Contained within the walls of a modern home, which houses an average, modern family is a nursery, restaurant, shop, laundry, office, recreation center, snack bar, hospital, answering service, theater, and entertainment area, all in miniature.

Within the confines of the home there is a clothing store, grocery store, bank, school, garden and taxi service.

Many of these facilities and services overlap and encroach on one another, with the result being—confusion.

Well-planned homes, such as are available from local builders can eliminate much of this confusion by careful consideration of the needs of the family that takes advantage of space to make preparation for such needs. Clothing areas need to be convenient, spa-

cious and well-located. The nursery-hospitalsleeping area should be quiet and out of the "traffic pattern."

The laundry, shop and taxi areas can be combined and centered in another area and the restaurant-grocery store-snack bar area can be carefully planned to make the most profitable use of space and storage.

Room for entertainment, recreation, office and theater should all be given their due consideration in order to make it as efficient as possible for the person who must be in charge of all these activities.

Today's modern homes are planned with all these things in mind, utilizing wall space, floor space, built-ins, appliances and storage to make the best possible use of existing areas and eliminate bottle-necks, confusion and infringement.

Two such fine homes have been recently sold by Shoemaker Construction Company in the Idyllwilde and Ravenna Park areas, and they will show you similar homes, or customize one to suit your particular family.

At Greenbriar of Loch Arbor, spacious homesites are available with large plots of land, suitable for building the kind of home to satisfy the needs of todays homemakers.

LMN Enterprises, Inc. have closed out their homes in Tee 'N Green and are presently showing some new homes in the Crystal Lake Park area. Salesmen will be on the grounds at Tee 'N Green to provide transportation to the new homesites, and direct interested persons to the Lake Wayman Estates area, where a few homes remain.

While you are out driving, this week-end, take this page with you. The map above will assist you in locating some of Sanford and Seminole County's outstanding real estate. Take a circle tour and see them all, you may find just what you are looking for in the way of a home.

Robert T. Besserer, Seminole Memorial Hospital administrator and a trustee of the Florida Hospital Council, has been elected president of the newly formed East Central Florida Hospital Council. . . .

Fall meetings of Seminole County Unit 30, Disabled American Veterans Auxiliary, will resume at 7:30 p. m. Tuesday at the chapter home on Orlando Drive, Mrs. Harriett Johnson, newly elected commander, said final arrangements will be made for the Sixth District meeting at the local chapter Sunday, open with a chicken dinner al noun.

Signs fixing a 45-mph speed limit on SR 434 (Longwood-Ovledo Road) through the city limits of North Orlando have been installed by the State Road Department. . . .

. . .

Russ Pearson, sophomore at the University of Florida, will spend the fall trimester with NASA at Houston, Texas. He is the son of Cdr. and Mrs. G. Russell Pearson, of Summerlin Avenue.

Work started last Thursday by Reiter Brothers, of Longwood, on clearing the land for Girls' Town at North Orlando, is expected to be completed within 10 days, according to Frank Fusula, North Orlando Company manager.

. . . Mrs. Sara Stoudenmire, of Sanford, is one of the key members of the steering conmittee planning the district annual meeting of St. Johns River District, Boy Scouts of America, Central of Florida

CHAMBER OF COMMERCE OFFICERS - F. E. Roumillat Jr., president; Howard H. Hodges, treasurer; W. Scott Burns, vice president, and Richard R. Deas, immediate past president - today endorsed the following editorial which appears below:

#### Editorial Comment:

#### Success Story !! The Sanford Herald endorses without reservation statements made throughout Florida that the Semi-

nole County Chamber of Commerce is the outstanding organization of its size in the entire state. Our reason? Where can you find

this kind of talent for free? To quote one member, "It would take a million dollars a year to duplicate this dedicated group who work . . . year after year . . . for the betterment of the community."

Every committee of the Chamber is staffed by businessmen who devote endless hours to the Chamber's program . . . hours taken away from the pursuit of their own livelihood that certainly could be used to their own financial advantage.

The Chamber's five-year program of success looks like the New York Yankees' standing in the American League. For example, in 1957 there was

this newspaper headline . . . "Sanford Naval Air Station To Be Phased

Out.' When this news was released, the Seminole County Chamber of Commerce was called upon to save the air station. Everyone knows the outstanding job that was done but it night is

Total employment nole County stood at 11,600 in July, a new high for this month of the year, it reported today by Joseph M Foy, manager of the Florida State Employment Service

local office. Employment was 800 (7. per cent) above the year ago total with gains in manufacturing, transportation, trade and agriculture. Unemployment held steady at 600 between mid-June and mid-July . below the 700 estimate of July 1962. Seminole County with 4.9 per cent of the labor force unemployed (persons currently seeking jobs) is experiencing a smaller unemployment rate than many areas of the State. For the month, employment in nonfarm firms edged down 300 . . . about the normal June-July decline. Losses were concentrated in manufacturing with food processing plants at off-season levels, and gov-

ernment due to the layoff of nonteaching personnel from public schools for the summer. The agricultural force dipped however, citrus grove pruning continued active in July.

