

# ECONOMIC TONE OF GERMANY IS CALLED BETTER

## Favorable Description Of Business Is Reported By Expert

WASHINGTON, Dec. 29.—A strikingly favorable description of Germany's economic situation, which, however, does not dwell on the prospects of an enforced moratorium on private debt payments—has been recited to the American government by Mr. H. Z. Groves, commercial attaché in Berlin. The report is a complement to the conclusions recently published by the British trade attaché and rounds out an estimate of Germany's trade position at the end of 1932, as seen through expert foreign eyes.

Grovesman, business through November, Mr. Groves writes, showed remarkable resistance to adverse conditions, and was little affected by the uncertain political situation. The general improvement already noted through September and October was continued in November, although seasonal factors caused partial reverses.

An increase in coal production and sales was an encouraging factor, indicating increased production of producers' goods, whereas in preceding months gains had been limited mainly to consumers' goods. The overall situation also showed signs of further improvement and consolidation, according to Mr. Groves.

Unemployment increased from 5,500,000 on Oct. 31 to 5,365,000 on Nov. 30, due largely to the seasonal cessation of outdoor work, while other activities remained unaffected.

The building trade is receiving current contracts amounting to \$80,000,000 (250,000,000 marks), and the fund set aside by Chancellor Fraps von Papen for aid to landlords engaging upon repairs has been entirely exhausted, indicating brisk activity in reconstruction lines.

Expansion of industrial production the last few months has thus far been financed mainly from liquid reserves, as the demand for credit has not shown any unusual increase. Bills discounted by the Reichsbank declined from 2,877,000,000 marks on Oct. 31, to 2,731,000,000 marks on Nov. 30, 1932, while the note circulation declined by 88,892,000 marks, to 3,331,107,000 marks.

Gold holdings of the Reichsbank continued to make a comparatively good showing with the reserve increasing by 9,915,000 marks to 329,329,000 marks, at the end of November, while eligible foreign exchange decreased by 13,240,000 marks to 109,743,000 marks.

A marked easing of the foreign exchange situation was noticeable during November. Holdings of gold increased from 228,700,000 marks during October to a total of 378,700,000 marks. The bank index advanced steadily from 68.17 in August to 70.05 in October, and 72.94 in November, while the stock index also rose from 87.19 in October to 88.23 in November.

German foreign trade in November declined slightly, but the export surplus was maintained at 82,000,000 marks, practically the same as that of October.

Fig. iron output in November advanced 15 per cent to 370,000 tons, while that of steel increased 19 percent to 547,000 tons. In harmony with the improved position in the heavy industries, car loadings advanced from a daily average of 110,000 in October to 127,000 during the first three weeks of November. Production of electric current reported for the week showed a steady increase in daily averages from 27,000 kilowatt hours in July to 30,156,000 in August and to 33,000 in September. Federal receipts increased from 547,000,000 marks in September to 587,000,000 marks in October. In the face of all these favorable indices, and without overlooking the serious economic conditions and poverty which still prevail in Germany, it is seen that the economic situation of the national economy is being rendered more and more favorable by its own efforts.

# Teas for Little Tots

If there is a little boy or girl who fails to enjoy afternoon tea—even though "tea" is represented by milk!

And how much more the child likes his tea when dainty cookies or sandwiches appear as the main food. One of the most popular sandwich spreads is peanut butter—the kind that comes in a pill which, when empty, becomes a sandpile toy.

**Peanut Butter Please**  
Mothers, too, like peanut butter combinations, for they are rich in food value and easily prepared. Here are a few peanut butter recipes which are just the thing for the little tot's tea!

**Peanut Butter Wafers:** Cream one-half cup butter with one-half cup canned peanut butter; add one-half cup sugar, and cream again.

**Add one well-beaten egg and one and one-third cups of flour sifted with a few grains of salt. Add one-fourth teaspoon lemon curaçao and roll very thin. Cut in small rounds, press a peanut in the center of each and bake in a slow oven, 300 degrees F., for eight to ten minutes.**

**Peanut Butter and Honey Sandwiches:** Slice and butter white bread. Spread half the slices with peanut butter and the other half with honey. Put the pieces together; press them firmly and cut in appropriate shapes.

**Fruited Peanut Butter Sandwiches:** Mash a banana and cream with enough peanut butter to make an easily workable paste. Moisten with lemon juice, spread on buttered bread and cover with another slice of buttered bread.

# Governor Issues Statement About His Administration

(Continued From Page One)

while revenues were diminished. Our first problem was to close the gap between receipts and expenditures, which were pointing to a bankrupt state unable to meet its obligations.

It was the administration's first duty, the governor declared, to balance its budget and thus preserve the state's financial integrity. But, in addition, he said, many of the common schools four years ago were in desperate financial straits, county bond issues were beginning to mature without hope of revenue to meet them; the general property tax had already reached the breaking point and was becoming unproductive because of its excessive burden; the flood problem in the Everglades called for millions to protect life and property and the fruit fly pest threatened the state's major industry.

