\$2-A-Gallon Gasoline Possible This Year, Experts Say

WASHINGTON (UPI) — Decontrol of oil prices could shoot the cost of gasoline through the \$2 barrier this year, but industry and government experts figure the increase probably won't be that high. The effect of decontrol alone, assuming no increase in the world price of crude oil, would add 15.1 cents to the average pump price of a gallon of regular leaded gasoline during 1981, an Energy Department study forecasts. The study, projects retail prices will range from a low of \$1.48 to a high of \$2.23 by year's end when adjusted for factors such as crude price

boosts, demand patterns and inflation. A base projection, falling between the high and low forecasts, put the 1981 year-end price at slightly more than \$1.80. Assuming no other factors but decontrol, and constant \$25 per barrel world crude oil, the average price still would jump from \$1.22 to \$1.37 during the year, the study said. The agency's "Short Term Outlook" study was based on information available before December 1980, thus missing the latest round of OPEC crude oil price increases and President Reagan's

decision last week to decontrol domestic prices immediately. But Murray Weidenbaum, chairman of Reagan's Council of Economic Advisors, said prices will reach the same levels by the end of the year under immediate decontrol as they would have under the gradual phase-out that would have ended Sept. 30. Most experts believe the price-boosting effect of Reagan's move will be immediate, particularly with home heating oil, but that overall increases will be about the same as with gradual decontrol. Consumer groups opposed to decontrol were

warning of 12-cent hikes in gasoline and heating oil prices. Dan Lundberg, publisher of an oil marketing newsletter, forecast 10 cents or more. "I think that oil companies are going to raise prices in the short run," said Dr. S. Charles Maurice, head of the Texas A&M economics department. "But, in the long run, decontrol can't possibly cause prices to be higher than they would otherwise be, because they're going to increase the supply of oil." "The controls themselves have probably caused prices to be higher than they should, because they decreased the supply of crude." Maurice scoffed at consumer group charges that decontrol is inflationary, saying it "could possibly even keep prices from being a few pennies higher" over time. Gasoline already is selling for \$1.50 a gallon at scattered full-service stations around the country, a far cry from the 30-cent gallon available before the 1973 Arab oil embargo. But such price comparisons, for all the consumer outrage they evoke, can be deceptive. In unfiliated dollars, gasoline prices actually declined from 1974 through 1978. Predictably, U.S. consumption rose, as did oil imports.

'Rainy Days And Mondays'

Brittle County Gets Boost From Rainfall

By DONNA ESTES Herald Staff Writer Seminole County received more rainfall Sunday night and early this morning than during the entire month of January. A spokesman for the National Weather Service at McCoy Jetport, Orlando, said today a total of 31 inches of rain fell in the Orlando area — in Seminole and Orange counties — in January. Normal rainfall for the month is 2.28 inches. Recorded rainfall at the Sanford sewer treatment plant for the seven-hour period from midnight to 7 a.m. today, however, was 49 inches. The Altamonte Springs pollution control plant recorded a .30 rainfall for the period from 10 p.m. Sunday until 6 a.m. today. Although Monday's nearly half-inch of rain may help ease the severe fire hazard which has existed since summer, it will come nowhere near ending it and the critical stage could be reached again within a few days. "Mike Martin, Seminole County forester, said the rain "has helped, but about all it's going to do is give us a chance to catch our breath and repair our equipment to be ready for the next wave." "Another cold front is expected to move into the area tonight, chasing any lingering clouds and minimizing any chance of further rain for several days, Martin said. "What we need is two or three days of steady rain to give things a good soaking," he said. "Monday's rain reduced our risk of wildfire somewhat, but things will dry out quickly and we'll be right back where we were." Martin reminded county residents

