

Locals Prepare For Game With Orlando Tigers

Feds Were Defeated 14-12 By Big Ten Eleven Last Year

The Seminole High School Celery Feds will begin preparation today for their annual battle with the Orlando Tigers Friday night when the Feds travel to Orlando for the contest to be played at Tinker Field.

The Orlando delegation, which is coached by Harry Greene and his assistants, Zolie Maynard, Walter Hovater and Carlisle Hughes, lost their first Big Ten Conference game last Friday night when Robert E. Lee High School of Jacksonville whitewashed them 19 to 0.

That was the second Orlando defeat of the year as the Daytona Beach Buccaneers of the North-east Florida Conference had first defeated them.

The Feds have won three out of five games this season, losing to Ocala and Daytona Beach. They have whipped Eustis, Lake City and DeLand.

The Feds are in fairly good condition for the contest but a hard week's preparation is facing them as hopes are none too high for a victory over the Orlando aggregation.

However, the Feds are remembering how close they came last season when the Tigers defeated them 14 to 12.

Explanation of Amendments is Given Rotary

(Continued on Page Seven)

of a home regardless of whether he or she had dependents.

Resolution No. 41, Mr. Householder continued, would place the schools on a parity with other departments of the state government in the matter of the distribution of state funds. In times past, Mr. Householder said, special taxes, earmarked by the Legislature for the schools, had failed to produce sufficient revenue to meet necessary appropriations, and school teachers had been left unpaid, while school terms in some cases had been cut to six or seven months. Under the so-called parity amendment, deficits in the school funds could be made up by allotments from the general funds in the same proportion as allotments were made to other departments of government.

The Fourth Amendment, Mr. Householder explained, pertained to the National Guard, and was designed to remove the National Guard from politics and to improve it as an effective and efficient military force. Appointments of officers in the National Guard, under the amendment would still be made by the Governor, but they would have to be made from among qualified men who have passed regular Army tests.

No officer, once appointed, Mr. Householder added, could be removed from office except through the regular channels as provided for under the U. S. Army rules and regulations.

Warning Against Hallow'en Mishaps Is Given By Frank

Goblins, witches and ghosts soon will be prancing about the streets. Hallow'en will bring all sorts of terrifying creatures from their graveyard haunts. They however, come forth only once a year.

On the other hand, there is one grisly demon who is with us all the year, and he'll be on hand for Hallow'en. It's old Man Accident. He will lurk at parties where there is merriment and laughter, and he'll stalk through the street where youngsters are playing with their jack-o-lanterns, and he'll play havoc and havoc with the pranksters.

Asher Frank, Director of the Florida Safety Council, tells us to "Beware of practical jokes at parties. How they often result in injuries. Enjoy your hallow'ens and ghosts of the friendly kind, but give Old Man Accident a cool shoulder."

Old Man Accident is about the only Hallow'en spook that can harm you. So watch out! Don't let your children engage in dangerous mischief. Be particularly careful in driving. The street will be filled with playful children on Hallow'en night so approach a group of youngsters with unusual caution. Do not drink, and drinking drivers do not think!

Demands Made For Probe Of Radio Program

Commission "with the view of preventing a recurrence of what happened."

The broadcast, coming at the same time as the Charlie McCarthy program on NBC, was an adaptation of H. G. Wells' imaginative "War of the Worlds."

After an introductory explanation by Welles at 8:00 o'clock, an announcer gave a commonplace weather forecast. Then in standard fashion, came the words: "We take you now to the hotel where you will hear the music of..."

After a few bars of dance music there came "a bulletin from the Indianapolis Radio News bureau" saying there had been a gas explosion in New Jersey.

After that the bulletin came more and more and more rapidly with "Professor Pierson," played by Orson Welles, explaining about the attack by Mars and the little men who were pouring out of their meteor-like airplanes.

For some time in Mars warriors drove everything before them. Mere armies and navies were wiped out right and left and the real radio audience was as frightened as the actors pretended to be. But then the little men acquired a lot of germs which we men of the world are virtually impervious. So the little men died and everybody lived happily ever after.

The action revolved around what might happen if monsters from Mars boarded flying machines which resembled meteors and called upon the earth with malice aforethought.

The whole thing was done realistically and in present tense. Before it reached its climax with the monsters sucking up germs and, very satisfactorily, dying, late tuncrunners were getting pretty upset.

The switchboard operator at New York, Johns, heady after his exchange was jammed by people who wanted to know about the 40 killed by a meteor exploding in Jersey.