"What has been the answer?" the governor said. "During the last four years the federal government has gone \$3,000,000,000 in the hole while other states have been unable to meet their obligations. Some have had deficits as high as \$30,000,000. Florida, hit harder than any other state with her four major disasters, has balanced her budget, paid her current obligations, retired a large part of boom day debt

# South Africa Puts Job Available For Everyone Is Belief Of Women's Group

PRETORIA, Union of South Africa, Dec. 29.—(AP)—Decision to retain the gold standard and to stop the export of gold from the union was reached at a special session of Premier Hertzog's cabinet yesterday.

After the flight of more than 1,000,000 pounds because of the unlimited sales of currency across the exchange recently, the cabinet resolved to withdraw signs from circulation and prevent the export of hoarded gold.

In an official statement last night, the treasury department relieved the reserve bank of responsibility in redeeming notes in gold and declared that banks must make exchange quotations on this basis.

The statement adds that as a consequence of the uncertain political situation there has been an abnormally large purchase on the exchange and withdrawals of gold for hoarding.

These are likely to continue on an abnormal scale with the result that credit and the banking position, which are sound, will be greatly endangered, the statement continued.

The government was advised that in order to avoid a crisis it was essential that immediate steps be taken to protect the country's gold and exchange resources.

In the circumstances, the government agreed to relieve the reserve bank of obligation in redeeming notes in gold and the section of the currency and banking act applicable to such a measure was accordingly suspended.

# Job Available For Everyone Is Belief Of Women's Group

NEW YORK, Dec. 29.—There is a job for everyone in the opinion of nine women in the American Women's Association who spoke to those members seeking employment at a recent meeting, telling how they had changed their occupations within the last few months.

A school teacher saw something in a shop window which gave her a suggestion for a patent which she now is selling. The wife of a professional man has taken training and now is a qualified social worker. And a former "lady of the house" has taken to earning money by dropping her title and becoming an employed "housekeeper."

"Within everyone there is something salable," said one of them, a former head reader for a firm of printers, who now does half a dozen different things. "We may not all be able to sell ourselves as a whole for a specific position, but we can sell ourselves retail, supplying different people with certain of our abilities or service."

Acting on this she now edits manuscripts, writes advertising, and does various other things.

One of the members had retired on her investment with her own firm, specialists in men's wearing apparel. She returned to the business field and after an unsatisfactory try in a public employment agency set up a sales agency in her own apartment for suits and dresses. The last idea came to her when she heard another member of the association talk on "intangibles," and as a by-product she has undertaken to give short-hand lessons at night to another association member.

A former librarian was told when she applied to sell reference books that she lacked "force" to make a successful saleswoman.

# CHIMPANZEE DECORATES CAGE

LONDON—Ho-Bo, a chimpanzee at the zoo here, accepting an offering of decorations for his cage as he prepares to celebrate the coming Yuletide season.

inherited from the past, is sending back to the counties for the common schools \$4,000,000 in tax money, is sending back for local tax relief, and the retirement of road and bridge indebtedness \$8,000,000 a year and has cut the state millage from 14 1-2 to 4 7-8, the lowest in 28 years.

In further bring relief to property owners, the governor recalled that property assessments have been cut from the boom day valuation of \$788,000,000 to less than \$500,000,000.

"Through this period," he said, "we have contended with and conquered the fruit fly pest, obtained aid for flood control in the Everglades through a \$7,000,000 federal appropriation, which is now being spent, and it is admitted that to meet our obligations we have, in keeping with the statute, transferred from various funds. But in no case has the transfer exceeded the average in the operating cost of the respective department from which transfers have been made. While the problem of meeting the state's obligations is and will be a continuing one with revenues falling short of estimates, yet the state is carrying on with full confidence in the future."

The governor denied the frequently heard report that expenses of the state government aggregate \$42,000,000 a year.

"This is untrue," he said. "Our state expenses have been reduced until the total for the fiscal year of 1931-32 is \$18,328,218, according to the state auditor's report. This sum, of course, does not include the amount sent back to the counties for local tax relief in

the support of the schools and retirement of bonded indebtedness. But the amount does include all state money expended for road construction and the maintenance of 6000 miles of highway."

Enforcement of rigid economy in all state departments, the governor pointed out, has resulted in aggregate cuts in operating costs of more than \$300,000 a day and he listed the reductions in various departments.

"We have cut the cost of the tag department more than \$600,000 a day," he said. "The administration is saving more than \$750,000 in this one department. Other reductions follow: Game department, \$400 a day or a total of \$500,000 for the four-year term; hotel commission, now operating for \$68,000 a year as against \$138,000 a year during the boom; shell fish department, operating at 50 percent of original cost; state institutions, maintaining efficiently 3700 inmates at \$161,000 less than 2840 were maintained four years ago—a third more at 15 percent less."

Similar reductions, the governor said, have been made in other departments, boards and bureaus and further economies have been effected through consolidations. Reallocation of the gasoline tax, he explained, has already lifted or prevented more than 300 bond defaults within the state, thus protecting the credit structure of nearly every county.

# "BOWLING NOTES"

The Smith's Barbers bowling team, in scoring a three straight game victory over the Dosarys Lunch Room team in a scheduled Sanford Merchants Bowling League game last night, went into a tie for first place with the N-HI Bottlers team.

N. Hale was high scorer of the evening, bowling 558 points in three games. Walter Bach was high single game scorer, however, with a 215 point score.