that all outside burning is prohibited due to the extremely dry conditions. Anyone caught defying the ban will be subject to criminal prosecution, he said. Along with the low rainfall, January will also be remembered for some of the coldest temperatures in recent years. The average temperature in January for the area was 51.3 degrees, nine degrees below normal, the weather service spokesman said. The highest temperature recorded during the month was last Friday at 77 degrees and the lowest was 30 degrees on Jan. 14. Record low temperatures were recorded on Jan. 4, 13, 18 and 19 with the low temperature on the 14th tying the all-time record low of 20, recorded in 1977. Unofficial records, however, say that the lowest temperature ever recorded on a January day in this area was 18 degrees in 1898. The coldest average temperature for the month of January was recorded at 50.4 degrees in 1946. The second coldest average temperature was 50.6 in 1977 with last month being the third coldest at 51.3. The spokesman said January was the fifth driest month on Weather Service records for the area. The National Weather Service has been keeping official temperature records since 1918. Temperature records prior to that time were kept on a cooperative basis beginning in 1882. Normal rainfall for February is 2.96 inches. Some places in the Seminole-Orange county area "got close to an inch" of rain Sunday night and this morning, the spokesman said.

Posed like thundering steeds taking a steeplechase water jump, this pair of ponies and youthful riders shooed away by the morning's rain. Ft. Mellon Park stood alone Monday, their

'Phil' Predicts 6 Weeks Of Winter

PUNXSUTAWNEY, Pa. (UPI) — Punxsutawney Phil saw his shadow today, which legend has it means six more weeks of winter. The mythical groundhog climbed out of his hole at Gobblers Knob in Punxsutawney at 7:28 a.m., an appearance delayed somewhat by rain and snow. Phil, wearing a yellow ribbon in honor of the former American hostage, bedded his forecast a bit, predicting the rest of winter would be mild. "That was because Phil couldn't quite make up his mind," said Punxsutawney Groundhog Club president Charles Erhard. "About 150 people showed up to watch Phil make the forecast, which in this 94th year was made out of a redecorated burrow. As in the past, the eyes of America were on Phil today, waiting for the critter to poke his furry head out of the burrow and tell us just how much longer this winter will last. The forecast was a chilling one for Pennsylvania and other cold spots around the country, especially in places where the mercury has fallen to record lows this winter. Phil, the most famous resident of his west-central Pennsylvania hamlet, had another task at hand today. The long-time Numero Uno of Groundhogs had to again ward off challengers to his throne, as a host of little hogsters, such as Buckeye Chuck of Ohio, made their own forecasts, and attempted to deflate Phil's claim to fame. In the past couple of years, members of the Groundhog Club, a booster group of sorts, have scoffed at the late comers and defended their rodent against skeptics. Erhard said other animal prognosticators such as Buckeye Chuck, Wisconsin's Sun Prairie Dog and Oklahoma's Grizzly Bear, are "just Johnny-come-lately imposters," he said. The key to the whole Phil affair, his supporters insist, is his performance. Phil is "never, never wrong," said Erhard.

Heating-Bill Woes? 1,500 Families Can Gain Assistance

About 1,500 needy families in Seminole County could receive assistance with their heating bills if only they would apply for the help. Elmer Wontney, Seminole County supervisor of the state's Department of Health and Rehabilitative Services' (HRS) low income energy program, said today about 1,500 needy families have applied locally for the assistance. "This is about half of the applications we expected," he said today. Meanwhile, the U.S. Department of Health and Human Services has given Florida until Feb. 13 to accept ad-

ditional applications for the assistance. The original deadline was last Friday. HRS requested the extra time because the original deadline would have denied aid to farm workers and others left jobless due to the recent coldwave. Florida was awarded \$18.7 million to help needy persons pay their winter heating bills, but applications merely trickled in. Statewide HRS expected more than 300,000 applications and received about 55,000. Maximum monthly income of those

applying for the assistance is: \$318 for one person; \$418 for two persons; \$519 for three persons; \$621 for four persons; \$723, five persons; \$824, six persons; \$926, seven persons; and \$1,028, eight persons. Wontney said persons with higher income may be eligible under certain circumstances, advising those needing assistance to contact the HRS office at the Live Oak Center in Casselberry. Wontney urged those filing applications to pay particular notice to make sure they sign the applications and affix the date.

Applications are available from any HRS office and at the Food Stamp office, 106 N. Oak St., Sanford, and Live Oak Center, Building 4, Casselberry; Longwood Health Clinic, 174 W. Church, Longwood; Sanford Health Department, 900 S. French Ave., Sanford; Migrant Clinic, 2145 Oak, Sanford, and 96 Division St., Oviedo; Seminole County Welfare Office, 900 S. French, Sanford; Oviedo Police Station; Federation of Senior Citizens Clubs of Seminole County, 837 Magnolia Ave., Altamonte Springs; and Seminole Community Action, 1101 Pine ave., Sanford.