James Powers of the Brooklyn police telephone bureau said several had asked if it was safe for them to stay in their homes—near their radios and one woman asked if she should seek refuge in the subway.

Senator Pepper To Address Demos At City Auditorium

(Continued from Page One)

American citizenship, "even if the children are born in this country."

Senator Pepper, who has but recently returned from a European tour, where he was during the recent crisis, told of his observations while in Paris and London with people practicing the use of gas masks and digging up public parks for emplacement of bomb cells.

Senator Pepper said America had three primary objectives to insure peace of the country:

1. Armed preparation for the entire nation to protect it on all fronts "which includes co-operation with nations of Central and South America to prevent aggression from that quarter."
2. The right kind of purifying spirit to make true Americans out of our citizens and to outlaw the ists that would here from within our government and

Pump-Priming Is Defended In Talk By Claude Pepper

Government Is Determined To Relieve Condition Of Farmers, Senator Says

Mayor Introduces Senate Nominee Continuation Of Federal Spending Program Is Foreseen

Spelling largely on the economic development of the South and the government's determination to relieve farmers, Senator Claude Pepper in an address to several hundred persons in the City Hall last night, defended the Administration's pump-priming program as "building a greater America" while increasing the income of the one-seventh of families whose annual income is not in excess of \$300 annually.

Senator Pepper was introduced as the Democratic Party's nominee for reelection to the United States Senate by Mayor Edward Egging who urged Democrats to join in support of the party's nominee at the polls on Nov. 8.

As a member of the Senate Commerce Committee, Senator Pepper stated that he was in contact with Army engineers and declared that he would work to ward securing the approval of the proposed St. Johns Indian River Canal.

Referring to the optimistic business outlook for the coming year which has been expressed by leading financiers, the speaker declared that the recovery is the result of the government's pump-priming program. He indicated that a more appropriate federal spending would likely be made at the next session of Congress after the state that a recent survey showed business has declined since Congress approved the last large amount for relief.

In beginning his address Senator Pepper told of his work on the joint Senate and House committee investigating the phosphate resources in the United States and stated that members of the committee are attempting to work out a plan whereby farmers can secure this essential fertilizer material at a reduced cost.

The speaker invited suggestions from local farmers on means of reducing fertilizer costs also extended to them an invitation to attend the hearing of the committee in Lakeland Nov. 21 when an investigation of Florida's phosphate problems will be made.

Senator Pepper mentioned briefly his trip to Europe and told of attending the conference at the Hague. At this conference, he said, representatives were present from the legislative branches of almost all the nations of the world. Senator Pepper attended as a legislative representative from the United States.

Celery Packers Likely To Come Under Wages Law

Definition Of "Area Of Production" Extends To Industry

Although no definite statement of decision has been made by Administration, the application of the new anti-hour statute to the celery packers, Senator Claude Pepper in his address last night stated that he believed celery packers will come under the provisions of the law unless the products are packed on the farm where grown.

The statute provides that its regulations will not apply if agricultural crops are packed with in the area of production, however, Administration's interpretation of "area of production" is the farm on which the crops are grown.

Since the celery industry here is recognized as handling a perishable, seasonable commodity, Senator Pepper stated that he believed it would therefore be exempt from the maximum hour provisions for a period of 11 weeks in each calendar year as in the citrus industry.

Although most celery packers in this area are more or less familiar with the basic principle of the law which went into effect on Oct. 21, opinions have differed widely as to its ramifications causing widely divergent opinions on the application of the statute.

The legislation will result in definite benefits for the South, Senator Pepper declared, noting that the wages and hours law is not another NRA and that Administrator Andrews is not another Hugh Johnson.

Senator Pepper declared that the law would be administered justly and added that he will study the act in any way possible by any person who has any complaints to make to the administrator.

W. M. Scott, local manager of the American Fruit Growers, stated that the bean packing houses in the Lake Okechobee section are tentatively going to comply with the minimum wage regulation but are not going to consider the maximum hour feature.

Farm Agents Told To Plan For Best Land Utilization

County and local demonstration agents were told that they must take the lead in program planning and land use studies which will give best utilization of every acre of land and enable the highest possible income and greatest possible production.

Declaring that Seminole County is facing the problem of packing a crop other than citrus for its main income, Mr. Dixon said that land use and program planning operations are now being carried on in a small scale being years ago.

BIBLE VERSE FOR TODAY

IS NOT GOD AS GOOD AS
OUR FATHERS? As far as the
east is from the west, so far hath
he removed our transgressions
from us. Like as a father pitieth
his children, so the Lord pitieth
them that fear him.—Psalm
103:12, 13.