The line-ups and scores:

Smith's Barbers	
N. Hale	187 182 200 558
P. R. Bach	153 142 143 438
Ed. Randall	139 180 180 499
J. L. Stephens	152 144 178 474
L. A. Renaud	148 175 144 467
Totals	769 833 828 2419
Dosarys Lunch	
W. H. Bach	120 158 215 493
J. Ludwig	130 183 183 496
George Hall	147 145 111 403
H. ZurHeide	117 174 148 439
Fred Bolly	178 181 149 508
Totals	792 791 778 2268

# Father And Son Are Killed In Collision

LAKELAND, Dec. 29.—(AP)—A collision of their automobiles with a fruit truck killed William Glass, 58, and his six-year-old son, Victor, at a road intersection 40 miles north of here last night. Mrs. Glass and an infant child escaped injury, while J. L. Collier, Lake Wales driver of the truck, suffered slight injuries. The Glass family lives near Polk City.

I Go Slow On Plans

The domestic allotment plan for aiding agriculture... The domestic allotment plan for aiding agriculture...

Mr. Cannon applied his remarks to cotton and pointed out that the prime difficulty of any plan for helping the cotton grower in the way proposed is that only about 40 per cent of the American cotton crop is now manufactured in this country while 60 per cent is exported.

"Aside from the difficulties of controlling production under our system of government it seems to us that the point made by Mr. Cannon is one which may well be given prayerful attention by those who think that they must do something for agriculture and are ready to take any plan, however chimerical, to that end."

The Boxing Business

On the heels of Sharkey's diatribe against Max Schmeling in which the Boston sailor boy called the Black Uhlan, among other things, a "quitter who won on a foul" comes the annual consensus of sixty sports writers placing Schmeling at the top of the heavyweight list.

This news ought to have some effect in making Sharkey feel a little ashamed over the bragadoocio he manifested in a recent statement characterized by a lack of sportsmanship, poor taste, and a super-abundance of egotism.

Sharkey had this to say: "Schmeling proved he was a quitter when he went down from a fair punch and yelled foul in our first bout in New York in 1930. Only a quitter would care to win a title on a foul."

"Public opinion forced Schmeling to meet me again. When he entered the ring he knew I could lick him. I also knew I could beat Max as he is a quitter under fire. When I won Schmeling cried 'robbery'. So I told him I would give him the first shot at my championship. I knew I had Schmeling's number like I had the number of Jimmy Maloney some years ago."

But despite all the wonderful things Sharkey thinks about himself and however unworthy he believes Schmeling to be, the fact remains that the German is recognized by the leading boxing authorities as the best of the lot, even if Sharkey wears the crown.

A condition of this kind existing in a sport cannot help being a detriment to it and will in time, if allowed to continue, cause its complete ruin. In order for a sport to be successful it must embrace some of the elements of sportsmanship, fair play, and honesty.

Certainly the boxing game as represented by the heavyweight champion and its official decisions has sunk into very low depths from which it will not rise until a greater premium is placed on true sporting qualities.

SANFORD, TWENTY YEARS AGO

At Sylvan Lake on Saturday morning last at 9:00 o'clock in the presence of a few special friends who had assembled to witness a quiet home wedding, Miss Mabel Pauline Schmels, only daughter of Mr. and Mrs. Victor Schmels, became the bride of Mr. Harry Milton Snow of the state normal school located at Denton, Texas.

Business men have picked up considerably in France since her default to this country on Dec. 18. See where she's just authorized a fourteen million dollar loan to her old enemy Austria. It just goes to show that it never pays to get too friendly.

The cure for the depression, says Roger Babson, and everybody has his cure, is advertising and more advertising. That's about as good as any we've seen yet. Advertising can change the new popular fashion of false economy to constructive spending, he says. Many people are not buying because they haven't the money, but many more are not buying because they are afraid they will be criticized for doing so.

Technology apparently insists that it is the invention and use of machinery which have caused the present high state of unemployment. What we can't understand is why then these years' past unemployment in 1892 and 1917 when we had just as many machines and all of them in use. And furthermore, what causes the high unemployment of today, when we have more machines than ever?

Government Park Transmittal will be inaugurated at 10:30 a. m. on Monday, Jan. 7, at the park. It is expected that the park will be a great success.

Wheat Direct To Needy Is Plan Of Farm Association

FARGO, N. D., Dec. 30.—Free wheat, donated by producers direct to the jobless, a plan originated by the North Dakota Farmers' Holiday Association, is being urged as a national movement by Mr. Usher L. Burdick, president of the association.

Mr. Burdick has written to the heads of the National Farmers' Holiday Association, the Grange, the Farmers Union, and the Farm Bureau Federation urging them to use this plan as the basis for a great national "eat more wheat" movement.

"Many farmers of North Dakota would prefer to give part of their wheat in some sections far from the market is practically valueless, and in no section of the wheat belt is worth the cost of producing it, to the unemployed," Mr. Burdick said.

"Here at Fargo we have found a way to do this—take the wheat directly from the farm and place it in the hands of the unemployed men who need food for themselves and their family."

"Members of the Cass County Board of the North Dakota Association are donating two hundred bushels of wheat to be given to the unemployed men in Fargo."