The amount of subsidy available for each eligible family which applies will be determined by the total number of approved applications. Sandra Gaines, energy coordinator with Seminole Community Action, said those needing assistance will receive a one-time check to assist with the rising cost of energy. She estimated subsidy per family at about \$40. The subsidy is also determined on the total heating cost for the year per family. Ms. Gaines said. — DONNA ESTES

Casselberry Ordinance Could Block High-Rise Plan

By CHARITY CICARDO Herald Staff Writer A high-rise development proposal and an ordinance against high-rise buildings will be discussed at the Casselberry city council meeting 7:30 p.m. tonight. A proposal by Bonaire Development Company, Inc., Altamonte Springs, for a 10-story high rise condominium

complex on Lake Howell will be discussed in a work session after the regular meeting. Mayor Owen Sheppard said the building and planning board approved the development only in concept. They did not approve the actual plan, he said. Although he doesn't see any correlation between the high rise proposal and the revised ordinance, Sheppard said today

some members of the council might use the ordinance as a means to prevent the development. At last week's work session, the council informally voted 3 to 2 to change an ordinance that allows buildings up to 100 feet high. The council informally decided to change the height limitation to 35 feet. The council placed the proposed revised ordinance on

tonight's agenda for action so it may be advertised for public review. Charles Wood, of Wood Associates Inc., an advertising and marketing firm in Winter Park, said the \$60 million Bonaire complex will be located on 44 acres adjacent to Lake Howell. He said if the city turns down the development, it will be turning away \$100,000 in taxes a year plus construction jobs.

WILLIAM LAYER

Meeting Tonight At Seminole High

Layer, School Boosters To Discuss Zones

Seminole High School Principal William "Bud" Layer will present basic criteria which he feels the school board should consider in deciding how to redistrict students in the north end of Seminole County at the school's Booster Club meeting 7:30 p.m. today. The school board meets 7:30 p.m. Thursday to decide which students will attend the Lake Mary High School. Layer and a Booster Club advisory committee will discuss criteria which should be incorporated in any decision the school board makes in regard to high school zoning in the north end of Seminole County, Layer said.

The criteria include: — Limit the number of students that Seminole High will lose. — Make sure the geographic area of Lake Mary High School is not too large. — The Interstate 4 corridor must be divided equally between Lake Mary High School and Seminole High School. — The planned unit developments already established need to be equally divided between the two schools. — The black-white ratio should be maintained at Seminole High School, but not increased. Layer said he will apply this criteria to all of the plans

the school staff has made and with County Commissioner Bill Kirchhoff's plan. Layer said he is not recommending any boundaries but feels with the criteria, anyone can draw a line which will be effective for Seminole High School. Although Layer said he isn't presenting a new plan, School Superintendent Bob Hughes feels the Booster Club will take Layer's criteria and propose its own plan. Hughes will give a recommendation to the board on the plan he feels best redistributes the students at the one-item board meeting Thursday. He said he will not make a final decision on any plan until Thursday before the meeting in case another proposed plan is presented. — CHARITY CICARDO

What's Wrong With Coal...?

The official estimate is that coal production in the United States this year will rise by 2.3 percent, which is not much.

Carl Bagge, president of the National Coal Association, finally lost patience with seven years of rhetoric about coal being the answer to the energy crisis.

Bagge's complaint is directed at a government that never fails to talk about coal being a "cornerstone" of its energy policy and then does so little to clear the way for producing and using more of it.

The economic trends are all in coal's favor. Last year, the price of oil needed to produce one million BTUs of energy rose by \$1.79 while the price of coal needed to produce the same amount of energy was rising by 14 cents.

The arithmetic now coming in indicates that an oil-burning power plant can be converted to coal with a savings in the cost of electricity even when the price of the best available pollution-control equipment is figured in.

If economics were the only consideration, coal-conversion would be much further along. What remains is to figure out what is worthwhile and what is not among the myriad regulatory barriers that surround the mining, transportation and burning of coal.

As of now, 19 percent of the energy used in the United States comes from coal. The upper limit of that figure is hard to calculate, given the restraints which air quality will impose on the use of coal in some parts of the country.