ON A TRAPOT OF CHEN LUNG

(From The London Mercury)
I saw a penny
Upon a tea pot drawn,
Pale-pink as mist on the sea,
Sends landward from the dawn.

Two petals, unaware
Of their appointed hour,
Fell, and on wings of air
A wasp flew to the flower;

Another hazy insect
Upon a busy breeze,
Ah! how shall we convert
The ignorant Chinese?
—LOED DUNSANY.

Potter Painter Took 24 Drinks
a Day—headline. The rest of the
time he was as sober as a judge.

The time is coming when the
fellow who always leats the
train to the crossing will wish
the train had beaten him.

The CBS radio panic had some
 repercussions not only in New
Jersey, not only in the East, but
also as far away as Sanford, if
the truth be told.

Billy Hand has offered to do
her fan dance before the jury
which is trying her on assault and
battery charges. Uh huh, trying
to bribe the jury.

Schools Closed in Dayton, Ohio:
Short of Cash—headline in Sat-
urday's papers. That may happen
in Florida some day if the pro-
posed "parity amendment" does
not carry.

Every Seminole County resi-
dent should make it his business
to see that enough people vote in
the hospital referendum to secure
a majority of the freeholders and
to assure the construction of the
hospital.

In Chicago a school apprecia-
tion of 22,000 has been made for
instruction in the noble art of
doing the "Lambeth Walk". The
announcement does not indicate,
however, whether the teachers
will instruct the pupils, or whether
the pupils will instruct the
teachers.

According to Dr. Gallup's Insti-
tute of Public Opinion, the G. O.
P. will gain at least 53 con-
gressional seats in this month's
election. The Institute has been
remarkably accurate up to date,
but so was the Literary Digest up
to 1928. However, the Republi-
cans will probably make some
gains, most impartial observers
agree.

The utilities are preparing to
spend two billion dollars aug-
menting their facilities; the rail-
roads are about to receive a one
billion dollar government loan
rehabilitating them; the automo-
bile industry is putting thou-
sands of men back to work and
preparing to go ahead at full
speed; conditions should be on the
upgrade.

Florida has no attraction with-
in its borders that is more worth
seeing than the new Marine Stun-
ner at Marathon near St. Au-
gustine, says Karl Lehmann of Lake
County. Seminole County citizens
who have not already done so
should find it well worth their
time to take a Sunday off some
time before long and run up to
St. Augustine to see this aquar-

The German Air Force

Whether he actually did or not, Col. Charles Lindbergh has received considerable credit, or discredit, according to individual beliefs, for having furnished the British government with technical information on the relative strength of various European air forces, so unfavorable to the Russian, so flattering to the German, that it is thought to have had an important bearing on the Peace of Munich. While high German officials promptly invited Lindbergh to Berlin where he was exultantly entertained and awarded a medal of honor, leaders of Russian aviation were at great pains to publicize widely that Lindbergh was a "liar" who had deliberately misrepresented the facts regarding the Red air force for the benefit of English "Fascists" of whom he was a hirling. And even in this country there has been some criticism of Lindbergh, as if he had spoken out of turn, or did not know what he was talking about.

Now comes Daniel W. Tomlinson, aeronautic expert and an executive of the Transcontinental and Western Air Lines, recently returned from a vacation spent in Europe, who says that if a war had developed over the Sudeeten crisis, Germany would have been in complete mastery of the air within two weeks. And such mastery would have enabled her to destroy completely within a comparatively short period of time such major cities as Paris, London, and Moscow.

Pointing out that German aviation plants are organized on a production scale beyond anything even conceived in this country, Mr. Tomlinson says that in the event of war the Reich was prepared to produce between 7,000 and 8,000 new military planes every month. French and British plants are hardly prepared to "turn out" that many planes within a year, and so even though they started at scratch and the Germans lost as many in battle as the Allies, the German air force would have soon been vastly superior.

"One of the greatest factors contributing to their superiority," he continued, "is their system of government which eliminates labor troubles, as for example many factories have homes for their workers, medical clinics, and he workers own their own farms. The Reich private factories are subsidized by the government, and what is most important, Germany has apprentice schools taking boys between fourteen and fifteen years old for training.

"When the boys finish they are highly skilled mechanics. I visited one plant at Hunkel, which was the most efficient I ever saw. Boys were enthusiastic and happy in their work. German aviators are on a par with ours, all being of the highest type. The United States is definitely inferior to Germany in performance and number of military planes. Labor trouble here hinders production of our planes."