THE PROBLEM OF AIR FORCES

CHRISTIAN SCIENCE MONITOR

There is a general and widespread recognition of the fact that, whatever the cause or left opportunity, the matter of disarmament, it is impossible to tolerate the means of aerial warfare. For while the weapons can be held in inactive, and employable chiefly, if not altogether, against opposing forces, the function of the airplane in war is, primarily, anti-civilian. By it the horrors of war are vastly multiplied. The greatest works of civilization can, it is believed, be obliterated in a night; and the first indication of war may be the destruction of cities and their inhabitants.

Nor, in tackling this problem, can any satisfactory distinction be drawn between military aviation and civil aviation. The passenger airplane can, it has been shown, speedily be converted into the bombing airplane. Quite clearly, the magnificent progress that has been made by man in the conquest of the air must be maintained. Nevertheless, we are bound to consider ways and means of preventing the misuse of aerial machines. It is proposed that there shall be some form of international control. But nobody has yet framed a sound scheme which would commend itself either to the European or the American people. No one is willing to assign limits to the development of aviation, and no one is willing to allow

It to be hampered by regulations whose efficacy is doubtful. A certain amount of national rivalry in the air is one of the conditions of progress, and it is not easy to determine by what method, if any, private enterprise shall be subjected to foreign control.

The proper course is undoubtedly to eliminate warfare altogether, and to establish permanent peace. But that is the ultimate goal, and in the meantime steps must be taken to stop mankind from becoming the victim of its own inventiveness. Certainly there should be, as the French have proposed, the total prohibition of aerial bombardments; but each nation has built a fleet of bombing machines, and while they exist—or even while commercial machines which can be quickly transformed exist—the outbreak of war might provoke their employment.

What is needed is the utter and unequivocal ostracism of aerial warfare and those who resort to it. Let it be firmly laid down that whoever is guilty of bombardment from the air is an outlaw and a traitor to the civilization to which we all belong; and the intensity of such universal disapprobation will unquestionably act as a deterrent.

It is not yet sufficiently appreciated that the moral weapon is one which will, in the end, obliterate material weapons.

Scientist Hopes To Make Steel Of Supreme Hardness

PASADENA, Calif.—By putting crystals of metal "to sleep" with intense cold, a youthful physicist at the California Institute of Technology hopes to secure information that will make possible steel harder and stronger than man had thought possible.

He is Dr. Alexander Goetz, associate professor of physics in the Norman Bridge Laboratory and professor of physics at the University of Göttingen, Germany. The apparatus constructed for his delicate experiment is one of the most elaborate ever designed here.

Inside a cryostat or "thermos" bottle about the size and shape of an orange but with nine walls, each smaller section progressively surrounded by colder substances, Dr. Goetz has placed a few crystals of metal. With the aid of liquid helium, the coldest of substances, he is now attempting to reduce the temperature in the cryostat chamber to 480 degrees Fahrenheit below zero, or only 1.4 degrees above the level of absolute inertia of molecules.

As a super-refrigerating machine steadily withdraws heat from the cryostat, the electronic particles within the crystals gradually cease their fierce activity and, finally, like tops that have spent themselves, the atoms "go to sleep."

Dr. Goetz will not be able to see the "sleeping" crystals directly. There is no light within the cryostat, for when light is absorbed it produces heat. Therefore, weak X-rays, which pass completely through the tiny thermos bulb without being absorbed, are to be used so that the physicist may photograph the frozen metal.

The photographs are expected to show defects which scientists here believe exist in metals, and which they hold responsible for certain metallic weaknesses. Theoretically, metals should be far harder and stronger than they are, they assert, if the suspected defects can be discovered from "sleeping" crystals, it may be possible to make steel 200 times stronger than the best manufactured at present, Dr. Goetz said.

Metalurgists have found that the rapid molecular movement within the crystal prevents close inspection of the "bricks" and obscures their vision of defects. This motion is accelerated by heat and retarded by cold. By stopping the motion with cold, it should be possible to catch a crystal off guard, they argue, with the result that the defects can be seen and corrected.

Another experiment of interest to physicists is to be found in an institute laboratory where, with a glass porcelain X-ray tube operated at 250,000 volts, artificial production of alpha particles has been produced. By using the high speed alpha particles, an electron in almost motionless rest transmits force from the atoms of various

metals. They hope to learn new secrets about the neutron—the latest puzzle which the physical universe has provided for man to toy with.

Do You Know?

WHAT Howland pipeweed growers are happy that some of the thousands of American smokers are carrying canned pipeweed to the members of their families daily? Recent nutritional research reveals 1/4 that such pipeweed contains more health value than any other fruit or vegetable which has been subjected to scientific research. Above is typical Howland pipeweed plantation.

Train That Will Make 200 Miles An Hour is Planned

(Continued from Page 1) ward thrust as a device.

But the effectiveness of the new car involves operation of an aerodynamic principle which, upon reaching a speed of 120 m. p. h., eliminates thrust to the side upward and maintains weight on the trucks. When this state of equilibrium is achieved the car virtually "rides" in the trough of the lifting force leaving from the propeller drag, it forward.

