mable is a reserval way, not only with the tests regarding
their institutions, but also with a simple guide to a ready
interpretation of the facts. Public attatements, institutional advertising, leatures and courses of study, especially
arranged for the general public, are being reported to in
many places the depress purpose of giving the public
a being conducted by the Poudre Valley National Bank of
Fort Collins, Colorato, to which groups of depositors
are invited, thirty or forty at a time, to hear lectures by
trained economists on such subjects as the fundamentals
of banking, the meanings of technical terms, and the newsregistrion involving banking.

"One thing which has been comphasized particularly,"

of banking, the meanings of technical terms, and the meaning regishtion involving banking.

"One thing which has been comphasized particularly," says the Literary Digest, "is the reason why banks have to impose a nervice-charge on some accounts. It was explained carefully that such charges simply represent the cost to the bank of services performed for the customer in cases where the balance is so small that the bank can not make any money by lending it. The bank officials have concluded that the school is successful because there has been an increase of \$170,000 in deposits since it began. The bunkers of the country should be deeply indebted to their colleagues of Fort Collins for showing them such a painless method of increasing deposits. Pussibly there is a suggestion here for other professions, as well. Clothlers, for instance, might hold evening classes offering an adequate explanation for that 'small charge for alterations.'"

We have no doubt that much of the suspicion which still exists in a large part of the public mind with regard to many business institutions can be traced, at least in part, to a lack of understanding of many of the bisentials of good business practice. There is nothing which appears quite so unnecessary or so repulsive as that which we do not understand.

It is perhaps one of the best signs of our changing civilization that the old policy of the "Public Be Damned" is giving way to a feeling that the people are entitled to know what is being done and to be kept informed as to the whys and wherefores.

Foreign Political Terms

The dispatches from Europe these days contain many strange, words, definitions of which may help us to understand belter, what is going on over there. The Associated Press, has recently compiled a list of these words, somewhat skin to our various political parties, our federal army, National Guard, and so forth, a few of the more commen of which are as follows:

Pageigm—A Aystem of authoritarian, as opposed to h Europe parliamentary, government; L. e., a one-party administration with its "chief" ("duce" in Italian, "fuebrer" in Germanh; as diotator: The system is anti-socialist and anti-

communist.

Italian Fascism—Benito Mussolini's "corporative state" with capital and labor organised in syndicates according to industries and occupations, each under control of a government department and the whole responsible to him as head of the party and of the state.

For fun, and for entertainment that bubbles with unusual angles it is a pleasure to recommend "Murder in the Private Car" twelve children both in the Milane Theatre and which opens at the Milane Theatre and three boys. Seven girls and on Aug. 6th.

Charles Ruggles, appears as a comedy deflector of crime who girls and one boy died some years gets mixed into a dastardly plot to assassinate a comely young heiress, and what happens afterwards is fun and thrills in plentiful measure.

Much of the action takes place on a private car attached to the rear of a transcontinental train speeding from Los Angeles to New York. Clutching hands, ecreams in the dark, warnings of impending disaster, madmen and gurillas are intertwined in the plot in believable and bewildering profusion.

With Ruggles is a notable cast composed of Mary Carlisle, Una Merkel, Russell Hardle and others.