# Must We Know?

You'd think there would be some kind of privacy in the desert, espe-cially if you lived in a hole in the ground. But not even prairie rodents have escaped from man's insatiable

curiosity. Zoologists are tagging prairie voles, small ratlike rodents, with radioactive materials to find out how much time they spend away from

their nests, Science Service reports. The radiating material serves as a silent beacon which can be monitored by scientists. The findings: The average prairie

vole is out of the house about three hours a day. How many of the animals were papa voles just getting away from the rat race at home was not disclosed.

# **Master Mind**

The human brain contains some 10 billion perve cells, or neurons, that form interconnections whose number far surpasses all the stars of the universe. This is the source of the infinite complexity of individual behavior.

Human civilization is something like that, being built up out of the complex interconnections of the increasing millions of people. But there are no built-in, natural

connections between people. They have to communicate by "artificial" means.

Obviously, no individual can talk personally with everyone else. By means of radio and television, however, he can address an unlimited number at one time. Records and tapes add a time dimension to that ability.

EAS

But only the printed word allows others to absorb a man's thoughts at their leisure-and only through print can a man project his thoughts into the future, either near or distant, and fasten upon the minds of others.

Just as the brain receives a constant flood of information from the environment, so is human society being flooded with news, ideas, facts, developments and discoveries in the arts and sciences and every walk of life.

The result is a worsening log jam in the channels of information and a serious time lag before the majority of men can absorb and understand these changes.

It is as if that part of an individual's brain which screens out all but essential information suddenly stopped working, allowing sensations from every nerve end to flood the conscious mind.

The effect would be chaotic and paralyzing. The situation in the field of scientific publications is approaching that state.

That is why some say we must begin to develop a "world brain"a system to coordinate, screen and contain the world's growing knowledge.

The idea of a world brain was originated by H. G. Wells back in 1937 and was revived recently by Watson Davis, editor of Science Service, in testimony before a House subcommittee.

Like so many other Wellsian ideas, the world brain was ahead of its time. But recent advances in computers, microfilm techniques and the transmission of information have made a world brain entire feasible. As Davis said, we already have the knowhow; all we need is the "let's-do."

#### 83-Year-Old Baby

In 1880 when Floridians picked up a phone for the first time, they talked - and that's all. But look what happens today. You can mind the baby (Home Interphone), talk hands free (Speakerphone), and conduct committee meetings (Call Director). Not only that, all Florida phones are now 100% dial. In spite of all the things phones do today, it's only the beginning. More and better services are being developed right now to make your telephone an even greater marvel

of convenience and pleasure, at the lowest possible cost.

# Mon. Sept. 9, '63-Page 5

DEAR ABBY: What am I to do? I am a respectable woman in my fitties. While I was clerking in a department store a middle-aged man walked over to my counter, slood directly in front of me, didn't say a word, but he winked at me. I picked up a lady's corset (I was in "women's intimate apparel") and slapped him across the face with it. A metal garter cut his eyeball slightly, but he didn't go blind or anything like that. He is suing the store. I lost my job, and it turned out that he had a nervous tic and meant no harm. Should I be blamed? LUCKLESS

DEAR LUCKLESS: Even if the man had had no nervous tie, and he actually "peach." WINKED at you, you were wrong to strike him. (You could have called the manager.) Perhaps he is lucks you weren't "in housewares." You might have parted his hair with a frying pan. . . .

I have had many requests to write more on opening notrump bids and the Jacoby transfer, My opening no-trump range

is from 15 to 17 high card points. This is in full accord with modern expert practice but if you want to use 16 to 18 you will be at only a very alight disadvantage against players who use 15 to 17. You can also apply the principles in these articles, provided you simply cut down all responder's requirements one point to allow for the difference.

While I don't really object to 16 to 18 no-trumps, I can self substantially.

assure you if you start playing 15 to 18, 14 to 16 or 11 about no-" unip bidding is would back in with two spades

**Defense Shows** Up Good In Scrimmage

> Only nine more practice lays remain for Coach Jim Pigott to get his Sanford Seminoles ready for their first game of the season.

A long game-type scrimmage with the Junior Varsity last Friday afternoon disclosed many fine players in the Seminole teeam but a fair share of mistakes also were revealed. Defensively the Seminoles looked real good to Pigott and his staff. However, the ever present problems of teamwork was hampering the offense. A strong JV squad gave up a total of 31 points to the Seminoles and managed to make only two first downs against the defense and the first downs

Pigott feels that the defense was much improved With the football season's [she is "crying for help," and over last week but it still has opening game less than two urges men and women who a lot of work to do to come weeks away, the Seminole will help with his primary up to last sceason's.
