The German who was thrown in jail for vagrancy in France when he had 5,000,000 marks in his pocket must have felt that at least the spirit of the war was not over.

"We want the wages paid the brick layers" was a sentence on a banner carried by the hod carriers in the Denver Labor Day parade. Well we would all like to draw those wages but the hod carriers must remember we are not all brick layers.

We too, like Senator Johnson, want to see the day when a dollar will take us in and let us out of a first-class restaurant without having to look the other way when the waiter hands us our check and stops the hand a moment in front of us for the looked-for tip.

Chief Justice Taft in suggesting to the American Bar Association the qualifications of a judge, struck a high key when he said: "A judge's conduct in every particular should be above reproach. He should be conscientious, studious, thorough, courteous, patient, impartial, just, fearless of public clamor, regardless of public praise, and indifferent to private, political or partisan influences."

Lord Birkenhead, the Englishman who insists that he is going to say what he has thought out to say about Mr. Wilson or "bust," should be permitted to have his "say." The American who insists that "we knew the American people would not back his high-minded but idealistic plan" is not capable of more harm than many prophets in this country who use the classic and familiar, "I told you so," when Mr. Wilson went to Paris, the American people were practically unanimous for his "idealism." It was after months of the bitterest partisan struggle in our history that a temporary turning away from the Wilson idealism was effected. When Birkenhead proclaims Wilson a great man but foolish, he is proclaiming himself a "bunder."

BREAD UPON THE WATERS.

In discussing the call on this country to aid the stricken Japanese, the Salt Lake Tribune calls attention to the fact that the Japanese contributed \$100,000 for relief in the San Francisco disaster a few years ago. It will be repaid many fold, and illustrates the everlasting truth of Him-

A CHANGE OF PROGRAM EVERY DAY

who said, "bread cast upon the waters will be returned after many days."

It is this bread moving back and forth upon the "waters" that eventually brings nations closer together in mutual consideration. We sometimes wonder at what men call the wisdom of Deity in utilizing untoward events as occasions as well as means of shaping events for the good of the race. This seems to invite men to follow this policy, if we may call it that, of enriching life in one way through the great disasters that come.

ITALY AND THE LEAGUE.

If Mussolini—Italy for the present—in the interest of his country would look ahead, he might not be so determined to flout the League of Nations and be his own court and jury regarding Greece and the punishment that shall fall upon the latter as the scapegoat for the acts of a band of assassins, who looked upon themselves, no doubt, as a band of Greek heroes in villainously slaying five innocent Italians.

Greece cannot fight back. The country has lost its standing with itself and other nations. It has been the football of the greater powers and of the lesser Balkan states. It is a lesson to nations and individuals in the evolutionary law. Greece is on the receding curve of it. But all this does not justify or excuse the conduct of the Mussolini government in resorting to old methods that may embroil a continent. Suppose it were some other nation that was in Greece's place, a nation fit to answer back in terms? Would Italy be in such clamorous mood for war? It may come some day, sooner than the present dictator believes possible, that Italy shall be in need of a buffer like the League of Nations. For the present Italy feels like Austria felt in July of 1914. To Austria retribution came fast and with terrific force.—Rocky Mountain News.

The Herald delivered six times a week for 15c.

JAPAN, THE STRICKEN.

The statement that the catastrophe in Japan must of necessity, reduce her to a six-class power and that she will not regain her position in world matters in a century must be taken with a grain of allowance. In fact with a lot of allowance. So far no one knows just how much she has suffered. Without doubt it is the worst disaster in the known history of the world. Yet Japan can come back and she will come back. Here are a people not unlike the American people. They thrive on disaster for they co-operate to overcome the results of the disaster.

Japan from north to south will join in rebuilding the cities that were wiped out and in rehabilitating their destroyed navy and forts. The world will see to it that she does not suffer any great setback and she will see to it that the loss is only temporary. The same writers who are saying that Japan will not come back in a century said San Francisco would not come back at all. That a new city would be built on the Oakland side. But San Francisco came back greater than ever. Galveston, Johnstown, Pueblo and all the rest came back. So will Japan. To be sure it will take a longer time but not nearly as long as people imagine today.