Powered by a 500 h. p. steam motor, the car will utilize the engine and its braking by means of the variable and reversible propeller, supplemented by vacuum brakes making contact with the side members of the elevated structure.

Two types of equipment are contemplated—single coaches carrying 30 to 50 passengers or one pay coach at speeds of from 100 to 240 m. p. h., and power cars pulling trains at 120 m. p. h. Estimated cost of carrying passengers one mile is 42 cents. Fuel economy is indicated in charge of \$1.25 for a hypothetical Jersey City-Philadelphia run.

Woman Is Hanged For South Africa Murder

PRETORIA UNION OF APPEALS, Dec. 30.—(P)—Mrs. Daisy Demelker was hanged today for the murder of Cecil Rhodes Cowie by poisoning. She was unshaken by the final ordeal and maintained her innocence to the end. Her trial attracted wide attention and was one of the most sensational in South African criminal history.

On charges of poisoning two former husbands she was found not guilty.

Flood Waters In Dixie Continue To Go Upwards

(Continued From Page One) sheet but the rest of the elevated thoroughfare was several feet above the flood. The only means of getting to the Shorter College section in West Rome was by boat or by shuttle train that carried commuters over a trestle. Most of the inundate area is sparsely populated. Will Towers, weather observer, said it would take four more feet of water to have a serious effect on the main part of town.

C. H. McFarland, Red Cross field representative at Birmingham, said all Red Cross workers in the flood areas of Alabama had been instructed to keep themselves in readiness for relief work.

Late yesterday the Washington Weather Bureau reported rains in the preceding 24 hours over the affected territory had been moderate and would have little effect on the rivers "all of which are banked, or overflowing, except the Savannah and Altamaha Rivers of Georgia."

The overflows, the bureau said, "will not be exceptional, but at the same time will cause considerable damage; the most serious probably will be along the upper tributaries of the Alabama River in Northwestern Georgia and Northeastern Alabama."

The Mississippi River was reported at a moderate stage and most of its tributaries well within their banks with the exception of the St. Francis in Missouri and Arkansas.

automobile. It will sell below \$250. It is equipped with an air-cooled two-cylinder motor, can attain a speed of 50 miles an hour, and was licensed by police here after demonstration flights.

BUILDS 2250 PLANE

KOENIGSBERG, Germany, Dec. 30.—(P)—Engineer Rolf Meyer has brought out a plane under the slogan "cheaper than the cheapest

metallic substances, they hope to learn new secrets about the neutron—the latest puzzle which the physical universe has provided for man to toy with.

## Auxiliary Has Meet At Community Center

With Mrs. Pearl Moss and Mrs. Rose Moss as hostesses, the monthly business meeting of the Auxiliary of the First Baptist Church was held on Wednesday evening at the Community Center. Mrs. Arthur Jacobson presided over the business session.

The officers of the organization, Mrs. Arthur Jacobson, Mrs. J. Fleischer, Mrs. Dave Bonaka, and Mrs. Victor Check, were appointed to be hostesses at the annual public contract and auction bridge party to be given by the auxiliary on Jan. 17.

## Social Calendar

**FRIDAY.**  
The Celery Fed will have a "leap year date" beginning at 8:30 o'clock at the home of Miss Carolyn Coburn, 217 West Seventeenth Street.

**SATURDAY.**  
The 1932 class of Seminole High School will have a class reunion and luncheon at noon at the Celery Club. Reservations may be made with Gene Estridge.

## Informal Tea Honors Miss Ruth Maddox

Complimenting Miss Ruth Maddox, of Fort Meade, who is spending the winter season here with Mrs. J. P. Moore, Celery Avenue, Mrs. Arthur Moore gave an informal tea yesterday afternoon at her home, 1218 Oak Avenue. During the afternoon by the hostess, entertained with piano music rendered by Miss Elizabeth Clark.

Refreshments were served during the afternoon by the hostess, assisted by Mrs. W. W. Brady, Mrs. Burke Steele, Miss Alice Brooks, and Miss Betty Moore. Those invited to be with Miss Maddox were: the Misses Betty McKinnon, Mary Frances Andrews, Frances Gibson, Dorothy Brooks, Virginia Brooks, Evelyn Wilkinson, Anna Belle Brown, Marjorie DuBois, Jaunita Smith, Marjorie Turner, Pauline Crawford, and Margaret Pardon.

## Mrs. Kirtley Honors Her Club With Party

Quantities of roses and other garden flowers were used to adorn the rooms of the home of Mrs. C. R. Kirtley, Lake Onora, when she entertained the members of her bridge club with a luncheon and bridge party yesterday morning.

At the conclusion of the bridge games, high score prizes, a novelty jug, was awarded to Mrs. G. D. Bishop.

Luncheon was served in courses on the card tables by the hostess, assisted by Mrs. R. R. Deas, and Miss Susan Kirtley. Those present were: Mrs. B. L. Perkins, Mrs. E. F. Householder, Mrs. Floyd A. Palmer, Mrs. Walter S. Coleman, Mrs. A. W. Pitts, Mrs. G. D. Bishop, Mrs. Wynn W. Potter, and Mrs. R. R. Deas.

