Police Want To Know

Which Room Was Eric Slain In?

By DENNIS FEOLA

Herald Staff Writer Seminole County Sheriff John Polk today predicted the investigation into the shooting death of 21/2-year-old Michael Eric Smith wil take from seven to 10 days to complete. The child was shot Feb. 15 reportedly by the 12-year-old son of the couple who was

"We don't want to rush through it and do it slipshod," Polk said of the investigation. He also said the age of the youth who fired the shot was being taken into consideration. "He must still be in shock," Polk said of the 12-

Polk said the investigation is focusing on the circumstances surrounding the shooting which remain unclear.

For example, Polk said, there have been two stories on where the shooting occurred. The sheriff said the youth has indicated to investigators the shooting occurred in the master bedroom of the trailer home in San-

However the youth's father, Jesse Lee, reported finding the child in the bathroom just off the master bedroom immediately after the shot was fired.

In addition, Polk said, there is some confusion as to whether the child was lying down or standing when he was shot. Seminole said autopsy results indicate the child was in the neck with the bullet.

Polk also confirmed that who loaded the .30 caliber rifle and when it was loaded remains a

Lee told investigators his son was in the room with the child only seconds before the time to load the rifle. "Apparently, it had to have been loaded; he

killed huge numbers of Chinese invaders in hattles on town streets Radio Hanol, in a broadcast monitored in Bangkok, said that in

two days of fighting Vietnamese troops killed 3,800 Chinese soldiers, destroyed 80 tanks and routed 12 Chinese battalions.

China's invasion force has stopped six miles deep in Vietnamese territory, but military analysts said they were unsure if Peking ordered its troops to halt or if the attack was thrown back by Vietnamese defenders.

In a related development, a Vietnamese official in Bangkok indicated his nation would not call for direct Soviet intervention but said Vietnam appreciates Russia's moral support, including a demand the Chinese withdraw "before it's too late." Intelligence officers said the 3-day-old invasion had left Chinese forces in control of two district capitals and scores of small villages, as the Peking troops pushed six miles into Vietnam on highways and trails across the 450-mile frontier.

They said today's fighting included air strikes by both sides in the battle areas. Radio Hanol said 1.000 Chinese were killed in street fighting in

Hanoi claimed to have helted the invasion, but it appeared the Chinese halted their own drive even before Moscow warned it would honor the terms of its military pact signed last November

Dubs Honored At Arlington

WASHINGTON (UPI) - The nation honored slain ambassador Adolph Dubs today at Arlington National Cemetery, where President Carter saluted him and comforted his tearful wife with a kiss. Dubs, 58, a career diplomat, was kidnapped in Afghanistan last week and killed in a shootout between Afghan police and the four terrorists who abducted him. He had been named ambassador to the country only seven months ago. He will be buried Tuesday.

NICOSIA, Cyrpus (UPI) — The political upheaval in Iran has created pressure on the Organization of Petroleum Exporting Countries pricing system to a point where it cannot be contained, the Middle East Economic Survey reported today. The weekly review of news on Middle East oil published in Nicosia said Abu Dhabi and Qatar have already slapped on market premiums of \$1 a barrel, "a relatively modest increment considering that the spot market premium has soared to around seven or eight dollars."

The Senate And Judges

Members of the U.S. Senate are not elected to appoint federal judges in their states. The Constitution did not give them any power in these appointments except to ratify the choices

made by the president. And yet they have asserted de facto appointive

power for years. A senator has been allowed to exercise an automatic veto of any candidate for judicial appointment in a federal court serving his state. The other members of that exclusive club which is the upper house of the Congress have given him that courtesy" as an exercise of per-

sonal privilege. Now Sen. Edward M. Kennedy D-Mass. has taken over as chairman of the Senate Judiciary 'Committee and he says he will no longer allow such automatic vetoes of judicial appointments by individual senators.

Instead the entire committee will consider any senator's objection That's good but it doesn't go far enough. The

objection should never be peremptory.

It should be for cause, and the cause should be stated in writing, so that the committee could consider evidence on the matter on its merits along with other evidence of the appointee's judicial qualifications or lack of them.

persons whose stated purpose is to disclose the most sensitive classified information in a manner patently detrimental to the security of the United States. Clearly, the gaping loophole in the Espionage Act of 1917 that leaves the Justice Department helpless in the face of this

treason ought to be bricked over, and soon. The proposed new CIA charter legislation now under consideration by the Senate Intelligence Committee would make it a crime for present or past agency employees to reveal, in any unauthorized fashion, the identity of agents. And Sen. Lloyd Benstsen, D-Tex., has offered a bill that

would accomplish the same purpose. The new CIA charter, assuming it is adopted, will take many months to work its way through the legislative mill. Sen. Bentsen's bill could be passed in a matter of weeks. We hope it

Face-To-Face Bargaining For Police, New Orleans

NEW ORLEANS (UPI) - For the first time since policemen walked off the job and threatened to cancel raucous Mardi Gras merriment, union and city officials have agreed to a face-to-face bargaining session in an attempt to settle a three-day strike. As rifle-toting National Guardsmen

patroled city streets in Army jeeps Sunday night, federal mediator Ansel Garrett announced the break-through negotiations. "We requested and the parties responded to

a meeting for 3 p.m. today in an effort to resolve the current work stoppage between the Police Association of New Orleans and the city of New Orleans," he said.

Guard Pay: Panel Nixes Law Change

The hopes of the Seminole County Commission that the local legislative delegation would solve the question of whether it must pay county employees who are members of the national guard or the military reserve full pay while they are away from their county jobs on training sessions

The legislators — Reps. Bobby Hattaway Bobby Brantley, Sens. John Vogt and Clark Maxwell Jr. — voted 3 to 1 to refuse local legislation to clarify the law on the

State law directs counties, cities and the state to pay reserve or national guardsmen full salary for up to 17 days while they train with their units, regardless of how much

Specifically, the county commission wanted a local law to mandate the deduction of pay received by military reserve or national guard from employees' salaries from state, county or city government up to a maximum of 17

"I have a philosophical problem as far as the national guard is concerned," said Sen. Vogt, D-Cocoa. He said the members of the guard serve a state purpose and are called out in times of disaster and need. "I feel they should be paid extra," he said.

Vogt added the matter, in his opinion, should be addressed statewide as a policy.

In answer to questions from the delegation, County Administrator Roger Neiswender said the county doesn't have more than 10 employees who would be affected and currently it costs the county about \$2,000 in salaries to guardsmen and military reserve on training sessions. "If we cannot continue the current policy (salaries minus deduction of state or federal compensation) it would cost much more," he said. Only the employee who had demanded his full salary had been cited previously. Neiswender also assured there would be no problem for the county to pro-rate the deductions, as Maxwell had