What America wants to do is to get in and help her come back but help in such a way that Japan will see in the effort nothing but friendship will see in the future nothing but co-operation and friendship between the two nations. If America allows Germany and Russia to secure the feeling of good will that should be secured through our co-operation, we will have missed an opportunity that only comes to a nation once in a century. It is similar to the opportunity France saw and accepted during the Revolutionary war. At times the relations between this country and France have been a little strained since then but thanks to the good people that both nations contain, those times are few and far between and they never amount to anything serious. "Lafayette we are here" may or may not have been spoken by General Pershing but the spirit of the words still burn in the hearts of all Americans.

Why not have America step into the breach in Japan and with money, men and supplies backed by the spirit of our Christ, established a friendship between the two countries that will be as lasting as the friendship between France and America. "Japan we are here" would be a wonderful sentence if our help betruded the words.

AN ALARMING RUMOR, IF IT HAS ANY BASIS.

It is an ambitious but threatening program which the communist international, with headquarters at Moscow, is planning to carry out, if the expose of their plans which the United Mine Workers are making in New York may be relied on. It is nothing less than the overthrow of all the present governments in America, federal, state and provincial, with the elimination of all constitutional forms and foundations, to be followed by the establishment of a soviet dictatorship with absolute powers, subject only to the international at Moscow. They propose to effect this rev-

olution by "boring in" to the labor unions, converting them to their felonious designs and using them to bring on the revolution.

We have very much misread the character of the American laboring man if he lends himself to any project for Russionizing America.

The proposition is almost too absurd for consideration, and would be knowledge that nothing is too absurd for the communists, who are always plotting the abolition of all existing governments.

The fact that the expose is being made by the United Mine Workers, who we believe contain within their ranks as large a proportion of ignorant laborers from the communistic parts of Europe as any of the labor unions, seems to carry the proof that they are not in sympathy with any such designs. Certainly no intelligent American laborer will lend his assistance to destroy a government to which he owes so much.

It is barely possible that the project is broached at this particular time in the hope that it may have some effect on the negotiations going on between the mine workers and the operators. It may be in the nature of an anchor thrown to windward to bolster up a losing cause.

If there is anything in it, we shall doubtless hear more about it soon. There can be no doubt that there are many agitators and communists who have crept into the ranks of labor, and are constantly fomenting trouble and disturbances; the Posters, Howatts and Fitzpatrick are notorious examples, but we believe their influence is not proportionate to the noise they make. The American workingman can be trusted not to tear down the house that shelters him.

Robs Calomel of Nausea and Danger

Medicinal Virtues Retained and Improved—Dangerous and Sickening Qualities Removed. Perfected Tablet Called "Calotabs"

The latest triumph of modern science is a "de-nauseated" calomel tablet known to the drug trade as "Calotabs." Calomel, the most generally useful of all medicines thus enters upon a wider field of popularity—purified and refined from those objectionable qualities which have heretofore limited its use.

In biliousness, constipation, headache and indigestion, and in a great variety of liver, stomach and kidney troubles calomel was the most successful remedy, but its use was often neglected on account of its sickening qualities. Now it is the easiest and most pleasant of medicines to take. One Calotab at bedtime with a swallow of water—that's all. No taste, no griping, no nausea, no salts. A good night's sleep and the next morning you are feeling fine, with a clean liver, a purified system and a big appetite. Eat what you please. No danger.

When you run out of Gasoline!

there is a most effective danger signal to warn you—your car comes to a stop without any particular amount of damage being done. It is different when you run out of lubricating oil in your motor; there are no warning signals, nothing to flag your attention until great damage has been done.

The greatest single factor in the economical and efficient operation of a motor car is the proper lubrication of its engine. Sufficient quantity, the right quality, the proper weight or grade, and the frequent replacement of oil are the things you want to watch.

You can solve all these problems by putting nothing in your crank case but Polarine, consulting the chart of recommendations to determine just what grade your car requires, and renewing your oil completely after it has been used for six or seven hundred miles.

There is no variation in the quality of Polarine. Wherever you see a dealer who displays a Polarine sign, you may feel assured that you can get there the finest motor oil on the market to-day.

