Capitalists and investors have long known that money mortgages, on homes, is the safest of all investments. In the face of financial difficulties, ill health, fire, flood, or other form of adversity, men and women will cling to their homes and sacrifice for them. The home is the last asset from which they will part.

The security back of installment loans is constantly increasing because the principle sum loaned is constantly decreasing, while the entire property (or security) value remains under first mortgage until the loan has been fully repaid.

A right understanding of sound investment is as necessary today as ever. The principal factors governing investment are:

- 1. Safety (or Security)
- 2. Income (or Earning Power)
- 3. Availability (or Convertibility Into Cash)

The wise men wants absolute safety with reasonable income and a security which can ALWAYS BE CONVERTED INTO MONEY WITHOUT LOSS.

Cover these requirements by owning shares in the

Geneva Street paving has been started. Unusual energy is being applied to complete this important thoroughfare at an early date.

A building program is now under way. The first home, now under construction, will be completed in the early part of May. Come see the plans.

Sanford is conceded to be the center of all Florida activities. Its future is secure. All present improvements and developments indicate that it will take its place as the center metropolis of the state long before it had been anticipated. With such prosperity in store for the city and with such activity now being carried on throughout this section, unlimited profits will be paid those who will back their confidence with investments. Sanford Grove is outstanding as a foremost investment opportunity of the Sanford District.

This unusual activity is sure to send prices soaring skyward

ASTOR FARMS

5 and 10 Acre Tracts

The greatest fine art of the future will be the making of a comfortable living from a small piece -ABRAHAM LINCOLN.

And today in Sanford this prophecy has been fulfilled, after seventy-five years, even in greater volume than had ever been anticipated.

For the territory that surrounds our city has proven that it is superior to all agricultural land. The possibilities that are in store for those that seek to make their fortune from the fertility of the soil are boundless. They that invest in these undertakings are sure of all the pleasures and comforts of life with a location close to one of the fastest growing cities in the state. This in itself speaks of opportunity—opportunity to secure a fast growing

Thousands of Perfection stoves are used in Florida-in private homes and in apartments. Grandmothers recommend them to their grand-daughters. And each user is a Perfection enthusiast. There are many reasons why.

Clean, intense heat pours directly into your cooking through the long blue chimneys, which burn every drop of oil and convert it into ample cooking heat before it reaches the utensils. Kettle bottoms stay as bright and clean as when

Touch a match to the wick for instant heat. The flame is visible at all times through the mica windows. To extinguish, turn wick 'way down. Immediately all heat is gone. No smoke. No odor. No hauling of coal, or ashes, for you use only kerosene, the safe, household fuel.

And Perfections need no watching, as M. Meddick says. Set the flame for a particular cooking need—high, with yellow tips inches long, for quick frying; or for simmering—and you can trust to remain for hours as you set it. It was the first murder in this county in a quarter of a century.

It was an unusually brutal murder, —Mrs. Nesbitt's skull was crushed from a death-dealing blow and her body, scratched, bruised and torn, was placed in a bath tub partly full of water.

At first, the mystery of the crime, intrigued Troy's "Main street." But this angle quickly was shoved into the background by the matter of fact admission of the husband at the inquest that "Fran" smoked a cigaret occasion-

# READ THESE TRUTHS ABOUT A "REAL FLORIDA" CITY.

A day-by-day story of a Florida community that we believe will show more comparative progress in the next five years than any other city in the state.

THIS IS NO. 5

### Sanford and the Potential Possibilities of the St. Johns River-Indian River Canal

Seminole County, of which Sanford is the County Seat, and Brevard County have consummated plans for the construction of a canal which will link together two commercially important rivers and connect the Solid Central Section of the State with the East Coast.

It will drain and open for agricultural development approximately a half million acres of fertile land in the vicinity of Sanford, as rich as that in the famous Mississippi delta.

It will provide a direct inland water route from Jacksonville to Miami, an estimated distance of 500 miles, and will comprise the Florida inland waterway link of the Maine to Key West intracoastal system.

Its effect upon Sanford's increasing importance as an inland port can be recognized by the fact that Sanford is on Lake Monroe, head of navigation on the St. Johns River, which, in turn, is a direct route to the sea and to principal Eastern seaports.

At Sanford are inexpensive homes and homesites, farms, acreage, business and industrial locations. Municipally owned utilities. Forty-seven miles of paved streets. Three banks. Modern schools, and churches of all denominations.

New Forrest Lake Tourist Hotel. Eighteen-hole golf course. Fishing, hunting, water sports. Other recreational facilities of the type that has brought renown to other resorts.

