### **Economic Trends** For Coming Year Indicate Slump

auch a slump Of course, something of the same sort was widely predicted for 1946. The stock market slumped in an ticipation. And some government big-wigs talked of coming hordes of hobless.

Ever since, some people have felt they were living economically on borrowed time. And the new

date they set is mid-1953. With so many convinced, doubt lessly with reason, that the boom must end sometime, the present debate centers largely around the date and the extent of the slump Guesses range from late spring of 1953 to the closing months of next year. A handful are betting

on good times into 1954. Talk of the extent ranges from government officials' assessment "a general levelling off on a high plateau" to some business men's use of the harsh word "depression" when talking privately among themselves.

Commerce Secretary Sawyer however, says that the husiness men in the West and Midwest he has been talking to recently are be-guessts covering almost any autions but not alarmed about the period next year.

New York City "enjoyed" coldest Oct. 20 the other day in the history of the Weather Bureau. The mercury dropped to 30.6 degrees.

Speaking in Worchester, Mass. the other day, General Eisenhower said, "I believe the federal government should be the partner of the state governments, not their oppressor". States of the South will have no quarrel with that policy.

"I am going to vote for Stevenago", someone told us the other day. And conversely, a lot of people are going to vote for lke because it costs them twice as much to live as it did ten years ago.

Under neither Stevenson nor Eithat is as should be.

The proposed school amendment will not give he State any more control over the county school system than it already has, says Superintendent of Schools T. W. Lawton. The principal question seems to be whether it would be better to issue bonds for school buildings and pay for them out of an ad valorem tax on real estate, as would be the present method, or adopt the amendment and retire the bonds from monies received from the State's auto license tax. #### Children's Accidents

Accidents, rather than disease, constitute the greatest single threat to the lives of American youngsters, the Metropolitan Life Insurance Company points out. About 6,000 children between 5 and 14 years of age are killed in accidents each year in the United States. This is nearly twice the number of young lives taken by leukemia and other cancers, pneumonia and influenza, and acute poliomyelitis together.

Accidents now account for one third of all deaths a the elementary school ages, whereas 15 years ago the proportion was only one fifth. This relative increase reflects the more rapid gains achieved in the conquest of discuse than in the control of accidents. While the fatal accident rate for these ages dropped 30 percent during the 15-year period, the mortality from disease dropped 65 percent.

An insight into how and where school-age boys and girls lose their lives in accidents is provided by 470 Industrial policy death claim records filed with the Metropolitan during 1951. Motor vehicle mishaps are the leading cause of accidental death at the school ages, accounting for 39 percent of all fatal injuries last year. Of the 186 children killed by motor vehicles in this insurance experience ,at least 145 were hit or run over; relatively few of the victims were pas-

The records point up the hazards children face in using streets and highways. Twenty-two of the fatally injured children were hit or run over when they ran into or played on streets or highways. About the same number were killed while crossing thoroughfares; among girls hit or run over, crossing accidents led all the rest. About 30 youngsters, nearly all boys, were killed by motor vehicles while riding

Drownings account for 30 percent of the total accidental deaths in this study. Reflecting their greater tendency to play away from home, nine tenths of the victims were boys. Activities of the victims at the time of the drownings included playing along the water, fishing, wading, swimming, using boats and rafts, and playing on the ice.

Among other causes of accidental death in this study,

burns and conflagrations killed 45 children, firearms killed 23 - all boys - and falls accounted for 17 deaths. Other deaths result from hanging or strangulation while playing with ropes, belts, and the like; from walking or playing on

railroad tracks; and from playing near third rails.
"This study," the Metropolitan concludes, "clearly shows the need for intensification of safety education both in the schoolroom and in the home. Particular emphasis must be put on reducing motor vehicle accidents and fatalison because I am making twice as ties arising out of recreational activities. Accidents - by much money as I was ten years far the leading cause of death among children - are, for the most part, preventable."

The WSB is made up of 12 mem-bers, four representing industry, four the public and four labor. To the labor members, it seems, Lewis' \$1,90 a day raise appeared reasonable enough. The eight oth ers thought otherwise.

As a starter Lewis accused those eight of would-be thievery for "filching" 40 cents from the purses of the miners. This was a simple statement of his views about their intentions. He also had some views on them,

personally, which he expressed in such terms as "timid dilettantes" and "ruffians."
After all, though, the board members may have looked like small fry to Lewis. He quickly shifted from tinkering with their reputations to an analysis of the inner-life of Roger L. Putnam, the economic stabilizer.

enson on the issue to communism. In his combination of defense and attack, Stevenson voiced his con-viction he expects to be the target for a smear campaign in the next few days—and that he considers Eisenhower responsible.

He did not use the word "smear" his address but he left no doubt of his meaning when he spoke to a wildly cheering crowd in the Cleveland Arena.

His speech was televised to the nation by NBC in a last-minute arrangement. It was later broadcast by recording over the CBS and Mutual radio networks. With this speech behind him-the most emotional in all his campaign-

"Let us always be clear where the responsibility lies," he said, adding that Nixon himself had de-scribed Eisenhower as the captain of thet cam "calling the plays."

Then Stevenson launched into his explanation of the Hiss deposition and why he thinks Eisenhower and Dulles are more vulnerable than he on the Hiss case.