Polarine MOTOR OIL

CROWN Gasoline

is made and is sold with the same safeguards as to quality and uniformity that are given to Polarine. Crown Gasoline is a fuel that will give you quicker pick-up and greater power.

RHEUMATISM

The Disease That Cripples and Kills... Quickest Way to Get Well... Through New Prescription Containing Seventeen Ingredients That Renew Every Part of Body.

Rheumatism may be caused by any number of things, and this is why it is so hard to cure. If we knew what caused any particular case of rheumatism, it could be promptly arrested. Any remedy that merely relieves the pain is not sufficient. The only sure way to relief is through a thorough systematic treatment that will reach every part of the body and all the vital organs. Then you are sure to reach the cause without guessing.

This complete treatment is found only in a prescription called Re-Cu-Ma, which contains seventeen well known and thoroughly tested medicines, so skillfully compounded that each one performs its function on the various parts of the body perfectly and harmoniously.

You will find the cost of building materials has no lowered as to make it well worth your while to build at once. We carry high-grade materials. Ask your contractor.

DEATH IN YOKOHAMA—39

including 29 British and 20 Americans.

(Continued from page 1) ... 908 foreign residents, 100 were killed, including 29 British and 20 Americans.

The foreign minister declared to be untrue reports that the capital was to be removed from Tokio, although he said many of the industrial, commercial and publishing houses plan to remove temporarily to the Osaka and Kobe districts.

"Following the first shock on the first of September," the minister stated in his dispatch, "1,310 separate shocks were recorded up to 6 a. m. on the 6th of September."

"The region suffering the extreme earthquake shock extends 100 miles from north to south and 130 miles east to west, or from Suzukawa on the Tokaido line to Kofu, Yenkyo Hachioji, Warbi, Tsuchiura and to the peninsula. This region covers seven prefectures, and includes the five cities of Tokio, Yokohama, Yokosuka, Kofu and Takasaki and thirty-three other counties.

"The population of this whole affected area is 6,000,000. And the property damage, which is, of course, immense, is not yet determined or estimated.

"Part of the earth ramparts surrounding the imperial detached palace at Nikko were damaged, but the emperor and the empress are safe.

"After the first shock the Prince Regent went from the main palace in Tokio, where he was attending to the usual business, to the Atsukasa Palace, and lived in a tent in the garden from that time until the afternoon of the sixth, when he again went back to his usual quarters in the Atsukasa Palace.

"An official investigation by the ministry for foreign affairs shows that in Yokohama, of 3,000 foreign residents, 100 were killed, including 50 British and 20 Americans. Of the survivors, only nine remain ashore, most of the others having gone to Kobe.

"The Tokio prefectural is guarding for Yokohama the property of the foreigners, collecting the dead and taking all possible measures of sanitation.

"Up until midnight on the eighth, the authorities in Tokio had burned the bodies of 60,000 dead. The number still uncounted of those drowned or buried under debris or burned in the general conflagration is probably very great.

"Up until the eighth in Tokio, first aid had been administered in the emergency hospital stations to upward of 500,000 injured and sick.

"Casualties in Yokohama are now estimated at 110,000, or one quarter of the entire population.

"Casualties in Chiba and Kanagawa region are great, but the investigation is not yet complete.

"Railway and other communications are rapidly being restored.

"Supplies of general commodities are increasing."

WASHINGTON, Sept. 12.—Consul Dickover at Kobe transmitted yesterday a dispatch from Ambassador Woods at Tokio, dated September 7, saying the following Americans were among those known to have been killed:

Mr. and Mrs. Amrine and child, Paul R. Cannon, Mrs. Albert Mandel and son and Paul E. Jenks.

In an undated dispatch from Kobe, Consul Dickover said that Mrs. L. H. Jenks previously reported killed, was safe in Kobe.

Consul Dickover said he had received from Tokio definite information that Helen Cameron and Miss Spencer Gilbert, both of Virginia, are safe.