## Bridge Party Given By Mrs. W. M. Scott

Christmas decorations were used in the living rooms of the home of Mrs. W. M. Scott, Mayfair, when she entertained the members of the Afternoon Tea Contract Club and a few other guests with a bridge party on Tuesday afternoon.

Mrs. H. M. Papworth held high score among the club members, while Mrs. Roy F. Symes had high score among the other guests and received an oil painting.

At the conclusion of the bridge games refreshments were served by the hostess. Those present were: Mrs. H. M. Papworth, Mrs. W. T. Langley, Mrs. R. J. Holly, Mrs. G. I. Lucas, Mrs. George S. Wiltner, Mrs. Roy F. Symes, Mrs. S. D. Highleyman, and Mrs. E. I. Carroll.

## Mrs. Adams Hostess At Christmas Party

With about 24 children in attendance, Mrs. F. Adams entertained the members of the Sunday School of the Christian Science Church with a Christmas party yesterday afternoon at her home, corner Eighteenth Street and Branch Avenue. Games were enjoyed by the guests during the afternoon.

At the ten hour refreshments were served from the dining room table which was centered with a small decorated Christmas tree, surrounded with a crepe paper spread bearing Christmas designs. The refreshments were an ice and sweet course which further commemorated the Christmas idea.

Mrs. Lewis Stephenson, of Atlanta, arrived yesterday to spend a short time here as the guest of

## Eastern Stars Hold Initiation Of Officers

Over 75 members and friends of Seminole Chapter Number Two Order of the Eastern Star attended the installation of officers of the chapter held last night at the Masonic Hall with Mrs. G. E. McKay, worthy grand matron, Mrs. Eugene Higgins, grand marshal, Mrs. George Huff, as grand chaplain, and Mrs. W. M. Haynes, as grand organist, acting as installation officers.

Officers installed were: Mrs. R. P. Crenshaw, worthy matron; U. O. Baro, worthy patron; Mrs. J. E. Currier, associate matron; R. W. Turner, associate patron; Mrs. R. W. Turner, secretary; Mrs. H. F. Kent, treasurer; Mrs. Pearl S. Babbitt, conductress; Mrs. Kyle Shomaker, associate conductress; Mrs. George W. Huff, chaplain; Mrs. W. W. Warner, marshal; Mrs. W. M. Haynes, organist; Mrs. B. C. Moore, Adah; Mrs. E. C. Harper, Ruth; Miss Maude Caraway, Esther; Mrs. C. E. McKee, Martha; Mrs. M. L. Tyre, Electa; Mrs. J. B. Crawford, wander; and G. E. McKay, sentinel.

During the installation exercises the Misses Chae Roth, Pauline Crawford, Sara Maxwell, Florence McKay, and Stella Moore presented the five star point officers with corsages. Mrs. R. C. Maxwell, retiring matron, presented a bouquet of red radiance roses to Mrs. Crenshaw from the chapter, and another similar bouquet to Mrs. Crenshaw from Mrs. Eugene Higgins, grand marshal. Mrs. George W. Huff, as grand chaplain; Mrs. W. M. Haynes, as grand organist; Mrs. R. L. Glenn, and Miss Annie Belle Dyson.

Music during the exercises was rendered by Mrs. R. L. Glenn and Miss Annie Belle Dyson. Mrs. Glenn sang, "When the Organ Plays at Twilight," and "The Voice in the Old Village Choir," while Miss Dyson rendered a piano solo, "Loves Dream." Quantities of pink and yellow gladioli were arranged in large baskets about the hall for the occasion.

## Son Of Mrs. Maude M. Miller Is Married

Of interest to a number of friends here is the announcement of the marriage of Miss Dorothy Jane Thomas, of Cleveland, Ohio, to Dr. William V. Cox, of Boston, Mass., son of Mrs. Maude M. Miller, of this city. The ceremony was performed on Tuesday, Dec. 27, by the Rev. Randolph Ray at the Little Church Around the Corner in New York City. Only a few relatives and friends of the couple were in attendance.

Mrs. Cox is the youngest daughter of Mrs. Fremont Thomas, of Elkhart, Ind. She attended Ohio Wesleyan University at Delaware, Ohio, for two years and later was graduated from the Lakeside Hospital Training School for Nurses in Cleveland. For the past several years she has been holding a position with the Lakeside Hospital.

Dr. Cox received his A. B. degree from the University of Michigan in 1921 and his M. D. degree from the Harvard Medical School in 1925. For the past five years he has been a professor of surgery in Western Reserve Medical School, Cleveland, Ohio. At present he is a professor of surgery on the Austin Fellowship at Peter Bent Hospital, Boston, Mass.

Dr. and Mrs. Cox will make their home at 24 Howall Avenue, Brookline, Mass.

## Committees Named For Auxiliary Dance

Committees have been appointed to have charge of the annual New Year's Eve dance to be given tomorrow night by the American Legion Auxiliary at the Mayfair Hotel. Dancing will be enjoyed from 10:00 P. M. to 2:00 A. M. by music to be furnished by the "Gloom Chaser" orchestra, of Orlando.