This is not the irresponsible chatter of someone who is speaking of things he knows not of. It is the conclusion of an expert who has recently made a study of aviation facilities in Europe. And it comes as a statement made after the decision reached by the statesmen of Europe and thus could not possibly be more of the "Fascist lies" of which Lindbergh was accused. It leads one to believe that perhaps Col. Lindbergh may have saved France and England from a disastrous war.

Pneumonia Control

A vaccine for the prevention of pneumonia is a possibility of the near future, according to a report by the United States Public Health Service on a series of tests made in Civilian Conservation Corps Camps to determine the value of a vaccine originated by Dr. Lloyd D. Felton, now Senior Surgeon of the United States Public Health Service.

The vaccine was developed under grants made by the Influenza Commission of the Metropolitan Life Insurance Company, the Pneumonia Fund of Harvard University and other private agencies. The tests were conducted under the direction of Colonels G. M. Ekwurzel and J. S. Simmons of the Medical Corps of the U. S. Army, Dr. Felton and Dr. Louis I. Dublin, third vice-president of the insurance company. They agree that the results so far are encouraging, although more extended experience with the vaccine will be needed.

While prevention of pneumonia is the ideal goal, it is pointed out, valuable results in the interim are being obtained through the extending use of the serum treatment for those who have already contracted the disease. Health departments and physicians generally are making available to more and more patients the specific serum necessary for the various types of the disease.

It is estimated that in the 12-month period from September 1937 to August 1938, approximately 30,000 American men and women have escaped death from pneumonia and influenza, due in no small measure to the more extensive use of serum and other modern aids in the treatment of pneumonia. This estimate is based on the mortality experience of the millions of Metropolitan Life policyholders whose outstandingly low pneumonia-influenza death rate of 60 per hundred thousand during this period, was 28 percent below the average of the corresponding months of five preceding years.

"There is every indication," statisticians of the insurance company say, "that with the wider use of serum in pneumonia cases and with the promise held out by the preventive vaccine, the ravages of pneumonia will show a notable decline. Thus, it is pointed out, pneumonia, heretofore one of the principal causes of death, may follow the course of other infections which, through the application of modern scientific methods, have been reduced to minor causes of sickness and death."

Strikers Are Ejected From Republic Plant

(Continued from Page One)
Committee—three representatives of management and three of labor—some months ago.
Pellei said he was asked to find out from the individual railroads what their attitude was toward a report made Saturday by the President's special fact-finding committee.
Pellei said he would gladly do that, and later he summoned the railroad heads to meet in Chicago Friday.

SOMETHING TO BEGIN THING ABOUT

DISPELLING THE FOG

BY CHARLES MICHELSON
Democratic National Committee

Dual identities are not rare in political circles, but Senator Vandenberg, candidate hopeful for the Republican presidential nomination two years hence, goes far beyond the twin class. He might be described as the Dionne of the situation, for he is an example of the quintuplet in politics and opinions. He is Conservative before Chamber of Commerce, Liberal at College commencements, he is for Labor, he is for Capital, and he is for the Ten Commandments (with possibly some reservations as to the 8th).

In the first of these incarnations he recently assailed the Wagner Labor Act, which he said led either "to fascism on the right or communism on the left."

The Senator charged among other things that the act expeditated and prolonged the depression, and he demands its amendment.

That sounds pretty terrible. How are we going to assay Senator Vandenberg's comments when they are compared with the views of one of the largest employers of labor in our country? The General Electric Company is not supposed to be either fascist or communist, nor might it be suspected of any desire to prolong the depression. Yet the other day, Vice President W. R. Burrows, under whose jurisdiction the labor relations of the great corporation come, made this statement to a League of Women Voters in New York State:

"Great Corporation Inevitably Wagner Law
"We have had no trouble with the Wagner law. It was designed to take the part of the employee who can't take care of himself. My suggestion would be to let the Wagner law ride and let some of these employers who haven't tried it give it a try."

The General Electric executive said a lot of other things that must sound like high treason to those who have been believing the National Labor Relations Board. He cited the labor policies of his corporation and perhaps these have something to do with the long absence of friction between his organization and its employees. First, he said, they made up their wage scales by doing a little better than the average of wage rates in the community. Then, they carefully trained foremen and supervisors so that their foremen would listen to statements of grievances and dispense fair treatment. Most revolutionary of all, they encouraged and were liberal with unions in their formative stages. This startling departure from the habit so carefully cultivated by other masters of great corporations, of sternly stamping out the first approach of unionism, has resulted in peace instead of strikes over a long period of years.