TOKIO, Sept. 12.—Deaths from the earthquake, fires and tidal waves in and around Tokio are estimated today to number 150,000. Groups of one hundred and more bodies have been found in various spots. Dysentery is prevalent and the government has informed the American embassy that the relief personnel en route will be welcomed. American marines have landed and are directing a bakery and an automobile repair shop at American embassy.

Blessed is he who found his work; let him ask no other blessedness. He has a work, a life purpose; he has found it and will follow it.—Carlyle.

UNION MINE WORKERS CLAIM THAT LITHUANIAN BOLSHEVISTS LED THE HERRIN, ILL., MASSACRE

Planned to Start Revolution and Overthrow Existing Government

NEW YORK, Sept. 12.—Eighty-six Lithuanian Bolshevists led the Herrin massacre of non-union Illinois miners, the United Mine Workers of America charges in making public today the third of a series of articles exposing an alleged plot by Moscow Communists to gain control of organized labor in the United States and Canada, stage a revolution and overthrow the existing governments.

The mob leaders—67 of them—were members at Herrin of the Bolshevik Lithuanian branch of the Communist Party of America, according to the miners' article, 19 other members of the same party were imported as agents to foment the attack on the strip mine of the Southern Illinois Coal company which culminated in the violent death of 22 men in June last year.

"This revolting, inexcusable crime was fomented, promoted and caused solely by Communists," says the writer. "It was a carefully planned affair, schemed with all the diabolic cruelty and disregard for law that characterizes the Communist movement."

William Z. Foster, promoter of the "one big union" idea in America, is alleged to have been the dominating figure in events preceding the massacre, numbering among his aides Jack Carney, Chicago editor of the radical VOICE OF LABOR, Nick Dozenburg, Carney's business manager, Arne Swaback, of the central executive committee, Communist Party of America, Oscar Larson of the Young Communist League, Gus Fraenkel, "Red" worker among the rail employes, Charles Krumbel, district Communist official, and Nels Kjar, convicted in Chicago courts for conspiring against the government during the war.

The author's history of the massacre follows:

"For more than seven weeks preparations had been in progress in Franklin and Williamson counties to bring about the attack upon strike breakers and armed guards at the strip mine. Violence and disorder were rampant in southwestern Pennsylvania. Communist groups in New York, Cleveland and Chicago were active in their efforts to cause the strike in southwestern Pennsylvania to expand into a great revolutionary movement in which the original causes for the cessation of work in the mines would be lost sight of and an armed insurrection, having for its purpose the establishment of a Bolshevik dictatorship in this country and enforced recognition of the Russian dictatorship and the Communist International, would be brought about.

"The plan was to have simultaneous uprisings in southern Illinois and, if possible, in the vicinity of Bellaire, Ohio, which also was a hot-bed of Communist agitation and propaganda, and in the region surrounding Uniontown, Pa.

"A telegram sent to local union officials at Herrin by John L. Lewis, president of the United Mine Workers, placing workers of the strip mines in the category of 'strike-breakers' was shrewdly twisted and distorted according to the boasts of the Communist leaders at Chicago, into an 'invitation' to attack the strip mines and the workmen employed there.

"Officials of the United Mine Workers had no intimation that an attack was contemplated, or that a conspiracy within the Communist Party of America existed at the time to precipitate tragedy such as took place the day after the telegram was received from President Lewis.

"Agitation under the active efforts of the Communists continued during May and June. The strike area in southern Illinois was carefully examined and the points where riot, violence of armed insurrection might be started were charted and catalogued. In the list of these places were Christopher, Zeigler, Sesser and Herrin.

"With the local Lithuanian miners as a nucleus, a Communist Party chapter was organized in Herrin, holding meetings secretly in the Lithuanian language but taking instructions from agents of Dozenburg in the offices of Carney at Chicago. Quietly and stealthily they worked among the idle miners at Herrin, preaching armed attack upon the strip mines."

Union strikers at Herrin inquired of President Lewis the status of the non-union miners who continued working the strip mine while the national strike was in progress. In a telegram on June 20 he classified them as strike-breakers.

by the Communist agents and distorted into an excuse for an attack upon the strip mine," continues the narrative. "The workers there were captured and, under the leadership of the 19 Communist agents who, according to Dozenburg, had been imported for the purpose of starting insurrection and revolution, the men were shot down."