Mrs. R. E. Stevens is general chairman of the affair and the following members are assisting her with preparations: Mrs. E. B. Stowe, Mrs. V. E. Douglas, and Mrs. Charles L. Park, decorations; Miss Jeanette Laing, furnishing; Mrs. E. C. Harper and Mrs. W. D. Hoffman, light and water; Mrs. James Howard, check room; Mrs. F. E. Rommelt, Mrs. L. M. Leinhardt, and Miss Jeanette Laing, cold drinks; Mrs. W. T. Langley, Mrs. J. C. Hutchison, and Mrs. Spencer, forays; and Mrs. Ralph B. Wight and Mrs. Roby Laing, advertising.

## Joan Bennett, Tracy At Milane Saturday

"Me And My Gal" a comedy-romance with Joan Bennett and Spencer Tracy dividing the love interest, comes to the Milane Theater Saturday. It is based on an original story by Barry Conners and Philip Klein and was prepared for the screen by Arthur Kober.

It is a Fox Film production, Miss Emille Lingle, Indian Mound Village.

# New Chevrolets Add Over 85,000 People to Payrolls of Nation

With the resumption of work at the Chevrolet factory recently more than 85,000 people were put back at work, 38,500 in the company's 29 domestic factories, 21,000 more in Fisher body plants working exclusively on Chevrolet-Fisher bodies, and more than 25,000 in dealerships throughout the nation. As many more are indirectly benefited by the announcement, through making their livelihood building parts for the car which Chevrolet buys from independent suppliers. Since Oct. 1 trained former employees have been going back to work in Chevrolet's widely distributed manufacturing and assembly plants, with welcome additions to the general pay-rolling power. More than 85,000 more wage money in circulation. Throughout November, the increase in employment continued to a seasonal peak in the middle of December, when concentrated operations incident to prompt dealer stocking were in full swing. More than \$20,000,000 worth of the new cars were in dealers' hands when the national introduction was made.

## Filipino Bill is Sent To Hoover; Veto Predicted

(Continued From Page One)  
Legislators meeting with him as the independence commission, adopted a resolution saying difference of opinion among the Filipinos was based on the 10-year transition period provided and retention of naval bases by the United States, not the limitation on imports, which was one of the chief forces behind the measure in the United States.

During the hour allotted to discuss the conference report in the House, only one representative, Underhill, Republican, Massachusetts, spoke against the bill.

The bill's principal provisions would grant independence 10 years after inauguration of a commonwealth government, to be formulated at a constitutional convention called within one year, approved by the President within two years and then voted on by the Filipinos.

During the transition period tariff-exempt exports to the United States would be limited to 50,000 tons of refined and 100,000 tons of raw sugar; 200,000 tons of raw sugar; 200,000 tons of coconut oil and 3,000,000 pounds of fibres.

Of the sixth of the 10 years, however, an export tax of five percent of the United States tariff would be applied to these shipments, increasing to 25 percent in the tenth year.

The immigration would be fixed at 50 a year during the 10 years and completely prohibited after independence.

## Tens of Thousands of Housewives Serving Canned Pineapple Daily

GROWERS of pineapples in Hawaii are pleased that American housewives in tens of thousands are serving canned pineapple daily to the members of their families. The explanation for this very real interest in the nutritive value of canned pineapple is the fact that comprehensive recent food research shows that canned pineapple has more dietetic value than any other fruit, which has been similarly subjected to scientific study.

Housewives are interested in the fact that canned pineapple, eaten with the meal, speeds up the digestion in the stomach, particularly the digestion of proteins such as eggs, meats and beans. It is a potent aid in helping to prevent acidosis, by contributing effectively to the alkalinity of the blood. It is a rich mineral salt, in its content of copper, iron and manganese which are recognized safety factors against nutritional anemia.

## Stage All Set For Lake Mary Civic Reception

(Continued From Page One)  
and impromptu talks and greetings to the pioneers by E. E. Brady, Judge E. F. Householder, T. W. Lawton, Judge J. G. Sharon, Judge Millard H. Smith, Judge H. S. White and E. R. Wilson.

The reception will begin promptly at 7:30 o'clock and the program is expected to be concluded at 9:30 o'clock so that after refreshments are served those pioneers who wish may return home early. All will be invited to remain in the building and help celebrate the passing of the old year, however, so that an interesting social gathering is anticipated.

The program is as follows: Reception of guests by officers of the trade body and their wives. Opening selection, "Let's Go" by the orchestra.

Invocation, Rev. R. N. Sanders, Welcomer by R. E. True, president of the Lake Mary trade body. Introduction of Frank Evans, master of ceremonies.

Selection, "When You And I"

Jacksonville, will be the week-end guests of Mr. and Mrs. George Weinstein, South Sanford Avenue.

## MACHINES ARE DEFENDED BY BIG ECONOMIST

(Continued From Page One)  
could not have increased at that rate.

"Advancing efficiency, and the drop in American industry from war-time inflation had, between 1920 and 1928, put 917,000 men out of work. I am urging Department of Commerce figures. If to these we add 300,000 in the decline of employees in agriculture, only a part of whom may be charged to machines, and the 240,000 released from railroads, we arrive at a formidable figure of 1,957,000.

"Too many social reformers are overwhelmed with these figures and go no further. But it is not quite half the story.