Perhaps equally revolutionary

Government Is Determined To Relieve Condition Of Farmers, Senator Says

(Continued from Page One)
are "no longer fondlings of a paternalistic government", but have caught such proportions as to be able to compete in world markets.

Senator Pepper advocated reciprocal trade tariffs with nations which have a high standard of living and also lent support to Secretary Yallahs' two-price farm plan by stating that consumption could be increased in the United States by sale of products to those in the lower brackets of pay for the same price that could be received on foreign markets.

Declaring that the farm problem was difficult to solve, Senator Pepper pointed out that the government was seeking to raise the price in some way other than restricting production. He pointed out that in the last session of congress he supported a plan for an eight-cent subsidy on farm products.

He pointed out, however, that a plan of this kind established a dangerous precedent. As a substitute, Senator Pepper outlined the operations of the Surplus Commodities Corporation to which funds are allotted from the customs receipts of the nation.

Declaring that he wanted to see the South come into its own, Senator Pepper said that the enactment of the wage and hour bill was the first step in building up its economic security. He pointed out that while the annual income in the North was \$1200, in the South was only \$600 annually. The increase in wages will tend to increase the South's annual income, he said.

Stating that he foresaw a South which was not handicapped by preferential freight rates, low wages, lack of skilled workers and lack of capital, Senator Pepper stated that such federal financial resources of the South, building "real southernness" to exploit the section for themselves and not for the capitalists of the East.

Mentioning briefly the extensive influences of "isms" in this nation, the speaker declared that something should be done to curb their spread, but added that he did not fear a dictatorship in the United States "as long as there are so many shotguns."

Advocating a hospital for every county in Florida, Senator Pepper outlined the benefits particularly in the South, of the government's public health program which he credited with reducing the death rate over the United States by nearly 10 percent last year.

"To my Townsend friends I wish to say there has come about a greater recognition of the merit of your claim," the speaker said, and pledged his assistance to their program.

Chamberlain To Seek To Effect Italian Accord

(Continued from Page One)
Britain's home defense of nearly fifty million civilians.

On the eve of the re-assembling of parliament which was checked by the nation's unpreparedness in the days of the September crisis, the prime minister reconstructed the government to assure vigorous leadership for wide organization of Air Raid Precautions and related measures.

Sir John came into the cabinet nominally as lord privy seal, but he is counted upon to put the government bureau in charge of air defense preparations on a strong footing.

Viscount Runciman was named last president of the council in succession to Viscount Halifax, who resigned. Malcolm MacDonald, secretary for colonies, was given the further portfolio of dominions secretary.

The prime minister fought by the means of a cabinet reshuffle to supply to parliament an effective team.

Such an extreme measure, Chamberlain was reported to be, might block his carefully laid plans to appease Reichsmarschall Hitler and Premier Mussolini and end all hope of a Japanese understanding on armistice negotiations.

He was also understood to fear the consequences of such a move on normal industry and export trade.

Lord Runciman may also aid in strengthening the ministry for coordination of defense now headed by Sir Thomas Inskip. Runciman's diplomatic skill and wide knowledge of trade and commerce will be at Chamberlain's disposal.

For the present at least, Mr. Donald will carry the burden of colonial and dominions affairs. Both are vital portfolios because of the Arab law upheaval in Palestine and the imminence of negotiations with Germany over the return of her war-torn colonies. The dominions post had been vacant since the death of Lord Stanley, Oct. 16.

CITY BRIEFS

stary A. C. Madden.

The Wekiwa Lodge No. 879 of the Ladies Auxiliary to the Brotherhood of Railroad Trainmen will hold its annual election of officers at the Elks Hall Wednesday at 2:30 P. M. instead of 9:00 o'clock as has been customary.

Mrs. H. Reed Edmonds of Leesburg, state worker for the Tubercular Association, will be the principal speaker at the meeting of the Grammar School Parent Teachers Association Thursday afternoon at 8:00 o'clock in the school auditorium. She will have as her subject, "Health in the Community."

The dinner and program tomorrow for the Kiwanis Club will be a farewell for T. E. Simpson, a member of the club, who is leaving Wednesday to take over new duties in Newburgh, N. Y.

From the number who have made reservations, a large attendance is expected for the farewell tonight in honor of T. E. Simpson, retiring president of the Chamber of Commerce who is leaving for Newburgh, N. Y. tomorrow. The dinner will begin at 7:00 o'clock in the Mayfair Hotel and will be a joint affair of the Seminole County and Junior Chambers of Commerce.

