Lymen Clothing **Drive To Aid** Children

The Lyman High School Student Council is sponsoring a Bundle Day collection for the Save the Children Federation. The local drive was launched Monday and will continue all this week according to Dan Casselberry, student council president.

Purpose of the drive is to collect wearable used clothing in response to the need of the children living in abject poverty in the Southern Appalachian Mountains. Summer and winter coats, dresses, suits and underwear are needed. They need not be in perfect condition but must be

sturdy and usable. These children live in what President Johnson has called "America's No. 1 depressed area" but the people there are proud and independent and do not want charity. Therefore, the clothing collected during the drive will be distributed at token prices in the Southern Mountain areas where too many children drop out of school because

they have no decent clothing to wear. Save The Children Federaation, international child welfare organization, with headquarters in Norwalk, Conn... was founded in 1982 and is now conducting its 23rd Annual Bundle Day Drive. It is registered with the U.S. State Department Advisory Committee on Voluntary Foreign Aid. SCF aids American Indian and Southern Appalaehlan Mountain children in the United States, and children in 16 countries abroad through a program of child, family, and community sponsorships, an international scholarship fund and community self-help projects. # Bomb Beefs Up China

There is little comfort in the fact that Red China's long-predicted first nuclear "device" is not the same thing as a nuclear bomb. Nor is there much room for complacency in estimates that it will take another five or 10 years for the Chinese to develop an arsenal of nuclear warheads and the necessary vehicle systems to deliver them.

A fraction of those five or 10 years has already elapsed since the State Department made its announcement. But the threat that China poses to world peace does not wait upon that fateful day. China, since its troops

crossed the Yalu River into North Korea in 1950, is, and has been, an international aggressor and fomenter of civil strife in neighbor countries.

Add to the no-so-remote danger the renewed pollution of the atmosphere with radioactive fallout from bigger and better tests. We can expect China to see and raise her favorite rival Russia's 58-megaton monster blast. Reckless and ambitious countries like Indonesia and Egypt will undoubtedly try to join the widening nuclear circle, whatever the cost.

It is unlikely that China will invite a war with the West, or possibly with Russia, until it has reached some kind of nuclear equality. But the mere possession of nuclear "devices" will give its ideological aspirations a powerful boost and have a great psychological impact, not only Asia, but upon other non-white developing nations as well.

Conceivably, there could be temporary lessening of the danger of a general war starting in Southeast Asia if China, to preserve the progress already made, avoids pushing too close to the brink before her equivalent of "Der Tag" arrives. Despite Mao Tse-tung's boast that China could absorb the loss of 300 million Chinese, it is likely he will not risk his regime in such an insane numbers game.

But only the most optimistic see much chance of permanent peace in Southeast Asia as long as China remains a virtual outlaw-and an increasingly powerful one-ranging the outskirts of the world commun-

One hope is that China's growing industrial and military strength, the achievement of material accomplishments that satisfy the national ego and the eventual passing of the oldline Communists will bring her to the point reached by Russia-the realization that nuclear war, and the brushfire wars that might lead to nuclear war, could destroy every-

Of one thing we can be glad: Russia is apparently as concerned about China as we are. In the face of a common menace shared by the two world leaders, great strides could be made in five or 10 years toward solving the other human problems of population and hunger, emerging nationalism and the establishment of a world governed by enforceable law.

#### Thought For Today

Bear one another's burdens, and so fulfill the law of Christ.-Galatians 6:2.

I'm going your way, so let us go hand in hand. You help me and I'll help you. We shall not be here very long, for soon death, the kind old nurse, will come back and rock us all to sleep. Let us help one another while we may .- William Morris.