In recent months as many as 60 ships have gathered on a single day in Chesapeake Bay waiting to pick up coal from the limited port facilities that can handle it.

The United States earned \$4.4 billion from exported coal last year — an impressive figure until it is compared with the \$75 billion we paid for imported oil.

This country has been described as the Saudi Arabia of coal, considering its potential as an energy resource existing here in quantities far greater than what we need.

"WELCOME HOME, YA BIG, BEAUTIFUL HOSTAGES!"

Around

The Clock

By DONNA ESTES

Purple martin scouts, looking for adequate housing for flocks of the birds on their way back north from South America, have been spotted in Sanford in the past few days.

The chamber committee is promoting the location of purple martin houses in Sanford to encourage the birds to nest here.

The chamber of commerce at a 7:30 p.m. meeting Wednesday will discuss the purple martin. A film on the martins will be shown at that time.

Carl Selph, chairman, invites anyone interested to attend the meeting. Meanwhile, the Seminole County Democratic Executive Committee will meet at 8 p.m., Feb. 12 at the Seminole County courthouse.

A new political action group is being formed in Sanford to help support moderate and progressive candidates and target conservatives for defeat.

It has been issued a state charter under the name of "The New Majority."

Sheldon says he hopes it will be a bipartisan group, willing to finance progressive Republicans as well as Democrats against right wing opponents.

SCA has elected new officers. The new president is Altamonte Springs City Commissioner Lee Constantine.

Carol Spotts and Madeleine Pape have returned to their jobs as city secretary and city treasurer, respectively, at Lake Mary City Hall after bouts with the flu.

ROBERT WAGMAN

How Ford Escaped Auto Recall

WASHINGTON — Experts at the National Highway Traffic Safety Administration fear that faulty transmissions on some Ford Motor Co. cars can cause dozens of deaths and many more injuries in the coming years.

They wanted to order Ford to recall the cars and fix the transmissions at a cost to the company of more than \$100 million.

The company denied responsibility, blaming "driver error" for the problems. But the new documents show that the NHTSA was able to confirm 23,000 such incidents, which resulted in more than 100 deaths and 1,500 injuries.

Neil Goldschmidt, who was then the secretary of transportation, apparently bought the company's economic arguments.

In recent months as many as 60 ships have gathered on a single day in Chesapeake Bay waiting to pick up coal from the limited port facilities that can handle it.

This country has been described as the Saudi Arabia of coal, considering its potential as an energy resource existing here in quantities far greater than what we need.

The Plight Of Teachers

I feel I must take this time to relate to you this true story, to give you some indication of the plight of the Florida teacher.

I chose education over private industry because I enjoy young people and feel that I can relate to them and communicate with them.

Due to my length of service, I am now aware of my former students who are graduating from state universities and other national universities with degrees in the computer sciences or engineering.

I have endured, thinking "I'll hang on one more year. I'll get better." Some people call that dedication.

JEFFREY HART

Hostages: Lest We Forget

It is almost always painful to make the necessary distinction between private and public emotions.

The whole episode was a national disgrace, at the public level, and the sooner it becomes the subject of congressional inquiry the better.

After that it was all down hill for SCC started Pete Kutsukas, who gave up nine runs and two homers.

The state's top-ranked Raiders held a big 75-61 bulge with only 2:40 remaining in the important Division II match.

"When our center Mike Ryals tried to inbound the ball he hit the rings on two occasions," said Sterling about Daytona's secret weapon.

WASHINGTON — Americans are understandably not impressed by the obscene spectacle of Big Oil weeping crocodile tears all the way to the bank.

"If we had more of a good team when they're losing because they're due to get it together," said Robinson.

Mainland's Tony Beal heads for home during SCC's double header loss to powerful Florida Sunday afternoon.

Trio Posts Easy 24 Hours Win

Redman-Garretson-Rahal Grab 'Pepsi' Gusto

By CARL VANZURA Herald Motor Sports Writer The team of Brian Redman, Bob Garretson and Bob Rahal ran a clean and steady pace to win the 24 Hour Pepsi Challenge.

The scoreboard tells the story as car nine driven by Brian Redman, Bob Garretson and Bob Rahal grab top honors in the 24 Hour Pepsi Challenge.