The Federal Shipping Commission Corporation has been authorized to purchase an additional 200,000,000 pounds of better quality cotton yarn.

Locals Prepare For Game With Orlando Tigers

Feds Were Defeated 14-12 By Big Ten Eleven Last Year

The Seminole High School Celery Feds will begin preparation today for their annual battle with the Orlando Tigers Friday night when the Feds travel to Orlando for the contest to be played at Tinker Field.

The Orlando delegation, which is coached by Harry Greene and his assistants, Zollic Maynard, Walter Hovater and Carlisle Hughes, lost their first Big Ten Conference game last Friday night when Robert E. Lee High School of Jacksonville whitewashed them 19 to 0.

That was the second Orlando defeat of the year as the Daytona Beach Buccaneers of the North-east Florida Conference had first defeated them.

The Feds have won three out of five games this season, losing to Ocala and Daytona Beach. They have whipped Eustis, Lake City and Deland.

The Feds are in fairly good condition for the contest but a hard week's preparation is facing them as hopes are none too high for a victory over the Orlando aggregation.

However, the Feds are remembering how close they came last season when the Tigers defeated them 14 to 12.

Explanation of Amendments is Given Rotary

(Continued on Page Seven)

Resolution No. 44, Mr. Hogg holder continued, would place the schools on a parity with other departments of the state government in the matter of the distribution of state funds. In times past, Mr. Hogg holder said, special taxes, earmarked by the Legislature for the schools, had failed to produce sufficient revenue to meet necessary appropriations, and school teachers had been left unpaid, while school terms in some cases have passed regular anniversary dates.

After an introductory explanation by Welles at 8:00 o'clock, an announcer gave a commonplace weather forecast. Then in standard fashion, came the words: "We take you now to the hotel where we will hear the music, etc."

After a few bars of dance music there came "a bulletin from the International Radio News Bureau" saying there had been a gas explosion in New Jersey.

After that the bulletins came more and more rapidly with "Professor Pearson," played by Orson Welles, explaining about the attack by Mars and the little men who were pouring out of their meteor-like airplanes.

For some time in Mars warriors drove everything before them. Mere armies and navies were wiped out right and left and the real radio audience was frightened as the actors pretended to be. But then the little men acquired a lot of germs to which we men-of-the-world are virtually impervious. So the little men died and everybody lived

Warning Against Halloween Mishaps Is Given By Frank

Goblins, witches and ghosts soon will be prancing about the streets. Halloween will bring all sorts of terrifying creatures from their graveyard haunts. They however, come forth only once a year.

On the other hand, there is one grisly demon who is with us all the year, and he'll be on hand for Halloween. It's old Man Accident. He will lurk at parties where there is merriment and laughter, and he'll skills through the street, where youngsters are playing with their jack-o-lanterns, and he'll play havoc and bounds with the pranksters.

Asher Frank, Director of the Florida Safety Council, told us to "Beware of practical jokes at parties. Horseplay often results in injuries. Enjoy your hobgoblins and ghosts of the friendly kind, but give Old Man Accident a cool shoulder."

Old Man Accident is about the only Halloween spook that can harm you. So watch out! Don't let your children engage in dangerous mischief. Be particularly careful in driving. The streets will be filled with playful children on Halloween night so be unusually cautious when you approach a group of youngsters. Thinking drivers do not drink and, drinking drivers do not think!

Senator Pepper To Address Demos At City Auditorium

(Continued from Page One)

American citizenship, "even if the children are born in this country."

Senator Pepper, who has but recently returned from a European tour, where he was during the recent crisis, told of his observations while in Paris and London with people practicing the use of gas masks and digging up public parks for emplacement of bomb cells.

Senator Pepper said America had three primary objectives to insure peace of the country:

1. Armed preparation for the entire nation to protect it on all fronts "which includes co-operation with nations of Central and South America to prevent aggression from that quarter."

2. The right kind of purifying spirit to make true Americans out of our citizens and to outlaw the ions that would bore from within our government and

Pump-Priming Is Defended In Talk By Claude Pepper

Government Is Determined To Relieve Condition Of Farmers, Senator Says

Mayor Introduces Senate Nominee

Continuation Of Federal Spending Program Is Foreseen

Speaking largely on the economic development of the South and the government's determination to relieve the condition of the farmers, Senator Claude Pepper in an address to several hundred persons in the City Hall last night, defended the Administration's pump-priming program as "building a greater America while increasing the income of the one-third of families whose annual income is not in excess of \$300 annually."