Freshly encouraged by this success the Communists are said to have redoubled activity among railroad, marine-transport and farm workers. The seamen already were organized as "one big union," so the minimum of effort was necessary in that direction.

The miners also were "one big union," ripe for capture by the Moscow agents. But there were four big brotherhoods and 16 unions on the railroads, so, "in order to control them as a unit and mobilize them into the Foster one-union scheme, the 'Minnesota Plan' for a single departmental industrial union" was evolved."

The railroads became the next objective. The Herrin massacre had demonstrated what the miners would do if properly chaperoned. The plan now was to bring about in some quarter, preferably a vital railroad center like Chicago or Pittsburgh a similar outbreak among rail workers. The shop-crafts were then on strike.

"The convention of agents of the Communist International and leaders of the Communist Party of America at Bridgman, Mich., last August constituted one of the greatest conspiracies in the history of the United States," the mine workers' narrative continues.

"Intent upon promoting the general uprising of all coal mine, railroad, marine transport and farm workers and realizing their aim to a successful realization before the coal and railroad strikes could be settled, their revolutionary sittings were cut short by the appearance of the county sheriff.

"The raid upon that convention was one of the greatest blows the Communist organization in America ever received. Its members were confined in jail and compelled to shift their activities from the promotion

CONVICT STRIKE WAS A FIZZLE SAYS JOHNS

(By The Associated Press)
TALLAHASSEE, Fla., Sept. 12.—The strike of the twenty-four convicts, at state road camp No. 12, in Bradford county has ended, according to advices received by the state prison authorities from Convict Inspector T. B. Johns, who was ordered to the camp last Friday.

A telegram from Johns said the trouble arose when the son of J. S. McNeill, captain of the camp, shot at a negro convict who had cursed him. The convicts have returned to work and everything is quiet at the camp, Johns reported.

Following the shooting, according to the inspector's report a convict named Eddie Callahan, called the strike and the men followed him from the place where they were working, back to the camp.

ATHENS, Ga., Sept. 12.—A. W. Brooks, 60, a cotton broker, was found dead here today with a pistol bullet wound in his head. A pistol was found near the body and the police pronounced it a case of suicide, giving despondency as the cause.

Brooks formerly resided in Norfolk, Va., where it is said his nephew is president of the Guaranty Title and Trust Company.

of industrial revolution to the raising of money for bail and preparing a defense in an effort to escape imprisonment under Michigan's criminal syndicalism law.

Since then, it is charged, the Communists tried unsuccessfully to foment a general strike among rail workers last November, and among coal miners last April 1, which also failed of execution. Another "one big union" movement was launched among transportation workers, however, from an office in St. Paul, Minn. This campaign is alleged to be still in progress, under the directorship of C. H. Kennedy, head of the organization, and O. H. Wangerin, secretary-treasurer.

The Lowest INSTALLED Price

Announced for a Farm Electric Light and Power Plant

The DELCO-LIGHT Man is ready NOW to install your DELCO-LIGHT Plant COMPLETE.

at \$549.50 for the most popular farm size plant.

UNEQUALLED installation facilities, including a nation-wide organization of over 4000 installation men, make it possible for Delco-Light with their quantity production to set the lowest price ever announced for an electric light plant completely installed.

And—it is highly important, in purchasing any lighting plant that you know the installed price.

The installed price for the most popular size Delco-Light plant is not only the plant itself—it includes freight; it includes the actual installation of that plant; it includes the standard Delco-Light Excite Battery composed of sixteen large capacity cells, built for long life, with extra thick plates and heavy glass jars; the wiring of your house for ten lights to be located anywhere you wish; one power outlet wherever you may want it; a standard set of ten drop lights with sockets for ten standard electric light bulbs—the complete installation ready for you to turn on the lights.

This is the way to buy your electric light and power plant.

Terms So Easy You Cannot Afford To Be Without One

To make it easy for you to get your Delco-Light plant we have set a very low first payment and made the terms very easy. The Delco-Light man will explain these terms to you. A liberal discount allowed.

Standard Outfit With Smaller Size Plant, \$442.50