Sixty Nine cars started the race with pole sitter Rolf Stommelen taking the lead. It was a see-saw battle with battle between Redman and Reinhold Joest.

Reinhold Joest then took over the lead in a Porsche and stayed there for nine laps until he had to pit for fuel and tires.

Chuck Hunton finished the first game winning by three runs, two of them on homers.

In the second game nothing got better for the Raiders. Ed Augustine was Florida's next pitcher. The southpaw saw three of his pitches ride out of the park.

Top-Ranked Raiders Survive 'Ring Around,' Host FJC Tonight

DAYTONA BEACH — Daytona Beach Community College tried to give Joe Sterling and his Seminole Community College Raiders the "ring around" here Saturday night, but SCC failed to get roped in and escaped with an 80-77 victory.

The state's top-ranked Raiders held a big 75-61 bulge with only 2:40 remaining in the important Division II match.

"When our center Mike Ryals tried to inbound the ball he hit the rings on two occasions," said Sterling about Daytona's secret weapon.

WASHINGTON — Americans are understandably not impressed by the obscene spectacle of Big Oil weeping crocodile tears all the way to the bank.

"If we had more of a good team when they're losing because they're due to get it together," said Robinson.

Tribe On Basketball Warpath

The Tribe is on the warpath again. Winning three consecutive conference games (two last week against Lake Brantley and Daytona Beach Seabreeze) Bill Payne's Sanford roundball crew is in the midst of a four-team Five Star Conference race.

Defense is the reason why the Seminoles have surged to 12-11 on the year and 7-4 in the conference, two games behind league leading Lyman and one behind DeLand and Spruce Creek.

"We don't have any offense so we work hard on defense," Chief Payne said. "You can either shoot or you can't. It just happens that we can't."

Lyman boss Tom Lawrence would agree with that statement after picking up a pair of conference wins over Apopka and Mainland last week.

"You hate to hit a good team when they're losing because they're due to get it together," said Robinson.

WASHINGTON — Americans are understandably not impressed by the obscene spectacle of Big Oil weeping crocodile tears all the way to the bank.

UCF Bombs Rollins 105-77

By BENTON WOOD
Herald Sports Writer
Rollins' rookie coach Tom Klusman may have thought Saturday night that he was involved in another version of Hiroshima or Pearl Harbor.

Instead the site was the University of Central Florida in another Knight-Tar battle. But the usual barnburner between the cross-town rivals turned into a fireworks show as UCF lit the game for a 105-77 blowout.

Rollins always gives us a "This game was just the reverse of last year's game. In that game, the West ran up the early leads but we had the ability to come back and win," added Cunningham, who now has won all three of his All-Star games.

From the outside guard Jim Beachum and reserve Willie Edgison combined for 43 Knight points. If they hap-

Grier Lifts USF

TAMPA, Fla. (UPI) — Tony Grier, the Sun Belt Conference's leading basketball scorer, pumped in 17 points to help the University of South Florida to a 63-59 victory over Jacksonville University Sunday.

Glenn Stambaugh makes a move to the basket in last year's state tournament game in Lakeland. The former Seminole sharpshooter is now playing for Rollins College, who lost to UCF 105-77 Saturday night.

East Yawns Past West NBA All Stars

RICHFIELD, Ohio (UPI) — For the first 39 minutes of Sunday's NBA All-Star game, about the only thing that kept the 20,239 fans awake was the antics of the San Diego Chicken, who harassed the referees, the cheerleaders and the sportswriters during the timeouts.

By that time, the East had built up a 16-point lead, the West had not led in the game since late in the second quarter and it looked like the game was over. The West managed to make a game of it, though, losing by only three, 123-120 and East Coach Billy Cunningham was not lulled by the West's sleepwalking act.

"An All-Star game is a game of sports," he said. "First you're dead out of it, but you get a spurt and get back in it. This game was just the reverse of last year's game. In that game, the West ran up the early leads but we had the ability to come back and win," added Cunningham, who now has won all three of his All-Star games.

Boston's Nate Archibald had more "fun" than anyone else and was rewarded with the game's Most Valuable Player award. He scored only nine points, but he added nine assists, five rebounds and three steals, and his darting presence was a constant thorn in the side of the larger West guards.