He said he had known Hiss brief-ly in 1933 when the two were in the old Agricultural Adjustment Administration in Washington-and that he did not run into Hiss again until 12 years later in the State

Most estimates came from editors supporting Eisenhower. They expect the general to gather in only four of 67 counties even though his September visit to the state gave the Republican cause a shot in the arm.
One newsman summed the situa-

tion in the state up in this fashion: voters in his area "will, on election day showdown, demonstrate what their forefathers taught them - to live and die under the banner of

hower in counties for which estimates came in. Effects of visits from the candidates-the first in history for Florida - just about

cancelled out, too.
Soundings in 40 of 67 counties with 88 per cent of the registered voters included nine polls. Seven gave an edge to Eisenhower, two were more conservative in their estimates than the poll results, Newsmen figured Eisenhower

had gained in at least 16 counties by reason of hard work by the GOP, help from Democrats for Eisenhower clubs, repercussions from Truman attacks and Democratic dissension. They estimated Stevenson had moved ahead in 10 counties, on account of such factors as the Taft-Eisenhower asso-ciation, a lessening of Eisenhower glamor, Democratic voting tradi-

Florida worried about the pos-sibility of floods should the heavy rains sweep the Everglades farm-ing area around Lake Okecchobee. The Everglades were reported to be "saturated but not flooded" in advance of the storm. Rainfall in the torrents that accompany a hurricane would flood the land. ### Fourteen Men Are Inducted In Sanord

Fourteen men were sent from Seminole County this week to Jacksonville as the group for October for induction into the Armed Forces, according to E. B. Carter, clerk of the local Selective Service

Board. Five of the group were volum teer inductees who boosted the number of inductees over the quota designated to the local heard. Willie L. Sutton, John M. Garrett, Eddie L. Thorpe and Robert L. Whittaker. They ranged in age from 18 to 20 years old.

Other inductees, who ranged from 21 to 23 years old, re Roosevelt Simmons, Robert L. Reding, Cleveland DeBose Joseph M. Waller, William Brown, Roosevelt Green, St. nley L. Brumley, Eugene Buggs and Robert L. Jones. Another call is slated for next

month, Mr. Carter said. A number of men went to Jacksonville yesterday for pre-induction examinntions. The inductees were sent to Jacksonville Wednesday.

Ketterlinus, however, cannot boast of an entirely untarnished record this season. They were stepped on by Daytona Beach's mighty Mainland in another non-conference tilt. The Yellow Jackets were just playing out of their class and they must have known it when they attempted to go big-time by scheduling the AA eleven last

year.

Banford has been turning on the steam all week in preparation for this—the biggest—test of the season. So far, the Feds have played teams of erratic nature, such as Palatka. Their crowning achievement came at the beginning of the season when Ray Davis thrilled the fans with his 91-yard pass interception that gave the Feds a 6-0 win over Eustla, who went on to win every game since then to pace the Central Florida Con-

McNeese was little regarded before the season started. Then the Lake Charles team turned out to be a powerhouse in the Gulf Coast Conference. If anything, the Louisiana team might hold a slight edge over Tampa.

At last Tuesday's Lions Club meeting, he promised to have an even larger array of feminine colchritude, includin othe comely U.E. ed, Nancy Cooper, who won the itle of Miss Tangerine Bowl for

"I have my reputation at stake, as well as, my own determination to put on a credit-able performance for the citizens of Sanford and Seminole County." he asserted, "Besides, I owe it to you Lions, since I teld you it would be a good show Of course, we couldn't control the weather, but we can and are going to give you a show that everyone will like this Sonday. even if it is voing to cost me money to do it." Clarence Welsh and his com-

petent lieutenants were unable to secure the 400 bleacher seats for lakefront spectacle this week be cause of the two football games in the Memorial Stadium this week

However, they have promised to assemble as many chairs as pos-sible for those people that poid the 25-cent fee for moving and re-moving the bleachers last week. All tickets to last week's

show will again be honored this week. The entire net proceeds, which the Lions Clob will accrue from Sanford's first show ring of a water skibbe extrava-zanza, zill zo into the Liona Club's general fund for their worthy children's visual aid program in Seminole County. The spine-tingling thrills furn-

The Seminole High School J.
V.'s squad suffered its first defeat
of the year to Edgewater of Orlando 18 to 6. The game was played at Edgewater's new High
School at 4 o'clock Monday after-

Edgewater marched right through Sanford's defense and scored on a running play in the first few minutes of the game. Their try for the extra point was no good. Edgewater then kicked deep into Sanford's own territory and held them there for four quick downs and that forced the Baby Feds to kick. Edgewater blocked \_Johnny Jone's pont and this set up another Edgewater touchdown,

point failed.
After the first quarter Sanford took life and played very good offensive and defensive ball but neither team was able to score again before the half ended.

When the second half began the Jr. Engles poured it down and scored again. This time on an off tackle smash for their third and final touchdown.

In the fourth and final frame Sanford started its longest march of the day, all the way into deep Edgewater territory.

It was the excellent bowling of Carl "Hot Shot" Von Herbulis that paved the way for the trihaps, but freshman mentor, John Scott, asserts that the sudden

change means nothing certain. Says Scott, "Our use of the T against Deland means absoluteagainst Deland means absolutely nothing. It was just an experiment. We thought that it might be easier to teach it to these boys now while they are freshmen. Besides, in the short length of time that we've had to work with them, the T was easier to learn." He went on to add, however, that his charges still had not quite mastered any formation.

Nevertheless, the Volusia county team just could not find a combination which could stop the local outfit. Behind Jim Hawkins the Sprouts marched for scores in every quarter.