Senator Pepper was introduced as the Democratic Party's nominee for reelection to the United States Senate by Mayor Edwin Higgins who urged Democrats to join in support of the party's nominee at the polls on Nov. 8.

As a member of the Senate Commerce Committee, Senator Pepper stated that he was in contact with Army engineers and declared that he would work toward securing the approval of the proposed St. Johns Indian Reservation.

Referring to the optimistic business outlook for the coming year which has been expressed by leading financiers, the speaker declared that the recovery is the result of the government's pump-priming program. He indicated that a new appropriation for federal spending would likely be made at the next session of Congress, after he stated that a recent survey showed by a news has indicated since Congress approved the last large amount for relief.

In beginning his address Senator Pepper told of his work on the joint Senate and House committee investigating the phosphate resources in the United States and stated that members of the committee are attempting to work out a plan whereby farmers can secure this essential fertilizer material at a reduced cost.

The speaker invited suggestions from local farmers on means of reducing fertilizer costs also extended to them an invitation to attend the hearing of the committee in Lakeland Nov. 21 when an investigation of Florida's phosphate problems will be made.

Senator Pepper mentioned briefly his trip to Europe and told of his conference at The Hague. At this conference, he said, representatives were present from the legislative branches of almost all the nations of the world. Senator Pepper attended as a legislative representative from the United States.

He told of the results of an economic survey made by the League of Nations which showed that the unemployment in the democracies was much higher than in any of the other nations; considerably higher than in the countries ruled by dictators.

THEY'RE GOING TO THE MOVIES

What are the Duke and Duchess of Windsor doing these days? Well, for one thing they are going to the movies just like other folk. The duke, cigar in hand and smiling is pictured with his lady, attending to a charitable matinee performance at a Paris theater.

Farm Agents Told To Plan For Best Land Utilization

County and home demonstration agents were told that they must make the best use of the land in their counties by planning and land use studies which will give best utilization of every acre of land and enable the highest possible income and greatest possible satisfaction.

Agents were asked to begin immediately to determine types of farming now existing by surveying their counties. An alternate land use study and a study of the types of farming best suited to different areas and then and farmers to adapt operations to fit the land.

Agents were told at the purpose of land use and program planning work is to coordinate all agricultural and related programs by all interested agencies to stimulate thinking and to encourage farmers to use land more effectively by developing state and county programs.

Mrs. Elvira Garner Is Honored While Visiting Atlanta

Mrs. Elvira Garner has returned from Atlanta where she, with Monroe Leaf, another author of children's books, were the guests of the Davidson and Paxton store and she will read from her new book "Ezekiel Travels" at a program for the Parent Teachers Association at the Southside Primary School Thursday afternoon at 3:30 o'clock.

During her stay in Atlanta, Mrs. Garner, with Mr. Leaf were the honored guests at a dinner given by the Southern Library Association. As part of the dinner program, Mrs. Garner read part of her recently published book, "Ezekiel Travels," which was a humorous copy of the book was opened at the dinner and three little negroes, dressed in respectable Ezekiel, Emancipation, and L.I. Moral stepped out. Mrs. Garner said that "Ezekiel" wasn't included because he didn't have time to put on his dinner jacket.

In her radio broadcast over the station in the Billmore Hotel, Sanford received some valuable publicity as she told the story of how Ezekiel came to be.

Attorney Dix Says Spy Trial Is "Frame-Up"

Government Accused Of Corruption In Bringing Fraulein Hofmann To Trial

NEW YORK, Nov. 1. (AP)—An accusation that the German espionage trial now proceeding in federal court was a "frame-up" was made today by George C. Dix, counsel for Fraulein Johanna Hofmann, one of the three persons on trial.

"I charge that there was a frame-up and corruption on the part of the government in this case," said Dix when government counsel objected to his cross-examining Reed Vetterli, a former special agent of the Federal Bureau of Investigation in New York.

The prosecution contended Vetterli, for money, which dealt with a statement signed by Otto Hermann Voss, another defendant, did not utter Dix's charges.

Dix was permitted to cross-examine Vetterli but his questions were limited.

A statement quoting Otto Hermann Voss, said that a woman, who was said to have given him information about the construction of United States army and navy planes to German agents "for Germany and not the money," was read into the record at the spy trial.

Voss, one of the three persons on trial, stood steadily erect in German military fashion, during the reading of the charges, directed in admission of the confession on the ground that it was not voluntary.