"For instance, between 1920 and 1928, the increase in the number of workers serving and driving automobiles was 750,000, including 100,000 car drivers, a vocation which did not exist in 1914. There were 100,000 more insurance agents in 1928 than in 1919; an increase made necessary by the large expansion which took place in insurance fields incident to new industry and trades. Electric refrigeration, light and power, and all heating establishments have

Were Young Maggie, the orchestra.

Memorial Interlude: Roll call of first meeting in 1923; prayer by Rev. J. M. Thompson; presentation of pictures of pioneers to the trade body, picture of A. E. Sjobom, by Geocharlie Sjobom, picture of Dr. W. H. Evans by J. D. Evans, acceptance for trade body by R. E. True, solo, "Memories" by Mrs. A. T. Trefry accompanied by the orchestra.

Blackface sketch by W. D. Hoffman and E. P. Lane.

Piano solo, Mrs. H. Houghton.

Reading, "The Last Boy and the Medicine Shelf" by Natalie True. Solo, Miss Pauline Moran.

"For My Grandmother", Miss Daphne Takah.

Introduction of all pioneers, Frank Evans.

Greetings to pioneers, E. E. Brady, Judge E. F. Householder, Jno. D. Jenkins, T. W. Lawton, Judge J. G. Sharon, Judge Millard H. Smith, Judge H. S. White, F. R. Wilson and others.

Selection, "That Old Irish Mother of Mine", the orchestra. Refreshments.

Orchestra selections: "Melody in F", Rubinstein; "Apple Blossoms", Roberts; "The Post's Dream", Huff.

The committee in charge of arrangements include: Mrs. Frank Evans, Mrs. A. T. Trefry, Mrs. H. D. Durant, Mrs. R. E. True, Frank Evans, A. C. Trefry, and H. D. Durant.

**BAN ON MARRIED WOMEN**

### WATER SYSTEM ADOPTED BY CITY TO BRING RELIEF

#### Unemployed Men Sign To Do Work On It To Pay For Costs

NYACK-ON-HUDSON, N. Y., Dec. 26.—More than 40 men who were looking for jobs last week have today definite prospects of work having signed up to perform various tasks during the next month to pay for articles they "bought" at the barter market here Dec. 17.

On the other side of the picture is a group of well satisfied home-makers and storekeepers who are scheduled to have barns or houses painted, carpentry work done, wood cut and sundry other chores performed in exchange for groceries, clothing, house furnishings, farm produce or other articles which they "sold" at the barter market.

The market was held in the home of Mr. and Mrs. Whiston Clay, who donated the project as a means that they have announced they will conduct another this winter. A group of women determined to find a way to bring unemployed persons in contact with those who needed their services, but could not pay for them, co-operated with Mrs. Clay

in organizing the project. Most of the transactions were simple trades, farmers who had chickens in exchange for articles of fruit or vegetables, carrying of material for stacking, or canned goods, or persons who had snowshoes or jewelry they no longer needed, gave them in exchange for firewood, butter, shoes, gloves or foot-stocks. A housewife exchanged her services for board and lodging.

But on two occasions when more complicated situations arose they were very neatly handled. Mr. John C. Broderick, an architect, negotiated the delicate transactions, with the result that he left the market with several boxes of pickled fruit, and the project of two cords of dry oak for firewood and some coal which were to be delivered at his home, and left behind a secondhand overcoat and a plaid.

Mr. Broderick found a contractor who would agree to barter fuel, but had no particular use for the plaid. When the dealer found that he could exchange the plaid for a typewriter which another man had brought to the market, the deal was complete.

An unemployed skilled laborer and superheater was willing to pay the secondhand overcoat with four days' work, but Mr. Broderick had no use for the labor. By shopping around a bit, however, the architect exchanged seven hours of the laborer's work for some pickled fruit which Miss Ethel Miller, proprietor of a farm, had brought in. Miss Miller needed to have wood chopped. For the rest

### INSURANCE UNEMPLOYED CALLED FAVORABLE

#### Germany's System in Practice Not Yet Fully Working Situation

NEW YORK, Dec. 26.—During that Germany's experience with its carefully planned unemployment insurance system has been generally favorable, the system is not yet fully working in this country, according to a report of the National Unemployment Council, which is based on a study of the German system.

The report states that the German system is based on the principle of "insurance" against unemployment, and that it is a "social" insurance system. It is a system in which the unemployed are insured against the loss of their income, and the cost of the insurance is shared by the employer, the employee, and the state.

The report also states that the German system is based on the principle of "mutual aid," and that it is a system in which the unemployed are insured against the loss of their income, and the cost of the insurance is shared by the employer, the employee, and the state.

The report further states that the German system is based on the principle of "solidarity," and that it is a system in which the unemployed are insured against the loss of their income, and the cost of the insurance is shared by the employer, the employee, and the state.

of the work, the laborer promised, he undertook to get Mr. Broderick two cords of dry oak instead and accepted of the cost of the plaid.

An unemployed laborer made a trade with a pair of peaches worked in a sack and a potato, for which he took in exchange a chicken, two sacks of apples and several cabbages. Other trades negotiated during the sale were one laurel wreath for a plaster-of-Paris lion, one laurel wreath for a corky jar, two cords of wood for an arrangement of shoes, one radio set for wood and canned goods, roofing for a supply of eggs and poultry.
