camel. Camel goodness insures a fitting climax to every perfect spread, adds of its own fragrant welcome to every home's bright occasions. Camels are made of the choicest tobaccos grown in all the world. They never tire the taste, never leave a cigarette after-taste. Fragrance and mellowness have made Camel the greatest word in all the history of smoking.

So this night, as you learn anew the joys of giving happiness to others. As after-dinner laughter rings out through all the house—know then the pleasures of smoking and serving the finest. You may be doubly sure that every good feature is rolled into Camels that anyone ever searched for in a cigarette.

Have a Camel!

Into the making of this one cigarette goes all of the ability of the world's largest organization of expert tobacco men. Nothing is too good for Camels. The choicest Turkish and domestic tobaccos. The most skillful blending. The most scientific package. No other cigarette made is like Camels. No finer cigarette can be made. Camels are the overwhelming choice of experienced smokers.

Our highest wish, if you do not yet have a Camel, is that you try them. Write now to compare Camels with other cigarettes made at any price.

R. J. REYNOLDS TOBACCO CO.