In the statement given to federal bureau of investigation agent Voss, a naturalized American citizen, told of exposing construction secrets of planes to both Karl Edel and Herbert Jannichen, accused as Nazi agents, who are fugitives from the indictment.

The statement said he reported to Karl Edel, chief of German naval intelligence in London, another agent, defendant, and was thanked profusely as the good he had done for his native land.

Voss was employed at the government's aircraft factory on Long Island.

The charged said, "The only money I ever received was \$5,000 which was for expenses on my trip to a hotel to report to the German agents."

"I never expected to receive any money. I had much Edel and Jannichen, and made it perfectly clear that I didn't want any money but was doing it solely for the fatherland."

Funeral Services For Julian Lee To Be Held

Funeral services for Julian Lee Lee, infant son of Mr. and Mrs. J. M. Lee, will be held at 3:30 P. M. Wednesday at the graveside in the Evergreen Cemetery.

Dr. E. D. Browner, pastor of the Presbyterian Church will officiate.

Surviving are his mother and father, two sisters, Miss Estelle Lee and Mrs. L. F. Paxton and another brother, James Lee, all of Sanford.

Alex Sharon Escapes Injury In Auto Wreck

Alex Sharon, son of James G. Sharon, local attorney, escaped serious injuries Sunday when the automobile he was driving, turned over on the Sanford-Orlando highway while rounding a curve.

Sharon was uninjured, but his automobile was badly damaged. Several other occupants of the car also escaped injuries, according to a report given out at the sheriff's office.

NAZIS WANTED HER AS 'MARRIAGE PARTNER'

Testimony in the trial of a spy trial was given by attractive Fraulein Johanna Hofmann, one of the three persons on trial. She said she was wanted by the Nazis as a 'marriage partner' for a high-ranking German official.

WASHINGTON, Nov. 1. (AP)—The Senate today passed a bill to prohibit the President from appointing carriers to the Federal Bureau of Investigation.

The bill, which passed by a vote of 77-17, would prevent the President from appointing carriers to the FBI without the approval of the Senate.

The bill was introduced by Senator Charles McNary, Oregon, and passed by a vote of 77-17 in the Senate today.

The bill is part of a series of measures designed to strengthen the independence of the Federal Bureau of Investigation.

The bill would prohibit the President from appointing carriers to the FBI without the approval of the Senate.

The bill is part of a series of measures designed to strengthen the independence of the Federal Bureau of Investigation.

Chamberlain Wants Accord With Il Duce

Prime Minister Will Seek To Bring Into Force Pact With Mussolini Of April 16

French To Act On Drastic Program

Split Seen Over Proposal To Save Nation From Collapse

While the French cabinet sought to bring into force the proposed Franco-British financial agreement, the British Parliament was told today by Prime Minister Neville Chamberlain that he would seek to bring the Anglo-Italian accord of April 16 into force as soon as possible.

Chamberlain said that the new financial agreement would be a definite step toward the restoration of the Franco-British financial accord of April 16, 1936.

The Prime Minister said that he would seek to bring the Anglo-Italian accord of April 16 into force as soon as possible.

City News Briefs

Weekly drills for the three local companies of National Guards were held in the Armory last night.

The weekly meeting of the local camp of Woodmen of the World will be held in the Woodmen Hall tonight at 7:30 o'clock, according to C. C. Collins.

Officers for the coming year will be elected at the regular meeting of the Chess and Checker Club in the Valdes Hotel tonight at 7:30 o'clock according to Secretary J. H. H. H.

Andrews To Study Newspaper Ruling

WASHINGTON, Nov. 1.—(AP)—Emer F. Andrews, the wage-hour administrator, told newspaper executives today he was giving special study to their contention that the new maximum hour requirements would curtail newspaper service to the public.

He said in a letter to Elias Hanson, attorney for the Newspaper Publishers Association, that a special study is being given to the employment of reporters on "continuous assignments."

Chess, Checker Club Officers To Be Named

Officers for the coming year will be elected at the regular meeting of the Chess and Checker Club in the Valdes Hotel Tuesday night at 7:30 o'clock, Secretary A. P. Madden announced today.

Beginning on Nov. 8 a chess tournament will be played between a team from Daytona Beach and a team representing the local club, Mr. Madden said.

All persons who are interested in playing chess or checkers are invited to attend the meeting Tuesday night.

LOCAL WEATHER

Fair tonight and Wednesday, except for few brief sprinkles or light showers on southeast coast.
