Judging Other People

The dismissal of Lee Tracy, movie star, by the film company which sent him into Mexico on film location calls to mind other instances when the nationals of one country offend the sensitivities of the nationals of another country, resulting in strained relations and unfriendly international feeling-

The Mexicans, who objected to Tracy's offensive activities, were doubtlessly moved not alone by the actor's crude conduct but also by the fact that the moving picture industry as a whole has consistently made fun of Mexicans and Mexico. All of Hollywood's pictures about Mexico are ludicrously unreal and invariably of a scurvy type. co are ludicrously unreal and their Mexican characters are

It was long a custom among the studios to identify film villians and questionable characters as Mexicans. Although this custom has been abandoned, the films which are produced concerning Mexico still have the offensive flavor. When a Mexican is shown on the screen he is usually dressed in a preposterous outfit, wearing spurs with six-inch rowels, packing a couple of guns, and wearing a huge sombrero. Life below the Rio Grande, as the films portray, is almost completely tinged with hairless hounds. lies, dust, bad hombres, and wicked senoritas.

It is too bad that people are prone to place a stamp of ignominy on the people of other countries with no better foundation of fact than the wild imaginations of some TRUTH! AND GOODNESS: film writer or novelist. It is regrettable, for instance, gord of the Lord is right; that for some reason Americans look upon Franchmen as all his works are deep in "fops," that we think of all Englishmen as sissies, that the leveth rightsousness and Italians work in ditches and can't stand the sight of blood, agment; the earth is full of the and that Germans are butt-headed. It is unfortunate that inesa of the Lord-Pasius Northerners some times look upon Southerners as being slow and slovenly, that Southerners some times think that Northerners won't fight when you call them a liar.

A better understanding of the character and customs of other peoples would go a long ways toward climinating intexnational discord. That this end might be attained more readily it would behoove the film industry and other Italy now is threatening to quic agencies, which influence public thought and fdeus, to be Longue of Nations.