Sanford's Claim of Potential Values

Set forth in a series of fourteen advertisements in this newspaper, in which the Story of Sanford, the City Substantial, is being told, and by which you will be shown that Sanford NOW has every evential for a great city,

You'll see property values like those you are accustomed to up North and you will be convinced, as others have become, that today, Sanford offers the same opportunity as St. Petersburg, Mlami, Orlando and Daytona offered ten years ago.

PASSA GRILLE, Fla., March 12. (P)—Solution of the great mystery of the telephone, which hung like a pall between the inventive intellect of Alexander Graham Bell, and realization of his dreams, came as an accident. Thomas A. Watson, Bell's co-worker, received here Wednesday on the golden anniverary of the first telephone message. Dr. Bell and Mr. Watson were working in Boston on a "harmocist telegraph" by means of which, upon its perfection, Bell intended to transmit four telegraph messages almultaneously over a single wire. All the time, Mr. Watson said, he was watching also for a way to realize a consummation by which he believed the voice could be transmitted electrically.

Mr. Watson said Mr. Bell had told him:

"If I could make a current of electricity vary in intensity, precisely as the air varies in density during the production of a sound, I should be able to produce speech telegraphically."

But how to produce this undulation wa sthe mystery which held realization of the telephone from the genius.

Messages Were Mixed Up.

"In his experiments on the harmonic telegraph," said Mr. Watson, "Bell had found that the reason why messages got mixed up was inaccuracy in the adjustment of the pitches of the receiver springs to those of the transmitter.

Mr. Bell was in the habit of observing the pitch of a spring by pressing it against his ear, while the corresponding transmitter in a distant room was sending its intermittent current through the magnet of that receiver. He would then manipulate the screw until that spring was turned in accord with the pitch of the whine coming from the transmitter.

"All this experimenting was "That current had passed the connecting wire to the distant receiver, which, fortunately, was a mechanism that could transform the current back into an extremely faint echo of the sofind of the vibrating spring that had generated it. Sanford needs homes; it is impossible to locate a house in this city. It is just as impossible to secure an apartment taking into consideration those that have been recently completed.

Homes is the crying need of the city. This need offers you as an investor unmatched opportunities to reap profits.

To care for our increasing population, building and construction of even greater magnitude must be started at once. This population growth is certain to continue due to the intensive advertising campaign now being featured by the Chamber of Commerce in newspapers throughout the state.

Our representatives will furnish you with more complete details concerning this building offer. We advise every investor of Loch Arbor property to come and talk this over with us. There is every opportunity for unlimited profits for those who are willing to grasp this opportunity. Let us urge you to listen to this splendid building opportunity.

# These Sedans Illustrate the Low Cost of Finer Transportation

Every day the American public becomes better acquainted with the Better Buick.

The capacity of the great Bulck factories is taxed to supply the demand.

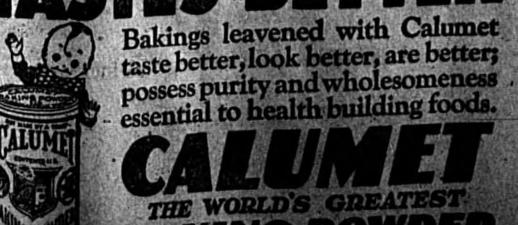

The Better Buick 5-passenger, 4-door and 2-door sedans are good illustrations of the reasons for Buick's accelerated

These sedans are real sedans with Fisher bodies, and striking Buick closed car body lines. Graceful. No barsh corners anywhere. Objects of admiration on boulevard and highway. Upholstery of finest quality. Interior refinements luxurious and complete.

And these fine bodies ride on the famous Buick chassis, with all the modern improvements and refinements introduced by the Better Buick.

The only similarity to "coaches," and other low-priced closed-car types, is price. Come in and compare these sedans before you spend your money. Here is finer transportation at lower cost.

French Are Optimistic But English People Flay Chamberlain

GENEVA, Mar. 18.—(P)— Either Germany or Franco must give way in the controversy over the reconstruction of the council of the League of Nations if the League is to be saved and Europe not again driven to despair. This was the situation today as seen by close observers of the situa-

tion in Geneva. The German representatives have reittersted that they cannot accept an obligation to approve a new non-permanent seat in the council for Poland, for this would violate the fundamental policy which Germany has fashioned to guide her attitude as a member of the League, a policy of co-operation by all the members of the League, and not a selective policy of all in herself with special groups.
